PREFACE

to the Preliminary Edition

These materials have been written to meet the needs of students who desire a comprehensive, intensive introduction to Latin forms and syntax in a relatively short period of time. They were originally structured to fit the specific format of the Latin Workshop of the University of California at Berkeley and the Summer Latin Institute of Brooklyn College of the City University of New York. Both of these programs aim to provide a rapid introduction to Latin forms and syntax in a period of approximately four weeks of concentrated study, leading to an additional six weeks in which selected classical and medieval texts are treated in depth. However, this book may also be used, at a slower pace, by instructors of less intensive or regular classes.

The introduction of the subjunctive early in the course will permit the supplementary reading of real or slightly altered texts at an early point in the student's career, given substantial vocabulary and syntactical glosses. Selections of connected reading (real, doctored, or manufactured, as need requires) will be found at the end of each Unit. Notes which will aid in the memorization of vocabulary as well as present some of the rules for word formation are provided after each new vocabulary list. In addition, the book contains a complete appendix, divided into two parts:

1. **FORMS.** All paradigms are included in full for reference and review. This will be particularly helpful in those cases where paradigms are not written out in full in the body of the text (e.g., **iste**, **ista**, **istud**, Unit 12G). The future imperative, which has been omitted from the actual text because of its infrequent use, appears in the appendix for the first time.

2. **SYNTAX.** An outline of syntax is presented for reference and review. Each construction is illustrated with several examples and so should supplement amply the explanations and illustrations in the main body of the text. In addition, several constructions which do not appear earlier in the book are included so as to make the text a more useful tool for those students who plan to continue with their study of Latin.

Each Unit was originally designed to be covered in a single day of the Berkeley and Brooklyn intensive summer programs, although regular-paced classes

may wish to spend an entire week on each one. Drills which illustrate the new morphological and grammatical concepts are supplied in the text for each Unit. Wherever possible, the vocabulary used in these drills has been limited to words which have already been met, and so the drills may be done without knowledge of the new vocabulary in the Unit. The exercises, in whole or in part, should be prepared by the student at home, and the connected readings, with their ample glosses, provide an excellent opportunity for sight reading in class.

The review Units consist of sentences which illustrate the morphological and grammatical principles taught in the lessons being reviewed. In the first three review Units, these sentences are followed by two review tests which the student may work out on his own or with the aid of an instructor. The six sample review tests in the book are followed by answer keys so as to enable the student to use them as a means of self-review. Maximum benefits may be obtained in reviewing the last Units by reading and carefully parsing the selections from Caesar which form the last part of Unit 18. By this time, students should be able to handle, with the aid of vocabulary glosses, any piece of reasonably straightforward Latin prose.

It is the belief of the authors that the best way to understand the structure of Latin is first through literal English translations, then smoother ones. For this reason, literal translations of illustrative sentences are almost invariably given first, followed by smoother English variants. For example,

Fēmina à militibus visa domum cucurrit.

The woman having been seen by the soldiers ran home; after she had been seen by the soldiers, the woman ran home; since she had been seen by the soldiers, the woman ran home, etc.

Dicit sē fēlicem esse.

He says himself to be happy; he says that he is happy.

In preparing these materials, the following works have been consulted:

Allen and Greenough, *New Latin Grammar* (Boston, 1903)

Gildersleeve and Lodge, *Latin Grammar* (London, 1957)

Krebs and Schmalz, *Antibarbarus der Lateinischen Sprache* (Basel, 1905)

Lane, *A Latin Grammar* (New York, 1898)

Woodcock, *A New Latin Syntax* (London, 1959)

Lewis and Short, *A Latin Dictionary* (Oxford, 1962) is the authority for the meanings of words; long quantities are for the most part based on those found in Walde-Hofmann, *Lateinisches etymologisches Wörterbuch* (Heidelberg, 1938).

For help with the present volume, we are grateful to Ms. Judith Rosner for her contributions to the initial stages of the project, to Mr. Robert E. Kenney

for his kind assistance with xeroxing and duplication, to Ms. Stephanie Russell for help with typing part of the manuscript, and especially to Professors William S. Anderson of the University of California at Berkeley and Charles William Dunmore of New York University for reading through segments of the manuscript and offering many constructive criticisms. In addition, Mr. August Frugé of the University of California Press has been most cooperative and helpful. To Brooklyn College and Professor Ethyle R. Wolfe, Dean of the School of Humanities, go our thanks for encouragement, the opportunity to bring the program to New York City, and for a grant in the summer of 1972 which enabled us to begin the project. Gratitude must also be expressed to those colleagues in the Departments of Classics and Comparative Literature who gave us support, in particular to Professor Anna Griffiths, who has helped us in many ways. Last but not least, it would be remiss of us to conclude without a very special vote of thanks to the department chairman when this was being written, Professor Dennis J. Spininger. If it were not for his eager support of the program, the chances of completing this project would have been diminished severely.

There is one additional group of people, many of whom must remain nameless, who deserve perhaps the most recognition of all — those who have played a role in building the intensive summer Latin programs which inspired this book and for which it was originally written. To Professors W. Ralph Johnson and Alain Renoir of the University of California at Berkeley, Mary-Kay Gamel Orlandi of the University of California at Santa Cruz, John Wyatt of Beloit College, Ms. Catherine R. Freis, current director of the Berkeley Latin Workshop, and Ms. Joan Plotnick and Professor Gail Smith of Brooklyn College go our thanks for their many explicit and implicit contributions to the program and all for which it stands. Most of all, however, we are indebted to the students who have participated in the Berkeley Latin Workshop and the Brooklyn Summer Latin Institute. Their patience and dedication, met only by that of superb teaching staffs, were vital to the success which both programs have enjoyed. It is to them, and to all those who follow them, that this book is dedicated.

