1. SUGGESTIONS TO AUTHORS AND EDITORS

1.1. This STYLE MANUAL is intended to facilitate Government printing. Careful observance of the following suggestions will aid in expediting publication and in reducing printing expenditures.

1.2. Copy must be carefully edited in accordance with the style laid down herein before being sent to the Government Printing Office. Changes on proofs add greatly to the expense and delay the work.

1.3. Legible copy, not faint carbon copies, must be furnished.

is essential in foreign-language copy and in copy containing figures.

1.4. Copy should be sent flat, with the sheets numbered consecutively, and typewritten on one side of the paper only. If both sides of reprint copy are to be used, a duplicate must be furnished.

1.5. To avoid mutilation of copy, each page should begin with a

paragraph.

1.6. Tabular matter should be on sheets separate from the text, as it is handled separately during typesetting.

1.7. Proper names, signatures, figures, foreign words, and technical

terms should be written plainly.

1.8. Manuscript and typewritten copy in a foreign language should be marked accurately as to capitalization, punctuation, accents, etc.

1.9. Footnote reference marks in text and tables should be arranged

consecutively from left to right across each page.

1.10. Photographs, drawings, etc., for illustrations should accompany the manuscript, each bearing the name of the publication in which it is to be inserted and the figure or plate number. The proper place for each text figure should be indicated on the copy by inserting

its number and title.

1.11. A requisition for work containing illustrations must be accompanied by a letter certifying that the illustrations are necessary and relate entirely to the transaction of public business (U. S. C., title 44, sec. 118). The total number of illustrations and the processes of reproduction desired should also be indicated. Instructions should be given on the margin of each illustration if enlargement or reduction is necessary.

1.12. If a publication is composed of several parts, a scheme of the desired arrangement must accompany the first installment of copy.

1.13. Samples should be furnished if possible. They should be plainly marked, showing whether they illustrate the desired type, size of type page, paper, trim, lettering, or binding; but they will not be considered as style for typesetting if they conflict with the rules in this STYLE MANUAL.

1.14. All corrections should be made on first proofs submitted, as later proofs are intended for verification only. All corrections must be indicated on the "R" set of proofs, and only that set should

be returned to the Government Printing Office.

1.15. Corrections should be marked on the margins of a proof opposite the indicated errors, not by writing over the print or between the lines. All queries on proofs must be answered.

1.16. Corrections in proofs read by authors or department readers

must be indicated as follows:

O Period. Comma. = Hyphen. Colon. Semicolon. Apostrophe. Em quadrat. m One-em dash. Two-em parallel dash. Push down space. Close up. Less space. Caret—left out, insert. Turn to proper position. or 7 Move to left or to right. 7 or 🗸 Move up or move down. tr. Transpose. or stet. Let it stand. Dele-take out. Broken letter. Paragraph. no To No paragraph. wel Wrong font. Equalize spacing. = or Caps. Capitals. Small capitals. C. Lowercase. Superior or inferior. or ital. Italic. rom. Roman. Brackets. Parentheses.

6: St. ital. caps TYPOGRAPHICAL ERRORS It does not appear that the earliest printers had any method of correcting errors before the form was on the press./ The learned The learned correctors of the first two centuries of printing were notproofreaders in our sense/they where rather what we should jerm office editors. Their labors were chiefly to see that the proof corresponded to the copy, but that the printed page was correct in its latinity that the words were there, and that the sense was right. They cared but little about orthography, bad letters or purely printersu errors, and when the text seemed to them wrong they consulted fresh authorities or altered it on their own responsibility. Good proofs, in the modern sense, were possible until professional readers were employed/men who had first a printer's education, and then spent many years in the correct on of proof. The orthography of English, which for the past century has under gone little change, was very fluctuating until after the publication of Johnson's Dictionary, and capitals, which have been used with considerable regularity for the past 80 years, were previously used on the miss or hit plan. The approach to regularity, so far as we have, may be attributed to the growth of a class of professional proofreaders, and it is to them that we owe the correctness of modern printing. A More er/ors have been found in the Bible than in any other one work. For many gen __lead, erations it was frequently the case that Bibles were brought out stealthily, from fear of governmental interference. A They were frequently Out; see copy. printed from imperfect texts, and were often modified to meet the views of those who publised them. The story is related that a certain woman in Germany, who was the wife of a Printer, and Lc., had become disgusted with the continual assercom. tions of the superiority of man over woman which she had heard, hurried into the composing room while her husband was at supper and altered a sentence in the Bible, which he was printing, so that it read Narrainstead of Herr, thus making the verse read "And he shall be thy fool" instead of "and he shall be thy lord." The word not was omitted by Barker, the King's printer in En-

gland in 1632, in printing the seventh commandment,

He was fined £3,000 on this account.

1.17. The following related Government Printing Office publications are available from the Superintendent of Documents, Washington 25, D. C.:

1. Word Division, a supplement to Government Printing Office Style Manual, fifth edition, 128 pages.

Basic rules for division of words; division into syllables of more than 12.500 words.

2. Specimens of Type Faces in the United States Government Printing Office, 262 pages.

Specimens of typefaces for Government editors, printers, and authors; varieties and sizes available; special signs, ornaments, and characters; and rules and borders.

 Typography and Design, apprentice training series (intermediate period), 187 pages.

Twenty-four lectures, with questions for study and discussion, books for reading, and suggested projects.

4. Theory and Practice of Composition, apprentice training series (orientation period), 254 pages.

Forty lectures on type composition, with questions for study and discussion, books for supplementary reading, suggested projects, and a glossary.

 Theory and Practice of Presswork, apprentice training series (orientation period), 248 pages.

Forty lectures, with questions for study and discussion, books for supplementary reading, and suggested projects.

6. Theory and Practice of Bookbinding, apprentice training series (orientation period), 246 pages.

Forty lectures, with questions for study and discussion, books for supplementary reading, and suggested projects.

7. Layouts for Flat-Bed, Rotary, and Web Press Imposition, 128 pages.

Most frequently used layouts of face-up impositions; types of folds; and a signature-size chart, with index.

8. Standard Ink Sample Book, 98 sheets.

Sample sheets of letterpress and offset basic ink colors stocked by the Government Printing Office.

2. GENERAL INSTRUCTIONS

PREPARING COPY

2.1. The first duty of copy preparers is to mark those things which are not readily understood and to indicate headings, indentions, dashes, new pages, new odd pages, and other matters of style necessary to give the completed book a good typographic appearance. They must indicate point size and type series on copy, and whether matter is to be leaded or double leaded, etc.; verify folio numbers; and plainly indicate references, footnotes, cut-ins, etc. Unless otherwise marked: (1) Text matter will be set in 10-point solid and tables in 6-point solid; (2) 9-unit figures will be used in tables when boldface is requested; (3) 2-point (hairline) rules will be used in tables.

2.2. Quoted or extract matter should be set 2 points smaller than text, and quotation marks at beginning and end of paragraphs should be omitted. If the same type size is used, quoted matter should be cut in 1 to 3 ems, depending on measure, and initial and closing quotes

should be omitted.

"Follow," "follow literally," etc.

2.3. To prevent confusion and delay and to insure economy in printing, all copy that bears no preparation by the requisitioning agency will be set in accordance with the rules laid down in this Style Manual, with which editors and compilers are expected to become familiar, except that in some classes of printing of a legal, technical, or historical nature it may be necessary to adhere strictly to the original text, and the requisitioning office may then properly mark such copy "Fol." or "Fol. lit."

2.4. Copy marked "Fol." will be followed with respect to verbal expression, abbreviations, signs, symbols, figures, and italic, but not with respect to punctuation (including compounding) or capitalization. In "Fol." matter any spelling (not including compounding) is

permissible that has the sanction of any dictionary.

2.5. Copy authorized to be marked "Fol. lit." must be thoroughly prepared by the requisitioning agency as to capitalization, punctuation (including compounding), abbreviations, signs, symbols, figures, and italic, and such copy, including even manifest errors, will be followed. "Fol. lit." does not include size and style of type.

2.6. Follow the position of quotation marks in relation to other punctuation marks in matter marked "Fol. lit." and "Fol., incl. caps and punc." Abbreviations do not close up, even in "Fol. lit." matter,

unless so prepared.

2.7. To insure uniform practice, a space will be used between a paragraph or section number and a following letter or figure in parentheses, as "paragraph 302 (a), section 23 (7)," even in "Fol. lit." matter, unless prepared to be closed up.

2.8. "Bill style" copy will follow the style of the Government Printing Office Bill Style Manual, which conforms to this STYLE

Manual in many particulars, such as the use of figures in dates; sums of money; percentages; the numbers of articles, chapters, lines, pages, paragraphs, parts, sections, and volumes; the classification of vessels (A 1); and all other instances where numbered is used or implied. Punctuation as prepared must be followed.

2.9. It is not necessary to mark again anything that has been plainly indicated at the beginning of a sheet, as such preparation is to apply to the entire sheet; but on copy marked "Fol.," "Fol., incl. caps," or "Fol. lit.," the preparation must be carried throughout.

2.10. Copy ordered to be kept clean and returned intact must be marked as lightly as possible, so that erasures may be easily made.

2.11. Copy preparer's instructions, which accompany each job, are written to cover the general style and certain peculiarities or deviations from style. These instructions must be followed. The copy preparer must not deviate from the style laid down in this STYLE Manual unless authorized to do so by the Chief Copy Preparer.

Abbreviations

2.12. In marking abbreviations to be spelled, copy preparers must show what the spelled form should be, unless the abbreviations are common and not susceptible of more than one construction.

Capitalization

2.13. Unusual capital and lowercase letters must be indicated.

Datelines, addresses, and signatures

2.14. Copy preparers must mark caps, small caps, italic, abbreviations, and indentions; also indicate line breaks where necessary.

Decimals and common fractions

2.15. In figure columns containing decimals or common fractions, preparers must indicate at the top of each folio of a continued table the "clear" or space necessary to preserve proper alinement. "clear" indicated for decimals does not include the bearoff.

"Et cetera," "etc.," "and so forth"

2.16. In printing a speaker's language, the words and so forth or et cetera are used—not the abbreviation etc. If a quoted extract is set in type smaller than that of the preceding text and the speaker has summed up the remainder of the quotation with the words and so forth or et cetera, these words should be placed at the beginning of the next line, flush and lowercase, and an em dash should be used at the end of the extract.

Folioing and stamping copy

2.17. Folio numbers should be placed in the upper right-hand

corner, preferably half an inch from the top.

2.18. All other stamping—type size, measure, etc.—should be placed in the upper left-hand corner. On cards, any available space

may be used.

2.19. Divided tables that have to be cut or that continue on more than one sheet of copy must be folioed down the first divide to the end of the table and continue on the next and following divides to the end. Parallel tables and pasters require only one folio number on each page of copy.

Footnotes and reference marks

(For text, see rules 16.1–16.20, pp. 185–186; for tables, see rules 14.94–14.118, pp. 174–176.)

Headings

2.20. The type to be used for all headings must be marked—case number or size of type, caps, caps and small caps, small caps, caps and lowercase, lowercase (first word and proper nouns capitalized), or (See also rule 3.51, p. 25.) italic.

Pickup

2.21. The jacket number of a job from which matter is to be picked up must be indicated. New matter should conform in style to that of the pickup.

Sidenotes and cut-in notes

2.22. Sidenotes and cut-in notes are set each line flush on left and ragged on right, unless otherwise prepared, and are always set solid.

2.23. The measure allowed for a cut-in note is 6 picas, unless otherwise marked, and the note bears off from the text—above, below, and at the side—not less than an em of the text type. A cut-in note begins on the third line of the paragraph if the length of the paragraph permits.

Signs, symbols, etc.

2.24. All signs, symbols, dashes, superiors, etc., must be plainly Names of Greek letters must be indicated, as they are frequently mistaken for italic or symbols.

2.25. The chemical symbols Al, Cl, Tl are sometimes mistaken for A1, Cl, Tl in typewritten matter. Copy preparers must indicate

whether the second character is a letter or a figure.

2.26. Since typewriters use the same characters for figure 1 and lowercase l, cipher and cap O, all such characters will be printed as figures unless otherwise marked.

Letters illustrating shape and form

2.27. Letters used to illustrate shape and form, as U-shape(d), A-frame, T-bone, T-rail, are set in gothic—case 392 for 10-point, case 391 for 8-point, and case 390 for 6-point—except that for I-beam, cases 14, 13, and 12, respectively, are used.

2.28. Plurals are formed by adding the apostrophe and s, as T's,

Y's, etc. Golf tee(s) should be spelled, as it does not indicate shape.

2.29. A gothic capital is not used in X-ray, U-boat, and other expressions which have no reference to shape or form.

TYPE COMPOSITION

2.30. Compositors and operators must study carefully the rules governing composition. Failure to do this will show plainly on proofs.

2.31. In correcting pickup matter, the compositor or operator must indicate what portion was actually reset.

2.32. Every precaution must be taken to prevent the soiling of proofs, as it is necessary for the reviser to see clearly every mark on the margin of a proof after it has been corrected.

2.33. Corrections queried in a ring must not be made, as such

queries are intended for the author.

2.34. If after a proof is read the first time, a word or line is pied or a dropout occurs, attention must be called to such mishap by marking that part of the proof "Pied" or "Dropout." If a proof is not available, the type involved must be placed feet uppermost when returned to position. This direction is intended for all who handle type.

2.35. In correcting matter set on the Linotype, care must be taken to insert corrected type slugs in their proper places and to remove only such type slugs as necessary. Matter must be run down to see that lines have not been duplicated, transposed, or eliminated. If the corrector is in doubt, he must read the slugs.

Leading and spacing

2.36. Spacing of text is governed by the leading, narrow spacing being more desirable in solid than in leaded matter. Very thin or very wide spacing in first line of a paragraph should be avoided. Words in a line requiring more than 1 em of space between them should be letterspaced, but the fewer letterspaced words the better. All of a short word is letterspaced rather than part of a long word. (See also rule 14.132, p. 177.)

2.37. If the last line of a paragraph follows a widely spaced line, it

is spaced with en quads instead of 3-em spaces.

2.38. Centerheads set in caps, caps and small caps, small caps, or boldface are spaced with en quads between words, and the space is widened proportionately for an extended face or for letterspaced

words.

2.39. Centerheads are separated from the text by slugs, the space below the head being at least 2 points less than the space above: 10-point slug above and 8-point slug below in 10-point text; 8-point slug above and 6-point slug below in 8- and 6-point text. However, a head which clears the line above or below by at least 1 em requires no additional space.

2.40. Heads set in caps are leaded, even in solid matter.

2.41. "Two leads," "three leads," and similar designations marked on copy mean 2 leads in all, 3 leads in all, etc., even in leaded matter.

2.42. Unless otherwise marked, flush heads are separated from text by 2 leads above and 1 lead below in solid matter, and by 3 leads above and 2 leads below in leaded matter.

2.43. Full-measure numbered or lettered paragraphs and quoted

extracts are not separated by leads from adjoining matter.

2.44. Unless otherwise marked, extracts and numbered or lettered paragraphs which are set off from the text by smaller type or indention are separated by 3 leads in leaded matter and by 2 leads in solid matter.

2.45. Extracts set solid in leaded matter are separated from the

text by 3 leads.

2.46. Flush lines following extracts are separated by 3 leads in leaded matter and by 2 leads in solid matter.

2.47. Footnotes are leaded if the text is leaded, and are set solid if

the text is solid.

2.48. Legends are leaded if text is leaded and solid if text is solid.

Indentions

2.49. In measures less than 30 picas, the paragraph indention is 1 em. Paragraph indentions in cut-in matter are 3 ems, overs 2 ems. Overruns, datelines, addresses, and signatures are indented in multiples of 1 em.

ples of 1 em.
2.50. In matter set 30 picas or wider, the paragraph indention is 2 ems. Paragraph indentions in cut-in matter are 6 ems, overs 4 ems. Overruns, datelines, addresses, and signatures are indented in multi-

ples of 2 ems.

2.51. In measures less than 30 picas, overruns in hanging indentions are 1 em more than the first line, except that to avoid conflict with a following indention (for example, of a subentry or paragraph), the overrun indention is made 1 em more than the following line.

2.52. In matter set 30 picas or wider, overruns in hanging indentions are 2 ems more than the first line, except that to avoid conflict with a following indention (for example, of a subentry or paragraph), the overrun indention is made 2 ems more than the following line.

2.53. Indention of matter set in smaller type should be the same,

in points, as that of adjoining main-text indented matter.

2.54. Two-line centerheads are centered, but heads of three or more

lines are set with hanging indention.

2.55. Overs in flush heads are indented 2 ems in measures less than 30 picas, and 4 ems in wider measures.

Legends for illustrations

2.56. Legends and explanatory matter of 1 or 2 lines are centered; if more than 2 lines, they are set with hanging indention. If an illustration is narrower than full measure and text is run at the side of it, the legend is set the width of the illustration; if text is not to be run at the side of the illustration, the legend is set full measure regardless of the width of the illustration, unless copy is otherwise marked.

2.57. Legend lines of illustrations which run the broad way should be printed to read up; that is, an even-page legend should be on the inside margin and an odd-page legend on the outside margin.

2.58. Unless other type is indicated, legends for illustrations are

set in 8-point roman, lowercase.

2.59. Periods are used at the ends of legends and explanatory

matter beneath illustrations.

2.60. At beginning of legend, Figure preceding the identifying number or letter is set in caps and small caps and is not abbreviated.

> FIGURE 5, not Fig. 5 FIGURE A, not Fig. A

2.61. If a chart carries both a legend and footnotes, the legend is placed above the chart.

2.62. Letter symbols used in legends for illustrations are set in italic without periods and are capitalized only if so shown in copy.

PROOFREADING AND COPYHOLDING

2.63. Foremen of composing sections must see that special instructions and layout and style sheets are sent to the Proof Section with the first installment of each job.

2.64. Readers must consult the copy preparer's instruction sheet.

2.65. Speed is desirable, but accuracy is of first importance.

2.66. The reader should see that the rules governing spacing, division of words, and good printing generally have been observed. The

reader who passes bad spacing will be held at fault.

2.67. If the reader detects inconsistent and erroneous statements, it is his duty to correct them. He must know, not guess, that they are errors, and he must be prepared, if called upon, to vindicate by recognized authority the soundness of his corrections. If he does not know, he must query.

2.68. If the grammatical construction of a sentence or clause is questioned by a reader and it seems desirable to change the form,

he must indicate the proposed correction, add a query mark, and enclose all in a ring. If a statement of fact is thought erroneous or doubtful, he must underscore the matter in question, write in the margin "Author verify," and enclose it in a ring. It is not enough to write only a query in the margin: the reason for the query must be clearly shown. If there is little doubt, the correction should be made, but a query enclosed in a ring must be written beside the correction to call the author's attention to it.

2.69. A query appearing on copy must be carried to the author. 2.70. Proofs that are not clearly printed or are in any manner defective must be called to the attention of the deskman.

2.71. The manner in which correction marks are made on a proof is of considerable importance. Straggling, unsymmetrical characters, disconnected marks placed in the margin above or below the lines to which they relate, irregular lines leading from an incorrect letter or word to a correction, large marks, marks made with a blunt pencil, indistinct marks, and frequent use of the eraser to obliterate marks

hastily or incorrectly made are all faults to be avoided.

2.72. In reading proof of wide tables, the reader should place the correction in white space as near as possible to the error, thus aiding all who handle the proof afterward. He should obliterate entirely a broken or defective figure and rewrite it in a ring. He should not use the transposition mark in little-known words or in figures. He should instead cancel the letters or figures and write them in the margin in the order in which they are to appear.

2.73. In marking errors in display or other unusual type, the case

number must be indicated.

2.74. Readers must draw a ring around footnote references in proof.

as an aid to the maker-up.

2.75. On discovering evidence of wrong-font matrices, the reader must immediately inform the referee, who will notify the section

2.76. Readers must not make important changes in indentions or

tables without consulting the referee.

2.77. The marks of the copy preparer must be given consideration by all, as he is in a position to know more about the peculiarities of a job than one who reads but a small portion of it.

2.78. Any mark which will change the proof from the copy as

prepared must be enclosed in a ring.

2.79. All instructions on copy must be carried on proof by readers.2.80. Folios of copy must be "run" by the copyholder and checked

against those marked on the proof.

2.81. In reading copy an unnecessarily loud tone of voice must be Short words are as important as long ones, and should be pronounced distinctly. Plurals should be sounded clearly, and names of persons or places pronounced distinctly or read by letters.

MAKEUP

2.82. Government publications will be made up in the following order unless otherwise indicated:

a. Frontispiece, faces title page.

b. False title (frontispiece, if any, on back).

c. Title page.

d. Back of title, blank, but frequently carries such useful bibliographic information as list of board members, congressional resolution authorizing publication, note of editions and printings, GPO imprint if departmental imprint appears on title page, price notice, etc.

e. Letter of transmittal (new odd page).

f. Foreword, differs from preface in that it is an introductory note written as an endorsement by a person other than the author (new odd page).

g. Preface, by author (new odd page).

h. Contents (new odd page), immediately followed by list of illustrations and list of tables, as parts of contents.

i. Text, begins with page 1 (if halftitle is used, begins with page 3).

j. Bibliography (new odd page). k. Appendix (new odd page). 1. Index (new odd page).

2.83. An introduction differs from a foreword or a preface in that it is the initial part of the text; if the book is divided into chapters, it should be the first chapter.

2.84. To number preliminary pages, use small-cap Roman numerals.

2.85. A separate cover should not be used on booklets of 32 or fewer pages (page 1 should be a self-cover or should carry a displayed title heading followed by table of contents, if any, and the text).

2.86. Before beginning his work the maker-up must ascertain the

length of type page and style of folios to be used.

2.87. If it is found necessary to make a short page, the facing page

should be of approximately equal length if the text permits.

2.88. A blank or sink of 6 picas should be placed at the head of each new odd or even page of 46-pica or greater depth; pages with a depth of from 36 to 45 picas, inclusive, will carry a 5-pica sink; pages less than 36 picas, 4 picas.

2.89. If top center folio is used, the folio on a new page must be

placed at the bottom, centered, and enclosed in parentheses.

2.90. Contents, list of illustrations, preface, or any other matter that makes a page in itself should be placed 12 points or more nearer top than bottom, the difference depending upon the length of page.

2.91. In "cleared" indexes the words being cleared must be repeated

on following page at the top of the column or page.

2.92. Continued heads over tables and leaderwork must be con-

densed into one line if possible.

2.93. Footnote references are repeated in boxheads or in continued

lines over tables, unless special orders are given not to do so.

2.94. Six-point notes above tables are enclosed in brackets and are not repeated with continued heads unless they are needed on each

page for the purpose of clarity.

2.95. Centerheads, whether in boldface, caps, caps and small caps, small caps, or italic, should have more space above than below. Uniform spacing should be maintained throughout the page; if this is not possible, the space above and below the centerlines should be reduced, commencing at the bottom of the page.

2.96. In making up a page of two or more columns with an illustration more than one column in width, the text should be broken so that it will read from above the illustration to the same column below. If a table, diagram, or layout occurs under the same condi-

tions, the text should double up above it.

2.97. In matter set two or more columns to the page, footnotes to full-measure headings should be set page width, while the text footnotes should be set column width and carried at the foot of the

column in which the references appear.

2.98. Two or more short footnotes coming together may be combined by the maker-up in one line, with the blank spaces between footnotes equalized, provided the spaces are not less than 2 ems.

IMPOSITION

2.99. A page is considered the unit of a signature; the two companion pages, the unit in imposition. Whether the imposition is from the outside or inside, a long or a broad form, work and turn or sheetwise, these companion pages are never separated; their position

is determined by the fold.

2.100. To illustrate further that these companion pages are the unit of imposition, it will be found when determining margins that these two pages are always printed in the center of the untrimmed sheet, as regards outer margins, when it is divided into halves, quarters, eighths, or sixteenths. For example, a sixteen is to be made up to 24- by 38-inch paper, side wire stitched; and half of it, the 24-inch way, is 12 inches. The width of the two type pages, say, is 48 picas, or 8 inches, and the back is 10 picas, or 1% inches, leaving 2% inches to be used as margin, one-half of which is to go on the outside of each printed page (1% inches, or 7 picas), making 12 inches in all.
2.101. The other two companion pages that make up the quarter

of the sixteen are likewise printed in the center of the quarter sheet, which is 19 inches, one-half of the 38-inch way. It will thus be observed that two pages were used to get the outside margins and another multiple of two (four) to get the bottom margins.

2.102. Margins should be governed by the trimmed book and not by the untrimmed sheet. The back margin or gutter should be such that it will bring the pages nearly in the center of the open printed book, putting any excess space in the outer margins, except in books that are to be side stitched, in which additional space must be allowed for the stitching. The margins should be so planned that when the book is delivered from the binder the back margin is less than the outside. The top margin of the trimmed book should be at least 3 picas and the bottom margin at least 4 picas. The outside margin should be at least 1 pica greater than the back but not as wide as the bottom margin.

2.103. If a running head is used, the head margin should be the same as the back margin; but if a bottom folio is used, that line and

the slug above it should be counted as part of the margin.

REVISING

Galley revising

2.104. The importance of revising proofs cannot be overempha-Although a reviser is not expected to read proof, it is not enough for him merely to follow the marks found on the proof. He should be alert to detect errors and inconsistencies and must see that all corrections have been properly made and that words or lines have not been transposed or eliminated by the compositor in making the corrections. (See rule 2.115, p. 13.)

2.105. A reviser must not remodel the punctuation of the readers or make any important changes. If he thinks that an important change should be made, he must submit the proposed change to the

Chief Reviser for decision.

2.106. In the body of the work, new pages must be properly indicated on the proof. Tables of contents, letters of transmittal, lists of illustrations, the text proper, all matter following halftitles (except parallel tables), and indexes must begin on new odd pages unless instructions to the contrary are given.

2.107. All instructions on proofs must be transferred to revises.
2.108. All queries must be carefully transferred to the revises.

2.109. Each paragraph containing an alteration causing an overrun should be reread.

2.110. Revising must be done with reasonable dispatch, but

accuracy must not be sacrificed to speed.

2.111. Corrector's slug number must be written on revise proof.

Page and stone revising

2.112. Page and stone revising require great diligence and care. Not only must the reviser see that the rules governing the work of those who precede him have been followed but he must be on the alert for a multiplicity of points not coming within their sphere.

2.113. The reviser is responsible for marking off all bleed and off-

center pages.

2.114. A blank page must be indicated at the bottom of the preced-

ing page.

2.115. Special care must be exercised in revising linotype matter. It is necessary to read the entire line in which a correction has been made, to see that the line has been inserted in the proper place, and to see that the lines above and below have not been disturbed. If it appears that a correction has not been made, the reviser should carefully examine each line on the page to see if the correction was inserted in the wrong place or if lines have been transposed.

2.116. The following rules must be carefully observed:

a. See that proof is clean and clear; send for another if necessary.
b. Before beginning page revising, see that galley proofs run consecutively and that in continuous makeup the matter on the galleys connects.

c. See that page folios are consecutive, that running heads are correct and uniform, and that the proper signature mark is correctly placed. If an error is found in running heads or in signature marks, notify the Chief Reviser immediately, so that the correction may be made in other forms or pages of the same job.

d. Revise carefully, observe connection between pages, take care that continued and repeated lines are free from errors, and carry all unanswered queries if the proof is to be sent to the author; if not,

see that all queries are answered.

e. If a revise is not properly corrected or is not reasonably free from errors, call for another corrected proof, stating number of copies wanted, and destroy all duplicates.

f. Watch for slips, dropouts, doublets, and transpositions.

g. Read all running heads and boxheads in continued tables; see that all leading lines are carried at the top where subordinate matter runs over, that dollar marks and italic captions of columns are uniform and properly placed, that bearoffs in figure columns are uniform. that the matter is as compact as circumstances will permit, and that footnotes fall on the page containing the corresponding references and are properly arranged.

h. Preserve complete files of all proofs returned to the desk.

i. On the first page of a signature of a stone revise carry any special directions that may be necessary, and on open or session jackets

carry the number of copies to be printed.

j. When page proofs are to be sent out on partly completed jobs, fill out reviser's memorandum, noting the last galley, the last page, the signature mark, the page on which the last signature mark occurred, and the folio lines. Attach the memorandum to the markoff gallev and return to the Chief Reviser.

k. Make sure that different sets of proofs of the same job are correctly marked in series ("R," "2R," "3R," etc.); where a sheet is stamped "Another proof," carry the same designating "R" on the corresponding clean proof, destroying the stamped proof when it has served its purpose. Advance the "R," "2R," "3R," etc., on each set of page proofs returned from the originating office; if a dummy folio has been used and later a true folio is finally given, revert to single "R." When the "R" is not to be advanced, use an "x," as "2R"."

l. If two or more jobs are imposed in one form, separate the parts to verify the imposition. Until familiar with the fold, exercise care

in cutting the sheet.

m. See that rules do not lap, that work is not jammed in the lockup, that damaged letters and slips are indicated, and that the

matter is ready in all respects to pass rigid inspection.

n. Legend lines of full-page cuts that run the broad way should be printed so as to read up—that is, the even-page legend should be on the binding or inside margin and the odd-page legend on the

o. If a footnote is eliminated, do not renumber the footnotes; just

omit that number.

2.117. If the footnotes in an entire job have been made uniform, even though not according to style, do not change them.

2.118. If a footnote is added in proof, use the preceding number

with a superior letter added, as 15a.

2.119. Where a table with footnotes falls at the bottom of a page containing footnotes to text, print the table footnotes above the text footnotes, separated by a rule 50 points long, flush at the left, with 2 leads on each side of the rule. (See also rule 14.108, p. 175.)
2.120. In revising galleys into pages, revisers must enter on the

markoff slip the number of the last footnote and see that instructions

to the maker-up are followed.

Press revising

2.121. Press revising calls for the exercise of utmost care. press reviser must be thoroughly familiar with the style and makeup of Government publications. He is required to O. K. all forms that go to press-bookwork, covers, jobwork, etc. He must see that all queries are answered. He must necessarily have a knowledge of the bindery operations required to complete a book or job and be familiar with all types of imposition, folds, etc. He must be capable of ascertaining the proper head, back, and side margins for all work, to insure proper trimming of the completed job to the required size.

2.122. Although speed is essential when forms reach the pressroom,

accuracy must not be sacrificed.

SIGNATURE MARKS, ETC.

2.123. Unless otherwise indicated, signature marks are set 6-point lowercase and indented 3 ems.

2.124. Figures indicating the year should follow the jacket number

in signature marks:

2.125. When allmark (O) and signature or imprint and signature appear on same page, the signature line is placed below the allmark but above the imprint.

2.126. The allmark is placed below the page, bulletin, or circular number but above the signature line, if both appear on the same page.

2.127. Imprints and signature lines appearing on short pages of text are placed at the bottom of the page.

2.128. All plated jobs take a degree mark (°) immediately after the

jacket number in the signature line.

2.129. All offset jobs take a capital O immediately after the jacket number in the signature line.

2.130. When matrix is to be made of job, a superior m ($^{\text{m}}$) is placed

immediately after jacket number in the signature line.

2.131. All jobs having vinylite molds before printing from type take a superior v (v) immediately after the jacket number.

2.132. On a job reprinted on account of change, a black star (*) precedes the jacket number in the signature line and precedes the date on the title page:

2.133. The following forms are used for signature marks in House and Senate documents and reports printed on session jackets:

2.134. In a document or report printed on other than a session jacket, use the jacket number, year, and signature number only, omitting the document or report number.

2.135. For pasters, the jacket number, the year, and the page to be

faced by the paster are used as follows (note punctuation):

2.136. On a paster facing an even page, the marks go at the lower right-hand side; on a paster facing an odd page, at the lower left side.

2.137. If more than one paster faces the same page, each is numbered as follows:

2.138. When a paster follows the text, the allmark is placed on the last page of the text and never on the paster.

REPRINTS, IMPRINTS, AND PRICE NOTICES

Reprints

2.139. To aid bibliographic identification of reprints or revisions. the dates of the original edition and of reprint or revision should be supplied by the author on the title page or in some other suitable place. Thus:

First edition July 1941 Reprinted July 1943

First printed June 1940 Revised June 1941

Original edition May 1941 Reprinted May 1942 Revised July 1943

2.140. The year in the imprint on cover, title page, or elsewhere is not changed from that in the original print, nor are the signatures changed, unless other mends are necessary. This applies to all reproducibles, including type.

Imprints

2.141. The Government Printing Office imprint must appear on all printed matter, except certain classified work.

2.142. Use full imprint on the title page of a congressional speech.

2.143. The imprint and allmark are not used together on any page; if one is used, the other is omitted.

2.144. The imprint is not used on a halftitle or (except on congres-

sional hearings) on any page of a cover.

2.145. If there is a title page, the imprint is placed on the title page; but if there is no title page, or if the title page is entirely an illustra-

tion, the imprint is placed on the last page of the text.

2.146. The Government Printing Office crest is used only on Government Printing Office publications. If it is printed on page II, the full imprint is used on the title page; if it is printed on the title page, use the half imprint only, thus—Washington: 1952.

Price notices

2.147. If there is a cover but no title page, the price notice is printed on page 1 of the cover. Unless otherwise indicated, if there is a title page, with or without a cover, the price notice is printed at the bottom of the title page below a cross rule; if there is no cover or title page, the price notice is printed at the end of the text, below the imprint, and the two are separated by a cross rule.

2.148. Price notices are not printed on congressional documents.

The price notice is not considered an imprint.

Samples of imprints and price notices are given below.

2.149. On title page:

3. CAPITALIZATION

(See also Abbreviations; Guide to Capitalization)

3.1. It is impossible to give rules that will cover every conceivable problem in capitalization. But by considering the purpose to be served and the underlying principles, it is possible to attain a considerable degree of uniformity. The list of approved forms given on pages 27 to 50 will serve as a guide. Manifestly such a list cannot be complete. The correct usage with respect to any term not included can be determined by analogy or by application of the rules.

Proper names

3.2. Proper names are capitalized.

Rome John Macadam Brussels Macadam family Italy Anglo-Saxon

Derivatives of proper names

3.3. Derivatives of proper names used with a proper meaning are capitalized.

Roman (of Rome)

Johannean

Italian

3.4. Derivatives of proper names used with acquired independent common meaning, or no longer identified with such names, are lowercased. Since this depends upon general and long-continued usage, a more definite and all-inclusive rule cannot be formulated in advance. A list of derivatives is given on pages 34 to 35.

Great Lakes; the lakes
Lake of the Woods; the lake
North Platte River; the river
Lower California; but lower Mississippi
Charles the First; Charles I

Seventeenth Census; the 1950 census

3.6. If a common noun or adjective forming an essential part of a name becomes removed from the rest of the name by an intervening common noun or adjective, the entire expression is no longer a proper noun and is therefore not capitalized.

> Union Station: union passenger station Eastern States: eastern farming States Western States: western farming States

3.7. A common noun used alone as a well-known short form of a specific proper name is capitalized.

the Capitol (at Washington); but State capitol the Channel (English Channel) the District (District of Columbia) the Soldiers' Home (District of Columbia only)

3.8. The plural form of a common noun capitalized as part of a proper name is also capitalized.

Seventh and I Streets Lakes Erie and Ontario Potomac and James Rivers State and Treasury Departments British and French Governments Presidents Washington and Adams

3.9. A common noun used with a date, number, or letter, merely to denote time or sequence, or for the purpose of reference, record, or temporary convenience, does not form a proper name and is therefore not capitalized.

5. SPELLING

(See also Compound Words; Abbreviations)

5.1. To avoid the confusion and uncertainty of various authorities on spelling, the Government Printing Office must of necessity adopt a single guide for the spelling of words the preferred forms of which are not otherwise listed or provided for in this manual. The guide is Webster's New International Dictionary, which, in successive editions, has been the accepted authority for Government printing for more than 85 years. Unless herein otherwise authorized, the Government Printing Office will continue to follow Webster's spelling. Colloquial and dialect spellings are not to be used unless required by the subject matter or specially requested.

Preferred and difficult spellings

5.2. In addition to indicating the preferred forms of words with variant spellings, the list also contains other words frequently misspelled or causing uncertainty. (See also Word Division, a supplement to the STYLE MANUAL; for brief description, see p. 4.)

Endings "cede," "ceed," and "sede"

5.13. Only one word ends in sede (supersede); only three end in ceed (exceed, proceed, succeed); all other words of this class end in cede (precede, secede, etc.).

Doubled consonants

5.14. A single consonant following a single vowel and ending a monosyllable or a final accented syllable is doubled before a suffix beginning with a vowel.

5.15. If the accent in a derivative falls upon an earlier syllable than it does in the primitive, the consonant is not doubled.

refer, reference

prefer, preference

infer, inference

Indefinite articles

5.16. The indefinite article a is used before a consonant and an aspirated h; an is used before silent h and all vowels except u pronounced as in usual and o pronounced as in one.

a historical review a union an honor a hotel an herbseller an onion a human being an hour an oyster a humble man

5.17. When a group of initials begins with b, c, d, g, j, k, p, q, t, u, v, w, y, or z, each having a consonant sound, the indefinite article a is used.

a BLS compilation a GAO limitation a CIO finding a PHS project

5.18. When a group of initials begins with a, e, f, h, i, l, m, n, o, r, s, or x, each having a vowel sound, the indefinite article an is used.

an AEC report an NSC (en) proclamation an FCC (ef) ruling an RFC (ahr) loan

5.19. Use of the definite or indefinite article before a numerical expression is determined by the consonant or vowel sound of the beginning syllable.

an 11-year-old an VIII (eight) classification a onetime winner a IV-F (four) category a III (three) group a 4-H Club

Possessives and apostrophes

5.20. The possessive case of a singular or plural noun not ending in s is formed by adding an apostrophe and s; the possessive case of a singular or plural noun ending in s or with an s sound is formed by adding an apostrophe only.

man's, men's prince's, princes' Essex's, Essexes' Co.'s, Cos.' hostess', hostesses' princesses', princesses' Jones', Joneses' Jesus'

Mars' Dumas' Schmitz'

5.21. In compound nouns, the 's is added to the element nearest the object possessed.

comptroller general's decision Mr. Brown of New York's motion attorney at law's fee John White, Jr.'s (no comma) account

5.22. Joint possession is indicated by placing an apostrophe on the last element of a series, while individual or alternative possession requires the use of an apostrophe on each element of a series.

soldiers and sailors' home Brown & Nelson's store men's, women's, and children's clothing St. Michael's Men's Club editor's or proofreader's opinion Roosevelt's or Truman's administration Mrs. Smith's and Mrs. Allen's children the Army's and the Navy's work master's and doctor's degrees

5.23. In the use of an apostrophe in geographic names, firm names, the names of organizations and institutions, and the titles of books, the authentic form is to be followed.

Harpers Ferry
Masters, Mates, and Pilots' Association
Dentists' Supply Co. of New York
Court of St. James's

St. Peter's Church St. Elizabeths Hospital Johns Hopkins University Hinds' Precedents

5.24. The apostrophe should not be used after names of countries and other organized bodies ending in s, or after words more descriptive than possessive (not indicating personal possession), except when plural does not end in s.

United States control
United Nations meeting
Southern States industries
Massachusetts laws
Bureau of Ships report
Actors Equity Association
House of Representatives session

its

teachers college
merchants exchange
children's hospital
Young Men's Christian Association
but Veterans' Administration (in conformity
with enabling statute)

5.25. Possessive pronouns do not take an apostrophe.

5.26. Possessive indefinite or impersonal pronouns require an apostrophe.

each other's books one's home someone's pen
but somebody else's proposal

theirs

5.27. The singular possessive case is used in such general terms as the following:

author's alterations confectioner's sugar distiller's grain fuller's earth miner's inch printer's ink writer's cramp cow's milk 5.28. An apostrophe is used to indicate contractions, the omission of figures or letters (see also Courtwork, rule 18.9, p. 195), and the coined plurals of letters, figures, and symbols.

the 1920's or the TV'ers a's; ¶'s; 7's don't T's, Y's

5.29. The apostrophe is omitted in abbreviations, and also in shortened forms of certain other words.

Danl., not Dan'l coon Halloween Sgt., not Sg't possum copter phone Frisco

5.30. The plural of spelled-out numbers, of words referred to as words, and of words already containing an apostrophe is formed by adding s or es; but 's is added to indicate the plural of words used as words if the omission of the apostrophe would cause difficulty in reading.

twos ins and outs yeses and noes threes ups and downs but do's and don'ts sevens whereases and which's and that's ands, ifs, and buts wherefores

5.31. The possessive case is often used in lieu of an objective phrase even though ownership is not involved.

1 day's labor (labor for 1 day)
2 hours' travel time
a stone's throw
2 weeks' pay

5 or 10 billion dollars' worth
for charity's sake
for pity's sake

5.32. The possessive case is not used in such expressions as the following, in which one noun modifies another.

day labor (labor by the day)
quartermaster stores

State prison
State rights

5.33. For euphony, nouns ending in s or ce and followed by a word beginning with s form the possessive by adding an apostrophe only.

for goodness' sake for old times' sake for conscience' sake Mr. Hughes' service for acquaintance' sake

5.34. A possessive noun used in an adjective sense requires the addition of 's.

He is a friend of John's Stern's is running a sale

5.35. A noun preceding a gerund should be in the possessive case. in the event of Mary's leaving the ship's hovering nearby

Geographic names

5.36. The spelling of geographic names must conform to the decisions of the United States Board on Geographic Names. In the absence of such a decision, the United States Postal Guide is to be used for names in the United States and its possessions, and the Columbia Lippincott Gazetteer of the World is to be followed in the spelling of foreign names.

