[Harrow slang.—J. Fischer Williams, *Harrow*, 1901, writes thus pertinently:—'As to language, the inhabitants of Harrow speak, generally, the English tongue. But . . . they cut short certain words of their last syllable or syllables and substitute the letters "er". [See 'the Oxford -er'.] Thus Duck Puddle becomes "Ducker", football "footer", and Speech-Room "speaker", blue coat "bluer" . . . Some years ago the number of these changes was strictly limited, but latterly the custom has been spreading. Harrow has often been made responsible for a variation of this final "er" into either "agger" [q.v.] or "ugger" . . . but these seem to have arisen at a famous Oxford college . . . and Harrow is guiltless of this invention. Perhaps the only other word of the Harrow language worth noticing is "Bill" for "names-

calling" or "call-over" [roll-call is the usual S.E. term]. Some have suggested that this is a corruption of "Bell", the School bell being rung to call the boys together, but probably "Bill" is the truer word, and is used in the older English sense of list.' Moving-Picture Slang. Most of the terms in the following short article, 'It is Said in Filmland':

"Slanguage" the "Movics" Have Made', reprinted—with many thanks to the proprietors and the editor—from *Tit-Bits*, March 31, 1934, date, in England, from ca. 1930:—

The visitor to a foreign country expects to hear the natives speaking a tongue which is unlike his own, but it comes as a surprise to a visitor to a modern studio to find the technicians and artists speaking one of the strangest languages ever evolved.

2.¹ Every trade and profession has its own jargon, but the film world has a colourful compilation of expressions unlike those in other walks of life.

3. "Niggers" are not men of colour, but blackboards used to "kill" unwanted reflections from the powerful lights. The latter, however, are not called lights but "inkies" (short for incandescent), or "sun arcs" (searchlights), or "baby spots" (powerful lamps giving a very narrow beam), or "broads" (lights which give flat, over-all lighting). "Spiders" are the switches into which connections are plugged. When it is bristling with cables on all sides it is not unlike a giant spider. The "organ" is not a musical instrument but a control panel which enables the technicians to start up the cameras and sound-recording apparatus, switch on red warning lamps outside the doors, and cut out all telephones.

4. "Gertrude" is not a young lady, but a giant steel crane, with a camera at its head, which enables shots to be taken of players going up staircases or along balconies. "Dollies", too, have nothing to do with femininity; they are the low trucks, with pneumatic-tyred wheels, on which cameras follow stars as they hurry through hotel foyers or along the decks of liners.

5. Here are some more studio terms. "Juicers" are electricians; "lens hogs" are stars who are over-anxious to hold the dead centre of the picture. A "wild" scene has nothing to do with Hollywood parties, it is the terse description for scenes, usually of cars, aeroplanes or trains, which have appropriate fake sounds added in the laboratory after they have been photographically recorded.

6. When a film is completed it is "in the can". Every time a scene is successfully "shot"² it is called "a take"; the whole of the day's "takes" are then assembled and shown to the producer in a private projection room, but are then known as "the rushes" or "the dailies". Exposed film is "stuff"; unexposed film is "raw stock". If too much film has been shot on a scene, the surplus is known as "grief". The chemicals in which film is developed are known as "soup".

7. But not all studio terms are coined; as in other walks of life, many of the expressions used owe nothing to slang and everything to tradition.

8. For instance, a broadly funny situation is known as "a Mack Sennett"; a film cheaply and hurriedly made is known as "A Poverty Row Picture", in commemoration of the days when Gowar Street, Hollywood (nicknamed Poverty Row), was the home of small independent companies turning out pictures quickly and cheaply.

9. "To do a Gaynor" means to smile upwards through eyes swimming with tears, a tribute to Janet Gaynor's ability to switch on the "sunshine through the tears".

¹ The paragraph-numbers are not in the original. (Editor.)

² This is S.E. (Editor.)

10. "To do a Garbo", on the other hand, means to be proud, aloof, and unbending.

11. But perhaps the most picturesque phrase of all is "the lot", which is always used to describe the company's land surrounding the studio. It has been in use since the days when, before studios were thought of, all "interior" scenes were made in the open air (sunlight being the only satisfactory illuminant thirty years ago), and for which purpose hard-pressed pioneers rented vacant building lots.

[Nicknames. Those of persons (e.g. *Dizzy*) and of regiments (e.g. *the Docs*) will be found *passim* in the course of these pages.

'Inevitable' nicknames are of two classes: general; particular. The general denote nationality (*Fritz, Frog, Ikey, Jock, Mick, Taffy*) or a physical trait (*Bluey, Bunty, Snowy, Tich, Tiny*).

