A NOTE ON THIS EDITION

This book is an abridgement of the 1961 edition of Eric Partridge's *A Dictionary of Slang and Unconventional English*, containing only those words and expressions which were already in use before the First World War, and which may therefore be considered as historical, rather than modern, slang. The process of abridgement has also entailed omitting solecisms, malapropisms and grammatical points recorded in the 1961 edition.

A date, unpreceded by 'ca', signifies that this is the earliest discovered record; it is well to bear in mind, however, that in slang, cant, colloquialism, catch-phrase, and solecism, the first *use* goes back generally a few, occasionally many, years earlier.

The boundary between historical and modern slang, for the purposes of the present work, has been set at 1914.

A NOTE ON ARRANGEMENT

There are two main systems of arranging words in a dictionary. The strictly alphabetical; the ‘something before nothing’. No system is wholly satisfactory; the arrangements in the O.E.D., in Webster and, to compare small things with great, the present dictionary are open to severe criticism—severe but unreasonable. No arrangement is, for no arrangement can be, perfect.

Here, the ‘something before nothing’ system has been adopted—for the simple reason that it is the most suitable to a dictionary of this kind. Thus *A.B.* precedes *abaddon*, but it also precedes *Aaron*. Perhaps an example is more illuminating: *a*; *A.B.*; *A.B.C.*; *ABC*, *as easy as*; *a-cockbill*; *A.D.*; *a.f.*; *A from a windmill*; *A1*; *Aaron*; *abaa*; *abaddon*. Further, all *come* (or *come-*) terms, beginning with *come*, including *come it*, *come out*, *come the...*, and ending with *come Yorkshire*, precede *comedy-merchant*. Phrases in which the headword comes last precede those in which it comes first; thus *bell*, *sound as a* precedes *bell*, *book and candle*. Phrases in which the headword is in the plural or in the genitive do not immediately follow those where the headword is in the nominative singular, but take their own alphabetical place; thus *bells down* follows *bellowser* (not *bell-rope*), and *bull’s eye* follows *bullocky* (not *bull-puncher*). Terms that are spelt both as two words (e.g. *cock-tail*) and as one (*cocktail*) present a difficulty; I give them as, e.g., *cock-tail* and at, e.g., *cocktail* insert a cross-reference: to scholars, some of these precautions may seem mere foolishness, but there are others to be considered. Cross-references to words included elsewhere in this dictionary are set in small capitals; references in italics are to S.E., dialect, or foreign words, or to modern colloquialisms, etc.

TECHNICAL TERMS

Back-slang

. See *Slang*, pp. 276–7. The earliest reference to it which I have seen occurs in G.W.M.Reynolds's *Pickwick Abroad*, 1839, p. 587 (footnote).

Cant

is the 'secret' speech of the underworld. This word *cant* dates from ca 1700—*canting* is much earlier—and was long contemptuous and almost coll, as is the v., which dates from ca 1600; likewise *canter*, *canting*. See my *Slang*; Grose, P.; O.E.D.; F. & H.; and Weekley.

Centre slang

, see *Slang*, pp. 277–8.

Grafters' slang

is the s. used by those who work a line at fair or market, e.g. as fortune-teller or quack doctor. Some of it is Parlary, some Romany, some Yiddish, some rhyming s.; some of it, too, verges on c. The authority on the subject is Mr Philip Allingham: see his fascinating *Cheapjack*, 1934.

Hobson-Jobson

. The deliberate perversion of foreign words into approximately similar-sounding English ones.

'Inevitable' nicknames

are of two classes: general; particular. The general denote nationality (FROG (2); IKEY; JOCK; MICK; TAFFY) or a physical trait (BLUEY (4); SNOWY (2); TINY).

The particular, which are the 'inevitable nicknames' *par excellence*, attach themselves to certain surnames; like the general, they are rarely bestowed on women.

They app. arose first in the Navy (see esp. PINCHER (3); cf. NOBBY (2) and TUG (3)) and soon—by 1890 or so—reached the Army. They derive from the commonness of some phrase, as in 'Happy Day' and 'Hooky Walker'; from an historical or a vocational association, as in 'Pedlar Palmer', 'Dusty Miller', and 'Shoey Smith'; from a merely semantic suggestion, as in 'Lackery (or Timber) Wood' and 'Shiner White'; rarely from a neat phrasal connection as in 'Jumper Cross' (*jump across*); occ. from a well-known trade article or advertisement, as in 'Blanco White' and 'Johnny Walker'; from a famous personage, as in 'Pincher Martin', 'Nobby Ewart', 'Spiky Sullivan'—the largest of the ascertained-origin groups; and from some anecdotal cause or incidental (or local) notoriety, as in 'Pills Holloway', 'Rattler Morgan'.

F. & H.; Bowen; and personal research. For an article on the subject, see *A Covey of Partridge*, 1937.

Lingua Franca

is a mixture of Italian, French, Greek, and Spanish used for inter-communication between traders in the Eastern Mediterranean and Near East.

marrowskying

. The transposition of the initials of words (as in *poke a smipe*, smoke a pipe), with variant adj. and n. *marrowsky* or *mowrowsky*: ca 1860–1900. In 1848 described by Albert Smith as *Gower Street dialect* (cf. MEDICAL GREEK), it was affected by students of London University and constitutes *spoonerism* before the letter. Perhaps ex the name of a Polish count, as the O.E.D. suggests. See esp. *Slang* at ‘Oddities’.

Mumpers’ talk

is tramps’ c. Thus ‘No. 747’, *The Autobiography of a Gipsy*, speaks of ‘that strange mixture of thieves’ Latin and mumpers’ talk which has so often done duty for genuine Romnimus’ (Romany).