Needless to say, the errors and infelicities of style which remain in the following pages are the result of our own short-sightedness and do not bear in the least on the people mentioned above. We hope to iron them out in the final version of the text.

PREFACE

to this Edition

Two summers and an academic year of use in beyond-the-intensive, intensive, accelerated, and regular courses have caused this book to be revised in a number of ways. Many errors have been eliminated and some sentences have been re-written to illustrate better the concepts under consideration as well as to bring them into line with correct Latin usage. Some of the Units have undergone revision, modification, or expansion in order to give a more complete picture of the various syntactical functions. Unit Seven has been reorganized in the interest of greater lucidity, and the treatment of clauses of result and characteristic has been considerably revamped. The Review Tests have been retitled "Self Review" and one of these has been added to the Review of Units 12-18.

So as to make the book adaptable to regular-paced classes which meet three or four times per week, a group of Preliminary Exercises has been added for the first seventeen Units. These will permit breaking down each Unit into two or more manageable parts. Several users have suggested the following arrangement for presentation: the first day is spent rendering (at sight) the reading selections from the previous Unit, while the vocabulary for the new Unit is assigned for homework. On the second day, the first segment of the new Unit is presented and the Preliminary Exercises are assigned. The third day is spent presenting the second segment of the new Unit and then assigning selected sentences from the Unit Exercises. Grammatical principles can be reinforced at any time by going through the Unit Drills. A fourth day can be used doing additional sentences from the Exercises, or the vocabulary for the next Unit might be assigned while the readings are done at sight in class. Of course, other arrangements may be preferred and some instructors will find it useful to spend more time on some Units than on others. The initial four Units, for example, are extremely compact and may well require more time.

A substantial number of the sentences beyond Unit Seven have been built around phrases or thought-patterns from the ancient authors (although references are consistently not given). They have been adapted (in some cases, very slightly) to fit the controlled vocabulary and to afford concentrated practice with new forms and syntax. The problem of including "real" Latin in a begin-

ner's text is a massive one, particularly in the light of the authors' efforts to control the vocabulary and the constructions. Selections with glosses have, however, been included in most of the Units for the benefit of those who prefer that their students have contact with the original sources at an early stage. These selections have been coordinated as much as possible to the forms and syntax of the Unit.

The introduction of the subjunctive and some sophisticated constructions near the beginning of the course will permit reading of unaltered texts early in the term. Rather than include a greater variety of suggested readings in the book, we felt it more useful to leave it to the individual instructor to provide the students with sight material which he or she deems appropriate and interesting. We have found that several of the poems of Catullus are easy to handle from Unit Seven onwards, but others will have different preferences.

There continue to be more than ample exercises and opportunity for practice. The Unit Drills do not, where possible, use the new vocabulary for the Unit and so they permit the drilling of new syntactical functions before the student has mastered the vocabulary. The Preliminary Exercises and the Exercises do use the new vocabulary and provide more than enough practice on forms and syntax. The readings (after Unit Five) attempt to integrate the material of the Unit with actual (or slightly altered) selections from the authors and so a consistent progression from grammar and forms, to practice with synthetic or slightly altered Latin, to exposure to actual excerpts is maintained.

Throughout this book, every attempt has been made to present the grammar in as lucid and clear a way as possible while not oversimplifying it. The exercises and readings tend to be complex from the beginning so as not to give the student a false sense of confidence, but rather to minimize the traditionally difficult transition into the continuous reading of ancient texts. The book does not presume to be a definitive grammar and so many points have of necessity been omitted in order not to overburden the student with a plethora of exceptions and alternate ways of expressing ideas. A great deal about the function of independent subjunctives in hypotaxis, for example, has been omitted on the assumption that this kind of information and analysis can either be supplied by the instructor or might profitably be delayed until such time as the student begins to read continuously and so to expand his or her knowledge of syntax and style.

The book has a complete appendix of morphology and syntax which not only reviews in capsule form the material included in the main text, but also includes other constructions and terms to aid the student as he or she goes on to read. In the few instances where complete paradigms are not included in the body of the text, they will appear in full in the Appendix. The vocabularies at the end are geared to the exercises in the book and by no means are to be considered complete either in their inclusiveness or in the definitions of words.

Users have stated that the book has proved useful both as a beginner's text and as a review text for intermediate Latin classes. The Appendix will be especially valuable as a reference for the latter.

Detailed notes and suggestions submitted by Professors John R. Clark, J. B. Clinard, Elizabeth Constantinides, Gerald M. Quinn, Mr. Steven Lund, Ms. Stephanie Russell, and others have proved most valuable and have caused us to rethink and revise many things; but we have remained stubborn about others. The difficulties involved in editing a text of this kind and in attempting to achieve some degree of consistency in the presentation were greater than we could possibly have imagined. The patient, efficient services of Ms. Susan Peters of the University of California Press and the trained eye and skill of our copy editor, Ms. Ramona Michaelis, have been indispensable in this regard. To them and to other colleagues, students, and friends, we extend our gratitude, not only for whatever polish this edition has acquired over the preliminary one, but also for the opportunity afforded us to reassess our own notions and to learn a great deal more about this language.

An Additional Note:

In using the book at the Latin Institute of the City University of New York, we have found that the following poems of Catullus integrate nicely with the Units of the book as indicated below. We provide this information for the reference of instructors who may be looking for appropriate original material to supplement the exercises in the Units.