The particular, which are the 'inevitable nick-names' *par excellence*, attach themselves to certain surnames; like the general, they are rarely bestowed on women. The following¹ are the most frequently heard:—*Betsy Gay*; *Blanco White* (cf. *Chalky*);

¹For details, see each nickname at its alphabetical place.

Bodger Lees (cf. *Jigger*); *Bogey Harris*; *Brigham Young*; *Buck Taylor*; *Busky Smith* (cf. *Dusty and Shoeey*); *Chalky White*; *Charley Peace*; *Chats Harris*; *Chatty Mather*; *Chippy Carpenter*; *Dan Coles*; *Darky Smith*; *Dinghy Read*; *Dodger Green* (cf. *Shiner*); *Dolly Gray*; *Doughy Baker* (cf. *Snowy*); *Dusty Miller* and, occ., Jordan, Rhodes, Smith; *Edna May*; *Fanny Fields*; *Flapper Hughes*; *Ginger Jones*; *Granny Henderson*; *Gunboat Smith*; *Happy Day*; *Hooky Walker*; *Jack Sheppard* (-erd, -herd); *Jesso Read*; *Jigger Lees*; *Jimmy Green* (cf. *Dodger*); *Johnny Walker* (cf. *Hooky*); *Jumper Collins* or *Cross*; *Kitty Wells*; *Knocker Walker* or *White*; *Lackery Wood*; *Lottie Collins*; *Mouchy Reeves*; *Nobby Clark*(e) and, occ. Ewart, Hewart, Hewett, Hewitt; *Nocky Knight*; *Nutty Cox*; *Pedlar Palmer*; *Piggy May*; *Pills Holloway*; *Pincher Martin*; *Pony Moore*; *Rattler Morgan*; *Shiner Black*, *Bright*, *Bryant*, *Green*, *White*, *Wright*; *Shoey Smith*; *Shorty Wright*; *Slinger Woods*; *Smoky Holmes*; *Smudger Smith*; *Snip Parsons*, *Taylor*; *Snowy Baker*; *Spiky Sullivan*; *Spokey Wheeler*, *Wheelwright*; *Spud Murphy*; *Taffy Jones*, *Owen* and, as above, any Welshman; *Timber Wood* (cf. *Lackery*); *Tod Hunter*, *Sloan*; *Tom King*; *Topper* (occ. corrupted to *Tupper*) *Brown*; *Tottie Bell*; *Tug Wilson*; *Wheeler Johnson*; *Wiggy Bennett*. (A small Army group consists of Arabic words: see *Eska*, *Jebbel*, *Ketir Mug*, and *Mush*.)

These 'inevitable' names app. arose first in the Navy (see esp. *Pincher*; cf. *Nobby* and *Tug*) and soon—by 1890 or so—reached the Army; the G.W. effectually distributed them among the lower classes, a few (e.g. *Dolly* and *Tug*) among the upper classes. They derive from the commonness of some phrase, as in '*Happy Day*' and '*Hooky Walker*'; from an historical or a vocational association, as in '*Pedlar Palmer*', '*Dusty Miller*', and '*Shoey Smith*'; from a merely semantic suggestion, as in '*Lackery* (or *Timber*) *Wood*' and '*Shiner White*'; rarely from a neat phrasal connexion as in '*Jumper Cross*' (*jump across*); occ. from a well-known trade article or advertisement, as in '*Blanco White*' and '*Johnny Walker*'; from a famous personage, as in '*Pincher Martin*', '*Nobby Ewart*', '*Spiky Sullivan*'—the largest of the ascertained-origin groups; and from some anecdotal cause or incidental (or local) notoriety, as in '*Pills Holloway*', '*Rattler Morgan*', '*Wiggy Bennett*', whose origins are, at this date, either unascertainable or ascertainable only with great difficulty.

(For its use by 'the great Vance', see Addenda.) Thornton records it at 1828 and gives an anticipation (likewise by Andrew Jackson) at 1790: but on these two instances the O.E.D. throws icy water and gives 1840 as the date. It either = *oll* (or *orl*) *korrekt* (or *k'rect*) or is a Western U.S. error for *order recorded* (Thornton inclines to the latter origin); or again—the fashionable (but not the O.E.D. Sup.'s) view of the 1930's—it may represent the Choctaw (*h*)*oke*, it is so, for Jackson presumably knew the Choctaw word and it was his opponents who, wishing to capitalise his well-known illiteracy, imputed (so it is held) the *orl k'rect* origin to the phrase's first user. *The Graphic*, March 17, 1883, 'It was voted O.K., or all correct'; 1889, *Answers* (No. 56), 'John Jenkins . . . was O.K. with Matilda Ann at Williams Street'; the label on bottles of Mason's 'O.K.'