Oxford ‘-er’

. At Oxford, it began late in 1875 and came from Rugby School. By this process, the original word is changed and gen. abridged; then *-er* is added. Thus, *memorial* > *memugger*, the *Radcliffe Camera* > *the Radder* (for *the* is prefixed where the original has *the*). Occ. the word is pluralized, where the original ends in *s*: as in *Adders*, Addison’s Walk, *Jaggers*, Jesus College. This *-er* has got itself into gen. upper-middle class *s*. See esp. *Slang*, revised ed. (1935), pp. 208–9.

Parlary

. The ‘Lingua Franca’—but actually as to 90% of its words, Italianate—vocabulary of C.18–mid-19 actors and mid-C.19–20 costermongers and showmen: (orig. low) coll. (How long the word itself has existed, I do not know: prob. not before ca 1850, when the vocabulary was much enlarged and the principal users changed so radically, though itinerant and inferior actors supply the link.) Ex It. *parlare*, to speak. cf. PALARIE and see *Slang*, *passim*, and at ‘Circus Slang,’ and P.Allingham’s *Cheapjack*, 1934. e.g. DONAH; LETTY; MADZA; MUNGAREE; NANTEE; OMEE; SALTEE; SAY; TRAY (3).

A full account of this Cinderella among languages appears in my book of essays and studies upon language, *Here, There and Everywhere*, 1949.

Parlary is more general than the less serviceable *Parlyaree*. In late C.19–early 20, *palarey* or *palary* was very common, esp. among music-hall artists. Sydney Lester’s title for his glossary, *Vardi the Palary*, means ‘Know Parlary’.

pidgin, rarely pidjun, often pigeon; occ. pidjin

. Pidgin- or pigeon-English, ‘the jargon, consisting chiefly of English words, often corrupted in pronunciation, and arranged according to Chinese idiom, used for intercommunication between Chinese and Europeans at seaports, etc.’, S.O.D.: coll abbr. >: from ca 1855. (By itself, *pidgin*, etc., occurs in 1850.) A Chinese corruption of *business*, perhaps via *bidginess*, *bidgin*; *pigeon* is an English ‘improvement’ on *pidgin*.

Rhyming slang

dates from ca 1840; originated among Cockneys, where now still commonest; eschewed by the middle and upper classes, it had its apotheosis in the First World War. e.g. ABRAHAM’S WILLING, a shilling; the second word is often (but by no means always) suppressed, as in ELEPHANT’S (TRUNK), drunk. See my *Slang*, revised ed.

The entire question of rhyming s. has, for the first time, been adequately treated by Julian Franklyn in *Rhyming Slang*, 1960: a history and a study, a glossary and even a 'reverse' glossary. This book covers Great Britain and Ireland, Australia and the U.S.

Romany

. The language of the English Gypsies. It contributes many words to c. and to low s., esp. grafters'.

Shelta

is 'a kind of cryptic Irish spoken by tinkers and confirmed tramps; a secret jargon composed chiefly of Gaelic words disguised by changes of initial, transposition of letters, back-slanging and similar devices', F. & H. Discovered in 1876 by Leland, who published his account of it in his *Gypsies*, 1882: considerable attention has been paid to it since the Gypsy Lore Society started in 1889, its Journal in 1890. (See, e.g., TOBY.)

'Travelling language'

is a C.18 term—it occurs, e.g., in Bampfylde-Moore Carew—for the s. of vagabonds and, to a less degree, of criminals.

Ziph

. That ancient linguistic aberration which consists in saying, e.g., *shagall wege gogo* for *shall we go*. See *Slang*, p. 278.

The *Betty Martin* part, despite ingenious, too ingenious, hypotheses (esp. that sponsored by ‘Jon Bee’ and silently borrowed by H.: ‘a corruption...of...*Oh, mihi, beate Martine*’), remains a mystery. It is, however, interesting to note that Moore the poet has, in 1819, *all my eye, Betty*, and Poole, in *Hamlet Travestied*, 1811, has *that’s all my eye and Tommy*; this problematic *tommy* recurs in HELL AND TOMMY. In *The Phoenician Origin of Britons, Scots, and Anglo-Saxons*, 1914, Dr L.A.Waddell derives the phrase from *o mihi, Brito Martis*, ‘Oh (bring help) to me, Brito Martis’. cunt

. (In back s., *tenuc*, the *e* being intruded for euphony.) The female pudend. In one form or another, it dates from O.E.; it is unlikely to be related to L. *cunnus*, but is certainly cognate with O.E. *cwithe*, ‘the womb’ (with a Gothic parallel); cf. mod. English *come*, ex O.E. *cweman*. The *-nt*, which is difficult to explain, was already present in O.E. *kunte*. The radical would seem to be *cu* (in O.E. *cwe*), which app.= quintessential physical femineity (cf. sense 2) and partly explains why, in India, the cow is a sacred animal. Owing to its powerful sexuality, the term has, since C.15, been avoided in written and in polite spoken English: though a language word, neither coll, dial., c., nor s., its associations make it perhaps the most notable of all vulgarisms (technical sense, *bien entendu*), and since ca 1700 it has, except in the reprinting of old classics, been held to be

obscene, i.e. a legal offence, to print it in full; Rochester spelt it *en toutes lettres*, but Cotgrave, defining Fr. *con*, went no further than ‘A woman’s, &c.’, and the dramatist Fletcher, who was no prude, went no further than ‘They write *sunt* with a C, which is abominable’, in *The Spanish Curate*. Had the late Sir James Murray courageously included the word, and spelt it in full, in the great O.E.D., the situation would be different; as it is, no dictionary before the Penguin English Dict. (1965) had the courage to include it. (Yet the O.E.D. gave PRICK: why this further injustice to women ?) 2. (cf. Romany *mindj* or *minsh*, the pudend; a woman.)