- Unit 8, Catullus 13
- Unit 9, Catullus 51
- Unit 10, Catullus 9
- Unit 11, Catullus 12
- Unit 13, Catullus 41 and 43
- Unit 14, Catullus 42
- Unit 15, Catullus 5 and 7
- Unit 16, Catullus 101
- Unit 17, Catullus 8
- Unit 18, Catullus 11

INTRODUCTION

A. The Alphabet and Pronunciation

There are twenty-four letters in the Latin alphabet. These are the same as in the English alphabet, except that there is no *j* or *w*. The letters *i* and *u* were used as both vowels and consonants (*u*, when used as a consonant, is written *v* in this book). The sounds for the letters correspond roughly to the sounds in English, but the following observations should be noted.

VOWELS: All vowels are either long or short by nature.

ā (as in father)	frāter, hās
a (as in alike)	multa, parentum
ē (as in the <i>a</i> in save)	valē, tētē
e (as in bet)	vectus, mūnere
ī (as in machine)	prīscō, dormīre
i (as in is, it)	mortis, miser
ō (as in oh, Ohio)	frāternō, mōre, dōnārem
o (as in often)	locus, adloquerer
ū (as in rude)	flētū, fortūna
u (as in the <i>oo</i> in look)	vectus, ut

DIPHTHONGS: (A diphthong occurs when two vowels are pronounced together as one sound.)

ae (as <i>i</i> in alike)	haec, aequora
au (as <i>ou</i> in foul)	laudō, aut
ei (as in rein)	deinde
eu (a combination of <i>e</i> as in bet and an <i>oo</i> sound as in food)	heu
oe (as <i>oi</i> in boil)	coepit, proelium
ui (as in twin)	huic, cui

CONSONANTS:

b	(+ s, pronounced like <i>p</i> ; otherwise like English <i>b</i>)	abstulit, barbarus, urbs
c	(always hard, like a <i>k</i>)	accipe, haec, cinerem
g	(always hard, as in <i>get</i>)	gentēs
h	(always pronounced as an aspirate, as in <i>hat</i>)	huius, haec, huic
i	(consonantal; pronounced like <i>y</i> in <i>yes</i>)	Iūnō, iūdex (In some texts, consonantal <i>i</i> is written as <i>j</i> .)
q(u)	(pronounced like <i>kw</i> as in <i>quick</i>)	aequora, nēquiquam
s	(always a sibilant, as in <i>seek</i>)	inferiās, abstulit, tristi
t	(always as in <i>tell</i>)	abstulit, tristī, trādita, mānania
v	(pronounced like <i>w</i>)	avē atque valē; adveniō, vivit (In some texts, <i>v</i> is written as <i>u</i> . This is called consonantal <i>u</i> .)
x	(pronounced like <i>ks</i>)	dixit
ch	(pronounced like the <i>k h</i> in <i>park here</i>)	character, charta
ph	(pronounced like the <i>p h</i> in <i>top hat</i>)	philosophia
th	(pronounced like the <i>t h</i> in <i>hot head</i>)	theātrum
gu	(pronounced like <i>gw</i>)	lingua

Every letter in a Latin word is pronounced; there are no silent letters.

B. Syllabification

Every Latin word has as many syllables as it has vowels or diphthongs. In dividing a word into syllables, a consonant after a vowel goes with the following syllable:

mū/tam; ta/men

When a vowel or diphthong is followed by two or more consonants, the first consonant goes with the first syllable, the remainder with the next syllable:

for/tū/na; ad/lo/que/rer

Thus:

fortūna	3 syllables
māniantia	4 syllables
atque	2 syllables (que = qve)
nunc	1 syllable
mūtam	2 syllables
cinerem	3 syllables
tamen	2 syllables
postrēmō	3 syllables
inferiās	4 syllables

C. Accentuation

Every Latin word has one syllable which is slightly stressed over the others. In order to illustrate the rule by which accentuation is determined, it will be necessary to present some terminology.

ultima (syllaba ultima, 'last syllable') = the last syllable

penult (syllaba paene ultima, 'almost

last syllable') = the second syllable from the end

antepenult (syllaba ante paene ultima,

'before the almost last syllable') = third syllable from the end

The only two syllables in a Latin word which may receive accent are the penult and the antepenult. Accent is determined by applying the *law of the penult*:

In words of two syllables, the *penult* receives the accent:

múltas géntes véc tus

In words of more than two syllables, the *penult* receives the accent *if it is long; if the penult is short*, the accent is placed on the *antepenult*.

A syllable can be long in one of two ways:

1. *Length by nature.* If the syllable contains a long vowel or a diphthong, it is said to be long *by nature*.
2. *Length by position.* If the syllable contains a vowel which is followed by two consonants, it is said to be long *by position*. *x* (= *ks*) is said to be a double consonant.

postrēmō	aéquora	áccipe
paréntum	frátérnō	múnere

Read the following poem aloud, applying the rules for pronunciation, syllabification, and accentuation that have just been presented:

Multās per gentēs et multa per aequora vectus
 adveniō hās miserās, frāter, ad inferiās,
 ut tē postrēmō dōnārem mūnere mortis
 et mūtam nēquiam adloqueret cinerem,
 quandoquidem fortūna mihi tētē abstulit ipsum,
 heu miser indignē frāter adempte mihi.
 Nunc tamen intereā haec, priscō, quae mōre parentum
 trādita sunt tristī mūnere ad inferiās,
 accipe frāternō multum mānantia flētū,
 atque in perpetuum, frāter, avē atque valē.

(Catullus 101)

D. Word Order

The meaning of an English sentence is often dependent on the order of its words. For example, in the sentence:

Maria sees Anna

the word order tells us clearly that “Maria” is the subject of the verb “sees”, while “Anna” is its object. Switch the words around, and we have altered the sense:

Anna sees Maria.