5.37. If the decisions or the rules of the Board permit the use of either the local official form or the conventional English form, it is the prerogative of the originating office to select the form which is most suitable for the matter in hand; therefore, in marking copy or reading proof, it is required only to verify the spelling of the particular form used. The Government Printing Office preference is for the conventional English form. Copy will be followed as to accents, but these should be uniform throughout each job.

Nationalities, etc.

5.38. The table on page 213 shows forms to be used for nouns and adjectives denoting nationality.

5.39. In designating the natives of the several States, the following

forms will be used.

Alabamian Arizonian Arkansan Californian Coloradan Connecticuter Delawarean Floridian Georgian Idahoan Illinoisan Indianian

Iowan
Kansan
Kentuckian

5.40. Observe the following forms:

Guamanian Hawaiian Puerto Rican Part-Hawaiian (applies to Hawaii only) but part-Japanese

Indian words

5.41. In Indian words, including tribal and other proper names, copy is to be followed literally as to spelling and the use of spaces, hyphens, etc.

Ligatures

5.42. Ligatures are not used in anglicized or Latin words; in other foreign words national practice is followed.

Caesar Leguminosae Cædmon (Old English) vœu (French)

Transliteration

5.43. In the spelling of nongeographic words transliterated from Chinese, Japanese, or any other language that does not have a Latin alphabet, copy is to be followed literally. (Countries that do not use a Latin alphabet officially are marked with an asterisk in the table on p. 213.)

6. COMPOUND WORDS

(See also Guide to Compounding)

6.1. A compound word is a union of two or more words, either with or without a hyphen. It conveys a unit idea that is not as clearly or quickly conveyed by the component words in unconnected succession. The hyphen in a compound is a mark of punctuation that not only unites but separates the component words, and thus facilitates understanding, aids readability, and insures correct pronunciation.

6.2. In applying the following rules and in using the Guide to Compounding, the living fluidity of our language should be kept in mind. Word forms constantly undergo modification. Two-word forms first acquire the hyphen, later are printed as one word, and not infrequently the transition is from the two- to the one-word form,

bypassing the hyphen stage.

6.3. The rules as laid down cannot be applied inflexibly. Exceptions must necessarily be allowed, so that general good form will not be offended. However, current language trends point definitely to closing up words which, through frequent use, have become associated in the reader's mind as units of thought. The tendency to amalgamate words, particularly two short words, assures easier continuity, and is a natural progression from the older and less flexible treatment of words.

General rules

6.4. In general, omit the hyphen when words appear in regular order and the omission causes no ambiguity in sense or sound.

banking hours blood pressure book value census taker day laborer eye opener fellow citizen living costs mountain laurel palm oil patent right real estate rock candy training ship violin teacher

6.5. Compound two or more words to express a literal or nonliteral (figurative) unit idea that would not be as clearly expressed in unconnected succession.

afterglow bookkeeping cupboard forget-me-not gentleman newsprint right-of-way whitewash

6.6. Unless otherwise indicated, a derivative of a compound retains the solid or hyphened form of the original compound.

cold-bloodedness footnoting ill-advisedly outlawry

praiseworthiness railroader X-rayer Y-shaped

6.7. Except after the short prefixes co, de, pre, pro, and re, which are generally printed solid, a hyphen is used to avoid doubling a vowel or tripling a consonant. (See also rule 6.28, p. 66, and rule 6.31, p. 67.)

cooperation deemphasis preexisting anti-inflation micro-organism semi-independent

brass-smith Inverness-shire thimble-eye ultra-atomic shell-like Solid compounds

6.8. Print solid two nouns that form a third when the compound has only one primary accent, especially when the prefixed noun consists of only one syllable or when one of the elements loses its original accent.

airship bathroom bookseller cupboard dressmaker fishmonger footnote handkerchief locksmith workman

6.9. Print solid a noun consisting of a short verb and an adverb as its second element, except when the use of the solid form would interfere with comprehension.

blowout breakdown flareback giveaway hangover holdup letdown makeready markoff pickup runoff setup showdown throwaway but cut-in run-in tie-in

6.10. Compounds beginning with the following nouns are usually printed solid.

book eye horse house mill play school shop snow

way wood work

6.11. Compounds ending in the following are usually printed solid, especially when the prefixed word consists of one syllable. (See also rule 8.5, p. 121.)

blossom boat book borne bound brained bush fish flower grower hearted

house keeper keeping light like maker making man master mate mill mistress monger piece proof room shop smith stone store tail tight

ward
weed
woman
wood
work
worker
working
worm
wort
writer
writing
yard

6.12. Print solid any, every, no, and some when combined with body, thing, and where; when one is the second element, print as two words if meaning a single or particular person or thing; to avoid mispronunciation, print no one as two words at all times.

anybody anything anywhere anyone everybody everything everywhere everyone nobody nothing nowhere no one

time (not clock)

somebody something somewhere someone

but any one of us may stay; every one of the pilots is responsible.

6.13. Print as one word compound personal pronouns.

herself himself itself myself oneself ourselves themselves thyself yourself yourselves

6.14. Print as 1 word compass directions consisting of 2 points, but use a hyphen after the first point when 3 points are combined.

northeast southwest north-northeast south-southwest

Unit modifiers

(See also rule 9.57, p. 132.)

6.15. Print a hyphen between words combined to form a unit modifier immediately preceding the word modified, except as indicated elsewhere.

Baltimore-Washington road
civil-service examination
contested-election case
German-English descent
interstate-commerce law
law-abiding citizen
fire-tested material
drought-stricken area

pipe
10-word telegram

- national-defense appropriation

drought-stricken area 4-percent increase; but 4 percent
life-insurance company [of] hydrochloric acid, 4 permost-favored-nation clause cent [of] interest

6.16. Print without a hyphen a compound predicate adjective or predicate noun the second element of which is a present participle.

The duties were price fixing. The effects were far reaching.

The shale was oil bearing. The area was used for beet raising.

6.17. Print without a hyphen a compound predicate adjective the second element of which is a past participle; also, omit the hyphen in a predicate modifier of comparative or superlative degree.

The area is drought stricken. The paper is fine grained. The boy is freckle faced. This material is fire tested. The cars are higher priced. The reporters are best informed.

6.18. Print without a hyphen a two-word modifier the first element of which is a comparative or superlative.

better drained soil best liked books higher level decision highest priced apartment larger sized dress better paying job lower income group upper crust society but lowercase type (printing) uppercase type (printing)

6.19. Do not use a hyphen in a 2-word unit modifier the first element of which is an adverb, including adverbs ending in *ly*, nor use hyphens in a 3-word unit modifier the first 2 elements of which are adverbs.

eagerly awaited moment heavily laden ship unusually well preserved specimen very well defined usage longer than usual lunch period very well worth reading not too distant future often heard phrase
but ever-normal granary
ever-rising flood
still-new car
still-lingering doubt
well-known lawyer
well-kept farm

6.20. Proper nouns used as unit modifiers, either in their basic or derived form, retain their original form; but the hyphen is printed after combining forms.

Latin American countries
North Carolina roads
South American trade bu
United States laws
Red Cross nurse
Winston-Salem festival
Washington-Wilkes-Barre route

old-clothes man wooden-shoe maker tomato-canning factory service men and women common-stock holder light-blue hat small-business man income-tax payer American-flag ship

6.22. Where two or more hyphened compounds have a common basic element and this element is omitted in all but the last term, the hyphens are retained.

2- or 3-em quads, not 2 or 3-em quads 2- by 4-inch boards, but 2 to 6 inches wide 8-, 10-, and 16-foot boards

moss- and ivy-covered walls, not moss and ivy-covered walls long- and short-term money rates, not long and short-term money rates

but twofold or threefold, not two or threefold goat, sheep, and calf skins, not goat, sheep, and calfskins intrastate and intracity, not intra-state and -city

6.23. Do not use a hyphen in a unit modifier consisting of a foreign phrase.

ante bellum davs ex officio member per diem employee bona fide transaction per capita tax prima facie evidence

6.24. Do not print a hyphen in a unit modifier containing a letter or a numeral as its second element.

abstract B pages article 3 provisions class II railroad grade A milk

point 4 program ward D beds

6.25. Do not use a hyphen in a unit modifier enclosed in quotation marks unless it is normally a hyphened term, but quotation marks are not to be used in lieu of a hyphen. (See also rule 9.116, p. 137.) "good neighbor" policy "tie-in" sale "blue sky" law

6.26. Print combination color terms as separate words, but use hyphen when such color terms are unit modifiers.

bluish green dark green

orange red bluish-green feathers iron-gray sink silver-gray body

6.27. Do not use a hyphen between independent adjectives preceding a noun.

big gray cat

a fine old southern gentleman

Prefixes, suffixes, and combining forms

6.28. Print solid combining forms and prefixes, except as indicated elsewhere.

6.29. Print solid combining forms and suffixes, except as indicated elsewhere.

portable meatless kilogram partnership coverage geography outlet Îonesome operate manhood wavelike homestead plebiscite selfish procurement northward twentyfold pumpkin innermost clockwise spoonful

6.30. Print solid words ending in *like*, but use a hyphen to avoid tripling a consonant or when the first element is a proper name.

lifelike bell-like Florida-like lilylike girllike Truman-like

6.31. Use a hyphen or hyphens to prevent mispronunciation, to insure a definite accent on each element of the compound, or to avoid ambiguity.

anti-hog-cholera serum re-sorting (sort again)
co-op re-treat (treat again)
mid-ice un-ionized
non-civil-service position re-cover (cover again)

6.32. Use a hyphen to join duplicated prefixes.

re-redirect sub-subcommittee super-superlative

6.33. Print with a hyphen the prefixes ex, self, and quasi.

6.34. Unless usage demands otherwise, use a hyphen to join a prefix or combining form to a capitalized word. (The hyphen is retained in words of this class set in caps.)

anti-Arab but overanglicize pro-British prezeppelin un-American transatlantic

Numerical compounds

6.35. Print a hyphen between the elements of compound numbers from twenty-one to ninety-nine and in adjective compounds with a numerical first element.

twenty-one twenty-first 10-minute delay one-hundred-odd four-in-hand tie three-and-twenty two-sided question twenty-one but one hundred and twenty-one one-hundred-odd foursome three-core four-in-hand tie three-score four-square

6.36. Print without a hyphen a modifier consisting of a possessive noun preceded by a numeral. (See also rule 5.31, p. 61.)

1 month's layoff 2 hours' work 1 week's pay 3 weeks' vacation

6.37. Print a hyphen between the elements of a fraction, but omit it between the numerator and the denominator when the hyphen appears in either or in both.

one-thousandth twenty-three thirtieths two-thirds twenty-one thirty-seconds two one-thousandths three-fourths of an inch

6.38. A unit modifier following and reading back to the word or words modified takes a hyphen and is always printed in the singular.

motor, alternating-current, 3-phase, 60-cycle, 115-volt glass jars: 5-gallon, 2-gallon, 1-quart belts: 2-inch, 1½-inch, ½-inch, ½-inch

Civil and military titles

6.39. Do not hyphen a civil or military title denoting a single office, but print a double title with a hyphen. (See also rule 5.6, p. 56.)

ambassador at large assistant attorney general commander in chief comptroller general Congressman at large major general sergeant at arms notary public secretary general under secretary; but under-secretaryship vice president; but vice-presidency secretary-treasurer treasurer-manager

6.40. The adjectives *elect* and *designate*, as the last element of a title, require a hyphen.

President-elect Vice-President-elect ambassador-designate minister-designate

Scientific and technical terms

6.41. Do not print a hyphen in scientific terms used as unit modifiers if no hyphen appears in such terms in their original form.

carbon monoxide poisoning

methyl bromide solution

6.42. Print a hyphen between the elements of technical compound units of measurement.

board-foot candle-hour horsepower-hour kilowatt-hour light-year passenger-mile

Improvised compounds

6.43. Print with a hyphen the elements of an improvised compound.

7. GUIDE TO COMPOUNDING

7.1. The following list is based on the rules for compounding given on pages 63 to 69. Manifestly, such a list cannot be complete, and the rules should be applied to unlisted words. Nevertheless, the list is reasonably complete for meeting the needs of printers, editors, and writers.

7.2. In order to keep the list from becoming cumbersome, certain

restrictions had to be adopted.

7.3. The listing of hyphened compounds ending in ed was kept to a minimum, it being thought adequate to give one or two examples under a keyword rather than to admit needless repetition.

7.4. Similarly, many two-word forms which create no difficulty

were omitted.

7.5. On the other hand, care was exercised to achieve fuller coverage of solid compounds, particularly when the adopted form is at variance with that laid down in Webster's New International Dictionary. It should be added that while Webster's, with indicated exceptions (pp. 51-55), is our guide to the spelling of words, it is not our guide for the compounding of words. The rules and the guide prescribe and limit our practice.

7.6. A distinction should be made between words used in a nonliteral sense—e. g., highlight (prominent detail), sideline (added activity), where the one-word form differentiates from literal use—e. g., high light (elevation of a light), side line (physical line), where the two-word form frequently assures proper emphasis in pronouncing more distinctly each word in the group.

7.7. Distinction should also be made in the compounding of two words to form an adjective modifier and the use of the same words adverbially; e. g., "crystal-clear water," but "the water is crystal clear"; "fire-tested material," but "the material is fire tested."

7.8. Caution should be exercised in distinguishing when a succession of words is intended as a compound and when it is merely a collocation; e. g., "we know someone who will do it," but "we ought

to master some one thing well."

7.9. For better appearance, it may sometimes be necessary to treat alike words which would have different forms when they appear separately; e. g., bumblebee and queen bee, farmhand and ranch hand. In juxtaposition, these and similar words should be made uniform by being printed as two words. This is only a temporary expedient and

does not supersede the list.

7.10. Combining forms and prefixes are usually printed solid. For greater readability, the hyphen is sometimes required to avoid doubling a vowel (anti-inflation, naso-orbital), except as indicated in rule 6.7; or not to change a normally capitalized word (mid-April, non-European); or to assure distinct pronunciation of each element of a compound or ready comprehension of intended meaning (contra-ion, un-ionized); or to join a combining form or prefix to an already hyphened compound (equi-gram-molar, pro-mother-in-law).

7.11. As nouns and adjectives, holdup, calldown, layout, makeup, and similar words should be printed solid. Their er derivatives (holder-up, caller-down, layer-out, and maker-up) require hyphens. the other hand, such compounds as run-in, run-on, and tie-in resist quick comprehension when solid. They are therefore hyphened.

7.12. Words spelled alike but pronounced differently, such as teardimmed and tearsheet, wind tunnel and windup, are listed under the

same keyword.

7.13. Words printed flush are combined with the words which follow to form solid or hyphened compounds; a space mark (#) indicates a two-word form.

7.14. The abbreviations adv. (adverb), n. (noun), v. (verb), u. m. (unit modifier), pref. (prefix), c. f. (combining form), and conj. (con-

junction) indicate function.

7.15. This list does not include the large group of plant names,

which are covered in a separate list, pages 121 to 125. aero (c. f.) air—con.

8. PLANT NAMES

8.1. The following list of plant names, some of which vary in form from those given in Webster's New International Dictionary, has been compiled with the cooperation of the Department of Agriculture.

8.2. In general, derivatives of proper names with acquired independent common meaning are not capitalized. (See rule 3.4, p. 17.) However, in plant names, if the capital letter is retained, either the hyphened or the two-word form is used, depending on predominant usage. Such names as English ivy, Dutchmans-pipe, Cupids-dart, flower-of-Jove, and apple-of-Peru retain the capital letter. On the other hand, such names as Charlie, Jack, and Susan lose their capital letter in fanciful names; e. g., creeping-charlie, jack-in-a-box, and brown-eyed-susan.

8.3. The apostrophe is omitted in names with a possessive element;

thus: babysbreath, Grays lily, devils-paintbrush, etc.

8.4. To indicate preferred usage, there are also included adjective forms, such as nightblooming, straightstem, threecolor, two-wing,

etc., not by themselves plant names.

8.5. Except as indicated in the list, plant names ending in bane, bark, bean, berry, bine, brush, cup, fern, flower, grass, leaf, lily, nut, plant, pod, root, seed, thorn, tree, vine, weed, wood, and wort are printed solid, and such one-word forms were excluded from the list.

9. PUNCTUATION

9.1. Punctuation is a device to clarify the meaning of written or printed language. Well-planned word order requires a minimum of punctuation. The trend toward less punctuation calls for skillful phrasing to avoid ambiguity and to insure exact interpretation.

9.2. The general principles governing the use of punctuation are (1) that if it does not clarify the text it should be omitted, and (2) that in the choice and placing of punctuation marks the sole aim should be to bring out more clearly the author's thought. Punctuation should aid in reading and prevent misreading.

Apostrophe

(See Possessives and apostrophes, pp. 60-61.)

9.3. The brace is used to show the relation of one line or group of lines to another group of lines. The point of the brace is placed toward the fewer number of lines; or if the number of lines is the same, toward the single group. For examples of braces used in tabular matter, see rule 14.30, page 169.

Brackets

Brackets, in pairs, are used—

9.4. To indicate a correction, a supplied omission, an interpolation, a comment, or a caution that an error is reproduced literally.

He came on the 3d [2d] of July. Our conference [lasted] 2 hours.

The general [Washington] ordered him to leave.

The paper was as follows [reads]:

They fooled only themselves. [Laughter.]
Our party will always serve the people [applause] in spite of the opposition [loud applause]. (If more than one bracketed interpolation, both are included within the sentence.)

I do not know. [Continues reading:] The WITNESS. He did it that way [indicating].

Q. Do you know these men [handing witness a list]? The bill had not been paid. [Italic ours.]

The statue [sic] was on the statute books.

9.5. In bills, contracts, etc., to indicate matter that is to be omitted.

9.6. In mathematics, to denote that enclosed matter is to be treated as a unit. For examples, see page 164.

9.7. A single bracket may be used to indicate matter overrun into an adjoining blank space.

Till one man's weakness grows the strength Argentina: Wireless, regulations of __ 93, 682, 703,

9.8. When matter in brackets makes more than one paragraph, start each paragraph with a bracket and place the closing bracket at end of last paragraph.

Colon

The colon is used—

9.9. Before a final clause that summarizes preceding matter. (See also rule 9.48, p. 131.)

Give up conveniences; do not demand special privileges; do not stop work: these are necessary while we are at war.
Railroading is not a variety of outdoor sport: it is service.

9.10. To introduce formally any matter that follows.

The following question came up for discussion: What policy should be adopted?

He said: [if direct quotation of more than a few words follows]. (See also rule 9.48, p. 131.)

There are three factors, as follows: First, military preparation; second, industrial mobilization; and third, manpower.

9.11. After a salutation.

MY DEAR SIR: Ladies and Gentlemen: To Whom It May Concern:

9.12. In expressing clock time.

2:40 p. m. (use thin colon)

9.13. After introductory lines in lists, tables, and leaderwork, if subentries follow.

Seward Peninsula:

Council district:

Northern Light Mining Co.
Wild Goose Trading Co.
Fairhaven district: Alaska Dredging Association (single subitem runs in).

Seward Peninsula: Council district (single subitem runs in):

Northern Light Mining Co. Wild Goose Trading Co.

9.14. In Biblical and other citations (full space after colon).

Luke 4: 3. I Corinthians xiii: 13.

Journal of Education 3: 342-358.

9.15. In bibliographic references, between place of publication and name of publisher.

Congressional Directory. Washington: U.S. Government Printing Office.

9.16. In imprints before the year (en space each side of colon).

United States Government Printing Office Washington: 1951

9.17. In proportions.

Concrete mixed 5:3:1 (use 9-unit center colons) but 5-2-1 (when so in copy)

9.18. In double colon as ratio sign.

1:2::3:6 (use 9-unit center colon for single colons; thin colons to make double colon, with thin space each side of double colon)

Comma

The comma is used—

9.19. To separate two words or figures that might otherwise be misunderstood.

Instead of hundreds, thousands came:

Instead of 20, 50 came. February 10, 1929. In 1930, 400 men were dismissed. To John, Smith was very kind.

What the difficulty is, is not known; but he suggested that that committee be appointed.

9.20. Before a direct quotation of only a few words following an introductory phrase. (See also rule 9.11, p. 128.)

He said, "Now or never."

9.21. To indicate the omission of a word or words.

Then we had much; now, nothing

- 9.22. After each of a series of coordinate qualifying words. short, swift streams: but short tributary streams
- 9.23. Between introductory modifying phrase and subject modified. Beset by the enemy, they retreated.
- **9.24.** Before Jr., Sr., Esq., Ph. D., F. R. S., etc.

Henry Smith, Jr. Peter Johns, F. R. S. Brown, A. H., Jr. (not Brown, Jr., A. H.) but John Smith 2d (or II)

9.25. To set off parenthetic words, phrases, or clauses.

Mr. Jefferson, who was then Secretary of State, favored the location of the National Capital at Washington.

It must be remembered, however, that the Government had no guaranty. It is obvious, therefore, that this office cannot function.

The atom bomb, which was developed at the Manhattan project, was first used in World War II.

Their high morale might, he suggested, have caused them to put success of the team above the reputation of the college.

The restriction is laid down in title IX, chapter 8, section 15, of the code.

The man who fell [restrictive clause] broke his back. The dam which gave way [restrictive clause] was poorly constructed. He therefore gave up the search.

9.26. To set off words or phrases in apposition or in contrast.

Mr. Green, the lawyer, spoke for the defense.

Mr. Jones, attorney for the plaintiff, signed the petition. Mr. Smith, not Mr. Black, was elected.

9.27. After each member within a series of three or more words, phrases, letters, or figures used with and, or, or nor.

red, white, and blue horses, mules, and cattle by the bolt, by the yard, or in remnants a, b, and c 6, 7, and 10 neither snow, rain, nor heat

2 days, 3 hours, and 4 minutes (series); but 2 days 3 hours 4 minutes (age)

9.28. Before the conjunction in a compound sentence if the second clause is complete with subject and predicate.

Fish, mollusks, and crustaceans were plentiful in the lakes, and turtles frequented the shores.

The boy went home alone, and his sister remained with the crowd.

9.29. After a noun or phrase in direct address.

Senator, will the measure be defeated? Mr. Chairman, I will reply to the gentleman later.

- 9.30. After an interrogative clause, followed by a direct question.
 You are sure, are you not? You will go, will you not?
- 9.31. Between title of person and name of organization in the absence of the words of or of the. (See also rule 9.44, p. 131.)

Chief, Division of Finance chairman, Committee on Appropriations colonel, 7th Cavalry president, Yale University

9.32. Between the name and number of an organization.

Columbia Typographical Union, No. 101 General U. S. Grant Post, No. 25

9.33. Inside closing quotation mark. (This is not intended to change existing practice in bills and other legislative work.) (See also rules 9.122 and 9.123, p. 138.)

He said "four," not "five." "Freedom is an inherent right," he insisted.

9.34. To separate thousands, millions, etc., in numbers of four or more digits. (See also rule 9.38.)

4,230 50,491 1,000,000

9.35. After year in dates within sentence.

The reported dates of September 11, 1943, to June 12, 1944, were proved erroneous; but production for June 1950 was normal.

9.36. After postal-delivery zone number, but not before it.
Cleveland 21, Ohio Washington 11, D. C.

The comma is omitted—

9.37. Between month and year in dates.

June 1938; 22d of May 1938; February and March 1938; but January, February, and March, 1938; January 24 A. D. 1938; 15th of June A. D. 1938; 150 B. C.; 5 January 1944 (military usage)

9.38. In built-up fractions, in decimals, and in serial numbers, except patent numbers.

Dash

The em dash is used—

9.45. To mark a sudden break or abrupt change in thought. (See also rule 9.78, p. 134.)

He said—and no one contradicted him—"The battle is lost." If the bill should pass—which God forbid!—the service will be wrecked. The auditor—shall we call him a knave or a fool?—approved an inaccurate statement.

9.46. To indicate an interruption or an unfinished word or sentence. A 2-em dash will be used when the interruption is by a person other than the speaker and a 1-em dash will show self-interruption.

"Such an idea can scarcely be--" "The word 'donation'
"The word 'dona—'"
"He said: "Give me lib——"
The bill reads "repeal," not "am—
Q. Did you see——A. No, sir.

Mr. Brown (reading): The report goes on to say that-Observe this closely—

during the fiscal year * * *.

9.47. Instead of commas or parentheses, if the meaning may thus be clarified.

These are shore deposits—gravel, sand, and clay—but marine sediments underlie them.

9.48. Before a final clause that summarizes a series of ideas. also rule 9.9, p. 128.)

Freedom of speech, freedom of worship, freedom from want, freedom from fear-these are the fundamentals of moral world order.

9.49. After an introductory phrase reading into the following lines and indicating repetition of such phrase.

I recommend-

That we accept the rules. That we also publish them. 9.50. With a preceding question mark, in lieu of a colon.

How can you explain this?—"Fee paid, \$5."

9.51. Sometimes, in lieu of opening quotation mark, in French, Spanish, and Italian dialog.

9.52. To precede a credit line or a run-in credit or signature.

Still achieving, still pursuing,
Learn to labor and to wait.
—Longfellow.

Every man's work shall be made manifest.—I Corinthians 3: 13. This statement is open to question.—Gerald H. Forsythe.

9.53. After a run-in sidehead. (For examples, see rule 9.91, p. 135.) 9.54. To separate run-in questions and answers in testimony. (See also rule 18.27, p. 196.)

Q. Did he go?—A: No.

The em dash is not used—

9.55. At the beginning of any line of type, except as indicated in paragraphs 9.51 and 9.52.

9.56. Immediately after a comma, colon, or semicolon.

The en dash is used—

9.57. In a combination of figures, letters, or figures and letters. (An en dash, not a hyphen, is used, even when such terms are adjective modifiers.)

exhibit 6-A 5-20 bonds DC-14 4-H Club U-235 (atomic) \$15-\$20 CBS-TV network AFL-CIO merger

9.58. In the absence of the word to when denoting a period of time.

1935-37 January-June Monday-Friday

The en dash is not used—

9.59. For to when the word from precedes the first of two related figures or expressions.

From January 1 to June 30, 1951; not from January 1-June 30, 1951.

9.60. For and when the word between precedes the first of two related figures or expressions.

Between 1923 and 1929; not between 1923-29

Ellipsis

(For examples, see rule 9.90, p. 135, and rule 9.111, p. 137.)

9.61. Three asterisks, separated by en quads, are used to denote an ellipsis in text; if periods are used instead of asterisks, they are also separated by en quads.

9.62. Neither asterisks nor periods are overrun alone at the end of

a paragraph.

9.63. When both asterisks and periods for ellipsis occur in the copy and periods are not specifically requested, use asterisks throughout.

9.64. A line of asterisks indicates an omission of one or more entire paragraphs. In 26½-pica or wider measure, a line of "stars" means 7 asterisks indented 2 ems at each end of the line, with the remaining space divided evenly between the asterisks. In measures less than 26½ picas, 5 stars are used.

9.65. Indented matter in 26½-pica or wider measure also requires a 7-star line to indicate the omission of one or more entire paragraphs.

9.66. An extra indention is added in indented matter.

9.67. If an omission occurs in the last part of a paragraph immediately before a line of stars, three stars are used, in addition to the line of stars, to indicate such an omission.

9.68. If two or more sizes of type are used on a page, 10-point asterisks are indented 2 ems, 8-point and 6-point being alined with the 10-point asterisks.

9.69. Equalize spacing above and below a line of stars.

Exclamation point

of comma.)

9.70. The exclamation point is used to mark surprise, incredulity, admiration, appeal, or other strong emotion, which may be expressed even in a declarative or interrogative sentence.

He acknowledged the error! How beautiful "Great!" he shouted. (Note omission What! Who shouted, "All aboard!" (Note omission of question mark.)

9.71. In direct address, either to a person or a personified object, O is used without an exclamation point, or other punctuation; but if strong feeling is expressed, an exclamation point is placed at the end of the statement.

O my friend, let us consider this subject impartially. O Lord, save Thy people!

9.72. In exclamations without direct address or appeal, oh is used instead of O, and the exclamation point is omitted.

Oh, but the gentleman is mistaken. Oh dear; the time is so short.

Hyphen

The hyphen (a punctuation mark, not an element in the spelling of words) is used—

9.73. To connect the elements of certain compound words.

Compound Words, pp. 63-69.)

9.74. To indicate continuation of a word divided at end of a line. 9.75. Between the letters of a spelled word.

> c-e-n-t-s h-o-l-d-u-p

9.76. To indicate syllabification. (See Word Division, supplement to Style Manual. For brief description of supplement, see p. 4.)

Parentheses

Parentheses are used—

9.77. To set off matter not intended to be part of the main statement or not a grammatical element of the sentence, yet important enough to be included. (See also rule 9.4, p. 127.)

The CHAIRMAN (to Mr. Smith). The CHAIRMAN (reading): Mr. Kelley (to the chairman). (Objected to.)

Answer (after examining list). Yes; I do.

Q. (Continuing.)
A. (Reads:)

A. (Interrupting.)
This case (124 U. S. 329) is not relevant.
The result (see fig. 2) is most surprising.

9.78. To enclose a parenthetic clause where the interruption is too great to be indicated by commas. (See also rule 9.45, p. 131.)

You can find it neither in French dictionaries (at any rate, not in Littré) nor in English.

9.79. To enclose an explanatory word not part of the statement.

the Erie (Pa.) News; but the News of Erie, Pa.
Portland (Oreg.) Chamber of Commerce; but Washington, D. C., schools.

9.80. To enclose letters or numbers designating items in a series, either at beginning of paragraphs or within a paragraph.

The order of delivery will be: (a) Food, (b) clothing, and (c) tents and

other housing equipment.

You will observe that the sword is (1) old fashioned, (2) still sharp, and (3) unusually light for its size.

9.81. To enclose a figure inserted to confirm a statement given in words if double form is specifically requested. (See also rule 11.18, p. 158.)

This contract shall be completed in sixty (60) days.

9.82. A reference in parentheses at the end of a sentence is placed before the period, unless it is a complete sentence in itself.

The specimen exhibits both phases (pl. 14, A, B). The individual cavities show great variation. (See pl. 4.)

9.83. If a sentence contains more than one parenthetic reference, the one at the end is placed before the period.

This sandstone (see pl. 6) occurs in every county of the State (see pl. 1).

9.84. When a figure is followed by a letter in parentheses, a space is used between the figure and the opening parenthesis; but if the letter is not in parentheses and the figure is repeated with each letter, the letter is closed up with the figure.

15 (a). Classes, grades, and sizes. 15a. Classes, grades, and sizes.

9.85. If both a figure and a letter in parentheses are used before each paragraph, a period and an en space are used after the closing parenthesis; if the figure is not repeated before each letter in parentheses but is used only before the first, the period is placed after the figure.

15 (a). When the figure is used before the letter in each paragraph—15 (b). The period is placed after the closing parenthesis.

15. (a) When the figure is used before letter in first paragraph but not repeated with subsequent letters—

(b) The period is used after the figure only.

9.86. When matter in parentheses makes more than one paragraph, start each paragraph with a parenthesis and place the closing parenthesis at end of last paragraph.

Period

The period is used—

9.87. After a declarative sentence that is not exclamatory or after an imperative sentence.

Stars are suns.
He was employed by Sampson & Co.
Do not be late.
On with the dance.

9.88. After an indirect question or after a question intended as a suggestion and not requiring an answer.

Tell me how he did it. May we hear from you. May we ask prompt payment.

- 9.89. In place of parentheses after a letter or number denoting a series.
 - a. Bread well baked. b. Meat cooked rare.c. Cubed apples stewed.

1. Punctuate freely. Compound sparingly.
 Index thoroughly.

9.90. Sometimes to indicate ellipsis (3 periods; use 4 periods when preceding sentence has been brought to a close). (See also rule 9.61, p. 132.)

He called . . . and left. . . . He returned the next day. (Note en space at end of first sentence.)

9.91. After a run-in sidehead.

> gal. qt.

NE. N. Y.

m. (meter) kc. (kilocycle)

9.95. After legends and explanatory matter beneath illustrations. 9.96. Rarely, to indicate multiplication. (The multiplication sign is preferable for this purpose.)

 $a.b (a \times b)$

9.97. After Article 1, Section 1, etc., at beginning of paragraphs. A period and en space are used after such terms.

The period is omitted—

9.98. In general, at the ends of lines in title pages; after center, side, and running heads; after continued lines; after boxheads of tables; and after scientific, chemical, or other symbols. (This does not apply to abbreviation periods.)

9.99. After a quotation mark that is preceded by a period. (See

also rule 9.123, p. 138.)

He said, "Now or never."

9.100. After letters used as names without specific designation.

A said to B that all is well.

Mr. A told Mr. B that the case was closed. but Mr. A. (for Mr. Andrews). I do not want to go. Mr. K. (for Mr. King). The meeting is adjourned.

9.101. After a middle initial which is merely a letter and not an abbreviation of a name.

Daniel D Tompkins

Ross T McIntire

9.102. After a short name which is not an abbreviation of the longer form. (See also rule 10.20, p. 143.)

Sam

9.103. After Roman numerals used as ordinals.

George V

9.104. After words and incomplete statements listed in columns.

9.105. After explanatory matter set in 6-point under leaders or rules.

(Name)

(Address)

(Position)

9.106. Immediately before leaders, even if an abbreviation precedes the leaders.

Question mark

The question mark is used—

9.107. To indicate a direct query, even if not in the form of a question.

Did he do it? He did what?

Can the money be raised? is the question. Who asked, "Why?" (Note single question mark.)

9.108. To express more than one query in the same sentence.

Can he do it? or you? or anyone?

9.109. To express doubt.

He said the boy was 8 (?) feet tall.

Quotation marks

Quotation marks are used—

9.110. To enclose direct quotations. (Each part of an interrupted quotation begins and ends with quotation marks.)

The answer is "No." He said, "John said 'No." "John," said Henry, "why do you go?"

9.111. To enclose any matter following the terms *entitled*, the word, the term, marked, endorsed, or signed; but are not used to enclose expressions following the terms known as, called, so-called, etc., unless such expressions are misnomers or slang.

Congress passed the act entitled "An act * * *."
After the word "treaty", insert a comma.
Of what does the item "Miscellaneous debts" consist?
The column "Imports from foreign countries" was not * * *.
The check was endorsed "John Adamson."
It was signed "John."
Beryllium is known as glucinium in some European countries.
It was called profit and loss.
The so-called investigating body.

9.112. Note quotation marks in tabular and leader work.

Account 5, "Management fees."
Under the heading "Management and operation."
Under the appropriation "Building of ships, Navy."

9.113. If poetry is quoted, each stanza should start with quotation marks, but only the last stanza should end with them. The lines of the poem should range on the left, those that rhyme taking the same indention, and the quotation marks should be cleared.

"Rest is not quitting
The busy career;
Rest is the fitting
Of self to one's sphere.
"Tis the brook's motion,
Clear without strife,
Fleeing to ocean
After its life."

—John Sullivan Dwight.

9.114. At the beginning of each paragraph of a quotation, but at

the end of the last paragraph only.

9.115. To give greater emphasis to a word or a phrase. (For better typographical appearance and legibility, such use of quotation marks should be kept to a minimum.)

9.116. To enclose misnomers, slang expressions, sobriquets, or ordinary words used in an arbitrary way. (See also rule 6.25, p. 66.)

He voted for the "lame duck" amendment. His report was "bunk." It was a "gentlemen's agreement." The "invisible government" is responsible. George Herman "Babe" Ruth.

9.117. Quotation marks will not be borne off from adjacent characters except when they precede a fraction or an apostrophe or precede or follow a superior figure or letter, in which cases a thin space will be used. A thin space will also be used to separate double and single quotation marks.

Quotation marks are not used—

9.118. To enclose complete letters having date and signature.

9.119. To enclose extracts that are indented or set in smaller type, or solid extracts in leaded matter, but indented matter in text that is already quoted carries quotation marks.

9.120. In indirect quotations.

Tell her yes. He could not say no. 93073°—53——11 9.121. Before a display initial which begins a quoted paragraph.

9.122. The comma and the final period will be placed inside the quotation marks. Other punctuation marks should be placed inside the quotation marks only if they are a part of the matter quoted.

Ruth said, "I think so."

"The President," he said, "will veto the bill."
The trainman shouted, "All aboard!"
Who asked, "Why?"

The President suggests that "an early occasion be sought * * *."
Why call it a "gentlemen's agreement"?

9.123. In congressional and certain other classes of work showing amendments, punctuation marks are printed after the quotation marks when not a part of the quoted matter.

Insert the words "growth", "production", and "manufacture".
To be inserted immediately after the words "cadets, United States Coast

Change "February 1, 1951", to "June 30, 1951". "Insert in lieu thereof 'July 1, 1953,'."

9.124. When occurring together, quotation marks should precede the footnote reference number.

The commissioner claimed that the award was "unjustified." 1 His exact words were: "The facts in the case prove otherwise." 2

9.125. Quotation marks should be limited, if possible, to three sets (double, single, double).

"The question is, in effect, 'Can a person who obtains his certificate of naturalization by fraud be considered a "bona fide" citizen of the United States?"

Semicolon

The semicolon is used—

9.126. To separate phrases containing commas. (See also rule 9.129.)

Donald A. Peters, president of the First National Bank, was also a director of New York Central; Harvey D. Jones was a director of Oregon Steel Co. and New York Central; Thomas W. Harrison, chairman of the

Reptiles, amphibians, and predatory mammals swallow their prey whole or in large pieces, bones included; waterfowl habitually take shellfish entire; and gallinaceous birds are provided with gizzards that grind up the hardest seeds.

Yes, sir; he did see it. No, sir; I do not recall.

9.127. To separate statements that are too closely related in meaning to be written as separate sentences, and also statements of contrast.

Yes; that is right. No; we received one-third. It is true in peace; it is true in war. War is destructive; peace, constructive.

9.128. To set off explanatory abbreviations or words which summarize or explain preceding matter.

The industry is related to groups that produce finished goods; i. e., electrical machinery and transportation equipment.

There were involved three metal producers; namely, Jones & Laughlin, Armco, and Kennecott.

9.129. The semicolon is to be avoided where a comma will suffice. Regional offices are located in New York, N. Y., Chicago, Ill., and Dallas, Tex.

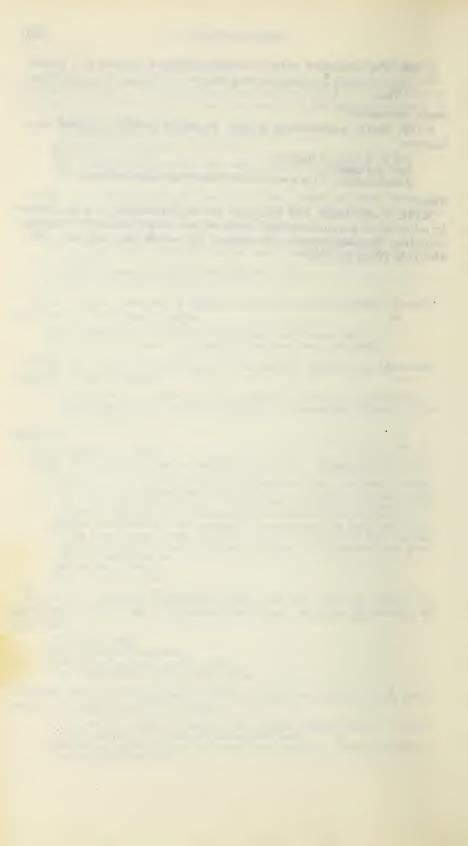

Single punctuation

9.130. Single punctuation is used wherever possible without ambiguity.

124 U. S. 321 (no comma)
Sir: (no dash)
Joseph replied, "It is a worthwhile effort." (no outside period)

Туре

9.131. Parentheses and brackets are set in roman, not in italic. In addition to parentheses and brackets, all other punctuation marks, including the dash, match the type of the words they adjoin. (See also rule 12.15, p. 162.)

(See also Foreign Languages; Numerals; Symbols)

10.1. Abbreviations are used to save space and to avoid distracting the mind of the reader by a needless spelling out of repetitious words

or phrases.

10.2. The nature of the publication governs the extent to which abbreviations are used. In text of technical and legal publications and in parentheses, brackets, footnotes, sidenotes, tables, leaderwork, and bibliographies, many words are frequently abbreviated. Cut-in sideheads, legends, tables of contents, and indexes follow the style of the text.

10.3. However, some scientific, technical, and industrial groups have adopted definite forms of abbreviations for terms in their specialized fields, and these forms are acceptable for use in publications falling within the respective classes. This does not apply to such common abbreviations as ft. b. m., ft.-c., ft.-lb., etc., even when used in a technical connotation, nor does it apply to the omission of periods

from abbreviations.

10.4. Standard and easily understood forms are preferable, and they should be uniform throughout a job. Abbreviations not generally known should be followed in the text by the spelled-out forms in parentheses the first time they occur; in tables and leaderwork such explanatory matter should be supplied in a footnote. As the printer cannot rewrite the copy, the author should supply these explanatory forms.

10.5. Abbreviations of measure should be used only with figures; similarly, many other abbreviations should not appear in isolation; for example, energy is measured in foot-pounds, not energy is measured in ft.-lb.; John was graduated with a bachelor of arts degree, not

John was graduated with a B. A. degree.

Capitals, hyphens, periods, and spacing

10.6. In general, an abbreviation follows the capitalization and hyphening of the word or words abbreviated. It is followed by a period unless otherwise indicated.

c. o. d. ft.-lb. St.

10.7. Except as otherwise designated, points and spaces are omitted after initials used as shortened names of governmental agencies and of other organized bodies. (See rule 10.44, p. 146.)

Geographic terms

10.8. The words *United States* are abbreviated if preceding the word *Government* or the name of a Government organization in

10.12. The names of other insular possessions, trust territories, Alaska, and Long Island, Staten Island, etc., are not abbreviated.