And, given English idiom, other arrangements are not possible:

Sees Anna Maria Maria Anna sees Sees Maria Anna

Latin word order is far more flexible, for the order of words does not rigidly determine their grammatical relationship. Latin nouns, pronouns, adjectives, and verbs are *inflected*; that is, they change their form, usually at the end of the word, to show their grammatical relationship to other words around them. The word *bends* (*flectere*, ‘to bend’) away from its original form in order to assume different grammatical relationships. The inflection of verbs is called *conjugation*, and one is said to *conjugate* a verb. The inflection of nouns, pronouns, and adjectives is called *declension*, and one is said to *decline* these words.

Thus, if we translate the sentence “Maria sees Anna” into Latin, we have **Maria videt Annam**. The **-m** ending of **Annam** indicates that this word *must* function as the object of the verb **videt**. The words can appear in any order, but the basic meaning will still be clear:

Marīa Annam videt.
 Annam videt Marīa.
 Videt Annam Marīa.
 Videt Marīa Annam.
 . . . etc.

This does not mean that the order of words in a Latin sentence is strictly fortuitous. Word order shifts because of *emphasis*. The two really emphatic positions in a Latin sentence or clause are the *first* and the *last*. Since the subject and the verb are usually the most emphatic words in a sentence, the normal word order is subject first, verb last. But variations occur. The following will give some idea of what shifts of emphasis can do.

Marīa videt Annam.	Maria sees Anna.	(both "Maria" and "Anna" mildly emphasized)
Marīa Annam videt.	Maria sees Anna.	(normal or neutral order: subject and verb in equal emphasis)
Annam Marīa videt.	Anna is the one whom Maria sees.	("Anna" emphasized)
Videt Annam Marīa.	Maria <i>sees</i> Anna.	("Maria" <i>actually sees</i> "Anna"; emphasis on the verbal action)

Of course, the exact thrust or nuance of the emphasis achieved by word order must also be determined from the context in which a given arrangement appears.

What may emerge from this brief illustration is the observation that the more *unusual* a position is for any word, the more *emphatic* it is for that word.

In order to apply this observation, the following remarks about word order are offered:

1. The *subject* of the sentence stands at the beginning of or early in the sentence.
2. The *verb* (or some important part of the predicate) usually comes at the end. *But* forms of the verb *sum*, 'be', when used as a link verb, rarely come last.
3. The accusative and dative, expressing the direct and indirect objects of the verb, usually come *before* the verb. Latin in this respect differs decidedly from English:

Ego **librum** **filiō** dō. I give the **book** to (my) son.

accusative	dative	accusative	dative
(direct object)	(indirect object)	(direct object)	(indirect object)

4. A genitive usually follows the word on which it depends:

librum fēminae (a, the) book *of (a, the) woman*; (a, the) *woman's book*

5. Adjectives, when used to describe or give an attribute of the noun, regularly come *after* the noun; but demonstratives, interrogatives, numerals, and adjectives denoting size or quantity regularly come *before* their nouns:

vir bonus	(a, the) <i>good man</i>	(attributive adjective)
puella pulchra	(a, the) <i>beautiful girl</i>	(attributive adjective)
haec urbs	<i>this city</i>	(demonstrative adjective)
multī hominēs	<i>many men</i>	(adjective denoting quantity)
ūnus vir	<i>one man</i>	(numerical adjective)
quae fēmina?	<i>which woman?</i>	(interrogative adjective)

6. Adverbs and their equivalents regularly precede the word or words they qualify:

Ille miles diū vixit. That soldier lived *for a long time*.

Hominem gladiō interfecit. He killed the man *with a sword*.

Tē nōn amo. I do *not* love you.

When writing sentences in Latin, we would suggest that, at the beginning, you observe the guidelines for word order listed above. As the course progresses, variations in word order will be called to your attention, and when your feel for Latin idiom and emphasis begins to grow, you will discover the multiple nuances you can create in a Latin sentence just by ordering its words skillfully and artistically.

GRAMMATICAL REVIEW

There are eight parts of speech: *noun, pronoun, adjective, verb, adverb, conjunction, interjection, preposition.*

A *noun* is a word used to express the name of a person, place, or thing.

Examples: boy, dog, horses, Chicago, window, feet.

A *pronoun* is a word used in place of a noun.

Examples: he, she, it, we, us, them, ours, mine.

An *adjective* is a word used to describe a noun.

Examples: big, small, red, tall, new, old.

A *verb* is a word used to express action or a state of being.

Examples: run, walk, eat, sleep, cough, chew, am, is, are, stand, was, were, appear, seem.

An *adverb* is a word used to describe a verb, adverb, or an adjective.

Examples: quickly, very, beautifully, happily, too.

A *conjunction* is a word used to connect sentences, clauses, phrases, or words.

Examples: and, if, or, but, since, although.

An *interjection* is a word or sound which expresses an emotion.

Examples: oh, ouch, phew, damn!, ugh.

A *preposition* is a word placed before a noun or a pronoun which is used to indicate position, direction, time, or some other abstract relation.

Examples: by, from, to, with, at, in, on, for.

NOUNS and pronouns have the qualities of *gender, number, and case.*

There are three *genders*: masculine, feminine, and neuter. In English, nouns are feminine if they are the name of a female creature: "woman, girl, mare, ewe,

hen, doe, aviatrix, actress, sow, cow, bitch"; masculine if they are the name of a male creature: "man, boy, gander, stallion, actor, aviator, rooster, bull"; neuter if the noun is neither masculine nor feminine. Usually, we think of a neuter noun as an inanimate one: "window, blackboard, chalk, chair, table". However, in English, we sometimes personify a neuter noun and change its gender; for example, many people speak of their car (a neuter word) as a feminine creature. They will say of a new car: "She's a beauty. She gets 38 miles to the gallon," etc. Ships, too, are often referred to as females: "She was listing at a forty-five degree angle." In Latin, the gender of each noun must be memorized as each noun is learned, since its gender is not readily apparent in many instances.

In Latin, there are two *numbers*: singular and plural. Singular refers to one object, plural, to more than one. In English, for the most part, the plural is formed by adding *-s* to the singular form: "house, houses"; "dog, dogs"; "girl, girls". However, some words change their spelling altogether to indicate that they are plural: "mouse, mice"; "foot, feet"; "die, dice". These forms have to be learned; they cannot be guessed at.

English has three *cases*: subjective, possessive, and objective. The subjective case is used for the subject of a verb: "I, he, we". The objective case is used for the object (either of a verb or a preposition): "me, him, us". The possessive case is used to show possession: "Mary's, mine, his, ours". Latin has six cases and some words show a trace of a seventh case.

VERBS have the qualities of *person*, *number*, *tense*, *voice*, and *mood*.

By *person* is meant first, second, or third. The *first* person is "I" in the singular, "we" in the plural. The *second* person is "you". (Note that in Latin there is no special polite form for the pronoun "you"; the singular is used for one "you" and the plural is used for more than one "you".) The *third* person is "he, she, it" in the singular, "they" in the plural.

By *number* is meant singular and plural.

Tense indicates *time* and *aspect*; we speak of the present tense, past tense, and future tense. In addition, we speak of simple aspect, continuous (progressive) aspect, and completed aspect. In Latin there are six tenses.

Latin has two *voices*: active and passive. A verb in the *active* voice has a *subject* which is *doing* the action of the verb:

The pitcher *is throwing* the ball.

The dog *bit* the child.

Will the ball *break* the window?

A verb in the *passive* voice has a subject which is *not doing* the action of the verb, but which is *having the action* of the verb *done* to it:

The ball *is being thrown* by the pitcher.

The child *was bitten* by the dog.

Will the window *be broken* by the ball?

The *mood* of the verb expresses *how* the action of the verb is conceived. If the action is conceived of as a *command*, then the *imperative* mood will be used:

Get me a drink of water.

If the action is conceived of as a statement of *fact*, then the *indicative* mood will be used:

She *got* me a drink of water.

If the action is conceived of as an *idea* or a *possibility* (rather than an actual fact), then the *subjunctive* mood will be used:

If I *were* thirsty (but I'm not; therefore, it is not a fact), would you get me a drink of water?

In Latin there are three moods.

An ADJECTIVE may be used as a noun; when it is, it is called a *substantive*.

Examples:

Only *the brave* deserve *the fair*.

Blessed are *the meek*.

Fortune favors *the brave*.

In Latin when the substantive is *masculine*, it refers to *men*; when it is *feminine*, it refers to *women*; and when it is *neuter*, it refers to *things*.

Latin does not have an article; there is no word for "a, an", or "the". Latin uses far fewer words than English does: it can omit such words as "his, her, its", and the verb "to be" may be omitted frequently. There need not be a separate word to express the subject of a verb; the subject may simply be indicated in the verb itself. Thus, it is conceivable that the following is a complete Latin sentence:

Docent. They are teaching.

Latin is an inflected language. *Inflection* is the change made in the form of a word to show its grammatical relations. The inflection of a *noun*, *pronoun*, or *adjective* is called *declension*. The inflection of a *verb* is called *conjugation*. Inflection can be seen in English in the following ways:

boy	singular
boy's	singular possessive case
boys	plural
boys'	plural possessive case
I, he, she	subjective
me, him, her	objective

Note that, for nouns, -'s or -s' indicates possession.

In the conjugation of the verb “to be”

am
are
is

“am” is obviously first person singular and “is” is third person singular.

Inflection was more common in older English, where *-st* was the ending for the second person singular of the verb and *-th* was the ending for the third person singular present.

do say
dost sayest
doth saith

Nowadays, the only remnant of inflection in most verbs is the final *-s* of the third person singular in the present tense.

say want see
says wants sees

A SELECTED GLOSSARY

of Important Terms

This glossary is provided as a reference for some of the basic terminology which a student of Latin will encounter. Presented from the point of view of English, it will serve as a partial review of grammatical terms and as a foundation on which one's study of Latin may be built. It should be used in conjunction with the main text and the appendix.

A nominative *absolute* is a participial construction which is not in close grammatical connection with the main sentence. Example:

This being a legal holiday, ("This" is in the nominative (subjective) case, I refuse to work. as is the participle "being", which agrees with it.)

An *abstract noun* is the name of a quality or a general idea. Examples:

thoughtfulness, loyalty, freedom

Agreement is the correspondence in one or more categories between a noun and the adjective which describes it, a subject and its verb, or a pronoun and its antecedent. Examples:

much noise (noun and adjective both singular)

many noises (noun and adjective both plural)

he knows (subject and verb both singular)

The book which he lost is mine. (antecedent and pronoun both neuter)

Antecedent. The word for which the pronoun stands. Example:

The *man* whom you know is good.

Apodosis. The conclusion in a conditional sentence (cf. *Protasis*). Example:

If it should rain, *I'll take an umbrella.*

Apposition. A word placed next to another one which means or indicates the same thing. Example:

John, *the farmer*, is a good man.

The appositive must be in the same case as the word to which it refers.