Addresses

(For use of numerals in addresses, see rule 11.12, p. 157.)

10.13. The words street, avenue, place, road, square, boulevard, terrace, drive, court, and building, following name or number, are abbreviated in footnotes, sidenotes, tables, and leaderwork.

10.14. In addresses, the abbreviations NW., SW., NE., SE., indicating sectional divisions of cities, are used, but North, South, East,

and West are spelled out at all times.

10.15. The word Street or Avenue as part of a name is not abbreviated even in parentheses, footnotes, sidenotes, tables, and leaderwork.

> M Street Bridge Ninth Avenue Building

10.16. The words county, fort, mount, point, and port are not abbreviated.

Descriptions of tracts of land

10.17. In the description of tracts of public land the following abbreviations are used (periods are omitted after abbreviated compass directions that immediately precede and close up on figures):

10.46. Even in commercial correspondence do not abbreviate instant, proximo, and ultimo.

yd., yard

yr., year

Terms of measure

10.47. Compass directions are abbreviated as follows:

10° N. 25° W. NNW. SW. ESE. NW. by N. 1/4 W. NE.

10.48. The words latitude and longitude, followed by figures, are abbreviated in parentheses, brackets, footnotes, sidenotes, tables, and leaderwork, and the figures are always closed up.

lat. 52°33′05" N.

long. 13°21′10" E.

10.49. Avoid breaking latitude and longitude figures at end of line; space out line instead. In case of an unavoidable break at end of line, use hyphen.

10.50. Temperature and gravity are expressed in figures and the

degree mark is used. Note the following abbreviations:

C.,¹ centigrade F., Fahrenheit Cel., Celsius R., Reaumur K., Kelvin abs., absolute

B., Baumé API, American Petroleum Institute Twad., Twaddell 32° F.1 273.1° K. 18° API

10.51. References to meridian in statements of time are abbreviated as follows:

10 a. m. 2:30 p. m. (use thin colon) 12 m. (noon) 12 p. m. (midnight)

10.52. The word o'clock is not used with abbreviations of time.

10.53. Metric abbreviations are set in lowercase, the same form being used for both singular and plural. The preferred abbreviation for cubic centimeter is cc.; use cm.3 only when requested.

Prefixes and their meaning milli = one-thousandth (0.001) centi = one-hundredth (0.01)deci = one-tenth(0.1)

[The unit equals 1] dk. deka = ten (10) h. hecto=one hundred (100)

Money

10.57. The following are some of the abbreviations and symbols used for indicating money:

\$, dol. (dollar)
c., ct., \$\psi\$ (cent, cents)
\$\mathbb{E}\$ (pound)
\$\mathbb{T}\pmu175\$ (Turkish)
\$\mathbb{S}\$ (shilling)

\$\mathbb{M}\mathrm{C}\mathrm{S}\$2,650
\$\mathrm{E}\$12 16s. 8d. (not 12/16/8)

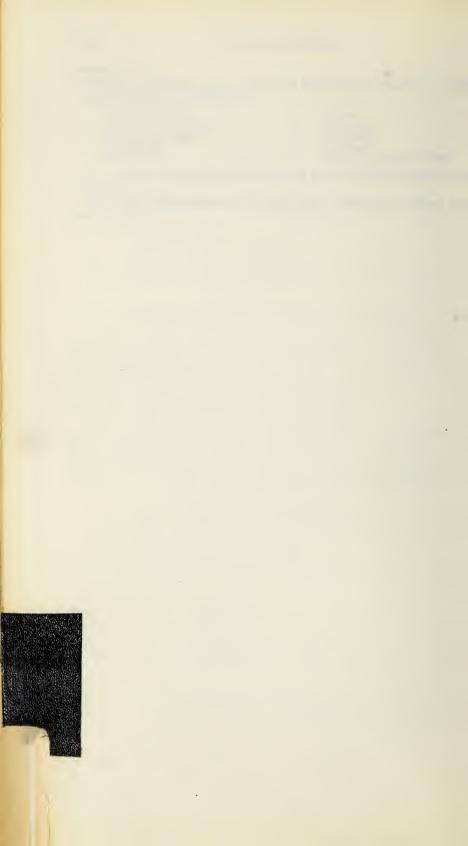

Use "US\$" if omission, in relatively rare instances, would result in confusion.

(For the abbreviations of other terms indicating foreign money, see p. 215.)

Numerals

Italio:

Signs and Symbols

11. NUMERALS

(See also Tabular Work; Leaderwork)

11.1. Most rules for the use of numerals are based on the general principle that numerals are more readily comprehended by the reader. particularly in technical, scientific, or statistical matter. However, for special reasons numbers are spelled out in indicated instances.

11.2. The following rules cover the most common conditions that require a choice between the use of numerals and words. Some of them, however, are based on typographic appearance rather than on

the general principle stated above.

11.3. Arabic numerals are generally preferable to Roman numerals.

NUMBERS EXPRESSED IN FIGURES

11.4. Figures are used for isolated numbers of 10 or more.

50 ballots 10 guns

24 horses nearly 10 miles

about 40 men 10 times as large

Numbers and numbers in series

11.5. Figures are used in a group of two or more related numerical expressions, even if each number is less than 10.

There were 3 committees, each consisting of 11 men.

There were 3 committees, each consisting of 5 men. A farmer owned 8 horses and 10 cows.

A farmer owned 8 horses and 10 cows.

A farmer owned 8 horses and 6 cows.

That man has 3 suits, 2 pairs of shoes, and 12 pairs of socks.

That man has 3 suits, 2 pairs of shoes, and 4 hats.

At the hearing, only 1 Senator and 1 Congressman testified.

Of the 13 engine producers, 6 were farm-equipment manufacturers, 6 were principally engaged in the production of other types of machinery, and 1 was not classified in the machinery industry.

Only 9 of these were among the large manufacturing companies, and only 3 were among the largest concerns.

There were three 6-room houses, five 4-room houses, and three 2-room

cottages, and they were built by 9 men.
Only 4 companies in the metals group appear on the list, whereas the 1947

census shows at least 4,400 establishments.

but If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

11.6. A unit of quantity or measurement (as defined in rule 11.9), always expressed in figures, affects the use of figures for other related or connected numerical expressions.

The 5 girls each earned 50 cents an hour.

A team of 4 men ran the 1-mile relay in 3 minutes 20 seconds.

This usually requires from 2 to 5 washes and a total time of 2 to 4 hours. There were two 6-room houses, three 4-room houses, and four 2-room cottages, and they were built by 9 men in thirty 5-day weeks.

11.7. Figures are used for serial numbers.

In referring to a fiscal year, consecutive years, or a continuous period of 2 years or more, when contracted, the forms 1906-38, 1931-32, 1801-2, 1875-79 are used (but 1895-1914, 1900-1901); for two or more separate years not representing a continuous period, a comma is used instead of a dash (1875, 1879); if the word from precedes the year or the word inclusive follows it, the second year is not shortened and the word to is used in lieu of the dash (from 1933 to 1936; 1935 to 1936, inclusive).

In dates, A. D. precedes the year (A. D. 937); B. C. follows the year (254 B. C.).

Ordinal numbers

11.10. Except as indicated in rule 11.19, and also for day preceding month, figures are used in text and footnotes to text for serial ordinal numbers beginning with 10th. In tables, leaderwork, footnotes to tables and leaderwork, and in sidenotes, figures are used at all times. Also, military units, except Army and Corps, are expressed in figures at all times. (For ordinals in addresses, see rule 11.12.)

11.11. When ordinals appear in juxtaposition, and one of them is 10th or more, figures are used for such ordinal numbers.

This legislation was passed in the 1st session of the 82d Congress.

He served in the 9th and 10th Congresses. From the 1st to the 82d Congress.

He represented the 1st, 4th, and 13th wards. We read the 8th and 12th chapters.

but The district comprised the first and second precincts. He represented the first, third, and fourth regions.

11.12. Beginning with 10th, figures are used in text matter for numbered streets, avenues, etc., but in tables, leaderwork, footnotes, and sidenotes, figures are used at all times, and street, avenue, etc., are abbreviated. (See also rule 10.13, p. 142.)

Fractions

(For spelled-out fractions, see rule 11.28, p. 159.)

11.13. Piece and em fractions (¼, ½, ¾, ¾, ½, ½, ½, ½) are used in text, but the shilling mark with full-sized figures (1/4, 1/2954) may be used if specially requested. A comma should not be used in any part of a built-up fraction of four or more digits or in decimals.

11.14. Fractions are used in a unit modifier.

½-inch pipe

¼-mile run

%-point rise

Punctuation

11.15. The comma is used in a number containing four or more digits, except in serial numbers, common and decimal fractions, astronomical and military time, and kilocycles and meters of not more than four figures pertaining to radio.

Chemical formulas

(See also Signs and Symbols, p. 163.)

11.16. In chemical formulas full-sized figures are used before the symbol or group of symbols to which they relate, and inferior figures are used after the symbol.

6PbS.(Ag,Cu)2S.2As2S3

NUMBERS SPELLED OUT

11.17. Numbers are generally spelled out at the beginning of a sentence, except in Q. and A. matter in testimony, hearings, etc., where numerals are used at the beginning of a sentence for years, sums of money of \$1 or over, decimals, street numbers, and cumbersome expressions.

11.18. A spelled-out number should not be repeated in figures, except in legal documents. In such instances these forms will be

observed:

five (5) dollars, not five dollars (5) ten dollars (\$10), not ten (\$10) dollars

11.19. Numbers mentioned in connection with serious and dignified subjects and in formal writing are spelled out.

the Thirteen Original States in the year nineteen hundred and forty-four the Seventy-eighth Congress millions for defense but not one cent for tribute

11.20. Numbers expressing time, money, or measurement separated from their unit descriptions by more than 2 words are spelled out if under 10. Treat alike all numbers in groups.

two and more separate years whether five or any number of years

but 5 successive years
4 calendar years
6 hard-earned dollars
5 up to 10 dollars

11.21. Numbers larger than 1,000, if spelled out, should be in the following form:

two thousand and twenty one thousand eight hundred and fifty one hundred and fifty-two thousand three hundred and five eighteen hundred and fifty (serial number)

11.22. Numbers of less than 100 preceding a compound modifier containing a figure are spelled out.

two %-inch boards twelve 6-inch guns but 120 8-inch boards

11.23. Indefinite expressions are spelled out.

the early seventies; but the 1870's a thousand and one reasons between two and three hundred horses ¹

midthirties in the eighties, not the '80's nor 80's but 1 to 3 million mid-1951

11.24. Except as indicated in rule 11.5 (p. 155), isolated numbers less than 10 are spelled out.

six horses five wells eight times a but 3½ cans 2½ times

eight times as large

11.25. In expressing large numbers, the word million (or a similar larger group term) should be spelled out.

20 million 4 millions \$2.5 billion 25½ million dollars; \$25½ million 2¾ billions; \$2¾ billions 285 million dollars; \$285 million

11.26. Related numbers close together at the beginning of a sentence are treated alike.

Fifty or sixty miles away is snowclad Mount McKinley.

11.27. Round numbers are spelled out.

a hundred cows a thousand dollars a million and a half one or two millions forty-odd people one-hundred-and-odd men one-hundred-odd pupils two-hundred-and-fifty-fold

11.28. Fractions standing alone are generally spelled out. A fraction in figures should not be followed by of a or of an.

three-fourths of an inch; not $\frac{3}{4}$ inch nor $\frac{3}{4}$ of an inch one-half inch one-half of a farm; not $\frac{1}{2}$ of a

one-half of a farm; not ½ of a farm one-fourth inch;

one-tourth inch;
or, if copy so reads:

five one-thousandths
thirty-five one-thousandths
but ½ to 1½ pages

one-tenth

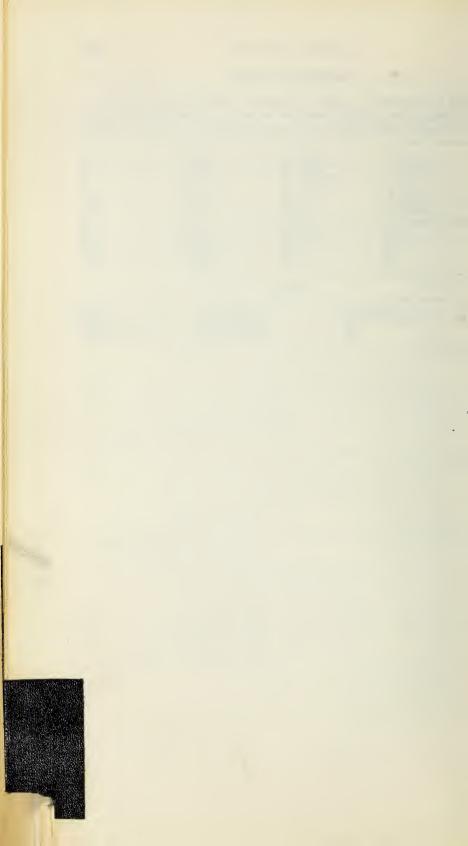

¹ Better: Between 200 and 300 horses.

ROMAN NUMERALS

11.29. A repeated letter repeats its value; a letter placed after one of greater value adds to it; a letter placed before one of greater value subtracts from it; a dashline over a letter denotes multiplied by 1,000.

Italia Signs and Symbols

12. ITALIC

(See also Courtwork; Symbols; Datelines, Addresses, and Signatures)

12.1. Italic is sometimes used to differentiate or to give greater prominence to words, phrases, etc. However, an excessive amount of italic defeats this purpose, and its use in general work should be restricted as indicated.

Emphasis, foreign words, titles of publications

12.2. Italic is not used for mere emphasis, foreign words, or the titles of publications unless it is specially requested and the copy is edited therefor.

12.3. In nonlegal work, ante, post, infra, and supra are italicized only when part of a legal citation. Otherwise these terms, as well as the abbreviations id., ibid., op. cit., et seq., and other foreign words, phrases, and their abbreviations, are printed in roman. (See also rule 18.29, p. 196.)

12.4. When "emphasis supplied," "emphasis added," or "emphasis ours" appears in copy, it should not be changed; but "underscore

supplied" should be changed to "italic supplied."

Names of vessels and aircraft

12.5. The names of vessels and aircraft are italicized unless otherwise indicated; in lists set in columns and in stubs and reading columns of tables consisting entirely of names of vessels or aircraft, they will be set in roman.

the liner America
the Friendship
the Bermuda Clipper
U. S. S. Silversides (submarine)
U. S. S. Wisconsin
ex-U. S. S. Savannah
U. S. C. G. S. (U. S. Coast and
Geodetic Survey) ship Pathfinder
U. S. C. G. (U. S. Coast Guard)
cutter Thetus; C. G. cutter
Thetus

the U-7
LST 1155
destroyer 31
H. M. S. Hornet
MS. (motorship) Richard
Forrestal (proposed name of vessel)
the Missouri's (roman "s")
turret
the U-7's (roman "s") deck
West Virginia class or type
but B-50 (type of plane)

12.6. Names of vessels are quoted in matter printed in other than lowercase roman.

Sinking of the "Lusitania"
SINKING OF THE "LUSITANIA"
Sinking of the "Lusitania"
SINKING OF THE "LUSITANIA"

Names of legal cases

12.7. The names of legal cases are italicized, except the v. When requested, the names of such cases may be set in roman with italic v.

"The Hornet" and "The Hood," 124 F. (2d) 45 Smith v. Brown et al. but Smith v. Brown et al. (heading) SMITH v. BROWN ET AL. (heading)

Scientific names

12.8. The scientific names of genera, subgenera, species, and subspecies (varieties) are italicized, but are set in roman in italic matter: the names of groups of higher rank than genera (phyla, classes, orders, families, tribes, etc.) are printed in roman.

Tsuga canadensis Cypripedium parviflorum var. pubescens the genera Quercus and Liriodendron the family Leguminosae Measurements of specimens of Cyanoderma erythroptera neocara

12.9. Quotation marks should be used in place of italic for scientific names appearing in lines set in caps, caps and small caps, or boldface, even if there is italic type available in the series.

Words and letters

12.10. The words Resolved, Resolved further, Provided, Provided, however, Provided further, And provided further, and ordered, in bills, acts, resolutions, and formal contracts and agreements are italicized; also the words To be continued, Continued on p. —, Continued from p. —, and See and see also (in indexes and tables of contents only).

Resolved, That (resolution)
Resolved by the Senate and House of Representatives of the United
States of America in Congress assembled, That
[To be continued] (centered; no period)
[Continued from p. 3] (centered; no period)
see also Mechanical data (index entry)

12.11. All letters (caps, small caps, lowercase, superiors, and inferiors) used as symbols are italicized, but in italic matter roman letters are used. Chemical symbols (even in italic matter) and certain other standardized symbols are set in roman. (See also rule 13.8, p. 163.)

nth degree $D \div 0.025 V_{m^{2.7}} = \frac{0.042}{G-1} V_{m^{2.7}}$

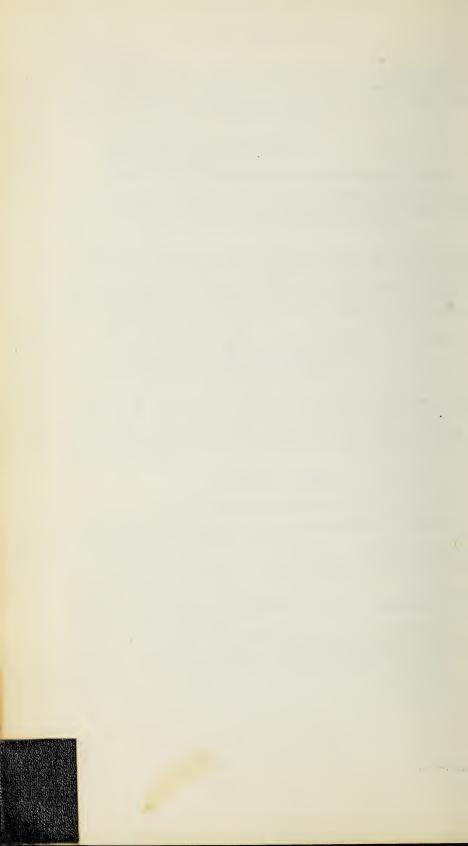

5Cu₂S.2(Cu, Fe, Zn)S.2Sb₂S₃

12.12. Letter designations in mathematical and scientific matter, except chemical symbols, are italicized.

12.13. Letter symbols used in legends to illustrations, drawings, etc., or in text as references to such material, are set in italic without periods and are capitalized if so shown in copy.

12.14. Letters (a), (b), (c), etc., and a, b, c, etc., used to indicate sections or paragraphs are italicized in general work but not in laws and other legal documents.

12.15. Parentheses and brackets adjoining italicized words are set in roman. In italic matter, a mark of punctuation immediately following a roman parenthesis or bracket is also set in roman. Other punctuation marks match the type of the words they adjoin. (See also rule 9.131, p. 139.)

13. SIGNS AND SYMBOLS

13.1. The increased use of signs and symbols and their importance in technical and scientific work have emphasized the necessity of standardization on a national basis and of the consistent use of the standard forms.

13.2. Certain symbols are well standardized—number symbols (the digits, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9), letter symbols (the letters of the alphabet, a, b, c, d, etc.), and graphic symbols (the mathematical signs $+, -, \times, \div$).

13.3. The Government Printing Office will furnish at cost new

special symbols for technical matter when necessary.

13.4. In mathematical and chemical equations the signs $+, -, \times$, and + are closed against accompanying symbols. When the X is used to indicate "crossed with" (in plant or animal breeding) or magnification, it will be separated from the accompanying words by a space. Thus: Early June X Bright; X 4.

Symbols with figures

13.5. The degree mark is always used in lieu of the word degree

following a figure denoting measurement.

13.6. Any symbol that is set close up to figures, such as the degree mark, Greek mu, dollar mark, or commercial c (°, μ , \$, ¢), is used before or after each figure in a group or series.

45° to 65° F., not 45 to 65° F. 30µ and 50µ \$5 to \$8 price range 5'-7' long, not 5-7' long

3¢ to 5¢ (no spaces) ±2 to ±7 but § 12 (thin space)

Letter symbols

13.7. Letter symbols are set in italics without periods and are capitalized only if so shown in copy, since the capitalized form may have an entirely different meaning. However, a few symbols are set in roman if so indicated in copy.

Equations

13.8. In mathematical equations, use italic for all letter symbols capitals, lowercase, small capitals, and superiors and inferiors (exponents and subscripts); use roman for figures, including superiors and inferiors.

13.9. If an equation or a mathematical expression needs to be

divided, break after plus or minus, but before equal sign.

13.10. A short equation in text should not be broken at the end of a line. Space out the line so that the equation will run over to the next line; or better, center the equation on a line by itself.

13.11. An equation too long for one line is set flush on the left, the second half of the equation is set flush on the right, and the two

parts are balanced as nearly as possible.

13.12. Two or more equations in series are alined on the equal signs and centered on the longest equation in the group.

13.13. Connecting words of explanation, such as hence, therefore, and similarly, are set flush either on the same line with the equation or on a separate line.

13.14. If a built-up fraction occurs in one part of an equation, all

other fractions in that line must be built up.

13.15. Parentheses, braces, brackets, integral signs, and summation signs should be of the same height as the mathematical expressions they include.

13.16. Inferiors precede superiors if they appear together; but if

either inferior or superior is too long, the two are alined on left.

$$\sqrt{\Phi} = \sum_{k=0}^{m} {}^{k} (A_k \cos k\psi + B_k \sin k\psi) \tag{1}$$

$$= A_2 \left\{ 2g \frac{p_1}{v_1} \left(\frac{\gamma}{\gamma - 1}\right) \left[\left(\frac{p_2}{p_1}\right)^{\frac{2}{\gamma}} - \left(\frac{p_2}{p_1}\right)^{\frac{\gamma + 1}{\gamma}}\right] \right\}^{\frac{1}{2}}$$

$$(3)$$

$$\omega_{n}(x,\theta_{x}) = \frac{1}{\sqrt{r_{1}r_{2}}} \int_{0}^{x} dx_{2} \int_{0}^{x_{2}} dx_{1} \cos n\psi_{x}(x_{1},x_{2})$$

$$\left[\frac{r_{1}r_{2}}{p_{1}p_{2}} \left(\phi_{n-1}(k_{1}) + \phi_{n+1}(k_{1}) \right) + 2\phi_{n}(k_{1}) \right]$$
(4)

$$m_{s_1 s_2} = \int_{x_{i_1}}^{x_{s_1}} dx_1 \int_{x_{i_2}}^{x_{s_2}} dx_2 \int_0^{2\pi} \frac{d\theta_1}{2\pi}$$

$$\int_0^{2\pi} \frac{d\theta_2}{2\pi} \frac{\frac{r_1 r_2}{p_1 p_2} \cos\left(\theta_2 - \theta_1\right) + 1}{\sqrt{(x_2 - x_1)^2 + R^2(\theta_2 - \theta_1)}}$$

$$= \int_{x_{i_1}}^{x_{i_1}} dx_1 \int_{x_{i_2}}^{x_{i_2}} dx_2 \int_0^{2\pi} \frac{d\psi}{2\pi} \frac{\frac{r_1 r_2}{p_1 p_2} \cos \psi + 1}{\sqrt{(x_2 - x_1)^2 + R^2(\psi)}}$$

 (6)

Chemical symbols

13.17. The chemical elements are designated by the initial letter or a shortened form of the English or Latin name. They are set in roman, without periods.

$$2(KHC_4H_4O_6) + CaCO_3 = CaC_4H_4O_6 + K_2C_4H_4O_6 + H_2O + CO_1$$

Standardized symbols

13.18. Symbols duly standardized by any national scientific, professional, or technical group are accepted as preferred forms within the field of the group. The issuing office desiring or requiring the use of such standardized symbols should see that copy is prepared accordingly.

Known as glucinium in some European countries.

From Fragmentum in some European countries.

Formerly lutecium.

This is a defined value rather than an indicated one.

Formerly protoactinium.

Because of natural variations in the abundance ratio of the isotopes of sulfur, the atomic weight of this element has a range of ± 0.003 .

14. TABULAR WORK

(See also Abbreviations; Leaderwork)

14.1. The object of a table is to present in a concise and orderly manner information that could not be presented so clearly in any other way.

14.2. Tabular material should be kept as simple as possible, so that

the meaning of the data could be easily grasped by the user.

14.3. Unless otherwise specified, tables will be set in 6-point, and 2-point hairline rules will be used.

Abbreviations

14.4. The names of months (except May, June, and July) when followed by the day are abbreviated; otherwise months are spelled. However, in narrow reading columns consisting solely of single months. the months may be abbreviated. (For examples, see rule 14.36, p. 170; rules 14.53-14.55, p. 171.)

14.5. The words street, avenue, place, road, square, boulevard, terrace, drive, court, and building, following name or number, are abbreviated.

For the numbered streets, avenues, etc., figures are used.

14.6. Abbreviate the words *United States* if preceding the word

Government or the name of any Government organization.

14.7. Use the abbreviations RR. and Ry. following name (except as indicated in rule 10.24, p. 143) and SS. preceding name.

14.8. Use lat. and long. with figures.

14.9. Abbreviate when followed by figures the various parts of

publications, as article, part, section, etc. (See rule 10.34, p. 145.) 14.10. Use, generally, such abbreviations and contractions as 74th Cong., 2d sess., H. Res. 5, H. J. Res. 21, S. Doc. 62, S. Rept. 410 (see rules 10.38, 10.39, p. 145), Rev. Stat., Stat. L., etc., when with figures.

14.11. In columns containing names of persons, copy is followed

as to abbreviations of given names.

14.12. Periods are not used after abbreviations followed by leaders, but are used before footnote references.

Bearoff

(For examples, see rule 14.30, p. 169; rule 14.82, p. 173; and rules

14.119-14.122, p. 176.)

14.13. An en quad is used for bearoff from both rules in an inside reading or date column, from the rule on the right in a figure column, and from the adjacent rule in an outside reading or date column.

14.14. In a crowded table the bearoff may be omitted in figure

columns.

14.15. Indicated clears and indentions are in addition to bearoff.

14.16. Fractions are set flush to the rule, as shown in example to rule 14.121, except in double-up tables in column preceding parallel rule and in tables in rules. (See rule 14.146, p. 178.)
14.17. Mathematical signs, parentheses, and brackets, when pre-

ceded by figures are not borne off.

Blanks

14.18. Blank lines are omitted unless their retention is specially requested.

Boxheads

14.19. Periods are omitted after boxheads, but a dash is used after any boxhead that reads into the matter below.

14.20. Boxheads are set solid and bear off an em space above and

below rule unless they run up.

14.21. Boxheads are centered, except that in a column 10 ems or more in width, a head of 3 lines or more is set with hanging indention.

14.22. Boxheads run crosswise wherever practicable; if necessary to run up, they are reduced to the minimum practicable depth. If one head must run up, all heads over figure columns in the same table run up, except years expressed in figures, which run across for better appearance. Running up over reading and date columns is to be avoided. Boxheads need not run up in all parts of divided tables.

14.23. Runup heads are indented an en quad at the beginning of the line and bear off an en quad from the top rule; if they make two lines, the second is centered; if three lines, they are set with hanging

indention.

14.24. If a single box exceeds the depth of a double or triple box,

the extra space is placed in the lowermost box.

14.25. In compound boxes the greatest number of lines in a top box controls the depth of all the top boxes, unless the total depth of the head would thereby be increased; so also in each of the other boxes. The top box of a triple boxhead may be of such depth as to make a better appearance by alining its bottom rule with the bottom rule of the second box.

14.26. In boxes containing two lines, the first line is to be the longer if possible; but good appearance must not be sacrificed by dividing short words or making two-letter divisions in wide columns.

14.27. In parallel tables, and when so prepared in divide tables, a boxhead that is divided is repeated on subsequent pages with the

word Continued.

14.28. In referring to quantity or things, the word Number in box-

heads is spelled if possible.

14.29. In an 8-point table with a 6-point boxhead, an 8-point quadline is inserted between head and body of table if no italic unit of

quantity is given; if a unit of quantity is given, use a 6-point quadline and set unit of quantity in 6-point italic.

Braces

14.30. Braces are avoided if possible; if used, they are placed on the right of a rule and should include overruns. (See rule 14.37, p. 170.)

Centerheads, flush entries, and subentries

14.31. Centerheads over tables are set solid over solid tables and leaded over leaded tables; they follow the style of the tables as to

the use of figures and abbreviations.

14.32. Except as indicated in rule 2.40, heads and headnotes over parallel tables center over the two-page spread of tables, except short lines. In heads over parallel tables, words are not divided between pages.

14.33. In divide tables that are made up parallel, the heads and headnotes are set over parallel tables; the heads but not the headnotes repeat on each succeeding page; the word *Continued* is used.

14.34. Punctuation is omitted after centerheads. Flush entries and subentries over subordinate items are followed by a colon (single subentry to run in, preserving the colon), but a dash is used instead

of a colon when the entry reads into the matter below.

14.35. In reading columns if centerhead clears reading matter below at least an em and there are leaders, no space is used under the head; if there are no leaders below and centerhead clears at least an em, the quadline is omitted; if it clears less than an em, a full quadline is used. (See also rule 14.36.) However, if an overrun, dashline, etc., in another column, or in the same column, creates a blank space above the head, the extra quadline is not added.

above the head, the extra quadline is not added. (See also rule 14.58, p. 172.)

Ciphers

14.38. Where the first number in a column or under a cross rule is wholly a decimal, a cipher is added at the left of its decimal point. A cipher used alone in a money or other decimal column is placed in the unit row and is not followed by a period. In mixed units the cipher is repeated before each decimal unless the group is totaled.

14.39. Copy is followed in the use of the word *None* or a cipher to indicate *None* in figure columns. If neither one appears in the copy, leaders are inserted.

14.40. In columns of figures under the heading £ s. d., if a whole number of pounds is given, one cipher is supplied under s. and one under d.; if only shillings are given, one cipher is supplied under d.

14.41. In columns of figures under Ft. in., if only feet are given, supply cipher under in.; if only inches are given, clear under Ft.; if ciphers are used for None, place one cipher under both Ft. and in. 14.42. In any column containing sums of money, the period and

14.42. In any column containing sums of money, the period and ciphers are omitted if the column consists entirely of whole dollars. In columns containing both dollars and cents, ciphers will be supplied on right of decimal point in the absence of figures.

Continued heads

14.43. In continued heads an em dash is used between the head and the word *Continued*. The abbreviation *Con*. is used only to avoid an overrun. If the head is in small caps, the term *continued* or *con*. is not capitalized.

14.44. In centerheads set in caps, caps and small caps, or italic, the word *Continued* is set in roman cap and lowercase; in a heading set in boldface caps or lowercase, the word *Continued* is set in cap and lowercase of the same font as the head. No period is carried after a continued line.

14.45. In stub and boxheads, Continued is always set in roman.

14.46. Continued heads over tables are to be condensed into one line if possible. Notes above tables are not repeated unless necessary to make the table clear; but footnote references are repeated in boxheads and in continued lines unless special instructions are given not to do so.

Dashes or rules

14.47. Dashes or rules are not carried in reading or date columns.

14.48. Parallel dashes are used to cut off figures from other figures below that are added or subtracted; also above a grand total. (For example, see rule 14.35, p. 169.)

14.49. Rules may be used in place of dashes in a crowded table.

Date columns

14.50. There are two kinds of standard date columns: (1) Each item contains month and day, and (2) each item is made up of month, day, and year.

14.51. In 6-point tables, standard date columns with month and day are cast 4½ ems for outside and 5 ems for inside columns; with

month, day, and year, 7 and 71/2 ems, respectively.

14.52. Standard date columns with month and day in 8- and 10-point tables are cast 4 ems for outside and 4½ ems for inside columns; with month, day, and year, 6½ and 7 ems, respectively.

14.53. The figures are alined on the right, and extra space, if any, is inserted between the month and day. An en comma is used between the day and the year.

14.56. A standard date column is not considered a reading column. and no period is used after the date if the column is the last one of the table; however, a column consisting entirely of dates but not a

standard date column is considered a reading column.

14.57. In a standard date column, footnote references are placed at right against rule, with 3 units justified on such references; but in a standard date column that is the last column of a table, footnote references are placed on left with 3 units justified on character following

14.58. If the year is centered as a head in a standard date column.

it is set in italic with a full quadline above but no space below.

14.59. In columns consisting entirely of single and double years or of double years, figures are centered in columns without leaders.

(See also Units of quantity, rule 14.155, p. 179.)

14.60. The abbreviation do. is used in reading and date columns only, lowercased and preceded by leaders when figures or text is used in preceding column.

14.61. Capitalize do. in first and last columns.
14.62. Tracing columns are counted as the first and last columns of table.

14.63. All do.'s should be uniform throughout column; if any one is lowercased, all in the column should be lowercased and preceded leaders. (For example, see rule 14.53, p. 171.)

14.64. In mixed columns made up of figure and reading-matter

items, do. is used only under the latter items.

A_2a_4	Т	1.0	8.0	28.0	44. 8	31. 4

A_2a_2Bb	143:1 35:1	6.3 1.0	3. 6 0	1.8	1.6	1.0 1.0

14.65. Do. is not used: (1) In a figure column; (2) in the first line under a centerhead in the column in which the centerhead occurs; (3) under a line of leaders, a dashline, or a rule; (4) under an item italicized or set in boldface type for a specific reason (italic or boldface do. is never used; item is repeated); (5) under an item consisting wholly of figures or combination of letters and figures; (6) in a reading column containing only Yes and No; or (7) under an abbreviated unit of quantity.

14.66. Do. is used, however, under a blank space and under the

word *None* in a reading column.

14.67. Do. does not apply to a reference mark on the preceding The reference mark, if needed, is added to do. (See rule 14.53, p. 171.)

14.68. Do. is not used under a braced group.

14.69. Leaders are not used before Do. in the first column or before

or after Do. in the last column.

14.70. In a first column 6 ems or less in width, a 1-em quad is used before Do.; in all other columns 6 ems or less in width, 1½ ems of leaders are used, except in a last column, in which quads are used in

place of leaders. Bearoff is included.

14.71. In a first column more than 6 ems in width, 2 ems of quads are used before Do.; in all other columns more than 6 ems in width, 2½ ems of leaders are used, except in a last column, in which quads are used in place of leaders; bearoff is included. If the preceding line is indented, the indention of do. is increased accordingly.

14.72. Do. under an indented item in an inside reading column, with or without matter in preceding column, is preceded by 2 ems

of leaders, which are indented to aline with item above.

14.73. Do., followed by 2 ems of leaders, is used under a unit of quantity in a stub if the unit is spelled; if the unit is abbreviated, the abbreviation is repeated. (For sample, see rule 14.154, p. 179.)

14.74. When so prepared, inverted commas may be used instead

of the abbreviation do.

Dollar mark

14.75. The dollar mark or any other money symbol is placed close to the figure; it is used only at the head of the table and under cross rules when the same unit of value applies to the entire column.

14.76. In columns containing mixed amounts (as money, tons, gallons, etc.), the dollar mark, pound mark, peso mark, or other symbol, as required, is repeated before each sum of money.

14.77. If several sums of money are grouped together and added to make a total, they are separated from the preceding figures by a parallel dash, and the symbol is placed on the first figure of the separated group only.

14.78. In a double money column, dollar marks are used in the first group of figures only; en dashes or words are alined. (See also

rule 14.141, p. 178.)

14.80. Dollar mark should be repeated in stub or reading columns.

\$1 to \$24_____ \$25 to \$49_____ \$50 to \$74_____

Double-up tables

14.81. If the matter in the stub under a centerhead, flush entry, or subentry breaks and is carried over to the second part of a double-up table, a continued head is inserted at the top of the second part.

14.82. An en-quad bearoff is used on each side of the parallel rule separating the two parts of a double-up table. This applies also to leaders, dashes, and fractions in the last column of the first part, but not to rules in boxheads. (See also rules 14.119-14.121, p. 176.)

Figure columns

14.83. Figures aline on the right. In a crowded table the en-quad bearoff may be omitted from the figure columns; but if only a few figures will touch the rule on the left, it is preferable to retain the bear-off on the right. The whole table, including all parts of a divided table, must be treated alike. (For example, see rule 14.30, p. 169.) 14.84. A one-line overrun in a figure column is set flush on right;

an overrun of more than one line is indented an em on left under first

line and is followed by a period.

14.85. When figures occur in parentheses, the parentheses are set against the rule and the figures alined on right. In tables set "Figs. against," parentheses are cleared. (For example, see rule 14.82.)

14.86. In double rows of figures in a single column, connected by a dash, a plus or minus sign, or the word to or a similar connecting word, and in dates appearing in the form 2-12-43, the dashes, signs, or

words are alined.

14.87. Plus or minus signs at the left of figures are placed close to the figures regardless of alinement; plus and minus signs at the right of figures are placed against the rule and are cleared. (For example, see rule 14.38, p. 170.)

14.88. Words and Roman numerals in figure columns are alined on

the right with the figures, without period.

9 BQ 783	V D A	Algol Olive R. Direct Light Blue BV. Kiton Fast Red 4BL.	P	Sandothrene Olive N2R Durazol Blue 2GS Erio Fast Red 4BL	

14.90. Figures (including decimal and common fractions) expressing mixed units of quantity (feet, dollars, etc.) and figures in parentheses are alined on the right.

14.91. Decimal points are alined except in columns containing numbers that refer to mixed units (such as pounds, dollars, and per-

centage) and have irregular decimals.

14.92. Copy preparers should indicate at top of each folio the clear necessary for decimals; indicated clear does not include bearoff.

14.93. In a table that is doubled up, the maker-up should transpose unnecessary clearance space so that all columns will have the proper bearoff. (For examples, see rule 14.38, p. 170; rule 14.64, p. 172; and rule 14.121, p. 176.)

Footnotes and references

14.94. Footnotes to tables are numbered independently from footnotes to text.

14.95. Figures are used for footnote references, beginning with 1 in each table.

14.96. If figures might lead to ambiguity (for example, in connection with a chemical formula), asterisks, daggers, or italic superior

letters, etc., may be used.

14.97. When an item carries several reference marks, the superior-figure reference precedes an asterisk, dagger, or similar character used for reference. (See rule 16.14, p. 186.) These, in the same sequence, precede mathematical signs. A thin space is not used to bear off an asterisk, dagger, or similar character.

14.98. If a reference is repeated on another page, it should carry the original footnote; but, to prevent repetition, especially of a long note, it may carry instead, as a cross-reference, the words "See foot-

note 1 [or 2, 3, etc.], p. —."

14.99. Footnote references are repeated in boxheads or in continued

lines over tables unless special orders are given not to do so.

14.100. References to footnotes are numbered consecutively across the page from left to right and across both pages in a parallel table. (For example, see rule 14.154, p. 179.)

14.101. Footnotes to a parallel table begin on the even page unless

there are no references on that page.

14.102. In a divide table, references to footnotes are numbered consecutively across and down the first part of the divide, then

similarly in the second part.

14.103. Footnote references are placed at the right in reading columns and date columns, and at the left in figure columns (also at the left of such words as *None* in figure columns) and in symbol columns, and are borne off. However, if a date column is the last column, the references are placed at the left. (See also rule 14.57, p. 172.)

14.104. Two or more footnote references occurring together are separated by spaces, not commas. (For example, see rule 14.154,

p. 179.)

14.105. In a figure or date column, a footnote reference standing alone is set in parentheses and centered. In a reading column, it is set at the left in parentheses and is followed by leaders, but in the last column it is followed by a period and quads, as if it were a word.

14.106. The numbered footnotes are placed immediately beneath the table. Should it be requested that a sign or letter reference in the heading to a table be followed, it is not changed to become the first numbered reference mark, and the footnote to it precedes all other footnotes. If the table runs over more than one page, the appropriate footnotes go with each page.

14.107. For better makeup or other reason, all footnotes may be placed at the end of a table making more than one page. It is then necessary to supply at the bottom of each page "See footnotes at end

of table, p. —.

14.108. If the footnotes to both table and text fall together at the bottom of a page, the footnotes to the table are placed above the footnotes to the text, and the two groups are separated by a 50-point rule flush on left; but if there are footnotes to the text and none to the table, the 50-point rule is omitted.

14.109. Footnotes to cut-in tables are set in the same measure as

the tables.

14.110. Footnotes are set as paragraphs, but two or more short footnotes may be combined by the maker-up in one line, with the blank spaces equalized, provided the spaces are not less than 2 ems.

14.111. In a series of short footnotes, the reference numbers are

alined on the right.

14.112. Footnotes in measures 30 picas or wider are set doubled up. 14.113. The footnotes and notes to tables are set solid if the table is solid and leaded if the table is leaded.

14.114. Footnotes and notes to tables are usually set in type 2 points

smaller than the table, but not smaller than 6-point.

14.115. Footnotes to tables follow tabular style in the use of abbreviations, figures, etc.

14.116. In footnotes, numbers are expressed in figures, even at the

beginning of a note or sentence. (For fractions, see rule 14.122.)
14.117. If a footnote consists entirely or partly of a table, the footnote table is indented 3 ems on left. It should always be preceded by introductory matter carrying the reference number; if necessary, copy preparer should add an introductory line, such as "1 See the following table:".

14.118. An explanatory paragraph without specific reference but belonging to the table rather than to the text follows the footnotes, if any, and is separated from them or from the table by 2 leads.

Fractions

14.119. Piece and em fractions are set flush to the rule on the right. Whole numbers clear the fractions throughout the columns except in columns containing numbers indicating mixed units (such as pounds, dollars, and percentages), which are alined on the right.

14.120. Where fractions of different length occur in the same column, the longest is set flush to the rule on the right and the others

are set to aline with it on the left. Copy preparers should indicate at top of each column the clear necessary for fractions.