Aspect. The category of the verb which indicates whether the action is simple, continuous (progressive), or completed. Examples from the point of view of present time:

he walks (simple)

he is walking (continuous or progressive)

he has walked (completed)

Attributive. An attributive adjective is one which describes or modifies a noun (as opposed to a substantive adjective). An adjective is said to be in attributive position if, in English, it precedes the noun it modifies ("the *brave* man"). This is in contrast with the predicate adjective which, in English, comes after the linking verb ("he seems *brave*").

Clause. A group of words which contains a subject and a verb but is in itself not a complete sentence, but a part of a complex or compound sentence.

A *causal* clause is introduced by "since" or "because".

A *circumstantial* clause is introduced by "when" or "after" and stresses the circumstances in which the action occurs.

A *concessive* clause is introduced by "although, though, granted that".

A *temporal* clause indicates the time at which the action occurs and is introduced by "when, after, before, as, while".

A *collective noun* is a word in the singular which names a group of people. Examples:

group, crowd, populace, senate

The *comparative* degree of the adjective indicates an increased amount of the quality of the positive form of the adjective. In English, the comparative degree is shown by adding *-er* to the simple form of the adjective or by adding "more", "rather", or "too" to the positive degree. Examples:

fatter, more beautiful, rather pretty, too big

A *complementary infinitive* is used to complete the meanings of certain verbs such as "be able, try, ought". Example:

He ought *to go*.

A *complex* sentence is a sentence which contains at least one dependent and one independent clause. Example:

While we were away, our house was robbed.

A *compound* sentence is a sentence which contains two or more independent clauses. Example:

My sister went to the beach and I stayed home.

A *conditional* sentence is a sentence which contains two clauses: a protasis and an apodosis. Example:

If it should rain, I'll take an umbrella.

A *contradictory* (contrary-to-fact) condition is a condition which is not true. Example:

If I were an elephant, I would have a trunk (but I'm not an elephant; therefore, I don't have a trunk).

A *coordinating conjunction* is a conjunction used to join two elements of a sentence without subordinating one to the other. Examples:

and, but, or

Correlatives are words regularly used together which balance each other. Examples:

both...and; either...or; the more...the....

A *demonstrative* is a word which points out something. Examples:

this, that, these, those

A *denominative verb* is a verb made from a noun. Examples:

broadcast, flag (i.e., flag down a train).

A *dependent clause* is a clause which does not make a complete statement by itself. Example:

because we are busy

Diminutives are nouns which indicate a small size, endearment, or contempt. Examples:

duckling, pussykin, pup

The most common diminutive endings in English are: -et (-ette), -y, -ie, -ey. Examples:

piglet, statuette, Bobby, bookie, lovey

Ellipsis is the omission of a word or words which are necessary for grammatical completeness. Example:

The man we saw was drunk. *instead of* The man whom we saw was drunk.

An *enclitic* is a word which in pronunciation is so closely connected to the preceding word that it loses its own accent. Examples:

give me (often pronounced "gimme"), want to (often pronounced "wanna"), should have (often pronounced "shoulda").

An *epexegetical* infinitive is an infinitive which depends on and limits an adjective. Example:

difficult to imagine

An *expletive* is a word which serves no grammatical function, but which fills up a sentence or gives emphasis. Example:

There are five people here.

A *finite* verb is a verb which is limited by person, number, tense, voice, and mood. Examples:

was, am, eats

The *frequentative* (iterative) aspect of a verb expresses repeated action. Example:

He keeps walking.

A *gerund* is a verbal noun. Example:

Swimming is good exercise.

Hypotaxis (subordination) is the subordination of one clause to another.

An *idiom* is an expression which is peculiar to a language. Example:

to be on the up and up

Idiom also refers to the characteristic modes of expression of a given language.

An *impersonal* verb is a verb which lacks a personal subject and is found only in the third person singular. Example:

It is raining.

The *inchoative* (inceptive) aspect of a verb expresses the beginning of an action.

Example:

He is beginning to crawl.

An *indefinite* pronoun refers to a not specific person or thing. Examples:

someone, somebody, anyone, anybody

An *independent* clause is a main clause, one that is not subordinate.

An *indirect object* is found with verbs of giving, telling, and showing. Someone gives or tells or shows something *to somebody*; the "somebody" is the indirect object. Example:

John gave Mary the book.

Indirect discourse is of three types:

An *indirect statement*, regularly introduced by the subordinating conjunction *that*, expresses what someone says, thinks, feels, or believes without using a direct quotation. Example:

“I do not feel good.” (direct statement)
He says *that he does not feel good.* (indirect statement)

An *indirect question*, introduced by an interrogative word, expresses what someone asks, considers, wonders, or states without using a direct quotation. Example:

“Why did you do that?” (direct question)
I wonder *why you did that.* (indirect question)

An *indirect command* expresses what someone commands, urges, warns, or begs without using a direct quotation. Example:

“Don’t go.” (direct command)
I urge you *not to go.* (indirect command)

The *infinitive* is the form of the verb which is not limited by person or number. Example:

to see, to have done

Inflection is the change made in the form of a word to show its grammatical relationship to the other words around it.

The *intensive adjective* is used to emphasize the word it describes. Example:

He is the *very* man I meant.

An *interrogative* asks a question. An interrogative sentence is a sentence which asks a question. The interrogative pronoun in English is “who” or “what”; the interrogative adjective is “what, which”.

An *intransitive verb* is a verb which does not take a direct object. Examples:

fall, go, die

A *macron* is a mark (‐) placed above a long vowel to mark its quantity.

Morphology is the study of the basic formations of words.