14.121. In a table that is continued or doubled up, the maker-up should transpose unnecessary clearance space so that all columns will have the proper bearoff.

14.122. Fractions standing alone are expressed in figures, even at the beginning of a line, but not at the beginning of a footnote.

Headnotes

14.123. Headnotes should be set in lowercase, 2 points smaller than the table but not smaller than 6-point, bracketed, and period omitted at end, even if the last statement is a complete sentence; but periods should not be omitted internally if required by sentence structure.

14.124. Headnotes are not repeated with continued heads unless

necessary to make table clear.

Italic

14.125. Names of vessels and aircraft (except in reading columns consisting entirely of such names), titles of legal cases (except v. for versus), and certain scientific terms are set in italic. The word "Total" and headings in the column do not affect the application

14.126. Set "See" and "see also" in roman. (See also rule 16.21, p. 186.)

Leaders

14.127. Leaders run across the entire table except that they are omitted from a last reading column or a first or last date column. (For example, see rule 14.53, p. 171.)

14.128. If there is only one reading column in a table, leader from bottom line of an overrun, but when several items are listed on one

item in stub, without brace and cleared, leader from top line.

14.129. If there is more than one reading column, leader from top line, and the overrun ends with a period. (For example, see rule 14.53, p. 171.)

14.130. A standard date column is not regarded as a reading

14.131. In parallel tables and in tables with tracing figures on left and right of page, leader from top line.

Letterspaced words

14.132. Words in a line are letterspaced if more than 1½ ems would otherwise be required between words. All of a short word is letterspaced rather than only part of a long one.

Overruns

14.133. An overrun is indented 1 em more than the first line of the item; but to prevent confusion with a following subordinate item, the overrun is cut in 1 em more than the first line of such subitem. example, see rule 14.151, p. 179.)

Parallel and divide tables

14.134. Heads and headnotes over parallel tables center over the two-page spread of tables, except short lines.

14.135. Words are not divided between pages in heads over parallel

tables.

14.136. Boxheads are not divided but are repeated, with the word Continued added.

14.137. Rules are used on the right of even pages and the left of

odd pages.

14.138. In divide tables that are made up parallel, with stub repeated, the heads, but not the headnotes, repeat on each succeeding

page, and the word Continued is used.

14.139. Tables with tracing figures or stub, or both, repeating on the left of odd pages, are divide tables and not parallel tables, and over such tables the heads are repeated with the word Continued; rules are not used on right of even pages and left of odd pages.

Reading columns

14.140. Figures or combinations of figures and letters used to form a reading column aline on left and are followed by leaders. Do. is not used under such items.

14.141. The en dash is not to be used for to in a reading column; if both occur, change to to throughout.

14.142. Cut-in items following a colon are indented 2 ems in addi-

tion to the en quad used for bearoff.

14.143. Run in single entry under colon line; retain the colon.

14.144. The last word in a leader line must be followed by at least an en leader.

14.145. Numerical terms, including numbered streets, avenues, etc., are expressed in figures, even at the beginning of an item. (See also rule 10.13, p. 142, and rules 11.10–11.12, p. 157.)

Tables in rules

14.146. All figures, including fractions, are centered in column if width of column permits; otherwise they bear off an em or en quad each side of the rules according to width of column. Except when centered, the first and last columns, including leaders and fractions, must bear off an em quad from the outside rules.

14.147. In tables consisting entirely of figure columns, the figures are centered in each column and alined on right. In figure columns,

leaders are borne off 1 em on each side.

14.148. Matter in boxheads takes no extra bearoff.

14.149. Centerheads and headnotes are set the full measure of the job. Short footnotes are set the width of the table; but for good typographic appearance, long footnotes should be set the full measure of the job.

Tables without rules

14.150. In tabular matter set without down rules, the same arrangement and bearoffs will prevail as in ruled tables, except that leaders and dashlines will bear off an en space, the same as type, so that an em space will appear between columns.

14.151. If column headings are used in a table without rules set in

6- or 8-point, such heads are to be set in 6-point italic, solid.

Total, mean, and average lines

14.152. The usual indention of the word *Total* is 3 ems; but if stub is too narrow, the indention may be 1 em. If the indention of the preceding line interferes, *Total* is indented 1 em more than preceding line. It is not necessary to maintain uniform indention of the word *Total* throughout the page. The word *Total* is supplied when not in copy. (For example, see rule 14.35, p. 169.)

14.153. Mean and Average are treated in a similar manner.

Units of quantity

14.154. Units of quantity in stub columns are placed on the right, 1-em leader from the rule. If the item does not make a full line but is too long to permit the insertion of the unit of quantity, the line is quadded out and the unit of quantity is placed on the next line at the right, preceded by quads and followed by 1 em of leaders.

14.155. Do. is used under a spelled unit of quantity in a stub and in an independent column consisting entirely of such units, but do.

is never used under an abbreviated unit of quantity.

14.156. Over figure columns, units of quantity and other words used as headings, and the abbreviations a. m. and p. m., if not included in the boxheads, are set in 6-point italic and are placed immediately above the figures, without periods other than abbreviating periods. Any well-known abbreviation will be used to save an overrun, but if one unit of quantity is abbreviated, all in the same table will be abbreviated. If units change in a column, the new units are set in italic, with full quadline above and no space below.

14.157. Units of quantity and other words as headings over figure columns are used at the beginning of a table or at the head of

a continued page or continued column in a double-up table.

15. LEADERWORK

(See also Abbreviations; Tabular Work)

15.1. Leaderwork is a simple form of tabular work without box-heads or rules. In general, leaderwork (except indexes and tables of contents, which are set the same style as text) is governed by the same rules of style as tabular work. Unless otherwise indicated, leaderwork is set in 8-point. The period is omitted immediately before leaders.

Bearoff

15.2. No bearoff is required in a reading column.

Columns

15.3. A figure column is at least an en quad wider than the largest group of figures, but not less than 2 ems. Between 2 figure columns use at least a 1-em quad. Dashlines are to be the full width of the figure column.

15.4. If the last column is a reading column, leaders are run within an en quad of the first word; but if the first column overruns, it is indented an additional en space from the first word of the last column.

Continued heads

15.5. If leaderwork continues on a following page or is doubled up, continue center and side heads, including colon lines, in stub; also units of quantity or other words over figure and reading columns. In leaderwork set broad measure, no heads or units of quantity are repeated when the matter continues on the facing page. (See also rules 14.43–14.46, p. 170–171.)

Ditto

15.6. The abbreviation do. is capitalized and preceded by quads in stub; it is capitalized and preceded and followed by quads in last reading column; it is lowercased when used under a unit of quantity in stub.

Dollar mark and ciphers

15.7. The dollar mark or any other money symbol is used at the beginning of each statement, on the first line of double-up matter, at the head of a continued statement, and on the first line of each cut-in group. A dollar mark or any other money symbol does not carry through leaders in leaderwork.

15.8. In a column containing mixed amounts (as money, tons, gallons, etc.) the figures are alined on the right, and the dollar mark or other symbol is repeated before each sum of money. If several sums of money are grouped and added to make a total, they are separated from the preceding figures by a parallel dash, and the symbol is placed on the first figure of the separated group only.

15.9. If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

Flush items and subheads

15.10. Flush items clear the figure column.

15.11. Subheads are centered in full measure; if they extend to the figure column, the figure column and an equal space on the left are cleared.

Footnotes

15.12. Footnotes to leaderwork follow the style of footnotes to tables.

15.13. Footnote references begin with 1 in each statement, and footnotes are placed at end of statement, separated from it by 2 leads. Separate notes from matter following by not less than 6 points.

15.14. If the leaderwork runs over from one page to another, the appropriate footnotes are carried on each page, and are repeated as

necessary.

15.15. If the footnotes to leaderwork and text fall at bottom of page, the footnotes to leaderwork are placed above footnotes to text and the two groups are separated by a 50-point rule, flush on the left.

Units of quantity

15.16. Units of quantity or other words over a stub or figure column are set in 6-point italic and are separated from leaderwork by 2 points.

Examples 1

15.17. The example below shows the style to be observed where there is a short colon line at left. In case of only one subentry, run in with colon line and preserve the colon.

16. TEXT FOOTNOTES, INDEXES, AND CONTENTS

Footnotes and reference marks

(For footnotes in tabular work, see p. 174.)

16.1. Except as noted under Abbreviations (p. 141), footnotes to

text follow the style of text.

16.2. In a publication divided into chapters, sections, or articles, each beginning a new page, text footnotes begin with 1 in each such division. In a publication without such divisional grouping, footnotes are numbered consecutively from 1 to 99, and then begin with 1 again. However, in supplemental sections, such as appendixes and bibliographies, which are not parts of the publication proper, footnotes begin with 1.

16.3. Copy preparers must see that references and footnotes are plainly marked, and must also indicate the measure if footnotes are

to be doubled, or tripled.

16.4. On a job that is not completed, the last footnote number must be given to Chief Copy Preparer, who will enter it in copybook, so that there will be no question as to next footnote number.

16.5. If a reference is repeated on another page, it should carry the original footnote; but to avoid repetition of a long note, the copy preparer may use the words "See footnote 3 (6, 10, etc.) on p. —"

instead of the entire footnote.

16.6. Unless copy is otherwise marked: (1) Footnotes to 12-point text (except 12-point briefs) are set in 8-point; (2) footnotes to 11-point text are set in 8-point, except in Supreme Court reports, in which they are set in 9-point; (3) footnotes to 10- and 8-point text are set in 6-point.

16.7. Footnotes are set as paragraphs and are separated from the text by a 50-point rule, flush on the left, with 2 leads above and

below the rule.

16.8. Footnotes to indented matter are set full measure.

16.9. Footnotes must always begin on the page carrying the reference. The breaking over of a footnote from one page to the next should be avoided; but when this is unavoidable, the break should not be made on a paragraph.

16.10. Footnotes to charts, graphs, and other illustrations should

be placed immediately beneath such illustrative material.

16.11. A cutoff dash is not required between the chart or graph

and the footnotes.

16.12. For reference marks, superior figures, superior letters, or symbols (preferably the first) are used. Superior figures and letters are separated from the words to which they apply by thin spaces, unless immediately preceded by periods or commas; symbols are set closed up.

16.13. Where reference figures might lead to ambiguity (for example, in matter containing exponents), asterisks, daggers, etc., or

italic superior letters may be used.

185

16.14. When symbols or signs are used for footnote reference marks, their sequence should be (*) asterisk, (†) dagger, (‡) double dagger, (§) section mark, and (||) parallel. Should more symbols be needed, these may be doubled or tripled, but for simplicity and greater readability, it is preferable to extend the assortment by adding other single-character symbols.

16.15. Symbols with commonly established other meanings likely to produce confusion, such as the percent mark (%) and the number

mark (#), should not be used.

16.16. To avoid possible confusion with numerals and letters frequently occurring in charts and graphs, it is preferable in such

instances to use symbols as reference marks.

16.17. When an item carries several reference marks, the superiorfigure reference precedes an asterisk, dagger, or similar character used for reference.

16.18. A superior reference mark follows all punctuation marks except a dash, but falls inside a closing parenthesis or bracket if applying only to matter within the parentheses or brackets.

16.19. Two or more footnote references occurring together are

separated by thin spaces, not commas.

16.20. In a series of short footnotes, reference numerals or letters are alined on the right.

Indexes and tables of contents

16.21. Indexes and tables of contents are set in the same style as the text, except that See and see also are set in italic.

16.22. Page, section, paragraph, etc., over figure columns are set in roman, flush on right, with 1 lead below even in solid matter.

16.23. Where a word occurs in an index page column, either alone or with a figure, it is set flush on the right. If the word extends back into the leaders, it is preceded by an en space.

Explanatory diagram	Frontispiece

Correct imposition (diagram)	Facing 34
Legends. (See Miscellaneous rules.)	

16.24. The figure column is 3 ems wide unless otherwise indicated. 16.25. Thin periods and commas are used in figure columns of indexes.

16.26. For better appearance, Roman numerals should be set in small caps in the figure columns of tables of contents and of indexes.

16.27. In indexes set with leaders, if the page numbers will not fit in the leader line, the first number only is set in that line and the other numbers are overrun; but to save an overrun the page numbers may be run back within an em leader of the entry, with an en quad between the leader and the figures. If the entry makes three or more lines and the last line of figures is not full, a period is used at the end.

If page folios overrun_____ 220, 224, 227, 230, 240 This way to save overruns__ 220, 224, 227, 230, 235, 238, 240, 247, 260 220, And this way when overrun folios make two or more lines 220, 224-225, 230-240, 245, 246, 250-255, 258, 300.

(For examples of item indentions in reading column of indexes set with leaders, see p. 431.)

16.28. Overrun page numbers are indented 3½ ems in measures not over 20 picas and 7 ems in wider measures, more than one line being used if necessary. These indentions are increased as necessary to not less than 2 ems more than the line immediately above or below.

16.29. When copy specifies that all overs are to be a certain number of ems, the runovers of the figure column shall be held in 2 ems

more than the specified indention.

16.32. In a table of contents, where *chapter*, *plate*, or *figure* is followed by a number and period in the first line and cleared in the following lines, an en quad is used after the period in the first line and the periods are alined.

16.33. Subheads in indexes and tables of contents are centered in the full measure. If such subheads extend into the figure column, the figure column and an equal number of ems on the left are cleared.

17. DATELINES, ADDRESSES, AND SIGNATURES

17.1. The general principle involved in the typography of datelines, addresses, and signatures is that they should be so set as to stand out clearly from the body of the letter or paper which they accompany. This is accomplished by using caps and small caps and italic, as set forth below. Other typographic details are designed to insure uniformity and good appearance. Certain general instructions apply alike to datelines, addresses, and signatures.

General instructions

17.2. Principal words in datelines, addresses, and titles accompany-

ing signatures are capitalized.

17.3. Mr., Mrs., and all other titles preceding a name and Esq., Jr., Sr., 2d, and 3d following a name in address and signature lines are set in roman caps and lowercase if the name is in caps and small caps or caps and lowercase; if the name is in caps, they are set in caps and small caps, if small caps are available—otherwise in caps and lowercase. (See also rule 10.33, p. 144.)

17.4. Lines set in caps, caps and small caps, or small caps are

spaced with en quads.

17.5. An extra lead is used, unless space is clear, between dateline and text or address, address and text, text and signature, and signature and address.

Datelines

17.6. Datelines at the beginning of a letter or paper are set at the right side of the page, the originating office in caps and small caps, the place name and date in italic; if the originating office is not given, the place name is set in caps and small caps and the date in italic; if only the date is given, it is set in caps and small caps. Such datelines are indented from the right 1 em for a single line; 3 ems and 1 em, successively, for 2 lines; and 5 ems, 3 ems, and 1 em, successively, for 3 lines. In measures 30 picas or wider, these indentions are increased by 1 em.

United States Senate, Washington, D. C.

Signatures

17.19. Signatures, preceded by an em dash, are sometimes run in

with last line of text. (See also rule 9.52, p. 132.)

17.20. Signatures are set at the right side of the page. They are indented 1 em for a single line; 3 ems and 1 em, successively, for 2 lines; and 5 ems, 3 ems, and 1 em, successively, for 3 lines. In measures 30 picas or wider, these indentions are increased by 1 em.

17.21. The name or names are set in caps and small caps; Mr., Mrs., and all other titles preceding a name and Esq., Jr., Sr., and 2d following a name are set in roman caps and lowercase; the title following name is set in italic. Signatures as they appear in copy must be

followed.

17.22. If name and title make more than half a line, they are set

as two lines.

17.23. Two to eight independent signatures, with or without titles, are alined on the left, and the longest name is indented 1 em from the right if no title follows. More than eight signatures, with or without titles, are set full measure, caps and lowercase, run in, indented 5 and 7 ems in measures of 26½ picas or wider; in measures less than 26½ picas, indent 3 and 5 ems.

18. COURTWORK

(See also Capitalization; General Instructions; Italic)

18.1. Courtwork differs in style from other work only as set forth in this section; otherwise the style prescribed in the preceding sections will be followed.

Supreme Court records

18.2. Paragraphs are made of answers in Q. and A. matter.

18.3. The folio number is flush in the same line as the first word of the folio and in a cut-in 3 ems square (unless there are 10 points of white space above or below). Indentions of paragraphs, etc., are in addition to the 3-em cut-in. In hanging indentions of headings the extra indention is carried to the end of the heading.

18.4. A cut-in folio is not used opposite a paragraph reading

"Endorsement on cover."

18.5. Copy is followed literally, including capitalization (initial capitalization of words), punctuation (including compounding), and

obscene language, but not italic.

18.6. Italic letters are used only to indicate errors in spelling (for example, curely for surely), except in the names of persons and firms, in geographic names, and in foreign words that are not law terms. These and errors in syntax are not corrected. Roman letters are used to indicate errors in words set in italic.

18.7. In typewritten records manifest errors of the typewriter are corrected (for example, if one letter has been struck over another or if a space appears where a letter was obviously intended to be); but if a word is used in the wrong place (for example, in for on; boot

for boat), it is not changed nor set in italic.

18.8. Words having the sanction of any dictionary are permissible,

and the spelling is not changed.

18.9. An apostrophe is used to indicate the omission of one or more letters in a word; but in well-established abbreviations, the period is used instead of an apostrophe.

18.10. Doublets are indicated by italicizing the repeated words or

18.11. A 3-em quad is used to indicate the omission of one or more words.

18.12. The names of vessels are set in roman, quoted.

18.13. The titles of cases are set in roman, including the abbreviation of versus.

18.14. The word *The* is capitalized in names of legal cases as follows:

the said The B. & O. RR. Co. The Sun v. The Globe The City of Washington v. The B. & O. RR. Co. the defendant, The Davies County Bank

18.15. Printing Office editorial marks must be erased before the copy is returned to the originating office. Copy preparers should make only necessary marks thereon, and those lightly, with a soft

pencil. Cut-in folios should not be indicated on copy. All instructions are entered on the preparer's instruction sheet. The folio numbers on copy are picked up. Any matter preceding or following an original folio is marked, in pencil, with the jacket number followed by lowercase letters (e. g., J. 12345a, J. 12345b, etc., to the end).

18.16. Preparers must indicate on the instruction sheet such infor-

mation as 11-point type, solid or leaded, cut-in folios, etc.

18.17. The following abbreviations of the names of reporters are used in citations of United States Supreme Court Reports:

> Abbreviation Cr. Cranch Dall. or Dal. Dallas How. Howard Pet. Peters U. S. Wall. United States Reports Wallace Wheat. Wheaton

Briefs, decisions, exhibits, and opinions of other courts

18.18. In general, copy is printed "Fol., incl. caps."

18.19. In opinions of the Court of Claims, the United States Court of Appeals for the District of Columbia, and all circuit courts of appeals, copy is followed, including capitalization. Titles of legal cases are italicized.

18.20. Single punctuation is used in citations wherever possible.

18.21. The STYLE MANUAL is followed in testimony in Court of Claims transcripts of evidence.

18.22. The spelling of Indian names is followed in the use of

hyphens, accent marks, and spaces.

18.23. Superior letters are not used in abbreviations unless so indi-

cated by the copy preparer.

18.24. Copy is followed as to use of the singular or plural possessive referring to the United States as claimant or claimants, defendant or defendants, etc. However, if conflicting forms are used in copy, they are made uniform, either singular or plural.

claimant's brief or claimants' brief appellee's exhibits or appellees' exhibits

18.25. When "emphasis supplied," "emphasis added," or "emphasis ours" appears in copy, it should not be changed; but "underscore supplied" should be changed to "italic supplied."

18.26. When Question and Answer are spelled out in copy, set in

separate paragraphs.

18.27. In National Labor Relations Board transcript, the contracted forms Q. and A. are always used, run in, and the question

and its answer are connected by an em dash.

18.28. If questions are numbered and the numbers with periods precede the questions, an en quad is used after the number; otherwise use 5-em space.

18.29. The words infra and supra are italicized.

18.30. In the titles of cases the first word and all principal words are capitalized, but not such terms as defendant and appellee.

18.31. In the titles of cases copy is followed as to use of figures

and abbreviations.

18.32. Abbreviations in names of legal cases are to be followed literally in all classes of work.

18.33. The following examples indicate the capitalization, italic. small caps, abbreviations, etc., generally used, except the word case. which is set in italic only when so indicated in copy.

18.38. Use brackets to enclose words interpolated by stenographer into or at the end of remarks of a witness.

18.39. Use parentheses for parenthetic phrases or sentences; also to enclose interpolated words following name, Question or Answer, or Q. or A.

18.40. If the entire sentence is in parentheses or brackets, the

punctuation should be within the parentheses or brackets.

18.41. The following examples illustrate the use of brackets, parentheses, other punctuation, and spacing:

At end of sentence: [Laughter.]; within sentence: [laughter] The paper was as follows [reads]:

18.46. The following differences in capitalization and in the use of quotation marks should be noted:

The said paper was marked "Defendant's Exhibit No. 4" (exact title). The defendant's exhibit No. 4 was thereupon placed on file.

18.47. The following capitalization is followed in all courtwork:

GEOLOGIC TERMS

[With suggestions by U. S. Geological Survey]

For the capitalization, compounding, and use of quotations in geologic terms, copy is to be followed. The following list includes some of the terms which are or have been in common use. It should be noted that "Coal Measures" is used for a subdivision of the Carboniferous system; "Calciferous" and "Magnesian" for lithologic subdivisions of the Cambrian and Ordovician, respectively; and "Red Beds" for "Permo-Triassic" rocks of the West; and that these terms, if used in a common-noun sense, are not capitalized or quoted. The term redbeds (lowercase, one word) is used in a technical, nonliteral sense to designate certain formations of mixed lithologic character that are predominantly red. The adjectives upper, middle, and lower are capitalized only as indicated in the list, unless the term is quoted (lower Carboniferous; "Lower Carboniferous"). Such common nouns as formation, member, group, anticline, syncline, dome, uplift, and terrace are not capitalized even if preceded by a name: Mesaverde formation, Devol anticline, Ozark uplift, etc.

Algonkian type Archean type "Calciferous" Cambrian: 🦂 Lower Middle Upper Carboniferous: lower upper Cenozoic Cincinnatian "Coal Measures" "Corniferous" Cretaceous: Lower Upper Devonian: Lower Middle

PHYSIOGRAPHIC TERMS

[With suggestions by U. S. Geological Survey]

The following list of physical divisions of the United States has been approved by the Association of American Geographers and should be used as a guide to capitalization. The general terms province and section, used in the commonnoun sense, are not capitalized; the other terms are proper names and are therefore capitalized.

3 The United States has not recognized the Soviet regime in Estonia, Latvia, and Lithuania.

4 Germany, comprising the areas of the 4 zones of occupation, Berlin, and the areas provisionally administered. In this table, the items in the entry for Germany apply to the Federal Republic of Germany, the government established in Western Germany. However, supreme authority is exercised in certain fields by the Allied High Commission (representing the United States, Great Britain, and France). The government for Berlin functions in the American, British, and French sectors of Occupation of Berlin, under authority of the Allied Kommandatura. The Eastern Zone of occupation of Germany and a sector of Berlin are occupied by the Soviet Union. Certain areas of Germany are provisionally under the administration of Poland and of the Soviet Union.

¹ The term "British" is usually used of or pertaining to Great Britain, or in the widest sense to the United Kingdom of Great Britain and Northern Ireland, or its inhabitants. It is also occasionally used as meaning "of or appertaining to the British Commonwealth of Nations"; e.g., "British" subject.
² The Associated States of Cambodia, Laos, and Viet-Nam.
³ Irish (collective, plural) is used generally in the case of Ireland, the island.
⁴ Netherland is generally preferred, but Netherlands is the official form for Netherlands Government ¹ The word "Soviet," which means council, cannot be used correctly in this sense; use instead "of Soviet nationality" (citizenship); "Soviet national(s)"; or "Soviet citizen(s)."

1 The conventions for writing sums of money in foreign countries are similar, generally, to those in the United States in that the symbol or abbreviation of the basic unit is placed before the sum, and a period, a comma, or simply a space appears before the fractional part. "DM1.225,50," for example, means 1,225 deutschemarks 50 pfennigs. Some other conventions are contained in the following footnotes.

2 Unless otherwise indicated in parentheses, plurals of these terms are formed regularly by adding "s."

3 The term "gold peso" (oro sellado) is abbreviated "o/s," but gold coins are not widely in circulation. Official and private accounts are kept in terms of the paper peso (moneda nacional, abbreviated "m/n"), indicated as M\$\N; thus: \$632,790, or \$632,790 (m/n).

4 Sums are written as in Great Britain except that the symbol £, for the pound, is usually preceded by

an A. (See footnote 9.)
⁵ The conto is 1,000 cruzeiros. Sums are written: 25.376:125\$320, which reads 25,376 contos 125 cruzeiros

20 reis.

6 Including Newfoundland, now a Province of Canada.

7 There has been no separate currency issue in Danzig since prior to World War II.

8 There has been no national currency issue in Estonia, Latvia, and Lithuania since World War II.

9 The franc units of Algeria, Morocco, Tunisia, French West Indies, and French Guiana are equivalent to the French franc. However, the currency units of certain French possessions bear differing ratios to the French franc. Their names and areas of circulation are as follows: CFA franc, French West Africa, French Equatorial Africa, Madagascar, Réunion; CFP franc, New Caledonia, New Hebrides, and French establishments in Oceania; Djibouti franc, French Somaliland; rupee, French establishments in India.

10 Sums of money are written as follows: £5 4s. £6d. or £5.4.6, not 5/4/6. Currency units of a number of nonmetropolitan areas are equivalent to the British pound; namely, the West African pound (in Gambia, Gold Coast, Nigeria, and Sierra Leone), the Southern Rhodesian pound (in Northern and Southern Rhodesia and in Nyasaland), the pound units of Cyprus, Gibraltar, Malta, Bahamas, Bernuda, Jamaica, and the Falkland Islands. However, units of certain areas bear differing ratios to the British pound; namely, the East African shilling (in Kenya, Uganda, Tanganyika, and Zanzibar), British West Indian dollar (in Barbados, Trinidad, and British Guiana), British Honduran dollar, Mauritius rupee, Seychelles rupee, Fijian pound, Tongan pound, Hong Kong dollar, Malayan dollar, and the Sarawak and British Onth Borneo dollars.

11 There are local currency units in Netherlands territory; namely, the Surinam guilder, the Nederlands

British North Borneo dollars.

11 There are local currency units in Netherlands territory; namely, the Surinam guilder, the Nederlandse Antillen (Netherlands West Indies) guilder, and the Netherlands New Guinea guilder. These are not equivalent to the Netherlands guilder.

12 The symbol (\$) is used between the escudo and the centavo; the colon (:) is used between the conto (=1,000 escudos) and the escudo; the sum written 125,750:350\$50, for example, reads 125,750 contos 350 escudos 50 centavos. The escudo is used in Portuguese colonies, except in Angola (Portuguese West Africa), where the unit is the angolar which is equivalent to the Portuguese escudo.

21. PATENTS AND OFFICIAL GAZETTE

Where no specific reference is made to patents or to the Official Gazette, the rules herein given apply to both classes of work. The term "patents" includes plant patents, trade-marks, designs, and reissues.

ABBREVIATIONS

Patents

Follow copy, except in headings, in which the names of States, Virgin Islands. Puerto Rico, and Canal Zone are abbreviated, but follow Panama Canal Zone. (See p. 142.) Fractions in assignments, etc., should be spelled (rule 11.28). Saint should be abbreviated St. in names of cities in the United States, but follow copy in foreign patents (St., Saint, Ste., Sainte). Sections of cities should be printed N. W., E. C., etc.

Follow copy in the use of the word Figure or the abbreviation Fig. when followed by numeral where reference is had to figures of the drawings.

Use etc. in headings, but follow copy (&c. or etc.) elsewhere.

Spell out & wherever it appears in copy, except in the names of firms and corporations and in the signatures to trade-marks, where copy should be

Some of the abbreviations commonly used in patent work are as follows:

A. F. C. or AFC, automatic frequency control
A. G. C. or AGC, automatic frequency control
a. m., ante meridiem
AM, amplitude modulation
A. N., acid number
A. P. I. or API, American Petroleum Institute
a. s. f., amperes per square foot
A. S. T. M. or ASTM, American Society for Testing Materials
A. U., angstrom units
A. V., acid value
A. V., acid value
A. V., c. or AVC, automatic volume control
B./D., barrels per day
B. H. P., brake horsepower
BX cable
C., centigrade, cent.
ca or ca., of the control BX cable
C., centigrade, cent.
ca or ca., circa (about)
cc., cubic centimeter
C. B. M., constant boiling mixture
C. F. M., cubic feet per minute
C. F. R. or CFR, Cooperative Fuel Research
C. F. S., cubic feet per second
C. G., center of gravity
c. g. s., centimeter-gram-second
C. P., constant pressure
C. P. S., cycles per second
cns., centinoises

cps., centipoises C. R., cathode ray C. W., continuous wave C. R., cathode ray
C. W., continuous wave
ewt., hundredweight
db, decibel
D. F., direction finder
E. C. C., electrical continuous cloth
E. M. F. (plural E. M. F.'s), electromotive force
E. M. U., electromagnetic unit
E. P., end point
FM, frequency modulation
F. P. S., feet per second
g. p. d., grams per denier
G. P. M., gallons per minute
HF, combination of hydrogen and chloride
HIm., Hefner lumens
H. P. M. V., high pressure metal vapor
Hz., cycles per second (German)
I. A. C. S., International Annealed Copper Standard
in the current times resistance
I. V. initial calculate.

IR, current times resistance I. V., initial velocity

kHz., kilohertz k. v., kinematic viscosity kva. or kv.-a., kilovolt-ampere kw., kilowatt ma., milliampere
M. A. C., mean aerodynamic chord
M, molecular weight M, molecular weight
m. eq., milliequivalent
M. E. P., mean effective pressure
m. e. v., million electron volts
M. M. F., magnetomotive force
M. P. H., miles per hour
M. T. D., mean temperature difference
N, normal
N. N., neutralization number
N. P. A. or NPA, National Petroleum Association
N. T. P., normal temperature and pressure
O. D., outside diameter

p. m., post meridiem
P. P. I., plan position indicator
p. p. m., parts per million
p. s. i. a., pounds per square inch absolute
p. s. i. g., pounds per square inch absolute
p. s. i. g., pounds per square inch gauge
R. & B., ring and ball method
R-C, R. C., or R O, resistance-capacitance
R. F., radiofrequency
R. H., relative humidity
R. M. S., root mean square
R. P. M., revolutions per minute
S. A. E. or SAE, Society of Automotive Engineers
s. c. f., standard cubic foot
S. P. D. T., single pole double throw
S. P. S. T., single pole double throw
S. P. S. T., single pole single throw
S. U. S. or SUS (also S. S. U. or SSU), Saybolt
Universal seconds
S. U. V. or SUV, Saybolt Universal viscosity
S. W. G., standard wire gauge
T. M., time modulation
T. P. I., turns per inch (yarn)
U. H. F., ultrahigh frequency
V. F., voice frequency
V. G. C., viscosity gravity constant
V. P., variable pressure
v./v.lh., vibration velocity per hour
W. C. F., Watson characterization factor

CAPITALIZATION

Capitalize Letters Patent whether standing alone or followed by a numeral. Capitalize Patent, Trade-Mark, Design, Reissue, Certificate, Serial, Sheet, Plate, Diagram, Case, and Division, where followed by a numeral, in any one of the following forms:

Patent No. 680,180 my Patent No. 680,180 or my pat-ent, No. 680,180 Patent 680,180 British patent specification No. 162,578, but British Patent No. 162,578 Frade-Mark No. 140,500 Trade-Mark Certificate No. 610,142 Trade-Mark Registration No. 610.143 trade-mark registration, No. 645,842 Design No. 10,500 Serial

Formula 1

Division A

Lowercase patent statutes.

Proper nouns used as adjectives should generally be capitalized. There are a few exceptions to this rule. (Refer to list of words in common use in patents,

p. 237.)

Capitalize legends which are placed upon devices, drawings, blank forms, etc., for purposes of caution, direction, explanation, etc., as, The semaphore bears upon its face the word "Safety"; As shown in Fig. 2, at the point marked "Upper"; The first column is headed "Amt.," the second, "Year"; The figures are entered in the "Rec'd" column. Lowercase "danger" position, "on" position, etc., and supply quotation marks if not in copy.

Capitalize and quote the principal words of trade-mark in phrases, as My trade-mark consists of the words "Golden Rod Butter," distinctively displayed.

Capitalize the word Figure spelled or abbreviated, if followed by a numeral,

where reference is had to figures of the drawings.

Capitalize the following where reference is had to a geographical subdivision of a foreign country and where used in connection with the name thereof:

Canton (Switzerland and Luxembourg) Commonwealth (Australia) Department (France, etc.)
Dominion, District (Canada)
Duchy or Grand Duchy Empire Federal District (Brazil, Mexico, and Venezuela) Lan (Sweden)

Prefecture (Japan) Principality Province Provincial District (New Zealand) Republic State Territory Union (South Africa) Vilayet (Turkey)

Capitalize the scientific names of plants and animals where reference is had to the genus, order, or family, but always lowercase the species, as crispus (species), Chondrus (genus), Chondrus crispus (genus and species), Algae (order). reference is had to an individual member of an order, lowercase, as an alga (or the algae) of the genus Chondrus.

Capitalize the principal words of titles of books, magazines, and other publications, as the British Pharmacopoeia, Bulletin of the American Pharmaceutical Association, Chemical Reactions and Equations, etc.; but capitalize only the first word and proper nouns of titles of articles in books, magazines, and other publications, as, Brown, Delicacy of British Pharmacopoeia test for arsenic, Journal

Pharmacy.
Capitalize the principal words of titles of inventions where preceded by the word entitled, as: The invention shown in my Patent No. 530,410, entitled, able-Speed-Transmission Gearing; also capitalize the principal words of title of invention in text when referring to title of previous patent in connection with date and serial or patent number.

Where part of an incorporated name, capitalize the word city, as Kansas City, Oklahoma City, Jersey City, etc.; but lowercase New York city, etc.

All names of corporations and firms should be printed in caps and lowercase in head and all caps in signature. Names of individuals comprising lowercased de, von, etc., should be printed in lowercase in head and small caps in signature. Sr., Jr., etc., should be printed in caps and small caps in signature; née and geboren should be printed in small caps in signature.

Style for use of lowercase and capital letters following hyphen:

2-amino δ-Amino p-Amino A-amino Δ -amino bis (amino) or bis (amino) a-Amino α.β-Amino A-amino

NOTE.—After Greek capital letters word is lowercase, but after Greek lowercase letters word is capi-

Official Gazette only

Capitalize full titles of all courts, as United States Supreme Court, United States District Court for the District of Columbia, etc.; also Court of Appeals, Circuit Court of Appeals, etc.

Capitalize the word court where reference is had to the United States

Supreme Court, but lowercase elsewhere.

Capitalize the word office where reference is had to the Patent Office, but lowercase elsewhere

Capitalize the titles of officials of the Patent Office.

Capitalize full titles of acts, as Trade-Mark Act, Spooner Act, etc.; but lowercase the word act where standing alone or act of 1905.

Capitalize principal words in description of goods in published trade-marks

and in trade-mark phrases.

Capitalize Patent No. 1,780,310, but lowercase British patent, No. 1,780,310, and Smith patent, No. 1,780,310.

COMPOUNDS

Patents

Where two words are made of terms that are usually closed up, copy should be followed even though one word in heading; but prefixes and suffixes should be closed up with the words to which they belong, unless connected thereto by a hyphen, when copy should be followed. Examples: Horse shoe, rail road, fire arm, grind stone, anti-friction, electro-magnet, sub-station, ferro-manganese, counter-clockwise, etc., follow copy; but close up anti friction, electro magnet, sub station, ferro manganese, counter clockwise, etc., if they appear as two words in copy.

Official Gazette

Follow copy in quoted matter, laws, treaties, etc.

FIGURES

Patents

Follow copy, except in assignments in headings, where figures should be spelled. Change Figure one, Fig. two, etc., in the text to Figure 1, Fig. 2, etc. Change claim one to claim 1, etc. Follow Roman numerals.

Official Gazette (decisions and miscellaneous notices only)

Follow copy in treaties, conventions, etc., with foreign countries; laws; acts of Congress; extracts; and quoted matter. Spell out figures under 10 in everything else, except figures at the beginning of paragraphs, tabular matter, enumerations, figures of reference, etc. Only a general rule can be given. Much must be left to the judgment of the copy editor.

GOTHIC

All letters and figures relating to shape should be in gothic, except I. Where copy has tee shape, change to T shape, but follow "magic tee" or "magic T"; eye beam, change to I beam, but eye bolt; ell, change to L; in the form of an A; the A | frame; the Y; in the shape of an 8. Plurals are formed by adding apostrophe and letter s, as T's. Do not quote gothic, as "A" frame. If quotes are in copy, omit them. Golf tee should be spelled, as it does not indicate shape. No gothic in heads.

ITALIC AND ROMAN

Italic must be used in the Latin names of plants and animals where reference is had to the species (as tuberosa) or to the genus followed by the species (as Asclepias tuberosa); but roman should be used where reference is had to the genus alone (as Asclepias) or to the order (as Asclepiadaceae). Also italicize the names of vessels and titles of cases in citations, as Smith et al. v. Brown; the Brown Case (180 O. G. 306).

Roman should be used in the Latin names of medicines, diseases, anatomical terms, chemicals and dyestuffs, geological and mineralogical terms, Latin words and phrases generally, and in titles of books, magazines, and other publications. Where italic (to indicate emphasis) appears in copy of decisions for the Gazette,

Where italic (to indicate emphasis) appears in copy of decisions for the Gazette, the same should be followed, but use roman in obvious phrases and words, such as supra, infra, prima facie, etc. In patents, only such words should be set in italic as have been marked by the copy editor, except that Latin names of plants and animals should be set in italic in accordance with the above rule, even if not so marked in copy.

In mathematical equations and chemical formulas, letters representing unknown quantities, etc., are set in italic, but abbreviations of names of functions, processes, or elements remain roman, even though without punctuation. Thus—

 $x^2yz+kl=1$

 $\tanh a \cos b = \sin c$ $CH_x - CH_y - CH_x$

 C_nH_{n-2}

LEADER AND TABULAR WORK

Aline decimal points only when specifically prepared to aline by copy preparer or when table has a total.

MISCELLANEOUS

Notice if patent is a division, a continuation, a refile, a no fee, a no drawing, or has foreign application, and make head read accordingly. All new matter supplied in the head must be queried.

The noun drawing should always be singular in trade-marks.

In formulas and equations close up all symbols, also reference letters unless separated by commas. Where inferior cap "D" appears with lowercase letter (English or Greek) in a $7\frac{1}{2}$ -point line, the "D" must be set 10-point inferior. Thus: $n_{\rm p}$, $\gamma_{\rm p}$.

4-point line, the "D" must be set 10-point inferior. Thus: $n_{\rm D}$, $\gamma_{\rm D}$. Care must be taken to see that claims are properly numbered. Where reference is made in a claim to the number of a preceding claim, see that the proper number is used when claims have been renumbered. If the claim for the Official Gazette refers to another claim, the reader must query the claim.

SPELLING

Webster's New International Dictionary, current edition, is recognized as the standard authority in the spelling and division of words. Where the dictionary recognizes different forms of spelling the same word, follow the form given in copy. Hackh's Chemical Dictionary is used for chemical words and terms. Any word appearing in the heading of a patent should be given the preferred spelling; also the preferred spelling of the root word should be followed in participial and other derivations of that word. An execution to Webster's is made in the creditors derivations of that word. An exception to Webster's is made in the spelling of "sulfur" and derivatives, which form is to be used in patent headings. editors will indicate the preferred form in such cases on the file jacket.

Authorities for the spelling of geographic names (local and foreign) are listed in the order of their preference: Decisions of the United States Board on Geographic Names; United States Postal Guide; Columbia Lippincott Gazetteer of the World; Webster's Geographical Dictionary; New World Loose Leaf Atlas; Rand McNally Atlas. No accented letters are used in geographic names.

The signature of firms and corporations in a trade-mark should be followed and the head and preamble changed and queried if any discrepancy exists; follow individual names as signed. When in the text a claim or disclaimer is made to any words or symbols, spelling of such words should conform in every detail to the drawing. If any discrepancy occurs it should be queried. A defective or wrong cut should be reported to foreman.

In patents signed by an executor or administrator, the pronouns should be changed and queried. Examples: Change I claim to What is claimed is; My

invention to The invention, etc.

Follow copy for suffixes ize and ise.

Collective nouns, such as pair, series, mechanism, goods, type, etc., may be regarded as either singular or plural, and copy should be followed.

POSSESSIVES

Correct errors in the use of the apostrophe in the possessive case. Follow document style. (See pp. 60-61.)

PUNCTUATION

Patents

Follow copy literally, except in headings.

In the figure description, delete all punctuation between the numeral and the

Commas should not be used for periods in decimal fractions.

In equations, center points should be followed. Punctuate trade-mark and design preambles as follows:

- In the Borough of Manhattan, city and State

- residing in Oak Park, in the county of Cook and State of Illinois,
 residing at Kansas City, county of Jackson, State of Missouri,
 residing at Kansas City, Jackson County, and State of Missouri,
 residing in the city of San Francisco, county of San Francisco, and State of
 - California,

- residing at New York city, county and State of New York,

 residing in the city, county, and State of New York,
 organized under the laws of the State of New York and located in New York, - located in the county, State, and city

Official Gazette

Follow copy in claims; court decisions; treaties, conventions, etc., with foreign countries, and in rules and amendments thereto; laws; extracts; quoted matter; and acts of Congress. Punctuate everything else, including citations in all decisions.