The *object* receives the action of the verb. Example:

The child broke the *pitcher.*

A *paradigm* is a model or pattern which contains all the inflectional variations of a given word. Examples:

man, man's, men, men's; he, his, him, they, their (theirs), them

Parataxis (coordination) is the absence of subordination and the arrangement of several clauses side by side. Example:

We left; she stayed.

A *participle* is a verbal adjective. Example:

The screaming woman caught our attention.

Periphrasis (circumlocution) is a roundabout expression of a simple idea. Example:

Illumination is required to be extinguished *is a periphrasis for* Lights must be put out.

Phonology is the study of the sounds of a language.

A *phrase* is a group of words without a subject or verb. It may be used as an adjective or an adverb. Examples:

on time, without money, by whom

A *possessive* pronoun or adjective shows ownership. Example:

mine, yours, my, your, his

The *predicate*, in English, is the verb and the part of the sentence that comes after the verb. A *predicate nominative* is a noun or pronoun which follows a linking verb (such as the verbs “to be, seem, appear”) and which is the same as the subject. Example:

Tom is a *farmer*.

The same case follows the linking verb as precedes it; the linking verb can *not* take an object. Thus, in the example given above, both “Tom” and “farmer” are in the nominative case. A *predicate adjective* is an adjective which follows a linking verb. Example:

Tom is *tall*.

Once again, “tall” is in the nominative case; the verb “to be” can *not* take an object.

Protasis is the clause containing the condition in a conditional sentence (cf. *Apodosis*). Example:

If it should rain, I'll take an umbrella.

Proviso. A clause of proviso expresses a conditional or a provisional idea.
Example:

They will come, *provided that we invite them.*

A *reflexive* pronoun refers to the subject of the main verb. Example:

He cut *himself.*

A *relative* pronoun, “who, which, that”, introduces an adjectival clause which modifies the antecedent of that pronoun. Example:

The man *whom* we saw was very tall.

The relative pronoun has the same gender as its antecedent, but it takes its case from its use in its own clause.

The *root* of a word is the basic element that gives the meaning of the word.
Examples:

export, reporter, transportation

A *sentence* is a group of words with a subject and a verb; it expresses a complete thought, feeling, question, or command.

The *stem* is that part of a word to which endings are added. Example:

annihilated, annihilation

The *subject* performs the action of the verb. Example:

The *pitcher* threw the ball.

A *subordinate* clause is a dependent clause.

A *subordinating conjunction* is a conjunction used to join two elements of a sentence in a way in which one will be subordinate to or dependent upon the other. Examples:

since, when, although, that

A *substantive* is an adjective or any other word or clause used as a noun.
Example:

Blessed are *the meek.*

What you have done is troublesome to me.

It is also any noun.

The *superlative* degree of an adjective indicates the greatest amount of the quality of the positive form of that adjective. In English, the superlative degree is shown by adding *-est* to the simple form of the adjective, or by adding “most, very” or “extremely” to the positive degree. Examples:

youngest, most expensive, very tall, extremely handsome

A GLOSSARY OF IMPORTANT TERMS

19

A *synopsis* is a summary outline of a given verb that shows at a glance the major inflectional variations of that verb.

Syntax is the portion of grammar which deals with the relationship of words to each other in the sentence.

A *transitive verb* is a verb which may take an object. Examples:

see, eat, hit

UNIT ONE

A. The Verbal System

The inflection of verbs is called *conjugation*, and one is said to *conjugate* a verb. Finite verb forms have the qualities of person, number, tense, voice, and mood.

1. PERSON: The Latin verb form, without the aid of pronouns, indicates whether the subject is in the *first* ("I, we"), *second* ("you"), or *third* ("he, she, it, they") persons.
2. NUMBER: The inflection of a verb shows whether the subject is *singular* or *plural*.
3. TENSE: The tense of a verb tells us *when* the action occurs, has occurred, or will occur. The simplest categories of tense (time) are *present*, *past*, and *future*, but since there is the additional concern as to the completeness or the continuation of the stated act, some refinements of the present, past, and future divisions are required.
4. VOICE: There are two grammatical voices in Latin: the *active* indicates that the subject is the doer of the act; the *passive* shows the subject as the recipient of the verbal action.
5. MOOD: There are three moods or tones of verbal action. By mood we refer to the manner in which the speaker conceives of the action. The *indicative* mood is the mood of *fact* and is used for making direct statements and asking direct questions. The *subjunctive* is the mood used to express *idea*, *intent*, *desire*, *uncertainty*, *potentiality*, or *anticipation*. The *imperative* mood expresses the action as a *command*.

B. The Tenses of the Indicative

There are six tenses in the indicative mood.

1. PRESENT: The present tense indicates an action which is going on now or is habitual.

optat he desires, he is desiring, he (always) desires, he does desire

NOTE: The Latin form makes no distinction between the simple present tense and the present progressive.

2. **IMPERFECT:** (**imperfectum** = ‘not completed’): The imperfect describes an action which was going on or was habitual in the past. The imperfect is in some respects a motion picture of past action.

optābat he desired (continually, habitually), he was desiring, he used to desire, he kept on desiring

3. **FUTURE:** The future refers to an action which will occur at some later time.

optābit he will desire, he will be desiring

NOTE: Again, the Latin form makes no distinction between the simple future and the future progressive.

4. **PERFECT** (**perfectum** = ‘completed’): The perfect tense describes one of two types of action:

- a. one which took place at some point in the past.

optāvit he desired

NOTE: This aspect of the perfect is most nearly equivalent to the English past tense. It is a snapshot of past action.