REFERENCE LETTERS AND FIGURES

Reference figures to drawings should be set in boldface type.

Where copy has capitals, use roman capitals, and when copy has lowercase letters, use lowercase italic, as, the wheel A has a rim a and spokes b; the hub B is of iron; the wrapper Wr is of paper.

Where superior reference letters run up to "x", use the superior letter "x":

Follow copy as to a1, a2, 1a, 1b, etc., or a1, a2, 1a, 1b, etc. Copy should be followed in respect to the prime mark or superior ""; thus: "The wheels a' and a2" or "The wheels a1 and a2." Some typewriters use the prime mark for "1", after passing "9", as: a'0, a'', a'2, etc., which should be changed to a10, a11, a12, etc. Follow inferiors where so used in copy, as: a1, a2, etc.

Since typewriters use same character for figure 1 and lowercase 1, cipher and cap 0, all such characters will be printed as figures unless otherwise marked.

cap O, all such characters will be printed as figures unless otherwise marked. In foreign patents, if apostrophes are used for primes, change to primes. Use the en dash where a letter is followed by a figure (A-15), or vice versa (15-A). Use the em dash where figures or letters occur in pairs (127—127), (127—127A), (A-A), (7d-7e), (A-A5); or when a figure with a letter is followed by another figure and/or letter (8c-11d), (7a-11), (7a-A), or vice versa.

Samples of reference letters and figures with regard to use of en and em dashes

when used in combinations:

127 - 127 127 - 127a7d—7eA—A A-15 8a, 8c-71, 7m6-J-42 15-A

Fig. 3-A or Fig. 3-a (if dash in copy), but Fig. 3A or Fig. 3a

Exceptions to rule: Where combinations of numbers or letters are followed by the word "inclusive" or when a number of references in groups (three circuits 74–76) is specified, or when it is obvious from copy that a series of figures is intended, use en dash.

Follow copy for and or & in trade-mark signatures. The word "its" should be deleted in such terms as Its President, etc. Do not supply By in signatures. A comma punctuates the first name in the signature when followed by By. When By is not used, close with a period.

Patent signatures should be borne off

from right, longest line.

The following are examples of patent signatures:

OFFICIAL GAZETTE INDEX

Patents, designs, plant patents, reissues

Where the name of a city or State appears two or more times in succession, do not repeat the same, but use only once.

Where there are two or more inventors, spell out the Christian name of only the first inventor. Ab-

breviate the rest.

In cross-references, use last name, Christian name, and initial of first inventor only; last name only of

comventors.

If initials of coinventors having same family name are the same, spell out Christian name of each.

If coinventors with same name are senior and junior, repeat family name.

Use U. S. Army—not United States Army.

Never change name of firms, corporations, etc.

Omit Territory of before Hawaii and Alaska.

Each patent, design, etc., is a separate entry in the List of Patentees; if identical, they may be combined in the List of Inventions if they carry consecutive patent numbers.

PUBLISHED TRADE-MARKS

All information appearing on face of file must be incorporated in trade-mark as published in Official Gazette.

"'Doing business as," or phrases with same meaning, precede address; all other phrases (i. e., "assignor," "now by change of name") follow address.

If file is marked "see inside" (in connection with merchandise or date of use), this information will be

found in the Statement or amendments thereto.

Disclaimed words or phrases are printed in caps and lowercase, and quoted.

Abbreviate month when followed by date.

Except in the case of foreign trade-mark applications, the registration number only (not the date) is given in claiming ownership of other registrations. Foreign applications may or may not carry date of first use. Follow copy on claim of priority based on ownership of foreign registration.

Drawings always appear with published trade-marks.

22. CONGRESSIONAL RECORD

RULES OF THE JOINT COMMITTEE ON PRINTING

Attention is called to the following extracts from the rules of the Joint Committee on Printing for the publication of the Record:

- 3. The Public Printer shall print the verbatim report of the proceedings and debates of the Senate and House of Representatives, as furnished by the Official Reporters of the Congressional Record, in 7½-point type; and all matter included in the remarks or speeches of Members of Congress, other than their own words, and all reports, documents, and other matter authorized to be inserted in the Record shall be printed in 6½-point type; also all rollcalls and lists of pairs shall be printed in 6-point type on 6½-point slug.
- 9. When leave has been obtained to print (1) a speech not delivered in either House, (2) a newspaper or magazine article, or (3) any other matter not germane to the proceedings, the same shall be published in the Appendix, but this rule shall not apply to quotations which form part of a speech of a Member, or to an authorized extension of his own remarks. The Official Reporters of each House shall indicate on copy and prepare headings for all matter to be printed in the Appendix, and shall make suitable reference thereto at the proper place in the proceedings. Any Member may, upon request noted on the manuscript, have an authorized extension of his own remarks printed in the Appendix.

GENERAL RULES

The rules governing document work apply to the Congressional Record, except as may be noted herein. The same general style should be followed in the permanent Record (bound Record) as is used in the daily Record. familiarize themselves with the exceptions and the forms peculiar to the Record.

Daily and permanent Record texts are set in 7½-point type on 8½-point slug;

extracts are set in 6½-point type on 7½-point slug.

Headings set in 7½-point caps will be set on 7½-point slug; if line overruns, lead is to be inserted.

An F dash will be used preceding 7½-point cap lines in proceedings in Senate and House, with 2 leads above and below.

All 6½-point small-cap lines to be set on 7½-point slug.

All 6½-point extracts require 1 lead above and 2 leads below.

All extracts are set in 6½-point type unless otherwise ordered by the Joint Committee on Printing.

An address of the President delivered outside of Congress or referred to as an

extract is set in 6½-point type.

Except as noted below, all communications from the President must be set

A letter from the President to the Senate is set in 6½-point type, when any form of treaty is enclosed that is to be printed in the Record in connection therewith. The letter is set in 6½-point type whether the treaty follows or precedes it or is separated from it by intervening matter.

Instructions covering the measure and the size and kind of type for parallel columns in the Record will be given to operators when necessary, as the general style will depend upon the character of the matter.

In general, operators should avoid wide spacing.

In correcting proof, operators must exercise great care to have such lines free from error.

Extreme caution must be used in making corrections in copy, and no impor-

tant change will be made without authority

Observe the lists of names of Senators and Representatives, committees of both Houses, and duplicate names. Changes caused by death, resignation, or otherwise must be noted. There is no excuse for error in the spelling of names of Senators, Representatives, or department officials. In case of doubt, the Congressions. sional Directory will be the authority.

Indented matter in leaderwork will be 1 em only.

Queries must not be made unless it is known that the author is to see a proof.

CAPITALIZATION

(See also Guide to Capitalization, p. 27)

If the name of the Congressional Record is mentioned, it must be set in caps and small caps and never abbreviated, even when appearing in citations.

The name of a Senator or a Representative preceding his direct remarks is set

in caps and is followed by a period and an em quad.

The name of a Senator or a Representative used in connection with a bill or other paper is lowercased, as the Glass bill, the Smith amendment, etc.; but Smith's amendment, etc.

The names of Members and Members-elect of both branches of the Congress,

including those of the Vice President and Speaker, will be printed in caps and

small caps if mention is made of them.

Deceased Members' names will be set in caps and small caps only on day when eulogized, in speeches carrying date when Member was eulogized, or on memorial day in Senate and House.

Certificates of Senators-elect of a succeeding Congress are usually presented to the current Congress, and in such cases the names of the Senators-elect must

be in caps and small caps.

Names of Members of Congress must be set in lowercase in votes, in lists set in columns, in the list of standing and select committees, in groups (three or more) of names of Members and non-Members, in contested-election cases, and in lists of pairs. (See under Pairs, p. 256.)

Observe that the names of all persons not certified Members of Congress are to be set in lowercase; that is, names of secretaries, clerks, messengers, and others.

Follow capitalization of proposed boards, commissions, services, etc.

Follow copy in land descriptions in bills.

Capitalize principal words and quote after each of the following terms: Entitled, title, heading, headline, subheading, legend, or caption. Capitalize but do not quote after the following terms: Article, address, or subject.

CONTRACTIONS

If a Senator's or a Representative's remarks contain contractions such as don't, can't, won't, didn't, couldn't, and wouldn't, spell in full, but avoid forms that are outmoded or awkward. Instead of do not they, cannot they, will not they, etc., use do they not, can they not, will they not. Do not change well-founded historical utterances or expressions made popular by continued use on television, radio, or in the press. Use quotation marks and say, "Don't shoot until you see the whites of their eyes," "Let's look at the record." Follow contracted forms in extracts and in 7½-point quoted matter. The abbreviation etc. must be made to read and so forth, except in extracts.

FIGURES

(See also Numerals, p. 155)

If an expression contains two or more enumerations, some definite and others indefinite (or not accompanied by subject), spell the indefinite and put the definite in figures, as four or five thousand spent out of \$6,000 appropriated; \$300 saved and a thousand dollars spent; a hundred dollars is more to me than \$500 to you or one thousand to him.

If copy reads six millions of dollars, it must be changed to read \$6 million. If copy reads 3.8 million dollars, change to \$3.8 million; if copy reads 3½ million dollars, change to read \$3½ million. (To be used only in amounts of a million or

more.)

Isolated numbers of less than 10 are spelled out; numerical expressions in a group of two or more related numbers, even if each is less than 10, are to appear in figures: Six horses; 10 horses; 6 horses and 9 sheep; there were 20 males and 8 females, 28 in all; 25 bulletins, containing 352 pages; the population of Chicago is more than 2,000,000; a hamlet of 18 persons. If complicated, and if enumeration is 99 or less, spell, as twenty-five 6-inch guns, two 34-inch boards, ten 5-cent pieces, but 125 6-inch guns, etc.

If sums of money are used as adjectives, express in figures, as a 5-cent piece, a \$10 note, a \$7,000 house, a \$1 million expenditure, a \$1,200 clerk (even if copy

reads a twelve-hundred-dollar clerk).

If an expression of weight or measure is used as an adjective, use figures, as a 1-foot rule, a 2-bushel basket, a 5-acre lot, a 4-ton stone, a 3-pint pail, a 1-grain pill, a 1/2-inch pipe.

Follow copy in such expressions as twelve hundred gallons were used, fourteen hundred dollars was expended, or 1,200 gallons were used, \$1,400 was expended, a thousand dollars, a hundred pounds, two thousand million dollars.

For ordinal numbers, follow rule 11.10, page 157.

ITALIC

Italic, boldface, caps, or small caps shall not be used for emphasis; nor shall unusual indentions be used. This does not apply to literally reproduced quotations from historical, legal, or official documents. If italic other than restricted herein is desired, the words should be underscored and "Fol. ital." written on each folio. Do not construe this to apply to "Ordered," "Resolved," "Be it enacted, etc.," titles following signatures or addresses, or the part of datelines which should be set in italic.

Names of vessels must be set in italic, except in headings, where they will be

quoted.

The prayer delivered in either House must be set in 7½-point roman. If prefaced or followed by a quotation from the Bible, such quotation must be set in 7½-point italic.

When general or passing mention is made of a case, the title is set in roman, as Smith Bros. case. When a specific citation is indicated and reference follows, use italic for title, as Smith Bros. case (172 App. Div. 149).

Titles of cases are always set in italic if followed by references; but, except as in casual use noted above, titles in 6½-point matter are italicized whether or not references follow, as United States v. Jones Lumber Co.

In 7½-point matter, when only the title of a case is given, set in roman and use against instead of the abbreviation of versus, as United States against 12 Diamond Rings.

When versus is used in other than legal phrases and for the purpose of showing contrast, it is not abbreviated or set in italic, as "airplanes versus battleships.

MISCELLANEOUS

Do not quote any communication carrying date and signature. However, a letter (or other communication) bearing both date and signature that appears within a letter (or one in reduced type) shall be quoted.

Do not put quotation marks on centerheads in 6½-point extracts unless center-

heads belong to original matter.

In newspaper extracts, put place and date at beginning of paragraph. Use caps and small caps for name of place and roman lowercase for date. Connect date and extract by an em dash. If date and place are credited in a bracket line above extract, they need not be used again at the beginning of paragraph. (See p. 257 under Credits.)

Each Whereas in a preamble must begin a new paragraph. The Therefore be it must be preceded by a colon and be run in with the last Whereas. Be it will run in with the word Therefore, but must not be supplied when not in copy. Note

the following:

Whereas it has been deemed advisable to, etc.: Therefore be it Resolved, That the committee, etc.

In the titles of legal cases copy is followed as to spelling, abbreviations, and use of figures.

Use single punctuation in citations of cases and statutes:

United States v. 12 Diamond Rings (124 U. S. 329; R. S. p. 310, sec. 1748). In Fifty-fifth United States Statutes at Large, page 742 (55 Stat. 742).

Note this form: In One Hundred and Twenty-fourth United States Reports, page 329; also (124 U.S. 329).

Indent star lines 2 ems on each side. Use five stars.

If a title is used as part of the name of an organization, vessel, etc., spell; thus, General U. S. Grant Post, No. 76, Grand Army of the Republic.

The order of subdivision of the Constitution of the United States is as follows:

article I, section 2, clause 3.

If an exhibit appears at the end of a speech, the head Exhibit should be set in 6½-point caps and small caps.

In extracts containing votes the names must be run in, as Ellison of Maryland,

Jackson, and Ramspeck, etc.

In a Senator's or a Representative's remarks, when amendments, sections, etc., are referred to by number, use No. before the figure even though number appears in copy. However, if intervening words separate the number and the term it identifies, use numbered. For example, Senate amendments Nos. 187 and 188, amendments of the Senate numbered 187 and 188; bill sections Nos. 10 and 11. sections of the bill numbered 10 and 11.

In text references to Senate and House reports and in executive and miscellaneous documents, the No. must always be supplied if not in copy; thus, House Report No. 75, Executive Document No. 20, Miscellaneous Document No. 37.

USE OF CAPS AND SMALL CAPS

[Names of Senators and Members are set caps and small caps when in parentheses or brackets.]

Mr. McKELLAR entered the Chamber and answered to his name.

Mr. LEHMAN and Mr. MORSE entered the Chamber and answered to their names.

After some delay, Mr. Byrd entered the Chamber and answered to his name.

[Note that in 7½-point text an em quad is used after the name of the person speaking, while in 6½-point extracts an en quad only is used, as in the following:]

Mr. STIGLER. I think this bill is so well understood that no time will be required for its discussion.

Mrs. Norton. Does this bill come from the Committee on Armed Services?

The SPEAKER. It does.

BLANCHE H. KARSCH, ADMINIS-TRATRIX OF THE ESTATE OF KATE E. HAMILTON-VETO MESSAGE (S. DOC. NO. 108)

The VICE PRESIDENT laid before the Senate the following veto message from the President of the United States, which was read, and with the accompanying bill, referred to the Committee on the Judiciary and ordered to be printed:

To the Senate:

I return herewith, without my approval, S. 514, entitled "An act for the relief of Blanche H. Karsch, administratrix of the estate of Kate E. Hamilton."

I know of no circumstances which would justify the exception made by S. 514 to the long-continued policy of Congress, and do not believe that the field of special legislation should be opened to relieve special classes of taxpayers from the consequences of their failure to file claims within the period fixed by law.

HARRY S. TRUMAN. THE WHITE HOUSE, March 17, 1952.

[When communications from the President contain extracts, etc., such extracts must be in 61/2-point.]

REPORT ON CLASSIFIED INFOR-MATION (S. DOC. NO. 107)

Mr. President, the Mr. LODGE. Committee on Armed Services of the Senate has recently requested the Office of Public Relations of the Department of the Navy to submit to it a report on classified information. The Department of the Navy has complied with the request, and I now present the report and ask that it be published as a Senate document.

The VICE PRESIDENT. Without objection, the report will be printed as a document as requested by the Sena-

PAWNEE INDIANS v. THE UNITED STATES (S. DOC. NO. 311)

Amendment, third reading, and passage of a bill

GOVERNMENT OF THE TERRI-TORY OF HAWAII

The Senate proceeded to consider the bill (S. 1881) to amend an act entitled "An act to provide a government for the Territory of Hawaii," approved April 30, 1900, as amended, to establish a Hawaiian Homes Commission, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs with amendments.

The first amendment was, on page 4, line 22, to strike out "Keaaupaha" and insert "Keaaukaha,"

The amendment was agreed to.

The next amendment was, on page 6, line 19, after the figure "(1)", to insert "by further authorization of

Congress and", so as to make the paragraph read:

(1) by further authorization of Congress and for a period of 5 years after the first meeting of the Hawaiian Homes Commission only those lands situate on the island of Molokai, etc.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third

time, and passed.

The title was amended so as to read: "A bill to amend an act entitled 'An act to provide a government for the Territory of Hawaii,' approved April 30, 1900, as amended, to establish a Hawaiian Homes Commission, granting certain powers to the Board of Harbor Commissioners of the Territory of Hawaii, and for other purposes."

Forms of amendments

The joint resolution (S. J. Res. 4) requesting the President to negotiate a treaty or treaties for the protection of salmon in certain parts of the Pacific Ocean was announced as next in order.

Mr. McFARLAND. Mr. President. I have just had an opportunity to examine this joint resolution. I offer this amendment.

The PRESIDING OFFICER. The Secretary will state the amendment offered by the Senator from Arizona.

The READING CLERK. On page 1, line 11, it is proposed to strike out the words "both within and", so as to make the joint resolution read:

Resolved, etc., That the President of the United States be, and he is hereby, requested to negotiate on behalf of the United States, as promptly as is practicable, etc.

Mr. BRIDGES. Mr. President, I observe in the report of the bill by the chairman of the Foreign Relations Committee that it is reported as a Senate joint resolution. I ask for a modification of it so that it will be a Senate resolution instead of a Senate joint resolution.

The LEGISLATIVE CLERK. It is proposed to strike out "Senate Joint Resolution 4" and insert "Senate Resolution 85."

The PRESIDING OFFICER. Is there objection to the modification? The Chair hears none, and it will be so modified.

Mr. McFARLAND. Would it not be necessary to change the resolving clause also? The resolving clause reads:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled.

Mr. BRIDGES. Yes, Mr. President; it should read simply "Resolved." I ask that that change be made.

The LEGISLATIVE CLERK. On page 1. lines 1 and 2, it is proposed to strike out all after the word "Resolved."

The amendment was agreed to.

The VICE PRESIDENT. The next amendment will be stated.

The Assistant Secretary. On page 2, line 13, after the word "pound", insert the words "except rice cleaned for use in the manufacture of canned foods", so as to read:

Rice, cleaned, 2 cents per pound, except rice cleaned for use in the manufacture of canned foods.

The VICE PRESIDENT. The question is on agreeing to the amendment. The amendment was agreed to.

The next amendment was, on page 151, to strike out:

Steamer Phalarope: Master, \$1,500; engineer, \$1,200; fireman, \$780; two seamen at \$810 each; cook, \$870; in all, \$5,970.

The amendment was agreed to.

[Note use of words, figures, and punctuation in the following:]

The next amendment was, on page 34, in line 9, before the word "assist-, to strike out "five" and insert "three"; in line 10, after the word "clerks" and before the words "of class 3", to strike out "seven" and insert "five"; in line 11, before the words "of class 2", to strike out "twelve" and insert "nine"; in the same line, be-fore the words "of class 1", to strike out "twenty-seven" and insert "twenty"; in line 12, before the words "at \$1,000 each", to strike out "three" and insert "two"; and in line 18, to "\$124,940" and insert strike out "\$102,590", so as to read:

EMPLOYEES' COMPENSATION COMMISSION

Salaries: 3 Commissioners at \$4,000 each; secretary, \$2,750; attorney, \$4,000; chief statistician, \$3,000; chief of accounts, \$2,500; accountant, \$2,250; claim examiners—chief \$2,250, assistant \$2,000, assistant \$1,800, 3 assistants at \$1,600 each; special agents-2 at \$1,800 each, 2 at \$1,600 each; clerks-5 of class 3, 9 of class 2, 20 of class 1, 2 at \$1,000 each; in all, \$102,590.

Mr. HOLLAND submitted amendment intended to be proposed by him to the sundry civil appropriation bill, which was ordered to lie on the table and to be printed, as follows:

Add a new section, as follows:

"That the President of the Senate appoint three Members of the Senate: and the Speaker of the House three Members of the House."

The Senate resumed the consideration of the bill (H. R. 4075) to limit the immigration of aliens into the United States.

Mr. BYRD. Mr. President, I offer an amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The Assistant Secretary. On page 9, line 3, it is proposed to amend by striking out "3" and inserting "1", so that it will read:

SEC. 2. (a) That the number of aliens of any nationality who may be admitted under the immigration laws to the United States in any fiscal year shall be limited to 1 percent of the number of foreign-born persons of such nationality resident in the United States.

The VICE PRESIDENT. The guestion is on agreeing to the amendment offered by the Senator from Virginia to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. THYE. I ask for the yeas and nays on the passage of the bill.

Mr. GEORGE. Let us have the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. LONG (when his name was called). I am paired with the senior Senator from New Hampshire [Mr. BRIDGES]. I am informed that if he were present he would vote as I intend to vote on the passage of the bill. therefore feel at liberty to vote, and vote "yea."

Mr. SALTONSTALL. I desire to announce that the Senator from Nebraska [Mr. Butler], the senior Senator from New Hampshire [Mr. BRIDGES], and the Senator from Delaware [Mr. WILLIAMS] would vote for the bill if present. sarily absent.

[Observe that bills coming from the President take the form of *An act*. This rule must be followed invariably, even if the copy reads *A bill*.]

MRS. VIRGINIA THRIFT

Mr. COUDERT. Mr. Speaker, by direction of the Committee on House Administration, I submit a privileged resolution (H. Res. 321) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That there shall be paid out of the contingent fund of the House to Mrs. Virginia Thrift, widow of Chester R. Thrift, late an employee of the House, an amount equal to 6 months' salary compensation at the rate he was receiving at the time of his death, and an additional amount not to exceed \$250 to defray funeral expenses of the said Chester R. Thrift.

The resolution was agreed to, and a motion to reconsider was laid on the table.

BILLS PRESENTED TO THE PRESIDENT

Mr. KLEIN, from the Committee on Rules, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H. R. 3331. An act for the relief of

Harry L. Smith; and

H. R. 3366. An act to amend section 409 of the Interstate Commerce Act, relating to joint rates of freight forwarders and common carriers by motor vehicle.

ENROLLED BILL SIGNED

Mr. KLEIN, from the Committee on Rules, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 2859. An act to amend the Naval Reserve Act of 1938, as amended.

THE PRIVATE CALENDAR

The SPEAKER. The Clerk will call the first bill on the Private Calendar.

JOHN SIMS

The Clerk called the first bill on the Private Calendar, H. R. 399, for the relief of John Sims.

There being no objection, the Clerk

read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to John Sims, Mobile, Ala., the sum of \$5,000.

The SPEAKER. The gentleman from Florida offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. Sikes: In line 4, after the word "pay", add a comma and the following words: "cut of any money in the Treasury not otherwise appropriated."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

On motion of Mr. SIKES, a motion to reconsider the vote by which the bill was passed was laid on [not upon] the table.

PAUL BARRERE

The Clerk called the next bill, H. R. 1984, for the relief of Paul Barrere.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 962. An act for the relief of Mr. and Mrs. Frank Holehan; to the Committee

on the Judiciary.
S. 1077. An act for the relief of William
A. Haag; to the Committee on the Judi-

ciary.

[In the reference of Senate acts to House committees the name of the committee will be repeated after each act, though there may be several acts referred to the same committee.]

State of the Union

EMERGENCY TARIFF

Mr. JAVITS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2435) imposing temporary duties upon certain agricultural products, and so forth.

The SPEAKER. Is there objec-[After a pause.] The Chair hears none. The question is on the motion of the gentleman from New York that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2435, the emergency tariff bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2435, with Mr. McCormack in the chair.

The CHAIRMAN. The clerk will

report the bill.

The Clerk read the bill, as follows: Be it enacted, etc .-

TITLE I

EMERGENCY TARIFF

That on and after the day following the passage of this act, for the period of 6 months, there shall be levied, collected, and paid upon the following articles,

Committee of the Whole House on the when imported from any foreign country into the United States or into any of its possessions (except the Virgin Islands and the islands of Guam and Tutuila), the rates of duty which are prescribed by this section, namely:

> Mr. MERROW. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

> The CHAIRMAN. The gentleman New Hampshire offers amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MERROW: Page 2, line 1, after the word "bushel", insert "Provided, That wheat in transit upon the Great Lakes shall not be subject to the duty hereby imposed."

[Mr. KILDAY addressed the Committee. His remarks will appear hereafter in the Appendix.]

JAVITS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. McCormack, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H. R. 2435, had come to no resolution thereon.

STATEMENT

ment to be quoted.]

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7160) to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges, submit the following written statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

On amendment No. 1: This amendment eliminates Alaska from the benefits of title I of the bill. The House recedes with an amendment giving such benefits to Alaska.

On amendments Nos. 3 and 4: These amendments provide for an equal allotment of aid under title I in the amount of \$20,000 to each State and to the Territory of Hawaii each year before the remainder is allotted on the basis of farm population; and the House recedes.

On amendments Nos. 14, 15, 16, and 17: These amendments are for the purposes of making section 22 of the bill apply to the Territory of Hawaii; and the House recedes.

Pension bills

PENSIONS

The SPEAKER pro tempore. Under the previous order of the House, private pension bills and bills relating

to pension legislation are in order

for consideration today.

Mr. BUSH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House for the consideration of the bill (H. R. 5214) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; and, pending that, I would like to ask if we can make some arrangement as to the time for general debate.

The motion of Mr. Bush was

agreed to.

Accordingly the House resolved itself into the Committee of the Whole House, with Mr. McCormack in the chair.

The Clerk read the title of the bill H. R. 5214.

The bill is as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Hattie Hjelmberg, widow of William Hjelmberg, late of the 4th Company United States Coast Artillery Corps, war with Spain, and pay her a pension at the rate of \$12 per month.

Mr. FULTON. Mr. Speaker, I call up the bill (H. R. 6507) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, and I ask unanimous consent that this bill be considered in the House as in Committee of the Whole House.

The SPEAKER pro tempore. The Chair hears no objection, and the

Clerk will report the bill.

The Clerk read the bill, as follows: Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Mary M. Lytel, helpless and dependent daughter of Isaac Lytel, late of Company D, 118th Regiment Ohio Volunteer Infantry, and pay her a pension

at the rate of \$20 per month.

Amendments

[As figures are now used in bills to express sums of money, dates, paragraph numbers, etc., amendments involving such expressions must be set in figures thus: Strike out "\$40" and insert "\$1,000", etc. For other enumerations in bill style, see rule 2.8, p. 5.]

The next business on the Speaker's table was the bill (H. R. 4167) to enable national banking associations to extend their corporate existence, returned from the Senate with sundry amendments.

The SPEAKER. The Clerk will

read the amendments.

The Clerk read the amendments, as follows:

First amendment: Page 2, line 20, after the word "law", insert "or unless hereafter modified or repealed."

Add to line 21, as follows:

"Provided, That soldiers and sailors who lost either an arm or a leg during the late war shall be exempt from paying any special tax as peddlers of tobacco, snuff, or cigars."

[Observe that amendments are quoted when preceded by 6½-point introduction.]

Mr. MAGEE. I move the following amendments:

The amendments were read as follows:

In line 3, after the word "condemned", insert "cast-iron cannon."

In line 5, strike out "to be used" and insert "for use and ornamentation."

Page 2, line 14, strike out "southern."

The reading of the bill was resumed.

The next amendment was, in line

25, after the word "book", to strike out "cases" and insert "rests"; in the same line, strike out "\$5,000" and insert "\$2,500", so as to make the clause read:

For purchase of ice, buckets, file holders, bookrests, and clocks, \$8,600; \$2,500 of this sum to be expended for shelving and file holders in the second auditor's office.

The amendment was agreed to.

The Clerk read as follows:

Amend by striking out the words "from the date of her husband's death."

The amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time and passed.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Appendix of the Record, or to revise and extend remarks, was granted to:

Mr. DEANE.

Mr. Machrowicz and to include a resolution of the American Legion.

Mr. FARRINGTON (at the request of Mr. ASPINALL) and to include certain letters, notwithstanding the fact that the extension exceeds two pages of the RECORD, etc.

Mr. Flood in four instances.

Mr. Zablocki in two instances and to include extraneous matter.

Mr. McCarthy (at the request of Mr. Marshall) and to include other extraneous material.

Mr. LARCADE in four instances and to

include newspaper articles.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Vinson (at the request of Mr. Brown of Georgia), for an indefinite period, on account of official business.

Mr. Widnall (at the request of Mr. Martin of Massachusetts), for 1 day, on account of official business.

Mr. August H. Andresen, for an indefinite period, on account of official business.

Adjournment, recess, and evening session

ADJOURNMENT

Mr. PRIEST. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 48 minutes p.m.) the House, pursuant to its order heretofore entered, adjourned until tomorrow, Tuesday, March 18, 1952, at 12 o'clock noon.

RECESS

The SPEAKER. The hour for the recess has arrived. The Chair will state that should he be absent this evening the gentleman from Georgia, Mr. CAMP, will act as Speaker protempore.

The hour of half past 4 o'clock having arrived, the House, in pursuance of its order, took a recess until half

past 7 o'clock this evening.

EVENING SESSION

The recess having expired, the House reassembled at half past 7 o'clock p. m. and was called to order by Mr. Camp as Speaker pro tempore.

[Follow copy as to expressing time of adjournment, as 6 o'clock and 25 minutes p. m., or 6:25 p. m. If necessary, the headings Recess and Adjournment must be supplied in House and Senate copy.]

RULES AND EXAMPLES

Set in $6\frac{1}{2}$ -point on $7\frac{1}{2}$ -point slug, Record measure (14 picas); biweekly, solid. In bound Record, 2-point lead before each cap line; also use lead in History of Bills and Resolutions before each flush line.

In bound Record index, use red figures only.

Cap lines flush, blue underscore; italic lines flush, red underscore; entries 1 em; overs 2 ems; where a 3-em dash is used as a ditto or an italic sidehead is run into text, the overruns above and below will be 2 ems also.

Spell months if in brackets or parentheses (except in citations) even when

followed by the day of the month.

Abbreviate States after all geographic names throughout index, as N. Y., N. Mex., etc.

Comma precedes folio figures.

Names of vessels in italic—U. S. S. Brooklyn, steamship Raleigh.

All standing committee lines (House and Senate) when set flush and caps

will be set as a separate line. Do not run in entries on these lines.

Use roman for words in parentheses as (Omitted in Record), (Appendix), (deceased), (administrator), (newspaper), (magazine), (vessel), (House), (Senate), (city), (State), and (Governor of Maryland), but use italic for (late Senator from New York), (former Representative from Maryland).

Record, referring to Congressional Record, cap and lowercase.

Index cards that read back to subject must be followed.

Observe the following forms: (Omitted in Record), (Rept. 349), (S. Rept. 25), (S. Rept. —), (H. Rept. 41), (H. Rept. —), (S. Doc. 23), (H. Doc. 47), (H. J. Res. 26), (H. Con. Res. 5), (H. Res. 7), (S. Res. 7), (S. J. Res. 6), (S. Con. Res. 7), (S. 1495; H. Rept. 712), (H. R. 1252; S. Rept. 214).

[Public Law 16.]

(See bill S. 546—George bill.)

If the numbers of several bills are given, use this form: S. 24, 2486; H. R. 217, 2287, etc.; that is, do not repeat S. or H. R. with each number. Separate the Senate and House bills by a semicolon.

Use colon after italic and roman indented sideheads. Example: Ship-repair facilities: resolution for, etc. (see H. Res. 450). Munitions dump: remarks in House relative to, etc., A989. In cap lines use small-cap "v.," in place of against, in legal cases.

Court cases in italic.
Asterisk indicates action on bill.

23. SENATE AND HOUSE JOURNALS

GENERAL RULES

The Journals are set in 7½-point on 8½-point slug (except votes, which are 6-point on 61/2-point slug and appear in columns), Record measure, and as a rule Record style prevails.

Messages from the President are set in 7½-point, and extracts in same are

auoted.

Abbreviate States as provided on page 142, except in amendments, which must

be set bill style.

In amendments, matter stricken out must be set in roman, quoted; and matter inserted must be set in italic, bill style. Omit comma between name of Senator or Representative and State in dupli-

cate names, thus: Mr. Johnson of Colorado.

In the Journals names of Members are set in caps and small caps.

Note use of semicolon in Papers Referred (p. 281). Use 1 lead only on each side of small-cap heads.

Where 7½-point small-cap heads make more than one line, set all but the last line on a 7½-point slug.

Use 61/2-point cap line for centerheads showing time of meeting after recess

taken in a day's proceedings.

Addresses of visitors to Chamber in either House are set in 71/2-point and quoted.

Omit (H. Doc. No. 17, etc.) if appearing in Senate copy in connection with any matter which has been ordered printed as an executive document.

Note instructions on page 291 regarding "rundowns" in setting votes in Senate and House Journals.

For abbreviations of bills, resolutions, etc., see page 145. Capitalize the word "Act" in all bill matter.

Indented matter will be set 2 ems for paragraphs and 1 em for overs; if more indented matter follows, indent accordingly.

LABOR-FEDERAL SECURITY APPROPRIATION, 1950

FOGARTY, from the Com-Mr. mittee on Appropriations, pursuant to clause (2) (a), rule XI, reported (Rept. No. 228) the bill (H. R. 3333) making appropriations for the Department of Labor, the Federal partment of Labor, the Federal Security Agency, and related inde-pendent agencies, for the fiscal year ending June 30, 1950, and for other purposes.

Said bill and report were referred to the Committee of the Whole House on the State of the Union and ordered

to be printed.

Mr. KEEFE reserved all points of order on said bill.

ORDER OF BUSINESS

On motion of Mr. Fogarty, by unan-

imous consent,

Ordered, That, notwithstanding any rule, the bill (H. R. 3333) making appropriations for the Department of Labor, the Federal Security Agency, and related independent agencies, for the fiscal year ending June 30, 1950, and for other purposes, may be in order for consideration on tomorrow, Wednesday, March 9, 1949.

COMMITTEE OF THE WHOLE HOUSE ON THE STATE OF THE UNION

Mr. FOGARTY, pursuant to a special order agreed to on March 8, 1949, moved that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 3333) making appropriations for the Department of Labor, for the fiscal year ending June 30, 1950, and for other purposes.

Pending which,

On motion of Mr. Fogarty, by unan-

imous consent,

Ordered, That the time for general debate on said bill shall continue not to exceed 2 hours, be equally divided, and be controlled by Mr. FOGARTY and Mr. KEEFE.

The motion that the House resolve itself into the Committee of the Whole was agreed to.

Accordingly,

The House resolved itself into the Committee of the Whole House on the State of the Union for consideration of said bill; and after some time spent therein.

The SPEAKER resumed the chair. When Mr. TRIMBLE, Chairman, reported that the Committee, having had under consideration said bill, had directed him to report the same back to the House with the recommenda-tion that the bill do pass.

By unanimous consent, the previous question was ordered on the bill to its

passage or rejection.

The bill was ordered to be engrossed and read a third time and was read a

third time by title.

Mr. TABER moved to recommit the bill (H. R. 3333) to the Committee on Appropriations with instructions to report the same back forthwith, with the following amendment:
On page 24, lines 8 to 17, strike out

the first proviso, and insert Provided, That the Director of the Budget finds it necessary to meet increased costs.

On motion of Mr. Fogarty, by unanimous consent, the previous question was ordered on the motion to recommit.

The question being put, viva voce, Will the House recommit said bill? The motion to recommit was not agreed to.

The question being put, viva voce, Will the House pass said bill?

So the bill was passed.

A motion to reconsider the vote whereby said bill was passed was, by unanimous consent, laid on the table.

AMENDMENTS

When said resolution was considered.

The following amendments, recommended by the Committee on House Administration, were agreed to:

Line 1, strike out "affective" and

insert effective

Line 4, strike out "\$5,000" and insert \$2,500

The resolution, as amended, was then agreed to.

A motion to reconsider the vote whereby said resolution, as amended, was agreed to was, by unanimous consent, laid on the table.

The House then proceeded to the consideration of the following amendments of the Senate in disagreement (Nos. 7, $7\frac{1}{2}$, 11, 13, 32, 46, 52, 54, 56, 63, 74, 76, 77, and 85):

93073°-53-22

line 10, after "responsibility", insert : Provided further, That not to exceed \$2,700,000 of the amount herein appropriated may be transferred to the Department of the Navy.

Senate amendment No. 71/2: Page 10, line 10, after "responsibility", insert : Provided further, That no part of this appropriation or contract au-

thorization shall be used-

(A) to start any new construction project for which an estimate was not included in the budget for

the current fiscal year; or

(B) to start any new construction project the currently estimated cost of which exceeds the estimated cost included therefor in budget;

unless the Director of the Bureau of the Budget specifically approves the start of such construction project;

On motion of Mr. Thompson of Texas, by unanimous consent, Senate amendments Nos. 7, 71/2, 32, 52, 56, and 76 were considered en bloc.

On motion of Mr. Thompson of Texas the House receded from its disagreement to the amendments of the Senate Nos. 7, $7\frac{1}{2}$, 32, 52, and 76, and concurred therein.

24. NOMINATIONS, REPORTS, DOCUMENTS, LAWS

GENERAL RULES

The rules governing document work apply to nominations and withdrawals except as here noted.

Matter is set in 10-point, double leaded.

All nominations take current date, and the legislative day added when neces-

(Sample of each form is shown on following pages.)

In withdrawals, follow the date on copy and also the wording of the dateline. Spell everything except year, day of month, section, page, paragraph numbers, and any serial number where the word numbered is used or implied.

Omit the words I nominate in all nominations, no matter how or where written

In single nominations (that is, where only one person is named) where the words I nominate begin a paragraph in copy, indent the paragraph 6½ ems. This applies to Air Force, Army, and Navy as well as civilian nominations. (See

In Air Force, Army, and Navy nominations where only lists of names are given, set flush in half measure where there are four or more in a group. If less than a paragraph, full measure. No period after names.

(See sample 2, p. 300.)

Where civilian nominations have more than one person named, each name is set as a separate nomination (except where otherwise prepared), following the form of postmasters; that is, each separate carries the same nomination number, with the black superior figure, and is set as a plain paragraph. Indent these 1 em only. (See sample 3, p. 301.) Those that are to be grouped (a number of names printed as one nomination) are nominations to or promotions in the Coast Guard, Coast and Geodetic Survey, Public Health Service, military service, naval service, and diplomatic and consular service (except where consul, minister, or ambassador is named to a specific country).

If nomination contains an explanatory note, enclose note in parentheses and place just before the blank dateline at bottom.

Note that the word confirmed is set in italic in the recommendation line. sample 4, p. 302.)

Reinstatement, Reappointment, or similar statement, if a sentence at the end of

a nomination, is placed in parentheses. (See sample 3, p. 301.)

The President's signature indicates the end of a nomination, but is printed only in a withdrawal (see sample 5, p. 303), or in a withdrawal and nomination combined.

Capitalize the word Arm when synonymous with Corps, as Cavalry Arm,

Infantry Arm, etc.

In post-office nominations, if superior figures are used in connection with the bracketed figure at the left, bear off from the outside of the bracket. Use black superior figure, case 33. (See sample 3, p. 301.)

A nomination confirmed without reference to a committee is printed as a

message only.

Style of messages and Executive Journal extracts is shown in samples 6 and 7, on pages 303 and 305, respectively.

Note the use of the words I nominate in paragraphs in the messages.

Treaties in Executive Calendar will be set 36½ picas wide; type, 8-point on 10-point slug.

Armed Services nominations printed as advance messages use the following

Army or Air Force:

FEBRUARY 18, 1952.—Committed to the Committee of the Whole House and ordered to be printed ²

[6 points]

[18 points]

Mr. Nichols, from the Committee on the Judiciary, submitted the following

[14 points]

REPORT

[10 points] [To accompany H. R. 6154]

[14 points]

The Committee on the Judiciary, to whom³ was referred the bill (H. R. 6154) for the relief of Porter Bros. & Biffle et al., having considered the same, report favorably thereon with the recommendation

that the bill do pass with certain amendments.4

The purpose of H. R. 6154 is to permit the parties named therein to enter suit in the United States District Court for the Eastern District of Oklahoma for damages due from the United States by reason of alleged neglect and wrongdoing of officials and inspectors of the United States Bureau of Animal Industry in dipping tick-infested cattle in Texas and Oklahoma.

STATEMENT OF FACTS

In 1919 several citizens of Oklahoma bought on the market at Fort Worth, Tex., cattle that had originated in quarantine areas. These cattle were dipped under the supervision of the United States Bureau of Animal Industry and were certified as being clean of fever and ticks. The cattle were shipped into Oklahoma and it was found that the fever ticks had not been killed.

AGNES INGELS, DECEASED

MAY 2 (legislative day, MAY 3), 1952.—Ordered to be printed

Mr. McCarran, from the Committee on the Judiciary, submitted the following

REPORT²

[To accompany S. 1300]

The Committee on the Judiciary, to which was referred the bill (S. 1300) for the relief of the heirs of Agnes Ingels, deceased, having considered the same, reports favorably thereon with an amendment and recommends that the bill do pass.4

In line 7, strike out the figures "\$10,000" and insert in lieu thereof the figures "\$5,000".5

EXPLANATION OF THE BILL

The facts in the case are fully set forth in Senate Report No. 715, 82d Congress, 2d session, which is appended hereto and made a part of this report.

[S. Rept. No. 715, 82d Cong., 2d sess.]

The Committee on the Judiciary, to which³ was referred the bill (S. 4692) for the relief of the heirs of Agnes Ingels, deceased, having considered the same, reports favorably thereon with the recommendation that the bill do pass with an amendment.

On line 7, page 1, strike out "\$25,000" and insert in lieu thereof "\$5,000". As amended, your committee recommend that the bill do pass.

PENSIONS AND INCREASE OF PENSIONS FOR CERTAIN SOLDIERS AND SAILORS OF THE REGULAR ARMY AND NAVY, ETC.

April 26, 1952.—Committed to the Committee of the Whole House and ordered to be printed

Mr. Wood, from the Committee on Veterans' Affairs, submitted the following

REPORT

[To accompany H. R. 5214]

The Committee on Veterans' Affairs, to whom were referred sundry bills granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, etc., submit the following report:

This bill is a substitute for the following House bills referred to

said committee:

H. R. 400. Hattie Hjelmberg. 416. Julia M. Porter. 424. Annie M. Sullivan.

H. R. 1031. Fletcher Duling. 1078. William D. Wheaton. 1098. Elmer H. Weddle.

H. R. 416. Julia M. Porter, Auburn, N. H., widow of Clinton A. Porter, who served during the war with Spain in Company F, 1st New Hampshire Infantry, from June 28 to October 31, 1898 (W. Ctf. 868508).

A physician testifies as follows:

I have this day examined Julia M. Porter, aged 38 years, of Auburn, N. H., widow of Clinton A. Porter, private, Company F, 1st Regiment New Hampshire Volunteer Infantry. She had previously been approved for disease of eyes 4/18, etc.

It is believed that an increase of pension to \$20 per month is warranted, and it is so recommended.

The honorable the President of the Senate.

Sir: Pursuant to the order of the court, I transmit herewith a certified copy of the findings of fact and conclusion filed by, etc.

I am, very respectfully, yours,

JOHN W. TAYLOR, Assistant Clerk, Court of Claims.

[Court of Claims of the United States. No. 17319, Congressional, The United States] William W. Danenhower, Jr. v.

STATEMENT

This is a claim for damages to business property belonging to claimant arising out of the changes in the grades of certain avenues in Washington City, D. C., and the relocation of its tracks by a railroad company under an act of Congress. The bill reads:

"That the Secretary of the Treasury is hereby authorized and directed to pay to, etc., in pursuance to the Act of Congress approved February 12, 1901 (31 Stat. L., p. 774), and Acts supplemental thereto."

FINDINGS OF FACT

I. The actual damages caused by depreciation in value of claimant's property in the fall of 1903, due to changes in the grades of New Jersey and Virginia Avenues, etc.

CONCLUSION

The court, as a conclusion, states that the foregoing findings of fact show the nature and character of the demand. Whether the same shall be paid rests in the discretion of Congress.

Filed March 28, 1952.

GEORGE H. WHIKE CONSTRUCTION CO.

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

WITHOUT APPROVAL THE BILL (H. R.1 3002) FOR THE RELIEF OF GEORGE H. WHIKE CONSTRUCTION CO.

AUGUST 6, 1951.—Referred to the Committee on the Judiciary and ordered to be printed

To the House of Representatives:²

I return herewith, without my approval, H. R. 3002, for the relief of George H. Whike Construction Co.

The bill proposes an appropriation of \$14,483.45 in payment of a claim asserted by the George H. Whike Construction Co. against the United States for losses in performing a construction contract between the claimant and the Federal Public Housing Authority. The contractor maintains that these losses resulted from the operation of Executive Order 9301. This order, changing the workweek from 40 hours to 48 hours, was issued at or about the time the contract in question was let. The order was made effective in Canton, Ohio, where the contract was being performed, some months after the work was started.

The legislative history of this case reveals a number of disputed issues of fact as well as involved questions of law. It seems to me that these issues and questions can best be resolved by the courts. This is the course which generally has been taken by other contractors who, like the present company, claimed losses in the performance of Government contracts because of the impact of Executive Order

¹ If "S." appears in copy, because corresponding Senate bill is used, follow. ² In House bills in the Senate, the salutation "To the Senate:" is used.

9301 and directives of the War Manpower Commission issued thereunder. If this case is tried in the courts, as I believe it should be, not only will there be the assurance that comes with judicial review, but the criticism will be avoided that this claimant has been given more favorable treatment than that accorded other contractors who were adversely affected by the longer workweek.

While I have felt obliged for these reasons to withhold my approval of H. R. 3002, I would be willing to approve a measure authorizing

the Court of Claims to adjudicate the suit of this claimant.

HARRY S. TRUMAN.

Whike Construction Company, of Canton, Ohio, in full settlement of all claims against the United States for losses sustained on Jackson Park homes project contract numbered OH 33037, Canton, Ohio, as the result of Executive Order 9301 which changed the workweek from forty hours to forty-eight hours on same date (February 11, 1943) that such contract was signed: Provided, That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. 25. FOREIGN LANGUAGES

[Revised for this edition by committee consisting of George L. Trager, Director of Linguistic Research, Foreign Service Institute, Department of State, chairman; John G. Mutziger, Chief of Linguistics Section, U. S. Board on Geographic Names; and Henry L. Smyr, Jr., Director of School of Languages and Linguistics, Foreign Service Institute, Department of State]

PURPOSE AND PLAN

The purpose of this section of the STYLE MANUAL is to provide a guide to the typography of the more important languages handled in this Office.

It has been designed to answer the needs of two categories of users:

1. Those who have very little or no knowledge at all of a language but seek to become more competent in following copy and syllabifying with at least a passing degree of accuracy; and

2. Those who have an academic knowledge of a language but lack the practical information belonging to the special field of typography, complete guidance to

which is procurable only from advanced and foreign works.

To answer the needs of the former, there is presented first a sample of the language as it looks in print, followed by an adequate display of the alphabet and a helpful paragraph on special characters. This will be found fully adequate, for all practical purposes, to enable printers to follow copy competently, even though with but literal accuracy.

There is also included a brief discussion of pronunciation, so far as this can be described without special technical phonetic data, as a basis for the rules for

syllabifying words in printing.

The rules for syllabifying follow, and these were formulated so that with the aid of the first four rules, which require no further knowledge of the language, a printer can syllabify with at least an 80-percent accuracy. The application of the remaining rules may require a further knowledge of the language, but these are intended essentially for the second category of users.

To answer the needs of this category fully, the rules for syllabifying are presented with utmost comprehensiveness, so that they cover all possible prob-

presented with utmost comprehensiveness, so that they cover all possible problems that may be encountered; and subjoined is also a selected list of illustrative word divisions, which may be used either for further study or reference. Other useful data on typography and bibliography are also included.

Dictionaries of languages other than English rarely show syllable division. This is due in part to the fact that many spelling systems are less complex than that of English, and therefore make it easier to divide words in writing according to the spoken syllable divisions. The rules stated in the following sections are intended to be summaries of the procedures actually followed by printers native to the languages. native to the languages.

- s in sing; combination ss, and in foreign words sc, like s in S sing; combination sj, like sh; followed by i plus another vowel, like sh; in foreign words, sch and sh are pronounced
- t, at beginning of word; silent in word det and in ending et when unstressed; followed by i plus another vowel, like sh
- long: oo in food; short: oo in good; often like o in go, but u shorter
- v, before vowel or r and after long vowel; after short vowel, V like oo in food; often silent after l
- v; in foreign words only W
- ks, or at beginning of words, like s in sing; now only in foreign words
- long: ee in meet, but with lips rounded as in pronouncing oo y in food; resembles (long) German ü, French u; short: ee in meet, but shorter, and with lips rounded as in pronouncing oo in food; resembles (short) German \ddot{u} , French u
- \mathbf{Z} s in sing; occurs only in foreign words Z
- Æ long: e in met, but longer; short: e in met; before or after r, like a in hat; formerly sometimes written ä; in handwriting, usually æ
- a in care, but with lips rounded as in pronouncing oo in Ø food; resembles (long) German ö, French eu; formerly sometimes written ö
- long: aw in law, but tending toward o in go; short: aw in law, but shorter, and tending toward o in go; formerly written aa, and still so written by many (as in the sample of the language at top of p. 330)

Special characters

Danish uses the Latin alphabet with the addition of the following special characters: \mathcal{L} x, \emptyset ϕ , and \tilde{A} \tilde{a} .

The c, q, w, x, and z are used in words of foreign origin and in proper names. Until quite recently, aa was written for å, and in dictionaries, indexes, telephone directories, etc., was found either preceding a or following it. Now the tendency is to place it at the end of the alphabet. The letter w is often regarded as a mere variant writing for v, and in dictionaries, etc., the w's are then found interspersed with the v's; otherwise, w follows v.
Fraktur type (German text) is scarcely in use today.

Vowels and consonants

The vowels are $a, e, i, o, u, y, x, \phi$, and d; the back vowels being a, o, u, and d; the front vowels e, i, y, x, and ϕ . The other letters of the alphabet are consonants.

Consonantal units

Includes all the combinations given under Combinations of consonantal letters (digraphs) and the following: gj, kj, kl, kv, lj, sk, skj, sp, spr, st, str, and sv.

Rules for syllabification

1. Diphthongs, digraphs, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: Ba-lance, Hvi-sken, Hu-stru, Bøj-ning.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: Af-ten, dan-ske, sek-sten, tjenst-lig, blom-stre.

4. Division may be made between two vowels not constituting a diphthong or

between a diphthong and a vowel: Fri-er, Lej-er.

These are: ad, af, an, bag, 5. Certain adverbial prefixes are kept intact. be, bi, bort, efter, er, for, fra, frem, ge, in, ind, med, mis, ned, om, op, over, paa, til, ud, ude, und, under, and ved: ad-splitte, Af-drift, An-drag, Bag-slag, etc.
6. Certain suffixes are kept intact. These are: agtig, artig, hed, and inde: barn-agtig, egen-artig, Mat-hed, Mester-inde.

7. Compound words are divided according to their component parts (and each

part according to rules 1 to 6), the compounding s, if used, going with the preceding component: Aften-avis, Aften-blad, Aftens-tid.

8. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: Pa-triot, me-trisk, Repu-blik, eks-trem, Post-skriptum, Shake-speare, Wash-ington. Under this rule are also included scientific and technical words, which editors prefer to treat etymologically: Hemi-sfære, Dia-gnose.

Stress and diacritics

Most words are stressed on the first syllable, except when they begin with a prefix such as be-, er-, for-, ge-, in which case the following syllable is stressed. Foreign words, especially those of French origin, are usually accented on the last, or next to the last, syllable. In compound words, the first component

last, or next to the last, syllable. In compound words, the first component receives the primary stress; the second receives secondary stress.

In stressed syllables, vowels are generally long before one consonant or none, and short before two or more consonants. There are, however, many exceptions, especially in that a long vowel is often found before two or more consonants. Some monosyllables, which are generally weakly stressed in the sentence, are short, even when they end in a vowel or single consonant.

In unstressed syllables, the vowel is always short. If a word, having, when it stands alone, a long vowel, occurs unstressed in a spoken sentence, the vowel is question is propounced short.

in question is pronounced short.

Characteristic of Danish is an unwritten sound, called the stød, or glottal stop; i. e., a closure of the vocal cords, followed by a sudden opening of them. The sound, resembling a slight cough, occurs often in English before stressed vowels, but speakers of English are scarcely aware of it.

The stød occurs only in stressed syllables. It is used both after vowels and ter voiced consonants following a vowel. It does not occur in a word or after voiced consonants following a vowel. syllable which is made up of a short vowel followed by one or more of the consyllable which is made up of a short vowel followed by one or more of the consonants p, b, t, d, k, g, f, or s, nor in any word or syllable ending in a short vowel. It is also usually absent from the first part of compound words, even where the uncompounded form would have a stød. Otherwise, the stød is found in all monosyllables and in some polysyllables, especially foreign loanwords. It is also found in polysyllabic second members of compounds, even where, uncompounded, the word would have no stød.

However, the presence or absence of the stød cannot be determined from the written form of the word, but must be known for each word itself, and even for each form of the word. A word which is pronounced with a stød when stressed may lose it if it is weakly stressed in a sentence.

With the exception of d, d (variants for d), and d (variants for d), discritics are

With the exception of d, \ddot{a} (variants for x), and \ddot{o} (variant for ϕ), diacritics are used only in foreign loanwords and in certain proper names.

Capitalization

Capitalization is as in English, except that the pronouns De, Dem, and Deres are capitalized, as is the familiar form of the pronoun I. Until recently, all nouns were capitalized, as in German. Proper adjectives are lowercased.

Punctuation

Punctuation is practically the same as in English, except that all dependent clauses are set off by commas.

DUTCH

Nu is het duidelijk, dat het duratieve aspect in de feitelijke handeling moeilijk tot zijn recht kan komen. Men kan wel stilstaan op een plaats, maar niet stilstaan in de tijd. De enige middelen, die hier practisch ten dienste staan, zijn de herhaling en de vertraging. Van beide vindt men in allerlei godsdienstige rituelen voorbeelden.—Held: Magie, Hekserij en Toverij, Groningen (1950), p. 10.

Alphabet and pronunciation

	J K L M	i j k l m	h i in fit, police y in yet; like English z in azure in some words k l m	VW	v w x y	$\begin{bmatrix} w \\ x \\ i \text{ in fit} \end{bmatrix}$

Special characters

Dutch uses the Latin alphabet; and with the exception of the circumflex and acute accents, which it uses only to a small extent, it has no special characters. The letters ij are treated like a ligature. When they begin a capitalized word, both letters must be uppercased, thus: IJsland, Iceland; IJverig, zealous.

Vowels and consonants

The vowel letters are a, e, i, o, u, and y; the remaining characters are all consonants. The so-called double vowels, aa, ee, oo, and uu, are merely lengthened sounds of their respective single forms; thus aa is like aa in Saar, ee like e in egg, oo like o in rose (never like oo in good), uu like u in sure. Double vowels are regarded by most grammarians as single characters rather than diphthongs.

Diphthongs

The diphthongs are pronounced approximately as follows:

aai as ai in aisle
aau as ou in house
au as ou in house
eeu as a in fate followed by French u
or German ü
ei as ai in aisle
eu as er in her
ie as ie in pier

ieu as eu in reunion
ij as ai in aisle
oe as oe in shoe
oei as uoy in buoy
ooi as oy in annoy
ou as ou in house
ui as urry in furry

Digraphs

The digraphs and their sounds are:

ch like German ch 1 ph as f qu like English qu

sch as s plus ch or s 2 sj as sh in shall th as t

Rules for syllabification

1. Double vowels, diphthongs, and digraphs may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant or

a digraph: le-ven, leu-gen, la-chen, vrou-wen, le-raar.

3. In a group of two or more consonants, division is made before the last consonant or digraph: heb-ben, amb-ten, man-che; but if one of the consonants is s preceded by another consonant, the s goes over: kor-sten, ern-stig, Pink-ster. 4. Division may be made between two vowels not constituting a diphthong or

between a diphthong and a vowel: zaai-en, knie-ēn, spi-on.

5. Certain adverbial prefixes are kept intact. These are: aan, achter, af, be, bij, daar, door, er, ge, heen, her, in, mede, mein, mis, na, neder, neer, om, on, onder, ont, oor, op, over, samen, regen, reven, sed, according to annual ont, oor, op, over, samen, tegen, terug, toe, uit, ver, voor, voort, wan, weder, and weg:

pje, schap, sche, ske, ste(n), ster, and tje: dronk-aard, eigen-aardig, zak-achtig, oord-je (little place), oor-tje (little ear), boom-pje, hoog-ste, bak-ster.²
7. Compound words are divided according to their component parts (and each part according to rules 1 to 6): eer-ambt, angst-kreet. The compounding s, if

used, is kept with the preceding component: rijks-ambt, volks-eenheid.

8. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: repu-blick, por-tret, Trans-atlantisch, Washington, Shake-speare. Under this rule are also included scientific and technical words, which editors prefer to treat etymologically: dia-gnostisch, proto-plasma; but interesse has been naturalized and is divided inte-resse.

¹ This sound of ch is for words of native origin only. In words of French origin ch is pronounced as in French (like sh) and in words of Greek origin like ch in chorus.
² The digraph sch has two sounds. At the beginning of a word and at the beginning of a syllable preceded by a prefix it is pronounced like s plus the Dutch ch; elsewhere like English s.
² The suffixes listed must be distinguished from the same letter combinations that are not suffixes and not appended to a meaningful word. Thus ste in beste is not a suffix, as be is not a word. Likewise and in veinzaard and grijnzaard is not a suffix in the above sense, as there are no words veinz and grijnz. Properly, veinzaard and grijnzaard are derivatives of veinzen and grijnzen and are syllabified according to rule 3; i. e., vein-zaard, grijn-zaard, and beste is syllabified bes-te.

Stress and diacritics

The stress in Dutch words falls on the root syllable in simple words and on the main component (usually the first) in compound words: beSTELlen (to order), SCHOOLboek (schoolbook). Words of foreign origin keep their own characteristic stress.

Diacritical marks are used to a limited extent in Dutch. The circumflex is used to indicate the contraction of two syllables into one, if the contraction is unusual: daân for daden (deeds), liên for lieden (people). The dieresis (trema) is used to indicate that the vowel over which it is placed does not form a diphthong with the preceding vowel but is pronounced separately: zeeën (pronounced zay'-en), seas; oliën (pronounced olee'-en), to oil. The acute is used to give added emphasis: dáar is het, there it is, but daar is hij eindelijk, there he is finally; één gulden, one guilder, but een gulden, a guilder.

Capitalization

Capitalization in Dutch is similar to that in English, but with the following differences:

If the first word of a sentence is a single letter only, the word goes lowercase and the next one is capitalized: 's Avonds is het koud, in the evening it is cold. 'k Weet niet wat hij zegt, I do not know what he says.

The first-person pronoun, ik (I), is not capitalized, but the second-person pronouns U (you), Uw (your), and Gij (you), are generally capitalized in personal

correspondence.

The name particles de, ten, van, if not preceded by the Christian name, are capitalized; otherwise, lowercased.

Punctuation and hyphenation

Punctuation and hyphenation are similar to the usages in German (q. v.). The apostrophe, however, is used not only to indicate abbreviations or contractions but also to form the plural and possessive of foreign loanwords: 'n paard (for een paard), a horse; 's avonds (for des avonds), in the evening; 't huis (for te huis), at home; 'k heb (for ik heb), I have; sofa's, sofas; Maria's, Mary's.

Special characters

Finnish uses the Latin alphabet with the addition of the following special characters: Ä ä and Ö ö.

The letters b, c, f, q, x, and z do not occur in native Finnish words and are not mentioned even in the alphabets of some Finnish grammars. However, the standard dictionaries, containing words of foreign origin, list them in the alphabetic order shown above.

Vowels and consonants

The vowel letters are a, e, i, o, u, y, d, and o, the remaining letters being all consonants. The doubled vowel letters, aa, ee, ii, oo, uu, yy, dd, and od represent sounds the same as, but about twice as long as, their corresponding single ones.

Diphthongs

The diphthongs and their sounds are:

ai as ai in aisle ui like Finnish u plus i au as ow in how uo like Finnish u plus o yi like Finnish y plus i ei as ei in eight yö like Finnish y plus ö eu like Finnish e plus u äi like Finnish ä plus i ie like Finnish i plus e $\ddot{a}y$ like Finnish \ddot{a} plus y $\ddot{o}i$ like Finnish \ddot{o} plus iiu like Finnish i plus u oi as oi in oil öy like Finnish ö plus y ou as ow in low

The diphthongs ie, uo, yō, eu, iu, yi, ai, āy, ōi, and ōy are sounded as indicated above, i.e., like their constituent separate letters but in quick succession, ie, uo, yō having the main stress on the second vowel, the others on the first. The above combinations, except those ending in i, are diphthongs only at the beginning of a word or of a compound constituent; elsewhere they are separate vowels and may be divided: tapa-us, kope-us, kieli-en.

FINNISH 341

Rules for syllabification

1. Double vowels and diphthongs may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant: ka-la, neu-lat, vää-ryys.

3. In a group of two or more consonants, division is made before the last

consonant: kuk-ka, silp-pu, myrs-ky.

4. Division may be made between vowels not constituting a diphthong or between a diphthong and a vowel: lapsi-en, asi-asta, eri-āvā.

5. Compound words are divided according to their component parts (and each part according to rules 1 to 4): maa-alue, ilman-ala, esi-isä.

6. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: Shake-speare, kon-gressi, mono-grammi, me-tri. Under this rule are also included scientific and technical words, which editors prefer to treat etymologically: apo-pleksia, dia-gnostinen.

Diacritics and stress

With the exception of \(\alpha\) and \(\delta\), Finnish uses no diacritics. Stress is always on the first syllable.

Capitalization

Capitalization is similar to that in English, except that months, days of the week, and proper adjectives are lowercased.

Punctuation is similar to that in English. The apostrophe is used to separate a proper noun from its inflection as well as to show elision.

Special characters

French uses the Latin alphabet with the addition of the following special characters: À à, Â â, Ç ç, É é, È è, Ê ê, Ë ë, Î î, Ï ï, Ô ô, Ù ù, and Û û.

Vowels and consonants

The vowel letters are a, e, i, o, u, y; the other letters are consonants. Vowel sounds are represented by one of the vowel letters or by a combination of two or three of them. Consonant sounds are represented by one or two consonant letters.

Combinations of two vowel letters (diphthongs)

ai, ay, ei, ey as e in met or there ou as oo in moon au, eau as o in no oui like English we eu, æ, æu as u in fur 1 ui somewhat like we oi, oy as wa in watt

Combinations of two consonant letters (digraphs)

ch as sh in shoe; occasionally as k ph as in English gn as ny in canyon qu as k; occasionally as kwgu as g in give before e, i, y; occasionally rh as r th as t as qw ll as y in yet (in -ille)

Sequences of vowel(s) and n or m (nasals)

In French, there are four nasal sounds. These are produced by allowing air to pass through the nose and the mouth at the same time, but without any actual sound of m, n, or ng after them. These sounds are represented by the syllables:

1. am, an, em, en, the vowel sound of each being like a in far;

aim, ain, ein, ein, im, in, ym, yn, the vowel sound of each being a in fan;
 om, on, with the vowel like aw in fawn;

4. eum, eun, um, un, with the vowel like u in fur.

Nasals occur at the end of a word or in the middle of a word before another consonant except m or n: faim, bien, manger, membre; otherwise, the above combinations are not nasalized: ananas (pronounced anana), nommer (pronounced There are a few exceptions.

Consonantal units

In French, certain consonants followed by l or r or preceded by s are pronounced in the same syllable with the following vowel. These consonant groups are:

fl, frbl, br sc, sp, sph, squ, st gl, gr phl, phr, pl, pr chl, chr, cl, cr thr, tr vl, vr

Rules for syllabification

1. Diphthongs, digraphs, and consonantal units may not be divided.

2. Division may be made on a vowel or on a diphthong before a single consonant,

a digraph, or a consonantal unit: amu-ser, che-veux, jeu-nesse, pay-san, cro-chets, gra-phies, mé-thode, ali-gner, dé-cret, qua-drille.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: al-ler, sys-tème, fonc-tion, com-pris, isth-mique, ar-cher, har-gneux, Ag-nus.

 $^{^1}$ Note that α is printed as a single piece of type when it has this pronunciation, and also in some words of Latin origin, where it is pronounced as French e. When o and e are printed separately, they represent separate sounds in different syllables.

4. Division between vowels should be avoided, but it is tolerated if the second vowel carries the dieresis (trema) or begins a compound or derivative element:

héro-ïsme, archi-épiscopal, anti-acide.

5. Prefixes are kept intact only if this conforms to rules 2 to 4: ab-duction (rule 3), con-tinuer (rule 3), in-duction (rule 3), mal-heur (rule 3), non-chalant (rule 3), ob-server (rule 3), pré-ceder (rule 2), pré-ocupation (rule 4), re-joindre (rule 2); but abs-tention (rule 3), cons-titution (rule 3), ins-pire (rule 3), ma-ladroite (rule 2), no-nobstant (rule 2), obs-cure (rule 3), pres-cription (rule 3), res-piration (rule 3).

6. Compounds are divided preferably according to their component parts (and each part according to rules 1 to 5): grand'-mère, gentils-hommes, Tchéco-

slovaquie.

If a compound is formed with an apostrophe followed by a vowel, division may not be made on the apostrophe; thus the compounds qu'environ, hors-d'œuvres, s'entr'aider, may be divided only as follows: qu'en-vi-ron, hors-d'œu-vres, s'en-

If a compound is formed with a euphonic t (e. g., ira-i-il, présente-t-on), the t

should be made to go over.

7. Division may be made before a final mute syllable; i. e., a syllable ending in e, es (plural ending), or ent (third person plural ending of verbs), provided the syllable begins with a consonant: quel-que, ri-che, au-tres, par-lent; but pa-yent

or pay-ent would be inadmissible as per rule 9.

Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: alpen-stock, reichs-amt, cre-scendo, sky-scraper, Wash-ington. Under this rule are also included scientific and technical words, which editors prefer to treat etymologically: dia-gnostique, hémisphère, hémo-ptysies.

9. The letters x and y may not be separated from an adjacent vowel; thus exact and moyen should not be divided, but pay-san, ex-pert may be divided as

shown in rules 2 and 3, respectively.

Stress and diacritics

In French, words do not have any syllabic stress, each syllable being uttered

with almost equal force with a slight stress falling on the last.

The diacritics used in French are the acute, the circumflex, the grave, the

dieresis (trema), and the cedilla.

² The practice as to rule 5 varies among French printers, some dividing phonetically or etymologically, according to convenience. The Dictionnaire français Illustré (Librarie R. Simon), however, follows the uniform practice of dividing words only phonetically: des-cription, dé-sordre, ins-tance, ins-trument, malencontre, sous-crit, su-borner. The rule given in the text conforms to this practice.

FRENCH

The circumflex occurs on all the vowels. It may indicate that an s followed the vowel in Old French, as in ile from isle, island, and pate from pase, paste; it may distinguish homonyms like da (due) and du (of the); a, e, a may represent vowels longer than those spelled a, e, a, as in ane, bete, mole.

The acute accent occurs only on the e; e represents a close e sound, more like the a in late than the e in met. It will be found on an e followed by a single

consonant or digraph or consonantal unit, followed by a vowel as in érable, église, It will not be on an e followed by two consonants (i. e., two consonants which do not form a digraph or consonantal unit), as in esclaves, elbeuf. The letter ℓ is common at the end of words ($\ell t \ell$, $pass \ell$), and frequently initially, and medially as well, under the conditions already stated.

The grave accent occurs on a, e, and u. One of its functions is to distinguish homonyms: a (has) and a (to); des (of the) and des (since); ou (or) and ou (where). Far more frequent is the occurrence of e, indicating an open e sound, more like the e in met than the a in late. It occurs in one-syllable words in which mute eis the last letter, and a single consonant or digraph, or consonantal unit, is the next-to-last letter, as ère, lèvre, sèche; in word-final syllables like -ère, -ère, -ègre, -èble, -èvre, -èdre, -ères, -ègres, etc.; occasionally, in a word ending in es, to indicate that the e is not silent, as in progrès, succès.

The dieresis occurs on the second of two consecutive vowel letters to indicate

that the sequence does not have its usual value.

ai as e in met (plaisir) ei as e in met (reine) oi as wa in watt (toi) as u in fur (ail)

gue as g in go plus mute e in vague gui as g in go plus ee as in meet (guide); sometimes g as in go plus we as in we (aiguille)

aï as a in watt plus ee as in meet

(naif)

eï as e in met plus ee as in meet oï as o in for plus ee as in meet (colloide)

oë as o in for plus a as in late (canoë); as o in for plus e as in met (noël) guë as g in go plus u as in German ü

plus mute e (aigue) guï as g in go plus u as in German \ddot{u} plus ee as in meet (contiguïté)

The cedilla occurs under the letter c before a, o, or u, to indicate that c is pronounced like s; recu, received.

Capitalization

Capitalization is similar to that in English, except that proper adjectives, names of months, days of the week, titles, and the personal pronoun je (I) are not capitalized. In proper names of persons taken from the Italian the article is lowercased: le Dante; otherwise capitalized: La Fayette. In names of places the article is lowercased: le Havre.

Use roman small caps for the centuries: xixe siècle.

In vivid personifications the nouns personified are capitalized, as Ici habite la

Mort (Death abides here).

Historical events (la Révolution) also take the capital.

The term "street" and its synonyms are lowercased, as rue de la Nation, avenue de l'Opéra, route Saint-Denis, boulevard Saint-Laurent.

Observe the forms used in the following terms: l'Académie française; la Légion d'honneur; Louis le Grand; son Éminence; l'Église, when referring to the church as an institution; and l'État, when denoting the nation, as le Corps d'État, le Conseil d'État.

It is a rule among French printers that the preposition \dot{a} (to) when capitalized

is set without the accent.

Punctuation and hyphenation

Punctuation is practically the same as in English.

The apostrophe indicates elision, usually of mute e: l'ami for the nonexistent form le ami.

The hyphen is used much more widely than in English, and care should be exercised not to mistake the marginal hyphen in copy used orthographically as one of syllabification. The various orthographic uses of the hyphen are as follows:

Between verbs and the pronouns in questions: Parlais-je? Did I speak?
 Between verbs and object pronouns: Parlez-moi, speak to me.
 Between verbs and the particles en, y, ce, on: Portez-leur-en, bring them

some. 4. On each side of the euphonic t: A-t-il? Has he? Parla-t-elle? Did she

speak?

5. Before ci and là: celui-ci, this one.
6. After entre in all reciprocal verbs: s'entre-quereller, to quarrel with one another.

7. Between demi and its noun: une demi-heure, half an hour.8. In compound nouns and adjectives, especially with prepositional particles: arc-en-ciel, rainbow; nouveau-né, newborn.

9. In spelled numbers. (See p. 349.)

10. In geographic names: Saint-Valéry-en-Caux, Fontaine-le-Dun.

Wenn aber auch der Charafter verschiedener Weltgegenden von allen äußeren Erscheinungen zugleich abhängt; wenn Umriß der Gebirge, Physiognomie der Pflanzen und Tiere, wenn Himmelsbläue, Wolfengestalt und Durchsichtigkeit des Luftkreises den Totaleindruck bewirken: so ist doch nicht zu leugnen, daß das Hauptbestimmende dieses Eindrucks die Pflanzendecke ist. Dem tierischen Organismus sehlt es an Masse; die Beweglichkeit der Individuen und oft ihre Kleinheit entziehen sie unsern Blicken. Die Pflanzenschöpfung dagegen wirkt durch stetige Größe auf unsere Einbildungskraft.—Alexander von Humboldt, Ansichten der Natur, vol. II, p. 20 f. (1849).

¹ All German vowels are pronounced short or long. German spelling does not consistently indicate vowel quantity, but two dependable conversion rules may be mentioned. A double vowel and a vowel followed by a single consonant are pronounced long; a single vowel followed by a double consonant is pronounced short. Consonant quantity is fairly stable; a double consonant does not indicate a lengthened sound.

Special characters

German traditionally uses the Fraktur alphabet (German text). Note the following somewhat similar characters: Au, BB, CE, NH, DDD, and ff. Texts in specialized fields, but increasingly also literature of general appeal, periodicals, and portions of daily papers are printed in the Latin alphabet, with the following special characters, called umlauts: A ä, Ö ö, and Ü ü.

The Fraktur alphabet employs also four ligatures: d) (ch), d (ck), f (b, ss), and f (tz). According to German typography, ligatures may not be replaced by their respective individual characters cf, cf, f3, t3. In syllabification, f may be divided, d, and f may never be divided, and d, if division is called for, must be changed to fs. This is because the character c may never end a word or a changed to f.f. This is because the character c may never end a word or a syllable and, hence, may not terminate a line.

When German is set in Latin characters, the only ligature employed is ß; the other ligatures are represented by their respective individual characters. When ß is not available, it may be replaced by ss. Some printers use sz instead, but

this practice is not recommended.

Transliteration of s, ss, and tz

In resetting matter from Latin characters into Fraktur, the rules for treating s, ss, and tz are as follows:

The single s is transliterated 8: (a) At end of a word: Haus = Saus.

(b) At end of a compound element: Dienstag = Dienstag.

(c) Before a suffixed element: Bosheit=Bosheit.

(d) In some words of foreign origin (the dictionary is the only sure guide to these): Diskant = Distant.

In all other cases a single s is transliterated f.

The ss is transliterated §:

(a) At end of a word: Fluss=Flus.

At end of a compound element: Gusseisen = Guffeisen. (b) (c) Before a suffixed element: hässlich = häßlich.

(d) Before any consonant: fasste=faste.
(e) Between two vowels, if the first vowel is long or a long diphthong (the dictionary is the only sure guide to these): grüssen = grüßen.

(f) In the prefix miss: missachten = migachten.

In all other cases ss is transliterated ff.

The tz is transliterated t: trotz=trot; but when tz belong to different components of a derivative, they are transliterated to: entzücken = entzücken, achtzehn = achtzehn.

Transliteration of 3

In resetting matter from Fraktur characters into Latin, 3 is transliterated I if it stands before a consonant and J if it stands before a vowel.

NOTE.—As most work in this Office is of a technical, legal, or scientific nature and is mostly set in Latin characters, the remainder of this section will also be in Latin characters.

Vowels and consonants

The vowels are a, e, i, o, u, and y (including the umlauts \ddot{a} , \ddot{o} , and \ddot{u}). The other letters of the alphabet are consonants.

Vowel sequences (diphthongs)

The diphthongs and their sounds are:

aa as German long a ai as ai in aisle au as ou in our äu as oi in noise ee as German long e

ei as ai in aisle eu as oi in noise ie as German long i oo as German long o

To the ie there are a few exceptions, as in a few words ie is not a diphthong but the two letters are sounded separately, as ee-uh. These exceptions occur usually at the end of words of foreign origin, the ie being equivalent to the Latin ia: Linie, Materie, Julie, etc.

To the above diphthongs should be added also ae, oe, and ue, which are sometimes used in place of \ddot{a} , \ddot{o} , and \ddot{u} , respectively, and are sounded as \ddot{a} , \ddot{o} , \ddot{u} .

Consonant sequences (digraphs)

The digraphs and their sounds are:

ch as ch in Scotch loch ph as English ph=f

sch as sh in shall th as t

The sound for ch may be approximated by making a strong h sound. In words of Latin origin, ch is pronounced like k. The digraph sch must be distinguished from the mere coincidental juxtaposition of those letters, pronounced like s and ch separately: Biss-chen, little bit; Fäss-chen, little barrel; Häus-chen, little house.

Consonantal units

The combinations qu (pronounced kv), st, and \mathcal{B} are treated as consonantal units. Some editors treat pf as a consonantal unit, especially after another consonant; but this is not favored by Duden, Rechtschreibung der deutschen Sprache, which divides $k\ddot{a}mp$ -fen, karp-fen, stup-fen as indicated.

When B is replaced by ss, ss is divided.

Rules for syllabification

1. Diphthongs, digraphs, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: le-ben, lie-ben, wa-chen, wa-schen, mei-sten, gro-Ben re-qui-sit.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: Mut-ter, Was-ser, stimm-ten, kämp-fen,

wün-schen, Fen-ster, Pfing-sten.
4. Division may be made between two vowels not constituting a diphthong or

4. Division may be made between two vowers not constituting a diphthong or between a diphthong and a vowel: Oze-an, Trau-ung.

5. Certain adverbial prefixes are kept intact. These are: ab, an, auf, aus, be, bei, durch, ein, emp, ent, er, fort, ge, her, hin, hinter, in, miß, mit, nach, nieder, ob, um, un, unter, ver, vor, weg, wider, wieder, zer, zu, zurück, and zusammen: ab-ändern, An-erbe, auf-arbeiten, etc.

6. Certain suffixes are kept intact. These are: artig, chen, haft, heit, schaft, and tum: eigen-artig, Sus-chen, Knapp-heit, Wachs-tum.

7. Compound, words are divided according to their component parts (and

7. Compound words are divided according to their component parts (and each part according to rules 1 to 6): alt-italisch, Tür-angel. The compounding r and s, if used, are kept with the preceding component: dar-auf, wor-auf, Redens-

art, Orts-angabe.

8. Foreign words and components of foreign words follow the conventions of the language of origin: Republik, Hy-drant, Kre-scendo, Wash-ington, Shakespeare. Under this rule are also included scientific and technical words, which

editors prefer to treat etymologically: Dia-gnose, Milro-skop.

9. When division is made on or before a syllable from which a letter was elided, the letter is restored to render the syllable integral: glitschst is divided glit-schest, Luftschiffahrt is divided Luftschiff-fahrt; and when the double consonant ck is divided, the c is changed to k, thus Hacke and Zucker are divided Hak-ke and Zuk-ker. It is important to bear in mind that words divided under this rule, if subsequently reset and run over, must have their original spelling restored.

Diacritics and stress

Other than the umlauts, no diacritical marks are used in German. The chief stress falls on the root syllable in simple words (SINGen, to sing), and on the leading component, usually the first, in compound words (FESTland, mainland). Words of foreign origin have their own characteristic stress.

Capitalization

With the exception of the following, capitalization conventions are the same as in English:

1. All nouns and words used as nouns are capitalized: 1 das Geben, the giving;

die Armen, the poor.
2. Proper adjectives are lowercased: die deutsche Sprache, the German language. 3. Adjectives derived from personal names are capitalized: die Lutherische Übersetzung, Luther's translation; but when used descriptively, lowercased: die lutherische Kirche, the Lutheran Church; ciceronische Beredsamkeit, Ciceronic eloquence.

4. The pronouns Sie, you, Ihr, your, and Ihnen, to you, are capitalized, but

not ich, I.

In solid matter, where the umlaut on capital letters is likely to cause trouble in alinement, it will be omitted and a lowercase e added after the capital, as Ae (Aerger), Oe (Oel), Ue (Ueber).

¹ In the interest of simplicity, works in philology and bibliography often allow all common neuns to go lowercase.

Punctuation and hyphenation

(pages)

* 1, 1 * 1 * 1

Punctuation is practically as in English. The comma, however, is used to set off subordinate clauses of all kinds; e. g., ich glaube, daß er kommen wird, I believe that he will come.

In series of words made up of two parts, where one part is common to both words, the hyphen is used as follows: Feld- und Gartenfrüchte (field- and garden produce), the word früchte being common to both Feld and Garten; but and -insured), because Haftpflicht is common to both Versicherungsgesellschaft and Versicherte. Haftpflicht-Versicherungsgesellschaft und -Versicherte (liability-insurance company

² According to Duden, Rechtschreibung der deutschen Sprache, 1942, the official orthography applicable to Germany, Austria, and Switzerland, requires that not only short but also long numbers should be written in one word: (ein)tausendneunhundertundzehn Jahre (one thousand nine hundred and ten years), sechzigtausendsiebenhundertachtundfünfzig Mark (sixty thousand seven hundred fifty-eight marks); yet many orthographers prefer breaking up the compound numbers: drei und zwanzig, hundert und eins, etc.

[Concluded on following page]

¹ The character σ is used in initial and medial positions in a word; the character s, in the final position.

In connected speech, many phonetic changes occur: word-final n often drops or becomes m, and the first sound of the next word may change, for example, from p to b; ts at the beginning of a word becomes dz after a word ending in n; many other such differences in pronunciation, between an isolated word and a word in connected speech, are observable. These phenomena, however, are not

reflected in the spelling.

Modern Greek uses the same alphabet as Classical Greek, but many of the letters stand for different sounds now because of the linguistic changes that have taken place since classical times. The names of the letters are given here in the usual English version of their Classical Greek form. These names are usually pronounced in English as follows: alpha (al as in Alfred), bayta, gamma, delta, épsilon (o as in don), zayta, ayta, thayta, eye-ó-ta, kappa, lamda, mew, new, zie (ie as in die or sigh), óm-i-kron (o's as in don), pie, roe, sigma, tou (ou as in house), yóu-psi-lon (or úp-silon), fie, kie, sie, o-máy-ga. In Modern Greek, the letter names are pronounced ahlfa, veeta, gahma, thelta (th as in then), eh-psee-láwn, zeeta, eeta, theeta (th as in thin), yoeta, kahpa, lahmvtha (th as in then), mee, nee, ksee, oh-mee-kráwn, pee, ro, seeg-ma, tahv, ae-psee-láwn, fee, hee, p-see, o-mée-ga.

It is suggested that for transliterating Modern Greek names, etc., the usual transliteration of the letters be used, regardless of pronunciation: a, b, g, d, e, z, \bar{e} , th, i, k, l, m, n, x, o, p, r, s, t, u, ph, kh, ps, \bar{o} . For β , v may be used if desired. (Compare with the remarks on transliteration of Classical Greek,

p. 363.)

There are two quite different styles of Modern Greek: one is an extremely formal academic style, known as katharevousa; the other, called Demotic Greek, is used by everybody in daily speech, and in modern novels, stories, poetry, and some newspapers. There are considerable differences between the two styles in grammatical structure and vocabulary, but their pronunciation and spelling are largely the same.

Special characters

Some of the letters of the alphabet have variant forms: for alpha, α and α ; for beta, θ and β ; for theta, θ and θ ; for kappa, κ and u; for pi, π and ω ; for phi, φ and φ ; for psi, ψ and y. These are used interchangeably.

Some Greek letters are exactly or nearly like the corresponding Latin letters: Δ α , B β , δ , E ϵ , Z, I ι , K κ , M, N, O o, s, T τ , v. The other letters are characteristically Greek: Γ γ , Δ , ζ , H η , Θ θ , Λ λ , μ , ν , Z ξ , H π , P ρ , Σ σ , T, Φ ϕ , X χ , Ω ω .

Vowels

The vowels are α , ϵ , η , ι , δ , v, and ω , including the three vowels with a subscript $(\alpha, \eta, \text{ and } \omega)$, which are pronounced the same as their respective vowels without the subscript. The remaining letters are consonants.

τσ as ts in hats; ch in chug in some foreign words

Consonantal units

For purposes of syllabification, any combination of consonants that may begin a Greek word is a unit. Hence, the following are consonantal units:

βδ, βλ, βρ πλ, πν, πρ, πτ $\gamma\lambda$, $\gamma\nu$, $\gamma\rho$ $\delta\mu$, $\delta\nu$, $\delta\rho$ σβ, σθ, σκ, σμ, σπ, στ, στρ, σφ, σχ τλ, τμ, τρ $\theta\lambda$, $\theta\nu$, $\theta\rho$ φθ, φλ, φν, φρ κλ, κμ, κν, κρ, κτ $\chi\theta$, $\chi\lambda$, $\chi\nu$, $\chi\rho$

Also, any group of three consonants, the first two and the last two of which are units, as listed above, are likewise regarded as consonantal units. Thus, $\chi\theta\rho$ is a unit, because $\chi\theta$ and $\theta\rho$ are units.

Rules for syllabification

1. Diphthongs, digraphs when they represent a single sound, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant,

digraph, or consonantal unit: πα-τέ-ρας, παι-διά, βί-βλος.

3. In a group of two or more consonants, the division is made before the last consonant, digraph, or consonantal unit: γλῶσ-σα, πορθ-μός, 'Αγ-γλία, ἄν-θραξ.
 4. Division may be made between vowels not constituting a diphthong or

between a diphthong and another vowel: εὐ-ειδής, θέ-ατρον, λα-ϊκός, οὕ-ΐα.

5. Certain adverbial prefixes are kept intact. These are: ἀν, δια, δια, δια, δια, εἰσ, έκ, έν, έξ, μισ, προς, συν, ὑηερ, and ὡσ: ἀν-αρχία, ἐξ-άδελφος, ὥσ-τε.
6. Compound words are divided according to their component parts (and each

part according to rules 1 to 5): ωιλ-άνθρωπος, τρισ-άθλιος.7. Foreign words in Greek orthography are regarded as naturalized words and divided according to rules 1 to 5: 'Αγ-γλία, Βα-σιγ-κτών, 'Εδου-άρ-δος; but foreign compound words are divided according to their component parts: Τσεχο-σλοβακία,

Stress and diacritics

The three accent marks used in Greek now all represent the same thing loud stress, although in Classical Greek they are supposed to have represented different pitch accents:

1. The acute ('), which may occur on the vowel, or on the second vowel of a diphthong, in any one of the last three syllables of a word.

2. The circumflex (~, ^), which may occur on the vowel, or on the second vowel of a diphthong, in either of the last two syllables of a word. The circum-

flex never appears over ϵ or ϵ .

3. The grave (`), which may occur only on the vowel, or on the second vowel of a diphthong, in the last syllable of a word; such a word must be followed directly by another word, not a period or comma.

Greek orthography also employs two "breathing" marks:

1. The rough breathing, or spiritus asper ('), which occurs on an initial vowel, or on the second vowel of an initial diphthong. It has no phonetic value, although in Classical Greek it represented an h sound before the vowel or diphthong; in transliteration, it may be represented by h.

2. The smooth breathing, or spiritus lenis ('), which occurs on an initial vowel, or second vowel of an initial diphthong. It has no phonetic value, and in Classical Greek represented a lack of h sound before the vowel.

In text, these breathings and the grave and acute accent marks are placed above and to the left of capital vowel letters, rather than directly above.

Some words, called enclitics, may appear with no written accent at all; the word preceding an enclitic, however (unless it too is an enclitic), will always have at least one accent mark and may have two; e. g., τοιαῦτά ἐστι.

Another diacritical mark is the dieresis (trema) ("), which occurs on the second

of two vowels to indicate that they do not form a diphthong, which otherwise they would form: καϋμένος (pronounced kaeeménos instead of kavménos).

These diacritical marks may form combinations, as follows:

" lenis acute

" lenis grave " asper acute

- " asper grave
- " dieresis acute * dieresis grave
- 7 circumflex lenis * circumflex asper

An iota is often placed beneath the vowel α , η , or ω , mainly to indicate a declensional or conjugational inflection: $\dot{\eta}$, the nominative plural of $\dot{\eta}$; $\tau\iota\mu\tilde{q}$, third person singular of $\tau\iota\mu\tilde{\omega}$. This iota is called iota subscript.

Capitalization

Capitalization is practically the same as in English. The pronoun of address is usually capitalized. Capital letters do not take diacritical marks. If a lowercase accented vowel is capitalized, the accent mark is dropped. An initial capital vowel, however, carries the accent mark before it. The iota subscript may be placed either beneath the vowel or changed into a regular iota and placed right after the vowel. Thus the words $\delta \gamma_{iOS}$, $\delta \delta \eta_S$, and $\delta \pi \delta$, if capitalized, are set "AΓΙΟΣ, " $\Lambda \Delta H \Sigma$, and 'AΠΟ. " $\Lambda \delta \eta_S$ may also be set " $\Lambda \iota \delta \eta_S$.

Punctuation

The comma, the period, and the exclamation point are the same as in English and are used similarly. The semicolon and the colon are represented by a point above the line. The question mark resembles the English semicolon. The scheme for quotation marks is the same as in the western languages.

In transliteration from Classical Greek, the letters may be represented thus: a, b, g, d, e, z, \(\bar{\epsilon}\), th, i, k, l, m, n, x, o, p, r, s, t, u, ph, kh, ps, \(\bar{\epsilon}\); initial \(\beta\) is transliterated by rh, internal $\dot{\rho}\dot{\rho}$ by rrh; v not following α , ϵ , η , ι often represented by y instead of u. It was formerly customary to latinize Classical Greek names, and this custom is still followed for most ordinary names used in English literature; in doing this, the letters are transliterated as above, except: γ is represented by n before γ , κ , ξ , χ ; η , by e, but the macron is usually omitted, giving simply e; κ , by c; v, by y, except after α , ϵ , η , ι , where it is u; χ , by ch; ω , by o, but the macron is usually omitted. The diphthong $\epsilon \iota$ may be represented by ι instead of $\epsilon \iota$; the diphthong $\epsilon \iota$ may be represented by ι instead of $\epsilon \iota$; the diphthong $\epsilon \iota$ may be represented by ι instead of $\epsilon \iota$; the diphthong $\epsilon \iota$ may be represented by ι instead of $\epsilon \iota$; the diphthong $\epsilon \iota$ may be represented by ι . The accents and other diacritical marks may be omitted, though they may be shown as ', ^, ', '.

Typography

The typography of Classical Greek now follows in the main the conventions of Modern Greek; and the rules for syllabification of Modern Greek apply to Classical Greek as well.

These numerals, except the cardinals from 5 to 100, are regularly declinable according to the rules of the language.

The numeral characters take an acute accent after them, from 1 to 999. To place an accent below and to the left of a character multiplies it by 1000; e. g., $\alpha' = 1$, $\alpha = 1000$, $\alpha \ni \mu \delta' = 1944$.

Chronology

The ancient Greeks divided time into periods of 4 years, called Olympiads, the first year of the first Olympiad beginning in the middle of the summer of 776 B. C. Each year was divided into 12 months, but there was no division into weeks.

The seasons were called $\epsilon a \rho$ ($\tilde{\eta} \rho$), spring; $\theta \epsilon \rho o s$, summer; $\delta \pi \omega \rho a$, autumn, and

χεῖμα (χειμών), winter.

After the rise of Roman supremacy, the Julian calendar was adopted, with the Latin month names transliterated. After the advent of Christianity, the weekly system was adopted, with names of the days as in Modern Greek.

The modern equivalents are, of course, only approximate, as the Greeks had not calculated the year as accurately as more modern mathematicians have. The first day of Hecatombaion was intended to fall upon the summer solstice, but it actually varied from the middle of June to the first week in August.

In transliteration, especially of names, the macrons over vowels and the dots under consonants, as well as 'and ', are often omitted; 'is also printed as '. For f, ph is often used. For f, an ordinary f is often found, and then sameth is sometimes represented by f. For f, f is sometimes used, especially in scholarly works. There are other special transliteration practices to be found in scholarly works.

Hebrew is read from right to left. Its alphabet consists of 22 letters, all consonants; the vowels are represented by vowel signs or points, as explained

under Vowels below.

Special characters

Five of the letters (kaf, $m\bar{e}m$, $n\bar{u}n$, $p\bar{e}$, and $sad\bar{e}$) have a so-called final form, shown immediately to the right of its respective regular form. This final form is used as the final letter of a word.

Eight of the letters represent two sounds each, distinguished by means of a

dot, as follows:

as b or v as b or bbas g; also like Dutch g as g in big, ggas d; and like th in then 7 as d, dd as h or silent as hh (stronger aspiration) s as k or German ch as k, kk Э as p or f as p, pp as sh 27 as s in sin h as t or th n as t, tt

Some of the letters seem to be more or less similar. These are grouped, for the convenience of identification, within brackets below:

The vowels are represented by marks called vowel points. These are placed above or below the consonant and, with the exception of the furtive patah, have the effect of a vowel following the consonant; e. g., $\frac{1}{2}$ (ba), $\frac{3}{2}$ (ba). The forms, names, and sounds of the vowels are as follows:

Long V	owels	Short	Vowels
₹ Qameş ā	a as in palm	- Pataḥ a	a as in part (short)
• Şere ē	ei as in vein	* Segol e	e as in bed
Hirik gadol ī	i as in machine	 Hirik katon i 	i as in big
Holam ō	o as in no	* Qames katon o	o as in soft
1 Shuruk ū	oo as in moon	Kubbuts u	u as in full
mi e u			

The furtive patah

All vowels are pronounced as if they follow the consonant to which they are ascribed, with the exception of final II, which is pronounced not ha, but ah. This patah is termed "furtive patah."

The shwa

Sometimes shwa represents the sound of the first e in believe; e. g., אַבֶּרָ (shema); it may be transliterated \dot{e} . At other times it is not pronounced, as in אַבּרָם (avrom), so that a consonant cluster results. Also, shwa is written, according to certain rules for writing Hebrew, before the points for a, e, and o to represent a very short vowel; e. g., אַבָּח, and \overline{a} ; are transliterated \check{a} , \check{e} , and \check{o} , respectively.

Punctuation and accentuation

Although the principles and marks of punctuation in modern Hebrew are, in the main, as in English, Scriptural Hebrew employs, in addition to the vowel points, 21 accent marks, which are placed either singly or in various combinations above or below the consonantal characters they modify. These have a threefold object: (a) to indicate stress; (b) to direct cantillation—the chanting in which the Scriptures are intoned; and (c) to indicate distinctions in the meanings of words, e. g., (1) they build, but (1) in us.

As marks of cantillation, accent marks are divided into two classes: disjunctives and conjunctives, the former corresponding to marks of separation in English—the period, semicolon, comma, etc., the latter indicating that the word bearing them is connected in sense with that which follows. The table presents the forms, names, and classifications of these accents:

There are also three supplementary marks of interpunction: The soph-pasuk (:), terminal mark of a verse; the pesik (|), for a pause within the verse; and makkeph (-), the elevated hyphen between words.

Syllabification

It is the rule in Hebrew not to divide words.

The calendar

The Hebrew calendar was given its present fixed form by Hillel II about A. D. 360. It is based on a year of 12 months, alternating 30 and 29 days, with an intercalary month of 29 days in leap year. These months, with their corresponding periods in the Gregorian calendar, are as follows:

Tishri	תשרי	September-October
Heshvan	חשון	October-November
Kislev	בסלו	November-December
Tebet	מבת	December-January
Shebat	שבטשבט	January-February
Adar	אדר	February-March
Veadar	ואדר	Intercalary month
Nisan	ניסן	March-April
Iyar	איר	April-May
Sivan	סיון	May-June
Tammuz	תמוו	June-July
Ab		July-August
Elul	אלול	August-September

The year begins on the first day of the month of Tishri, which is the day of the Molad, or appearance of the new moon, nearest the autumnal equinox. The actual date is, however, sometimes shifted 1 or 2 days, according to specific regulations; thus, New Year may not fall on either a Friday or a Sunday, since that would conflict with the observance of the Sabbath; nor, for a like reason, may it come on a Wednesday, since that would cause Atonement Day to come on a Friday.

To convert a given year (anno Domini) into its corresponding Hebrew year (anno mundi), add 3,760 to the former, bearing in mind, however, that the year begins in September. As the Hebrew calendar omits the thousands, the year 5705, corresponding to the Christian year 1945, is represented in Hebrew characters by https://doi.org/10.1006/j.j.com/10.10

300, and 5, respectively.

The days of the week are referred to as first day, second day, etc., the seventh being called Sabbath (חבש). The holidays, festivals, and fasts, with their dates, are as follows:

Rosh Hashana (New Year, Tishri 1)	ראש השנה צום גדליה יום כפור סכות שמחת תורה
Hanukkah (Feast of Dedication, Kislev 25) Asereth b'Tebet (Fast of Tebet, Tebet 10)	חנכה עשרת בטבת פורים
Purim (Feast of Lots, Adar 14) Pesach (Passover, Nisan 15–21) Shabuoth (Feast of Weeks, Sivan 6) Tishah b'Ab (Fast of Ab, Ab 9)	פסח

Abbreviations

In Hebrew, abbreviations are set as follows: If of one letter, one prime mark (') is used after the letter; if of more than one letter, a double prime ("') is used

The vowels \acute{a} , \acute{e} , \acute{i} , \acute{o} , \ddot{u} , and \ddot{u} are long; the other vowels are short. Double consonants are pronounced long, somewhat in the manner of n(k)n in penknife. When doubled, cs, gy, ly, ny, sz, ty, and zs are written ccs, ggy, lly, nny, ssz, tty,

The letters q, w, x, and y are not considered a part of the Hungarian alphabet. In alphabetical listings which include foreign words or names, or words in very antiquated Hungarian orthography, e. g., proper names, q follows p, and w, x, and y come between v and z. The combination qu is pronounced kv; w is usually pronounced v; x is pronounced as though written ksz. The letter y in many family names is pronounced as though written i.

Special characters

Hungarian uses the Latin alphabet with the addition of the following special characters: Á á, É é, Í í, Ó ó, Ö ö, Ő ő, Ú ú, Ü ü, and Ű ű.

Vowels and consonants

The vowels are a, \acute{a} , \acute{e} , the alphabet are consonants.

Diphthongs

Hungarian has no diphthongs. Each vowel is fully articulated, and each word has as many syllables as it has vowels.

Digraphs

The digraphs and their sounds are:

ch as ch in church (old spelling) cs (see Alphabet and pronunciation) cz now written c, like ts; formerly regarded part of the alphabet, fol-

lowing cs

ds as j in judge dz as d followed by zdzs as j in judge

gh as g in go (old spelling)

Rules for syllabification

21.3

Digraphs may not be divided.
 Division is made on a vowel before a single consonant or digraph: vá-ros,

3. In a group of two or more consonants, division is made before the last consonant or digraph: ab-rak, al-szik, asz-tal, elméncz-ség, rend-szer, tán-czol.

4. Vowels may be divided: mi-enk, ti-e-id.

5. Certain adverbial prefixes are kept intact. These are: al, at, el, fel,

fenn, hát, ki, leg, meg, szét, túl, and viszon: al-elnök, át-adni, él-adás, etc.
6. Compound words are divided according to their component parts (and each part according to rules 1 to 5): bér-autó (taxicab), állam-adósság (national debt). This rule does not apply, however, to merely inflected words or suffixed words: ké-sem (my knife) (rather than kés-em), aszta-lon (on the table) (rather than asztal-on). asztal-on).

7. Contracted double consonants (ccs, ccz, ggy, lly, any, ssz, tty, from cscs, czcz, gygy, lyly, nyny, szsz, tyty) may be divided, but in that case the elided consonant must be restored. Thus hosszú, faggyú, hattyú are divided hosz-szú,

fagy-gyú, haty-tyú, etc.

8. Foreign words and components of foreign words are divided according to their respective conventions: Reichs-amt, Wash-ington, anti-kvárius, dia-fragma, dia-gnózis, demo-kratikus, dex-trín, bíf-sztek, champi-gnon.

Stress and diacritics

Without exception, stress is on the first syllable. Diacritical marks (see Special characters) are used to denote vowel modifications.

Capitalization

Forms of address in letters, etc., and titles are capitalized: Felséges Uram (Your Majesty); Méltóságod (Your Lordship).

Proper names and those referring to God are capitalized.

Adjectives formed from proper names and names of months are lowercased: budapesti (of Budapest); magyar (Hungarian).

Punctuation

Punctuation is practically the same as in English.

ITALIAN

Un tratto importante, che caratterizza il grande movimento della civiltà italiana risorgente e che risulta, non pure dalla poesia e filosofia di quel tempo, ma anche dall'opera dei politici e degli stessi guerrieri, è quell'impronta diffusa di umanità, in cui si avvolge come in una rosea nube il loro pensiero e la loro vita, pur diretti come sono ad un unico ideale: il risorgimento della Patria.—Giovanni Vidari, Le civiltà d'Italia (1934), as quoted by Young and Cantarella, Corso d'Italiano (1942), p. 320.

Special characters

Italian uses the Latin alphabet. It has no special characters; accents are employed only to a limited extent.

Vowels and consonants

The vowels are a, e, i, o, u, and y; the other letters of the alphabet are consonants.

Diphthongs

The combination of an i or u with another, more highly stressed, vowel may be regarded as diphthongal.

Digraphs

The digraphs and their sounds are:

ch as c in cat only before e, i gh as g in go only before e, i gl as ll in million 1

gn as in cognac (=ny in canvon) qu as in squalor sc as sh in shall (before e or i)

Consonantal units

For the purpose of syllabification, a mute consonant followed by a liquid consonant is a consonantal unit. Hence, the following are consonantal units:

chr, cl, cr

gl, grpl, pr vl, vr

Also the combination of the letter s with any other following consonant, digraph, or consonantal unit is a unit for purposes of syllabification.

Rules for syllabification

Digraphs and consonantal units may not be divided.
 Division is made on a vowel before a single consonant, digraph, or conso-

nantal unit: ami-co, ba-gno, ca-pra, giu-sto, ma-schera, ro-stro.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: sab-bia, ac-qua, ist-mo, an-che, com-pro. 4. Division may be made between vowels only if they are strong, that is, a, e, o. Hence, only the following vowel groups may be divided: aa, ae, ao; ea, ee, eo;

oa, oe, oo: be-ato, co-atto, po-eta, etc.
5. Prefixes are kept intact only if this conforms to rules 2 to 4: con-stare (rule

3), pro-emio (rule 4), pro-getto (rule 2), sub-marino (rule 3); but co-nestabile (rule 2), proi-bire (rule 2), su-bordinare (rule 2).²
6. Compound words are divided according to their component parts (and each

part according to rules 1 to 5): gentil-uomo, cento-uno.

If a compound is formed with an apostrophe, division may not be made on the apostrophe; thus dell'albero, un'arte, dorrebb'essere may be divided only del-l'al-be-ro, un'ar-te, do-vreb-b'es-se-re, respectively.

7. Foreign words and components of foreign words (not naturalized) follow

the conventions of the language of origin: Wash-ington, Haps-burg, Hamp-shire,

reichs-bank, Wag-ner.

 $^{^1}$ In a few words gl is not a digraph and is pronounced as gl in angle; for example: Ganglio, glicerina, geroglifico, glifo, gloria, negligere, etc. 2 Usage varies as to this rule; some orthographers still prefer dividing on the prefix. The rule given in the text above follows the recommendation of Leone Donati, Corso Pratico di Lingua Italiana, 207, 1934, Orell Füssli Editori, Zurigo e Lipsia. It is followed by most dictionaries as well as general works extant

Stress and diacritics

No simple rules can be formulated for word stress in Italian. The majority of words receive their stress on the penultimate (next to the last syllable): aMIco. comPLEto; fewer words are stressed on the antepenultimate (third from the last ultimate (last syllable), but in this case the vowel carries the grave accent: citTA, fabbriCO. syllable): FABbrico, gramMAtica; only a limited number are stressed on the

Accent marks are used only to a limited degree—chiefly to indicate a final stressed syllable; and, as stated above, this mark is the grave ('). The word types

on which it is used are:

(a) Nouns ending in ta or tu having the singular and plural alike: libertà, virtù (from the Latin libertade, virtude, etc.).

(b) Verbs in the third person singular past absolute and first and third persons singular future: comprò (he bought), comprerò (I shall buy), comprerò (he will buy); similarly in the second and third conjugations: vende, vendero, vendera; fint, finiro, finiro.
(c) Homonyms, the grave being used to distinguish them. The most common

of these homonyms are:

ne, of it, of them pie, pious chè, because che, that nè, neither, nor piè, foot però, therefore sè, himself colà, there cola, strainer costà, there pero, pear tree se, if costa, shore dà, gives da, by, from, to si, himself, one dì, day sì, yes di, of è, is e, and tè, tea te, thee là, there lì, there la, the, her li, the, them testè, just now teste, heads

(d) Monosyllables terminating in two vowels, to indicate that the preceding

vowel is shortened: ciò, già, giù, più, può, quà.
(e) Terminations ia and io in which the i is to be stressed: magia, desio. The acute is used by some editors to distinguish words differently stressed, where otherwise a misunderstanding might arise: malvágia (wicked), malvagia (malmsey, a wine). This use is rare.

The circumflex is used to indicate contraction: cacciar (for cacciarono), ginnasa

(for ginnasii). This use is rare.

The dieresis (trema) is used in poetry over the i to indicate that it is to be sounded separately from a following vowel: armonioso (pronounced armoni-oso. instead of armonio-so). This use is rare.

Capitalization

Capitalization in Italian is similar to that in English, with a few exceptions: (a) Proper adjectives are lowercased: la lingua italiana, the Italian language, but l'Italiani, the Italians (proper noun).

(b) The names of days and months are lowercased.
(c) Titles followed by name are lowercased: il signor Donati, Mr. Donati; il principe Umberto, Prince Umberto.

(d) The pronoun io, I, is lowercased, but the pronouns of formal address,

Ella, Lei, Loro, all meaning you, are capitalized.

(e) In poetry, the first word of each line is usually lowercased.

Punctuation is similar to that of English. The comma is used to point off all clauses, restrictive as well as descriptive. The apostrophe is used to indicate vowel elision only: un'opera d'arte (for una opera di arte), sopra 'l letto (for sopra il letto). The space after the apostrophe is no longer required.

Consonants

Formerly u and v were written with v, and i and j with i. Modern texts customarily distinguish both pairs. Thus: uva, visu, janua, Jove.

K, z, and y are rather rare, occurring mostly in loanwords. Q is used only in the combination qu, pronounced kw.

The digraphs ch, ph, and th are pronounced as k, f, and t, respectively.

Each of the five vowels is either long or short in each occurrence, and an accurate pronunciation will reflect this difference. Elementary texts usually mark the long vowels with a macron; thus: \bar{a} , \bar{e} , \bar{i} , \bar{o} , \bar{u} .

Diphthongs

Two short vowels may occur together in the same syllable, in which case the second of the two is a semivowel; i. e., u as the second element of a diphthong is pronounced like w, and i or e in this position is pronounced like y. The commonest diphthongs are ae and au, pronounced to rhyme with high and how. Less common are ei (as in vein), eu, oe (as oi in oil), and ui.

Consonantal units 1

The following combinations are referred to as consonant clusters in the rules given below for syllabification: bl, br, cl, cr, dr, fl, fr, gl, gr, pl, pr, tl, tr, scr, str, spl, spr.

The digraphs ch, ph, and th are treated just like c, f, and f in consonant clusters.

Some Latin lexicographers still use the classic method of determining consonantal units; namely, any group of consonants which can begin a word constitutes a consonantal unit and may begin a syllable. This method is still in use in Greek syllabification; but in present-day Latin orthography it has been largely replaced by the Romance-language method, given in the text and recommended by Allen and Greenough. (See References.)

385 LATIN

Rules for syllabification

1. Diphthongs, digraphs, and consonant clusters may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a

digraph, or a consonant cluster: ca-sus, si-pho, pa-tres, cae-lum.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonant cluster: vit-ta, mag-nus, punc-tus, bac-chor, am-plus.

4. Division may be made between vowels not constituting a diphthong: pu-er,

di-es, fili-us, Tro-ius.
5. Certain adverbial prefixes are kept intact. These are: ab, ante, circum, cis, con, de, ex, extra, in, inter, intro, ob, per, prae, praeter, per, post, pro(d), propter, re(d), sub, super, supra, and trans: ab-eo, con-scriptum, inter-esse.

6. Compound words are divided according to their component parts (and

each part according to rules 1 to 5): quot-annis, et-enim, sic-ut.
7. The letter x is retained with the preceding syllable: dix-it.

Note.—The above rules do not apply to anglicized Latin scientific names used in English works. Their syllabification follows the English practice.

Stress and diacritics

Words of two syllables are always stressed on the first syllable: ROma, LIber. In words of more than two syllables, the stress is on the next to the last syllable if that syllable ends in a consonant, a long vowel, or a diphthong. Otherwise the stress is on the third from the last syllable. Thus: ho-NO-ris, CON-su-lis.

There are only two diacritical marks, the long mark (7, macron) and the short mark (7, breve). They are used only in elementary works.

They are used only in elementary works.

Capitalization and punctuation

American editors usually follow the English conventions in capitalization and punctuation.

Alphabet and pronunciation

A a in stressed syllables followed by one consonant or none, like a in father, but tending toward aw in law; in stressed syllables followed by two or more consonants and in unstressed syllables, like a in father, but very short, resembling more u in but

B b b; formerly often written for sound p

C c s in so before e, i, y; like k before a, o, u, or consonant; occurs only in foreign words; now practically obsolete, being written k or s; combination ch, like ch in chorus; in French words, like sh

D d d; often silent after l, n, r, and at end of words

- E e in stressed syllables followed by one consonant or none, like i in pit, but longer; before r, like a in man; in stressed syllables followed by a consonant other than r plus another consonant, like e in let, but tending toward i in pit; in stressed syllables followed by r plus another consonant, like a in hat; in the words De and de, like ee in meet, but shorter; in unstressed syllables, like a in sofa
- F f G g in go; before i, y, ei, or øy, almost always like y in yes; after e at end of a few words (jeg, meg, deg, seg), like y in say; silent before j, in the word og, in suffix -ig, and in a few other words; in French words, often like sh

H h h; silent before j or v

i in stressed syllables followed by one consonant or none, like

ee in meet; in stressed syllables followed by two or more
consonants and in unstressed syllables, like ee in meet,
but shorter

J j y in yes; in French words, like sh

K k k; before i, y, j, ei, or ϕy , like strong h in hue—i. e., like German ch in ich

L l ll in million; sometimes silent before j

M m m

N n n; combination ng, like ng in singer; combination nk, like nk in sink; in French words, en and an often pronounced as though written ang

O o in stressed syllables followed by one consonant or none, like o in go, but with lips pursed, resembling more oo in food; in stressed syllables followed by two or more consonants and in unstressed syllables, like u in put

 $egin{array}{ll} P & p & p \\ Q & q & \text{always followed by } v \text{ (or } u), \text{ combination being pronounced} \\ & & \text{and now written } kv; \text{ occurs only in foreign words} \end{array}$

R r before vowel, like r, but slightly trilled, with tip of tongue against gums just above upper teeth; resembles Scotch burr or Italian r; before d, l, n, t, the r loses its trill and sounds somewhat like American r; always combines with following s to produce sound sh; in French words, often silent when final after e

s s in sing; before j like sh; combination sk before i, y, j, ei, or øy almost always like sh; always combines with preceding r to produce sound sh; in foreign words, combination sc like s, or in a few words like sk; sch like sh, or in a few words like sk; si followed by vowel (now written sj) like sh

t t; combination tj sometimes pronounced as though written kj; silent in word det and in -et, definite article suffixed to all neuter nouns; in Latin words when followed by i and another vowel, like ts; ending tion (now written sjon) pronounced as though written sjon

u in stressed syllables followed by one consonant or none, like oo in food; in stressed syllables followed by two or more consonants and in unstressed syllables, like oo in food, but shorter

v v; silent in word av and after l w v; occurs in foreign words

x ks; at beginning of words, like s

y in stressed syllables followed by one consonant or none, like ee in meet, with lips rounded as in pronouncing oo in food, being similar to long German ü or French u; in stressed syllables followed by two or more consonants and in unstressed syllables, like ee in meet, but shorter, with lips rounded as in pronouncing u in put, being similar to short German ü or French u

Z z s in sing; occurs only in foreign words

Æ æ formerly sometimes written Ä, ä; many words formerly written with æ now written with e; in stressed syllables followed by one consonant or none, like a in care; in stressed syllables followed by two or more consonants and in unstressed syllables, like a in hat, this sound occurring only before r

ø formerly often written Ö, ö; in stressed syllables followed by one consonant or none, like i in pit, but longer, with lips rounded as in pronouncing oo in food, being similar to long German ö or French eu; in stressed syllables followed by two or more consonants and in unstressed syllables, like e in pet, with lips rounded as in pronouncing u in pull, being similar to short German ö or French eu

å formerly written Aa, aa; in stressed syllables followed by one consonant or none, like aw in law; in stressed syllables followed by two or more consonants and in unstressed syllables, like aw in law, but shorter

Norway has two official languages, riksmål and landsmål. Both are used in the Government service. Riksmål was in the past generally known as Dano-Norwegian, a written language acquired from Denmark during the centuries the two nations were united (1397 to 1814). It differed in many ways from the speech of the Norwegian people, and in its written form was almost identical

with Danish.

In order to make the written conform more to the spoken form of the language, the Storting (the Norwegian Parliament) has thrice passed changes in riksmål orthography—in 1907, 1917, and 1938, as well as numerous minor changes inbetween. These changes were binding only for Government officials and schoolbooks. It is this language that is described above. Private individuals and publishers have been free to use the new systems or not, as they have seen fit. Thus various systems of writing are in use today, side by side.

The other official language, the landsmål, now known as New Norwegian, or

nynorsk, is a synthetic language constructed about a century ago from the local dialects. It is not at all, or very little, influenced by Danish. Although officially having the same recognition as the riksmål, its use is more restricted, and it

unquestionably occupies a secondary position.

The two languages, and their dialects, are in any event very similar, and in their struggle for supremacy are constantly influencing each other. The result may in the end be a single "compromise" language.

However that may be, the linguistic situation in Norway, both in its written and spoken aspects, is very much in a state of flux, and it is particularly difficult to make clearcut statements about it.

Special characters

Norwegian uses the Latin alphabet with the addition of three special characters—the last three shown in the alphabet.

The letters c, q, w, x, and z are now used only in foreign words and proper names. Even in popular words of foreign origin they are preferably avoided by substituting k or s for c, kv for qu, v for w, ks for x, and s for z.

Fraktur type (German text) was abolished officially in 1907, and is now scarcely

in use anywhere.

obsolete)

Vowels and consonants

The vowels are $a, e, i, o, u, y, x, \phi$, and a; the so-called back vowels being a, o, u, and a; the front vowels e, i, y, x, and ϕ . The other letters of the alphabet are all consonants.

Combinations of vowel letters (diphthongs)

The diphthongs and their sounds are as follows:

ai as ai in aisle au as ou in our ei as ei in weigh oi (in foreign words), as oi in boil øy (formerly written øi), like Norwegian ϕ followed by slight sound of Norwegian y, the two being sounded as one syllable

eu (in foreign words), like Norwegian æ followed by slight sound of Norwegian u, the two being sounded as one syllable

ou (in foreign words), like Norwegian u

Combinations of consonantal letters (digraphs)

The digraphs and their sounds are:

ch (in foreign words), as sh in shall or ch in chorus $\begin{array}{c}
 gj \text{ as } y \text{ in yes} \\
 hj
 \end{array}$ hv kjlj ng ph (in foreign words; obsolete) ps (in foreign words) qv (also written qu; in foreign words,

sc (in foreign words) sch (in foreign words) sh (in foreign words) sj (also formerly written si, ti in foreign words), as sh in shall sk as sh in shall (before front vowels) th (usually in foreign words), as t

wh (in foreign words)

Consonantal units

For purposes of syllabification, consonant combinations are treated as units. In addition to the digraphs, the following are also consonantal units: kv, skj, sp, spr, st, str.

Rules for syllabification

1. Diphthongs, digraphs, and consonantal units may not be divided.
2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: ale-ne, hvi-ske, hu-stru, bei-ning.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: af-ten, dan-ske, sek-sten, tjenst-lig, blom-ster.

4. Division may be made between two vowels not constituting a diphthong

or between a diphthong and another vowel: fri-er, lei-er.

5. Certain adverbial prefixes are kept intact. These are: ad, an, av, bak, be, bi, bort, efter, er, for, fra, frem, ge, in, inn (formerly ind), med, mis, ned, om, opp (formerly op), over, på (formerly paa), til, under, unn (formerly und), ut, ute, and ved: ad-splitte, an-bringe, av-klipp, bak-slag, etc.
6. Certain suffixes are kept intact. These are: aktig (agtig), artet, asje, het (hed), inne (inde): barn-agtig, god-artet, lekk-asje, matt-het, vert-inne.
7. Compound words are divided according to their component parts (and each

part according to rules 1 to 6), the compounding s, if used, going with the preced-

ing component: aften-avis, aften-blad, aftens-tid.

8. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: pa-triot, anti-kvar, inter-esse, mid-shipman. Under this rule are also included scientific and technical words, which editors prefer to treat etymologically: me-trisk, hemi-tropi, dia-gnose.

Stress and diacritics

Most words are stressed on the first syllable, except when they begin with a prefix such as be-, er-, for-, ge-, in which case the syllable following the prefix is stressed. Words borrowed from French are usually stressed on the last or next to last syllable. In compound words, the first component receives the primary stress, the second receives secondary stress.

In stressed syllables, vowels are long before one consonant or none, but short before two consonants or more. However, the letter m is never doubled at the end of a word, even though it nearly always follows a short vowel. Some words which usually occur unstressed in the sentence are written with only one consonant following the short vowel. The addition of an ending beginning with a consonant usually, but not always, makes the vowel short. Under such conditions, a long vowel may stand before two or more consonants.

Norwegian words of one syllable when pronounced in isolation or in accented positions in a sentence, and is one of the syllables of longer words, are spoken with a stress or loudness accompanied by pitch. The pitch is raised in monosyllables and in many longer words. Other words of more than one syllable have a pitch on the accented syllable that falls and then rises again on the next syllable. It is not possible to tell from the spelling which pitch-stress combination is to be used.

Consonants when written double are always pronounced long; compare with

the long d in English midday.

With the exception of d (sometimes replaced by aa), \ddot{a} (variant for x), \ddot{o} (variant for ϕ), diacritics are used only in foreign loanwords and in certain proper names.

Capitalization

Capitalization is now as in English, except that the polite personal pronouns De, Dem, Deres, and the familiar I are capitalized, but proper adjectives and the names of the months and the days of the week are lowercased. A capital is not required to begin a new line of poetry.

Previously, Norwegian followed the German custom of capitalizing all words

that functioned as nouns.

Punctuation

Punctuation is very much like that of English. Norwegian used to punctuate like German, with commas before every clause, but the tendency is away from that now. A comma is not used before the word og in an enumeration (A, B, C og D), but is often used where English would have a semicolon or a period. Sometimes commas are used instead of periods for decimals: 10,6. not used between thousands: 1 000 000.

Special characters

Polish uses the Latin alphabet with the addition of the following special characters: A a, Ć ć, E e, Łł, Ń ń, Ó ć, Ś ś, Ź ź, and Żż. Note also the following somewhat similar characters frequently confused: Ž Ž, źż, and łt.

Vowels and consonants

The vowel letters are a, q, e, q, i, o, o, u, and y. The remaining letters of the alphabet are consonant letters.

Diphthongs

The sequences of i or j followed by one of the vowel letters may be called diphthongs, as are the sequences of a vowel followed by j: ia, ja, ia, ja, ie, je, ie, je, ii, io, jo, $i\delta$, $j\delta$, iu, ju, aj, ej, ij, oj, oj, oj, uj. The sequences beginning with i are not found initially or after a vowel.

Digraphs

The digraphs are: ch, cz, dz, dz, dz, rz, sz, szcz and ść. Their sounds are shown in the alphabet table.

Consonantal units

The following groups of consonants are for purposes of syllabification treated as units:

bl, bl, br, brz chl, chl, chr, chrz, chw pl, pl, pr, prz śc, sk, skr, skrz, śm, sp, spr, sprz, st, dl, dl, dr, drz, dw fl, fr gl, gl, gr, grz, gw kl, kl, kr, krz, kw str, strz, stw tl, tl, tr, trz, tw wl, wł, wr, wrz

Rules for syllabification 1

 Diphthongs, digraphs, and consonantal units may not be divided.
 Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: uli-ca, mie-so, ko-chać, je-szcze, do-bry, do-brze, bli-sko, kome-dja, wę-grzyn.

3. In a group of two or more consonants the division is made before the last consonant, digraph, or consonantal unit: les-ny, lek-ko, lep-szy, pań-stwo,

maj-ster, pierw-szy.

4. Division may be made between vowels not constituting a diphthong or

between a diphthong and another vowel: po-ić, po-ema, oce-an, ma-jor.

5. Certain adverbial prefixes are kept intact. These are: bez. do, na, nad(e), naj, ni, nie, o, ob(e), od(e), po, pod(e), poza, prze, przed(e), przy, roz(e), spol, u, wy, za, and ze: bez-interesowny, do-słać, na-słać, nad-inspektor, nade-słać, ni-gdzie, nie-krwawy, etc.

6. Compound words are divided according to their component parts (and each

part according to rules 1 to 5): kraj-obraz, krótko-trwały.

7. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: golf-sztrom, foks-trot, kop-sztyk, superarbiter. This rule applies also to technical and scientific terms, which editors prefer to divide etymologically: san-gwinik, dja-gnostyka, strato-sfera, hiper-mnezja.

¹ Syllabification usage varies considerably among Polish printers, especially as regards the division of consonantal groups. Editors usually permit printers to divide such groups optionally, provided the division does not override phonetics and etymology. The rules given here, being designed for consultants who might not be fully familiar with Polish, are somewhat restrictive, but they insure invariably correct and consistent word division.

Stress and diacritics

Stress is usually on the penultimate (next to the last) syllable: MAT-ka, gle-BO-ki, $spo-wo-DO-wa\acute{c}$. In verbs of the first and second person plural past tense and in words of Latin and Greek origin the stress is on the antepenultimate (second from the last) syllable: $BY-li-\acute{s}my$ (we were), $BY-li-\acute{s}cie$ (you were), a-ryt-ME-ty-ka, MU-zy-ka, re-TO-ry-ka.

The diacritical marks used are the inverted cedilla (a, b), to indicate the nasal sounds a and a; the acute (a'), to indicate the palatalization of a consonant; the stroke (a'), to indicate the hard a; and the superior dot (a'), to indicate the post-

palatal ż.

Capitalization

Capitalization is practically the same as in English, except that proper adjectives are lowercased and names of months are preferably lowercased.

Punctuation

Punctuation is practically the same as in English, except that the comma is used to mark off restrictive as well as descriptive clauses.

Alphabetization

The letters q, \acute{c} , \acute{e} , l, \acute{o} , \acute{s} , \acute{z} , and \dot{z} are regarded as separate characters and are so alphabetized. The complete alphabetic order is: a, q, b, c, \acute{c} , d, e, e, f, g, h, i, j, k, l, l, m, n, o, \acute{o} , p, r, s, \acute{s} , t, u, w, y, z, \acute{z} , \acute{z} .

PORTUGUESE

E quando se vir que a tendência da fala do Brasil é completamente diversa da fala de Portugal, que a civilização afasta cada vez mais os dois paises graças aos neologismos diferentes para as invenções, que a literatura no Brasil já se tornou brasileira, rompendo com um passado artificial para ser compreendida do povo; que as influências de fatores varios transformaram a nossa pronuncia e nosso vocabulário, criando aos poucos outra sintaxe—só existirá uma coisa a fazer: o brasileiro dar bons dias ao português, como faz na fronteira com uruguaio, o argentino e o paraguai.—Renato Mendonça, O Português Do Brasil (1936), p. 98.

Alphabet and pronunciation 1

A	a	stressed: a in palm; before m or n , u in hunt (often written \hat{a}); unstressed: a in sofa (see Stress and diacritics)
Ã	ã	nasalized u in hunt; with e or o following, $\tilde{a}e$ somewhat like i in mind and $\tilde{a}o$ somewhat like ou in mound
В	b	b
	c	s in so, before e or i ; elsewhere like k
C Ç D		s in so; used only before a , o , or u
Ď	$^{arsigma}_{ m d}$	d
E	e	stressed: somewhat like a in fate (close), or e in get (open); close sound sometimes written ê, the open one é; unstressed: e in basket

Ĵ	i	s in measure
K	k	k; used only in foreign words
L	î	l in million, before a vowel; elsewhere like l in hill
Ĺh	Ìh	somewhat like <i>lli</i> in million
M	m	m before vowel; after vowel, nasalizes vowel and is itself
		weakened in closure; final unstressed am like Portuguese ão
N	n	n before vowel; after vowel, same as Portuguese m
Nh	nh	ny in canyon
0	0	stressed: somewhat like o in coat when close (sometimes written δ), or like o in fort when open (sometimes written δ); unstressed: o in obey, or u in put when final
Õ	õ	used with e, õe is somewhat like oi in coin
P	p	p
P Q R	q	always followed by u (see Digraphs)
R	r	trilled r; in some regions like Parisian French r

¹The pronunciation shown is that of Brazilian Portuguese; in Portugal unstressed vowels are more slurred, and certain consonants have slightly different sounds.

s in so initially before a vowel; between vowels like s in rose (=z); when final, like s or z, or somewhat like sh, or like s in measure, depending on consonant or vowel of following word if the two are closely linked in structure of sentence; within words: before consonants, like sh before p, t, c (=k); like s in measure before b, d, g (as in go); like s before s or c; like z before other consonants

t stressed: u in rude; unstressed: u in put u

V

w or v, only in foreign words W

sh in shoe initially, and often elsewhere; otherwise as xX in box (=ks), or as s or z

like Portuguese i; now usually replaced by i V

z in gaze; final often like z in azure

Special characters

Z

Portuguese uses the Latin alphabet, with the addition of the following special characters: \tilde{A} \tilde{a} , \tilde{C} \tilde{c} , and \tilde{O} \tilde{o} . Portuguese uses also to a considerable extent the acute ('), the circumflex ('), and sometimes the grave (') or the dieresis (").

Vowels and consonants

The vowels are a, e, i, o, and u. Of these, a, e, and o are termed strong vowels; i and u, weak vowels. The letter y, which occurs only in foreign words, is treated as a vowel before a consonant, otherwise as a consonant. The other letters of the alphabet are all consonants.

Diphthongs and triphthongs

A diphthong is a combination of a strong vowel and a weak vowel. This is pronounced as one syllable, the strong vowel receiving the predominant sound and the weak one being somewhat slurred over (i somewhat like y in yet or boy, u like w in wet or bow): pai (pronounced pAi), rial (pronounced riAl). If the weak vowel, however, carries an acute mark, the two vowels do not constitute adiphthong and are pronounced separately: pais (pronounced pa-Is).1

A diphthong may also be a combination of two weak vowels. In such case the first vowel receives the predominant sound and the second one is slurred over: fluido (pronounced fluido), partiu (pronounced partIu). If the second vowel,

however, carries the acute mark, the two vowels do not constitute a diphthong: ruido (pronounced ru-Ido), miúdo (pronounced mi-Udo).

A triphthong is a combination of three vowels, the middle one of which is strong the others weak, and is pronounced as a single syllable, the strong vowel receiving the predominant sound: iguais (pronounced iguAis). If one of the weak vowels, however, carries an acute mark, the vowels do not constitute a triphthong: partieis (pronounced part I-eis).

Digraphs

The digraphs and their sounds are:

ch as sh in ship; in words of Greek origin as ch in choir (this latter ch occurs only in the older orthography; in the reformed orthography, it is replaced by c or, before e and i, by qu

gu as g in go, only before e, i; gu before e, i to indicate the sound of

lh as li in million nh as ny in canyon ph as f (in the older orthography only) qu as k before e, i; before a and sometimes before o as qu in quality (=kw); $q\dot{u}$ is used before e, i to indicate the sound of kwth as t (in the older orthography only)

¹ This acute mark may be omitted, however, if the vowel over which it is supposed to appear stands before any final consonant (except s) or before nh, nd, mb: raiz (pronounced ra-Iz), sair (pronounced sa-Ir), raina (pronounced ra-Ir), aina (pronounced ra-Ir), aina (pronounced ra-Ir). The spellings raiz, raina aina are also permitted.

Consonantal units

For the purpose of syllabification, the following are consonantal units:

bl, br chl, chr, cl, cr	dl, dr	gl, gr	tl, tr
$c\dot{h}l$, chr , cl , cr	fl,fr	pl, pr	vl, vr

Rules for syllabification

1. Diphthongs, triphthongs, digraphs, and consonantal units may not be divided. 2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: ba-lão, ba-nhar, ma-dre, flui-do.

3. In a group of two or more consonants, division is made before the last con-

sonant, digraph, or consonantal unit: par-te, guer-ra, sump-to, per-cha, sem-pre.

4. Division between vowels is avoided. In narrow measure, however, division is admissible between two strong vowels. Hence, in the interest of good spacing, 4. Division between vowels is avoided. In narrow measure, nowever, division is admissible between two strong vowels. Hence, in the interest of good spacing, the following vowels may be divided: aa, ae, ae, ee, ee, oa, oe, oe (but not the nasal vowels ae, ao, and oe): do-ente, le-oa, po-ema.

5. According to the new orthography, only the prefix ex is kept intact, but division may be made on the other prefixes if such division conforms to rules 2 to 4: con-sócio (rule 3), in-justo (rule 3), pro-mover (rule 2), re-organizar (rule 4); but cons-tar (rule 3), ins-pirar (rule 3), pros-crever (rule 3), reŭ-nião (rule 2).

6. Compound words (hyphened) are divided preferably on the hyphen (and each part according to rules 1 to 5): além-allántico, sub-rogar.

each part, according to rules 1 to 5): além-atlántico, sub-rogar.

7. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: Wash-ington, co-gnac, cre-scendo, Reichsamt. Technical and scientific terms are regarded as naturalized words and are divided according to rules 1 to 6.

Stress and diacritics

The stress in Portuguese words falls on the penult (last syllable but one) if the word ends in a, e, o (followed or not by s), am, em, and ens. CAsa, CAsas, paREde, paREdes, etc.; otherwise on the last syllable (the latter includes words ending in nasals and diphthongs followed or not by s): caNAL, entenDER, vaRÃO, vaRÕES, saRAU, arRAIS. Words terminating, however, in the diphthongs ia, io, ua, ue, and uo, preceded by a consonant (followed or not by m or s), have stress on the i or u: filosofIa, punIa, punIam, louvarIas, continUo, continUe, continUa. The stress in all such words is not indicated by any diacritical marks.

Words stressed contrary to the rule above carry a written accent mark, either acute (') or circumflex (^), the former to indicate an open vowel, the latter to indicate a close vowel: faRA, FAcil, CONsules, rePUblica, ORfãos, FAceis, abun-

DĀNcia, faMIlia.2

In addition to indicating stress not according to the first paragraph, accent

marks are used as mere diacritics for other purposes, as follows:

(a) The acute mark is used over the e or o in the stressed diphthongs ei, eu, oi, to indicate that the e or o is open; otherwise, the e or o is close: reis, plural of real (but reis, plural of rei), bateis, plural of batel (but bateis, second person plural of bater), sois, plural of sol or second person singular of soer (but sois, second person plural of $s\acute{e}r$); also $v\acute{e}u(s)$, $chap\acute{e}u(s)$, $her\acute{o}i(s)$, $j\acute{o}ia$, $gib\acute{o}ia$, etc.

(b) The acute is used over the i or u to indicate that it does not form a diphthong

with its adjacent strong vowel and is to be stressed: puniriamos, país, saída,

saúde, baú, etc.
(c) The circumflex is used over the stressed e or o to indicate that the e or o is close if there are other words spelled like them with the stressed e or o open: rêgo (furrow), rego (first person singular of regar); rêgo (request), rogo (first person singular of rogar); dêmos (present subjunctive of dar), demos (present indicative of dar), côrte (court), corte (cut, edge).

(d) The acute and circumflex are used arbitrarily on monosyllables ending in

a, as, e, es, o, os: pá(s), sé(s), vê(s), mês, pó(s), pôs (from pôr), etc.
(e) The acute and circumflex are used on certain words carrying sentence emphasis to distinguish them from words spelled like them but not receiving sentence emphasis: quê (interrogative), que (relative); porquê (interrogative), porque (conjunction); pôr (verb), por (preposition); pára (verb), para (preposition); péla (noun), pela (preposition), etc.

(f) The acute and circumflex are used to indicate secondary stress in adverbs

ending in mente: rápidamente, sómente, cortêsmente (from rápido, só, cortês).

(g) The grave (') is used over the u in gu, qu before e or i to indicate that the u is to be sounded but not stressed. In the other cases the u in gu and qu before e or i is silent: consequência, arguir, argui (first person preterite), but argui (third person present). Instead of the grave, many orthographers use the dieresis (trema) for this purpose.

(h) The grave is used over the i or u to indicate that it does not form a diphthong with the preceding vowel, and is not to be stressed: saimento, paisagem, saidar. Instead of the grave, many orthographers use the dieresis (trema) for this

purpose.

(i) The grave is used over an unstressed open a, e, or o in certain words if there are other words spelled alike in which the a, e, or o has a close or weakened value: à (to the), a (the); àquele (to that), aquele (that); prègar (preach), pregar (nail), etc.

(j) The tilde (*) is used to indicate a nasal vowel. It is also used at times to

indicate a contraction: $Roi\tilde{z}$ (= Rodriguez), \tilde{q} (= que), $s\tilde{n}ca$ (= sentença).

Capitalization

Capital letters are used as in English with the exception that names of months, days of the week, and proper adjectives are lowercased.

 $^{^2}$ In Brazil, words ending in i or u (followed or not by s) have stress on the next to the last syllable; stressed otherwise, they carry an accent mark; hence, according to Brazilian usage: $per\tilde{u}(s)$, $qau\tilde{u}(s)$, ali, $aqu\tilde{u}$, but tribu, nenhum, comum, oasis, virus, etc. However, Agard, Lobo, and Willis (Brazilian Portuguese From Thought to Word, 1944) state that words ending in i(s) or u(s) are normally stressed on the last syllable and need not receive the stress mark. According to available evidence, there is still disagreement in this matter. On the whole, the rules here recommended follow those now valid in Brazil.

Punctuation and hyphenation

Punctuation marks are used as in English.

The apostrophe as a sign of contraction between prepositions and pronouns has practically disappeared: neste (instead of, formerly, n'este, 'neste, or n-este), in this; dêsse (instead of d'êsse), of that; dàquém (instead of d'aquém), on this side; dêle (instead of d'êle), of him, his; etc. The apostrophe is still retained, however, in proper nouns and a few compounds: Sant' Ana, Nun' Alvares. (Note also compounds in paragraph following.) The apostrophe is sometimes used after a capital letter instead of the acute: A'sia, E', etc.

The hyphen is employed, aside from its use in syllabification, to indicate compounds whose elements retain their phonetic independence: $m\bar{a}e-d'agua$, reservoir; $m\bar{a}o-d'obra$, workmanship; contra-almirante, rear admiral; para-raios, lightning conductor. It is also used to set off suffixed and infixed pronouns in verb forms: $d\hat{e}-me$, give me; dizem-no-lo, they say it to us; fa-lo-ia, I would do it; also after the monosyllabic forms of haver when followed by de and an infinitive: hei-de ler, I

must read, but haviamos de ler, we had to read.

² When stressed; when unstressed, like a in sofa.

³ Also pronounced as v in the genitive ending -ro; often used for original h in non-Russian words, but is

7 Only stressed. § Like i in habit when unstressed; like yie in yield after a vowel and after b.

 12 (apostrophe). 13 Palatalizes a preceding consonant, giving a sound resembling the consonant plus y, somewhat as in

English meet you, did you.

<sup>Also pronounced as v in the gentive ending -PO; often used for original v in non-Russian words, but is pronounced as g by Russians.
Ye initially, after vowels, and after B, b.
Pronounced as i in habit, or the same sound with preceding y, when unstressed.
Ye as for ye. The sign ē is not considered a separate letter of the alphabet, and the "is often omitted. Transliterate as ē, yē when printed in Russian as ē; otherwise use e, ye.
Only transcad.</sup>

Like o in abbot when unstressed.
 The symbol " (double apostrophe), not a repetition of the line above. 11 No sound; used only after certain prefixes before the vowel letters e, ë, я, ю. Formerly used also at the end of all words now ending in a consonant letter. See Note on Old Spelling, p. 410.

RUSSIAN 407

Special characters

Russian uses the Cyrillic alphabet. Many of the characters are the same as in Latin, with the following special ones: Бб, Гг, Дд, Жж, Йй, Лл, Пл, Фф, Цл, Шш, Щщ, Ъъ, Ыы, Ээ, Юю, and Ял. Note the following somewhat similar characters: ЗЭ, Л П, УЧ, ШЩ, зэ, лл, шщ. The ы is a separate character and not a combination of ь and I.

Transliteration

This is a mechanical process of substituting the transliteration letter or combination of letters for each Russian letter: Mockba=Moskva, Киев=Kiyev, Pyccкий = Russkiy, etc.

Vowels and consonants

The vowel letters are a, e, \ddot{e} , \ddot{u} , o, y, \ddot{u} , a, \ddot{u} , n, and \ddot{u} , represented, respectively, by \ddot{a} , e or $y\ddot{e}$, \ddot{e} or $y\ddot{e}$, \dot{i} , o, u, y, e, yu, ya. The letters \ddot{u} , \ddot{u} , and \ddot{u} are not called either vowels or consonants. All other letters are consonants.

Diphthongs

The sequences of a vowel followed by "are often called diphthongs." sounds are:

ай (ay) ai in aisle ей (ey, yey) ey in they, or as yea (=yes)ий (iy) like prolonged English ee

ой (oy) oy уй (uy) uoy in buoy as pronounced by some (oo plus y)

ый (yy) y in rhythm plus y in yield эй (ey) ey in they

юй (yuy) you plus y in yield яй (yay) ya in yard plus y in yield

Digraphs

The transliterations ye, zh, kh, ts, ch, sh, shch, yu, ya represent single Russian letters and should not be divided in syllabification.

Consonantal units

The following combinations of consonants should be treated, for syllabification purposes, as indivisible units:

бл, бр (bl, br) вл, вр (vl, vr)гл, гр (gl, gr)дв, др (dv, dr)жд (zhd) кл, кр (kl, kr)

 $M\pi$ (ml)пл, пр (pl, pr) CK, CKB, CKP, CT, CTB, CTP (sk, skv, skr, st, stv, str) тв, тр (tv, tr) фл, фр (fl, fr)

Rules for syllabification 1

1. Diphthongs, digraphs, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: ба-гаж (ba-gazh), Бай-кал (Bay-kal), му-ха (mu-kha), рё-бра (rё-bra), каче-ство (kache-stvo), свой-ство (svoy-stvo).

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: мас-ло (mas-lo), мас-са (mas-sa), мар-шал (mar-shal), точ-ка (toch-ka), долж-ность (dolzh-nost'), сред-ство (sred-stvo).

4. Division may be made between vowels not constituting a diphthong or between a diphthong and another vowel: оке-ан (oke-an), ма-як (ma-yak).

5. Certain adverbial prefixes are kept intact. These are: без (бес), во, воз (вос), вы, до, за, из (ис), на, над, не, ни, низ (нис), о, об, обо, от, ото, пере, по, под, пред(и), пред(о), при, про, раз (рас), с(о), and у. In transliteration these prefixes are respectively bez (bes), vo, voz (vos), vy, do, za, iz (is), na, nad, ne, ni, niz (nis), o, ob, obo, ot, oto, pere, po, pod, pred(i), pred(o), pri, pro, raz (ras), s(o), and u: без-вкусный (bez-vkusnyy), бес-связь (bes-svyaz'), во-круг (vo-krug), etc.

6. Compound words are divided according to their component parts (and each part according to rules 1 to 5): радио-связь (radio-swaz'), фото-снимка (foto-

part according to rules 1 to 5): радио-связь (radio-svyaz'), фото-снимка (fotosnimka).

transliteration.

I Since the orthographic reform of 1918, the rules for syllabification have been considerably liberalized. It is generally permitted now to divide according to convenience, provided that phonetics and etymology are not severely overriden. These rules, designed as a guide for workers who might not be thoroughly familiar with the Russian language, are of necessity somewhat restrictive, but they insure invariably correct word division in conformity with generally approved usage.

As a great deal of Russian matter, especially bibliography, is printed in transliterated form, these rules have been formulated so as to apply with equal accuracy whether matter is in Russian characters or in transliteration.

7. It is to be noted that the й (i) always terminates a syllable: бой-кий (boy-kiy), рай-он (ray-on); the ъ ('') terminates a syllable except in words beginning with Въ (v''), въъ (vz''), апd съ (s''): отъ-ехать (ot''-yekhat') but съём-ка (c''yēm-ka), съест-ной (s''yest-noy); the ь (') terminates a syllable except before the soft vowels е (e), и (i), ю (yu), апd я (ya): маль-чик (mal'-chik), but соло-вьев (solo-v'yev), бри-льянт (bri-l'yant), се-мья (se-m'ya).

ce (e), и (i), ю (yu), and я (ya): Маль-чик (mal'-chik), but соло-вьев (solo-v'yev), бри-льянт (bri-l'yant), се-мья (se-m'ya).

8. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: Шек-спир (Shek-spir), мас-штаб (mas-shtab), Лоа-ра (Loa-ra) [not Ло-ара (Lo-ara) (from the French Loire)], се-ньор (se-n'or).

Stress and diacritics

No simple set of rules for syllabic stress can be formulated. The only dependable guide is a native, or a dictionary in the case of basic forms and a grammar for their inflectional shiftings.

The only diacritics are the dieresis and the breve. These do not indicate stress but modification of sound. Note alphabet.

Capitalization

Capitalization is practically as in English, except that proper adjectives, names of the months (except when abbreviated), and days of the week are lowercased.

Punctuation

Punctuation is very similar to that of English, but the comma is used for restrictive as well as nonrestrictive clauses. The dash is used between a subject and a complement when there is no verb is or are, and sometimes before a clause where the equivalent of the conjunction that has been omitted. Dialog is usually shown by dashes rather than quotation marks. Cited material is enclosed in quotation marks, which are usually in the French form—« », though sometimes in the German form-,, ", and rarely as in English.

NOTE ON OLD SPELLING

On October 10, 1918, the Council of People's Commissars decreed the introduction of a spelling reform that had been proposed many years before but The spelling used from that time in all official publications, never adopted. except those of the Academy of Sciences (Akademiya Nauk), was this new spelling. The academy adopted the new spelling in 1924. All Russian writing and printing, except for a few publications outside Russia, has been in the new spelling since the institution of the reform.

The old spelling, found in books printed before the dates mentioned, differed

in the following ways:

The ordinal numbers here given are of the masculine gender. To convert them to feminine or neuter, it is only necessary to effect the proper gender changes: For the feminine, change ый to ая, ий to ья, ой to ая. For the neuter, change ый to ое, ий to ье, and ой to ое.

411 RUSSIAN

1. There were used the additional i (in the alphabet, after u and before κ , as \ddot{n} was not considered a separate letter), $\dot{\pi}$ (after $\dot{\pi}$), $\dot{\theta}$ (after $\dot{\pi}$), and \dot{v} (after $\dot{\theta}$).

2. I was used only before another vowel letter and in the word \dot{m} $\dot{\mu}$ $\dot{\mu}$, world.

It is now replaced by и (міръ became мир).

3. Ѣ occurred in certain words and in some grammatical endings. sented the same sound as e and is now replaced by e everywhere. In a few cases & was pronounced like ë, and where e is now printed with dieresis ("), the replacement of \dot{a} is, of course, \ddot{c} .

4. Θ was used in words of Greek origin, for Greek θ (th). It was pronounced

f, and is now replaced by f.

5. V was used in a few ecclesiastical words, for Greek v(u, y). It was pro-

nounced like u, and is replaced by that letter.

6. b was used at the end of all words after a consonant not followed by b. In this position a has simply been omitted since the reform. For some years after 1918, some publishers omitted ъ altogether, using an apostrophe for it after prefixes, but the use of the apostrophe is now discouraged, and ъ is used.

7. The prefixes из, воз, вз, раз, низ, без, чрез, через were written with final

з everywhere, whereas now they are written ис, вос, etc., before к, п, с, т, х,

ц, ч, ш, щ, ф.

8. Some adjective endings in the genitive singular were written -aro, -aro;

these were replaced by -oro, -ero.

9. The plural nominative of adjectives agreeing with feminine and neuter nouns was written -ыя, -ія; these endings were replaced by -ые, -ие, which had formerly been used only for adjectives agreeing with masculine nouns.

10. The pronoun "they" in referring to the feminine gender was written он's; this was replaced by они, previously used only for masculine reference.

11. Similarly, однъ, однъх, однъми were replaced by одни, одних, одними. 12. The genitive pronoun "her" was written ея; this was replaced by её, formerly used only as accusative.

13. È was printed only in schoolbooks. Its use is now official everywhere.

SPANISH

No hay que decir que la consideración que reclama el aspecto fonológico del lenguaje no viene a diminuir el interés del estudio fonético, indespensable, por su parte, para seguir la transformación de los vocablos, para conocer las tendencias que dominan en la evolución del idioma, para la comparación de los dialectos y para la determinación de las zonas y áreas de la geografía lingüística.—Tomás Navarro, Fonología Española, p. 10.

Special characters

Spanish uses the Latin alphabet with the addition of the characters \tilde{N} \tilde{n} . Note that ch, ll, and rr are regarded as separate units; i. e., words beginning with ch will be entered in the dictionary after words beginning with cz, not between the groups of words beginning with ce and ci. The acute accent appears very frequently over one of the vowel letters in a word. The dieresis appears occasionally over u following g; its occurrence elsewhere is so rare as to be negligible.

Vowels and consonants

The vowels are a, e, i, o, u, and sometimes y. The other letters are consonants. The letter y is a consonant at the beginning of a word (before a vowel) and between two vowels.

Combinations of vowel letters (diphthongs and triphthongs)

The vowel i or u preceding a, e, i, o, u, or following a, e, o, is pronounced as a single syllable with the preceding or following vowel; if the diphthong occurs in a syllable which needs an accent mark (see Stress and diacritics), the acute accent is placed over the vowel other than i or u. The diphthongs are:

ai	ei	oi			éi		
au		016			éu		
ia	ie	io	iu	ilpha		$i\delta$	$i\acute{u}$
ua	ue	210	ui	ulpha	иé	иó	ui

At the end of a word and in one-syllable words, ay, ey, oy replace the diphthongs ending in i.

Sequences of vowel letters which are not diphthongs, and which may be

divided, are those in which i or u precedes or follows another vowel: ai, ei, oi, au, eu, ou, ia, ie, io, iu, ie, io, ie, io, ie, io, ie, io, io

iai	iei	ioi	iui	uai	uei	uoi	
iau	ieu	iou		uau	ueu	uou	uiu

If the i or u at the beginning or the end of a sequence of three vowel letters has an acute accent, it is not part of a triphthong, and division may be made accordingly; e. g., i-ai, ua-ú, ú-oi.

Combinations of consonant letters (digraphs)

The digraphs are ch, ll, and rr; sh is also used in some parts of Latin America, with the same sound as in shoe.

Consonantal units

In Spanish certain consonants followed by l or r are pronounced in the same syllable with the following vowel. These consonant groups are: bl, br; cl, cr; dr; fl, fr; gl, gr; pl, pr; tr.

Rules for syllabification

1. Diphthongs, triphthongs, digraphs, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: ca-sa, bue-no, re-yes, mu-cho, po-llo, co-rrer, ha-blar, li-bro.

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: ac-ta, ac-ción, ist-mo, mar-cha, cen-tro.

4. Division may be made between vowels not constituting a diphthong or

triphthong or between a diphthong and another vowel: ca-er, le-er, ba-úl, flú-ido, temí-ais.

5. Certain adverbial prefixes are kept intact. These are: anti, bis, circum, cis, des, inter, mal, pan, sub, super, trans, and tras: anti-artistico, bis-anuo (never bi-sanuo), circum-ambiente (never circu-mambiente), des-unión (never de-sunión). Other prefixes are also divisible from the stem, provided the division conforms to rules 2 to 4: contra-parte (rule 2), ab-negación (rule 3), ex-traer (rule 3), co-existir (rule 4). Otherwise division on prefixes should be avoided, except in cases of exigency, such as very narrow measure: ab-usar (better abu-sar), re-unir (better reu-nir), ex-ánime (better exá-nime), in-afectado (better ina-fectado), co-incidencia (better coin-cidencia). In no case may division on a prefix be made, however, before an s followed by another consonant: cons-titución (never constitución), pers-pectivo (never per-spectivo), subs-tancia (never sub-stancia).

6. Compound words are divided according to their component parts (and each part according to rules 1 to 5): estado-unidense (rather than estadou-nidense), bien-estar. (There are not many compound words in Spanish the correct division

of which does not coincide with rules 1 to 5.)

7. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: Wāsh-ington, Groen-landia (never Gro-enlandia), Gegen-stand, Frei-schütz, Ingol-stadt, Ste-phenson. Scientific and technical words derived from Latin and Greek are treated as naturalized Spanish words and are divided according to rules 1 to 6: diag-nostico, hemis-ferio, anastomosis.

 $^{^1}$ This rule of the s is rigidly adhered to, because no Spanish word and hence no syllable can begin with a group of consonants the first of which is s.

Stress and diacritics

The tilde, the dieresis, and the acute accent are the diacritical marks used in Spanish. The tilde is used only over the n, and \tilde{n} is a special character representing a separate phoneme, the palatal n. The use of the dieresis is related to senting a separate phoneme, the palatal n. the spelling of the k, kw, g, and gw sounds before the various vowels, as follows:

	a	0	u	e	i
(k)	ca	co	cu	que	qui
(kw)	cua	cuo		$c\ddot{u}e$	$c\ddot{u}i$
(g)	ga	go	gu	gue	gui
(gw)	gua	guo		$g\ddot{u}e$	$g\ddot{u}i$

The acute accent is used over a vowel to indicate that it is stressed; it is also used to distinguish homonyms. If there is no accent mark, a word ending in a consonant (including y, except n and s) is stressed on the last syllable; a word ending in a vowel, n, or s is stressed on the next-to-last syllable. Specifically, the acute accent is used as follows:

 To indicate that the vowel is stressed.
 To indicate vowels not forming a diphthong. (See Diphthongs.)

3. To distinguish words of the same spelling but of different meanings: aún, still, yet, aun, even; dé, give, de, of; él, he, him, el, the (but el que, el cual, he who, him who); há, ago, ha, has; hé, behold, he, I have; mí, me, mi, my; más, more, mas, but; sé, I know, be thou, se, oneself; sí, yes, oneself, sí, if; sólo, only, solo, alone, single;

té, tea, te, thee; tú, thou, tu, thy; vé, go, ve, sees.
4. To distinguish interrogative or exclamatory use from relative or declarative: adónde, where? adonde, where; cómo, how? como, as; cuán, how! cuan, how; cuándo, when? cuando, when; cuánto, how much? cuanto, as much; cúyo, whose? cuyo, whose; dónde, where? donde, where; qué, what? que, which; quién, who(m)? quien, who(m).

5. To distinguish pronouns from adjectives: éste, this one, este, this; ése, that one, este, that; aquél, that one yonder, aquel, that.

6. Arbitrarily on monosyllabic agrists: di, I gave; fui, I was; fui, he was;

rió, he laughed; ví, I saw; vió, he saw.

7. To avoid confusing the word o (or) with the zero: 2 \(\delta \) 3, but dos o tres, two or three.

Capitalization

The English style of capitalization is followed, with few exceptions.

Adjectives derived from proper nouns are lowercased, as las mujeres colombianas (the Colombian women) and los cruceros brasileños (the Brazilian cruisers). The first word of a question occurring within a sentence is lowercased, as: Cuando

viene la noche, ¿cómo se puede ver? Note the following forms of capitalization: El señor Enrique Palava; el señor

don Enrique Palava.

Days of the week and months begin with a lowercase letter.

In titles of books, only the initial and proper nouns are capitalized: Historia crítica de España y de la cultura española.

Punctuation and hyphenation

Punctuation is practically the same as in English; and, in addition, inverted interrogation and exclamation marks are used at the exact beginning of the question or exclamation.

Si es así, ¿qué he de hacer? Pero, jay de mí! no es posible.

Quotation marks begin the first paragraph of a dialog. The succeeding paragraphs sometimes start with em dashes instead of quotation marks, and the latter are not used until the dialog ends:

"¿Es así, señor? -Sí; es verdad.

-¿Ćómo se puede averiguarlo? No sé; pero es la verdad."

The hyphen, as a rule, is used only in syllabification. The apostrophe is not employed.

Då nu en ny upplaga av denna bok skall ges ut, har jag begagnat tillfället att göra några smärre rättelser och förtydliganden-större ändringar i texten ha även om de i vissa fall synts önskvärda av praktiska skäl icke kunnat sättas i fråga.—Erik Ludvig Wellander, Riktig Svenska (1941), p. xvi.

Special characters

Swedish uses the Latin alphabet with the addition of three special characters the last three in the alphabet.

Vowels and consonants

The vowels are a, e, i, o, u, y, a, \ddot{a} , and \ddot{o} ; the so-called back vowels being a, o, u, and \dot{a} ; the front vowels e, i, y, \ddot{a} , and \ddot{o} . The other letters of the alphabet are all consonants.

Diphthongs

The diphthongs in Swedish are au, pronounced like ou in house; eu, pronounced somewhat like e(ph)ew in nephew; of as in boy; af, pronounced like igh in high.

¹ In the orthography employed prior to 1906, the v sound was represented in absolutely final position by f; medially by fv. Since 1906, v has represented f and fv. except in some proper names.

² In words of Latin origin, the combination ti in the suffix tion is pronounced as in English if preceded by any consonant except r (aktion, pronounced akshon), otherwise like ch in chair (nation, pronounced nachon; portion, pronounced prochon); in the combinations tia and tie like ts (profetia, pronounced profetsia; aktie, pronounced aktsie).

³ In typesetting, if the character à is not available, it is replaced by aa.

SWEDISH 419

Digraphs

The digraphs and their sounds are:

ch as k

kj as ch in chair

ph as f (in foreign words) sch as sh in shall

sj as sh in shall

sk as sh in shall (it is not a digraph if pronounced like sk in basket) 1

skj as sh in shall stj as sh in shall th as t (in foreign words) qu as kv

The combination ng is pronounced like ng in sing-er (not fin-ger) and is termed a nasal: ingen (pronounced ing-en), hängar (pronounced häng-ar), engelsk (pronounced eng-elsk), finger (pronounced fing-er). The velar nasal ng must be distinguished, however, from the incidental collocation of the two letters resulting from compounding or affixing, in which case the ng is not a nasal: angelägen (from an plus gelägen), ingripa (from in plus gripa); nor is ng a velar nasal in words of foreign origin, such as singular, evangelium.

The letter g is also a velar nasal when it follows a short vowel and precedes the

letter n: lugn (pronounced lung'n), lugna (pronounced lung'na), vagnar (pro-

nounced vang'nar), ugnar (pronounced ung'nar).

Consonantal units

The combinations kv (the substitute for the Romance language qu), sk, sp, st, and str are treated for purposes of syllabification as units.

Rules for syllabification

1. Diphthongs, digraphs, and consonantal units may not be divided.

2. Division is made on a vowel or on a diphthong before a single consonant, a digraph, or a consonantal unit: ta-la, re-gel, hu-set, ma-skin, pa-scha, be-kväm,

3. In a group of two or more consonants, division is made before the last consonant, digraph, or consonantal unit: al-la, myc-ket, häs-sja, al-stra, hög-ste, fladd-ra, kan-ske, mar-schera, forsk-ning.

4. Division may be made between vowels not constituting a diphthong or be-

tween a diphthong and another vowel: se-ende, gå-ende.

5. Certain adverbial prefixes are kept intact. These are: an, av, bak, be, bi, bort, efter, en, ent, er, fort, fram, från, för, före, gen, genom, hop, in, med, miss, mot, ned, o, om, på, samman, sönder, till, under, upp, ur, ut, ute, veder, vid, åt,

ater, and över: an-draga, av-tryck, bak-slag, be-kläda, etc.
6. Certain suffixes are kept intact. These are: aktig, artad, het, ska, skap(s), and ske: del-aktig, ull-artad, envis-het, amerikan-ska, grann-skap, hand-ske.
7. Compound words are divided according to their component parts (and each part according to rules 1 to 6): där-emot, dess-utom, bank-aktie, blom-stjälk, bok-tryck. The compounding s, if used, is kept with the preceding component: dags-ljus, gevärs-exercis, guds-man.
8. Foreign words and components of foreign words (not naturalized) follow the

conventions of the language of origin: por-trätt, atmo-sfär, manu-skript. Under this rule are also included technical and scientific words, which editors prefer to

treat etymologically: tele-skop, dia-fragma, des-infektion.

9. The letter x and the nasal ng are properly kept with the preceding syllable:

byx-or, lax-en, gung-an, konung-en.²
10. When division is made on a syllable from which a letter was elided, the letter is restored to render the syllable integral: till-lika (from tillika). It is important to bear in mind that words divided under this rule, if subsequently reset and run over, must have their original spelling restored.

¹ The letters sk are a digraph and pronounced soft, like sh, when they occur before a soft vowel in a stressed syllable: $sk\ddot{a}ra$ (pronounced $sh\dot{a}'ra$), skynda (pronounced $sh\dot{n}'da$), maskin (pronounced mashin'); otherwise they are pronounced hard, like the English sk (skada, skriva, fisk, rusk, handske, fiske, ruskig). There are a few exceptions. Contrary to the rule, sk is soft in mainiska (pronounced marshalk), kanske (pronounced kanshe). On the other hand, sk is hard, contrary to the rule, in skiss, konfiskera, riskera, skelett, skeptisk, and in a few other words of foreign origin.
² The practice varies, however, and many editors allow x to be brought over to the next syllable and ng to be divided, according to the convenience of the compositor; hence: by-xor, la-xen, gun-gan, konun-gen (cf. Axel Johan Uppvall and Gösta Robert Stene, Swedish Grammar and Reader, 1938, p. 3, Syllabification).

Diacritics and stress

With the exception of \mathring{a} , \ddot{a} , and \ddot{o} , diacritics are used only in foreign loanwords ($r\acute{e}sum\acute{e}$) and in certain proper names ($Tegn\acute{e}r$).

Syllabic stress falls on the root syllable in all simple native words and on the main, usually the first, component of compound words.

Capitalization

Capitalization is similar to that in English, except that proper adjectives, days of the week, months, and holidays are lowercased. In compound names, only the first word is usually capitalized (Förenta staterna, United States; Karl den store, Charles the Great), and the second-person pronouns Ni, Eder, Er are capitalized in correspondence.

Punctuation

The rules of punctuation are essentially the same as in English, although Swedish punctuation is perhaps somewhat closer, the comma, especially, being used more freely. The apostrophe is not used to indicate possession, except in foreign names and those terminating in the letter s: Shakespeare's dramer (Shakespeare's dramas), Valerius' visor (the ballads of Valerius).

Abbreviations

Where the last letter of the abbreviation is the last letter of the complete word, the period is not used.

TURKISH

Ey, Türk Gençliği, birinci vazifen Türk istiklâlini, Türk Cümhuriyetini ilelebet muhafaza ve müdafaa etmektir. Birgün İstiklâl ve Cümhuriyeti müdafaa mecburiyetine düşersen, vazifeye atılmak için içinde bulunacağın vaziyetin imkân ve şeraitini düşünmeyeceksin. Mevcudiyetinin ve istikbâlinin yegâne temeli budur. Bu temel senin en kıymetli hazinendir. K. Atatürk.

Special characters

Turkish uses the Latin alphabet with the addition of the following special characters: \hat{A} å, \hat{C} ç, \check{G} ğ, \check{I} , 1, \check{O} ö, \hat{S} ş, \hat{U} û, and \check{U} ü. The characters \check{G} ğ occur also as \check{G} ğ. Note the characters \hat{I} I, i. The circumflex accent (^) is frequently used over vowels. It sometimes indicates prolongation of the vowel, sometimes palatal (y-like) pronunciation of neighboring k, g, or l. Turkish orthography uses no digraphs.

Vowels and consonants

The vowel letters are a, a, e, i, i, o, o, u, u, and u. The remaining letters of the alphabet are consonants. The apostrophe ('), which indicates hiatus or slight glottal catch, counts as a consonant.

¹[Translation:] O, Turkish Youth, your first duty is to look after and eternally to protect the Turkish Independence. If one day you are called upon to defend the Republic and the Independence, you will take over your duty neither flinching nor being deterred by any circumstances or situations in which you may find yourselves. This is the only foundation to your existence and future. This foundation is your most valuable treasure.

Consonantal units

For the purposes of syllabification, there are no consonantal units in Turkish, although in foreign words deference is shown to consonantal units according to the language of origin.

Rules for syllabification

- 1. Turkish, not having diphthongs, digraphs, or consonantal units, has no groups of vowels or consonants which may not be divided, provided division conforms to rules 2 to 8 below.
- 2. Division is made on a vowel before a single consonant: ha-va, zi-ya, sa-kin. 3. In a group of two or more consonants, division is made before the last consonant: bil-mek, bil-lûr, ört-mek, sat-hî, sal-ya, bey-yine.

4. Vowels may be divided: ma-ani, mu-af.

5. Turkish has no prefixes in the conventionally accepted sense. The negative particle gayri, however, acts as a prefix and is kept intact: gayri-matbu.
6. Compound words are divided according to their component parts (and

each part according to rules 1 to 5): gōz-ağrısı.
7. Foreign words and components of foreign words (not naturalized) follow the conventions of the language of origin: fa-brika, am-plifikatör, ka-blo, tel-graf, boy-skavt. In this rule are also included scientific and technical words, which editors prefer to treat etymologically: pan-kreas, proto-plasma.

8. Division may be made on the apostrophe indicating hiatus: mes'-ul.

Stress and diacritics

Stress is not marked in Turkish orthography. The only diacritics are the dieresis, cedilla, and circumflex, all of which are explained under Special characters. TURKISH 425

Capitalization

Capitalization is practically as in English, but proper adjectives are lower-cased.

Punctuation

Punctuation is similar to that in English, but the comma and dash are used somewhat more frequently than in English.

SLAVIC LANGUAGES AND THEIR ALPHABETS

The Slavic languages are usually divided into three groups:

(a) West Slavic, which includes Polish, Sorb or Wendish (also called Lusatian), Czech, and Slovak; Polabian, now extinct, also belongs to this group, as do Kashubian (almost extinct) and Slovinzian (extinct). Polish is the language of Poland. Sorb or Wendish is spoken along the river Spree in both Upper and Lower Lusatia. Czech and Slovak are two separate, though very similar, languages. Czech is spoken in western and central Czechoslovakia (Bohemia and guages; Czech is spoken in western and central Czechoslovakia (Bohemia and Moravia), and Slovak in the eastern part of the country (Slovakia). Polabian was spoken in the regions adjacent to the Elbe River. Kashubian and Slovinzian were found in the region around Danzig in Pomerania.

(b) East Slavic, which comprises Russian, Ukrainian, and White Russian. Russian is spoken throughout the Soviet Union, but was originally native only to central and northern European Russia. White Russian is spoken in the White Russian Soviet Socialist Republic. Ukrainian is found in most of the Ukrainian Soviet Socialist Republic; the variety of Ukrainian spoken in what was formerly sub-Carpathian Russia in Czechoslovakia was often referred to as Ruthenian. Ukrainian was formerly called Little Russian, and Russian

proper was then designated as Great Russian.

(c) South Slavic, which includes Slovene, Serbo-Croatian, Macedonian, and Bulgarian. Serbo-Croatian is a single literary language, the Serbian areas writing it in the Cyrillic alphabet, while the Croatian areas use the Latin alphabet. (in the form given as transliteration for Serbian Cyrillie). Serbo-Croatian is the language of all Yugoslavia, but Slovene is used in Slovenia (northwest Yugoslavia) and Macedonian in Macedonia (southeast Yugoslavia). Bulgarian is

spoken in Bulgaria.

The West Slavic languages and Slovene and Croatian have always been written in the Latin alphabet. The other Slavic languages use modern forms of Cyrillic. Cyrillic was devised in the 10th century, being based on the Greek alphabet. It was created for the purpose of writing Old Macedonian, which is usually called Old Church Slavic, and the old form of the alphabet, not given below, is now found only in printed ecclesiastical materials. Old Church Slavic is sometimes called Old Church Slavonic.

The Cyrillic alphabet has been adopted recently in the Union of Soviet Socialist Republics for use with various non-Slavic languages, such as Moldavian, Kirghiz, Tajik, Mongolian, and others. Usually the Russian form is used as a base, with special letters added as needed.

Transliteration of Cyrillic alphabets

The transliteration given first place here is that of the United States Board on Geographic Names, adopted in 1944. It is identical with that used by the (British) Permanent Committee on Geographical Names, adopted about the same time. The Board on Geographic Names transliteration has been officially adopted only for Russian, Bulgarian, and Serbian; for the other languages here given it is applied by extending the same principles and supplying new symbols or digraphs as needed. Certain additions to avoid possible ambiguity are also given.

The Library of Congress uses a transliteration that differs at certain points from that of the Board on Geographic Names. These differences are indicated. In works on Slavic in the fields of linguistics and philology, still other transliterations are used. These are also indicated, the word "linguistics" being used

to mean linguistics and philology.

In the list below, the transliterated symbol holds for all six languages when it is not marked. Where different uses are recommended for different languages, or where a letter is used only in some of the languages, these facts are stated.

The old form of Cyrillic used for Old Church Slavic had letters similar in shape to a, 6, b, r, π , e, π , 3, s, π , i, π , π , m, h, o, π , p, e, π , y, ϕ , x, π , u, π , π , s, b, ϕ , n, x, f-x, e, and v. In addition there were ω (Greek) = \bar{v} , ia (equal to modern π), i-e (equal to Ukrainian e), $\Lambda = \bar{e}$ (nasal e), ia = \bar{e} (ye or je), \bar{e} (Greek) = $\bar{k}s$ (x); ψ (Greek) = ps; π appeared as π i or π , and also as π in π . \bar{u} : \bar{u} :. A still older form of this alphabet, the Glagolitic, has letter shapes that are very different from those of the original Greek or modern Cyrillic; this alphabet lacked the letters ω , π , i.a, i-e, ξ , ψ , but had a letter corresponding to Serbian π .