- b. one which is completed from the point of view of the present.

optāvit he has desired

NOTE: This aspect is most nearly equivalent to the English present perfect.

5. **PLUPERFECT [PAST PERFECT]** (**plūs quam perfectum** = ‘more than completed’): This tense describes an action which was already completed at some time in the past.

optāverat he had desired

6. **FUTURE PERFECT:** The future perfect indicates an action which will be completed before some point of time in the future.

optāverit he will have desired (i.e., by next week)

The six Latin tenses in the indicative, then, express not only matters of *time* but also those of *aspect*. The following chart will illustrate the uses of the tenses in these terms.

TENSES

	Present	Past	Future	
ASPECTS	Simple	optat he desires (Present)	optāvit he desired (Perfect)	optābit he will desire (Future)
	Continuous (Progressive)	optat he is desiring (Present)	optābat he was desiring (Imperfect)	optābit he will be desiring (Future)
	Completed	optāvit he has desired (Perfect)	optāverat he had desired (Pluperfect)	optāverit he will have desired (Future Perfect)

The tenses in the second vertical column, that is, all those which refer to past time, are called *secondary* tenses. Those in the first and third columns, which refer to present and future time, are called *primary* tenses.

PRIMARY TENSES OF INDICATIVE

Present

Future

Future Perfect

Perfect (when equivalent to
English present perfect)

SECONDARY TENSES OF INDICATIVE

Imperfect

Perfect (when equivalent to English
past tense)

Pluperfect

Both lists above will prove very valuable to you as you progress with your study of Latin. Refer to them frequently.

C. The Infinitive

The verb forms discussed above are *finite* forms. The Latin word **finis** means 'boundary' or 'limit', and so finite forms are those which are bounded or limited by person, number, tense, voice, and mood. The infinitive is *not* limited as to person, number, and mood, but it does show tense and voice.

	ACTIVE	PASSIVE
Present	optāre to desire	optāri to be desired
Perfect	optāvisse to have desired	optātus esse to have been desired
Future	optātūrus esse to be going to desire	optātum iri to be going to be desired (this form is rare in classical Latin)

The infinitive is in fact an abstract verbal noun. **Optare** can thus be translated not only as 'to desire' but as 'desiring' and so expresses a verbal activity.

D. The Four Conjugations

With the exception of the verb “to be”, every verb in Latin belongs to one of four classes or *conjugations*: the first, second, third, or fourth. These conjugations are distinguished from one another by the form of the present infinitive.

Verbs of the first conjugation have a present infinitive in **-āre**.

optāre to desire

Verbs of the second conjugation have a present infinitive in **-ēre**.

implēre to fill

Verbs of the third conjugation have a present infinitive in **-ere**.

incipere to begin

Verbs of the fourth conjugation have a present infinitive in **-ire**.

sentire to feel, perceive

E. The Principal Parts

Most verbs in Latin have four principal parts. For example, the vocabulary entry for the verb **optō**, ‘to desire’, appears thus:

optō, -āre, -āvi, -ātus

The forms, written in full, are

optō, optāre, optāvi, optātus

and are explained as follows.

optō	first person singular, present active indicative	I desire
optāre	present active infinitive	to desire
optāvi	first person singular, perfect active indicative	I desired, I have desired
optātus	perfect passive participle	having been desired, de- sired

It is essential that the four principal parts for each verb be learned as part of the vocabulary, for without these parts it will not be possible to conjugate the verb fully. This fact will become obvious shortly.

F. The Present Active Indicative System of the First Two Conjugations

1. A Latin verb usually consists of a stem, a tense sign, and an ending.
2. The stem for the present, imperfect, and future tenses is called the *present stem* and is derived from the second principal part of the verb, i.e., from the present infinitive: the *-re* ending is dropped. This is true for all four conjugations.

STEM

<i>optō, -āre</i>	<i>optā/re</i>
<i>impleō, -ēre</i>	<i>implē/re</i>
<i>incipiō, -ere</i>	<i>incipe/re</i>
<i>sentiō, -ire</i>	<i>senti/re</i>

3. The present tense has no tense sign. However, the tense sign of the imperfect for all conjugations is **-bā-**, and that of the future for the first and second conjugations is **-bi-**. These tense signs are added to the stem.

optō, optāre:

optā- (present), *optābā-* (imperfect), *optābi-* (future)

impleō, implēre:

implē- (present), *implēbā-* (imperfect), *implēbi-* (future)

4. Finally, the personal endings are added, indicating the person (first, second, or third) and number (singular or plural) of the verb. The endings for the active voice are as follows:

FIRST CONJUGATION:

SINGULAR

	Present	Imperfect	Future
1 -ō or -m	<i>optō</i>	<i>optābam*</i>	<i>optābō</i>
2 -s	<i>optās</i>	<i>optābās</i>	<i>optābis</i>
3 -t	<i>optat*</i>	<i>optābat</i>	<i>optābit</i>

PLURAL

1 -mus	<i>optāmus</i>	<i>optābāmus</i>	<i>optābimus</i>
2 -tis	<i>optātis</i>	<i>optābātis</i>	<i>optābitis</i>
3 -nt	<i>optant*</i>	<i>optābant</i>	<i>optābunt</i>

* Note that a long vowel is shortened before final **-m**, **-t**, or **-nt**.

SECOND CONJUGATION:

SINGULAR

	Present	Imperfect	Future
1 -ō or -m	<i>impleō</i>	<i>implēbam</i>	<i>implēbō</i>
2 -s	<i>implēs</i>	<i>implēbās</i>	<i>implēbis</i>
3 -t	<i>implet</i>	<i>implēbat</i>	<i>implēbit</i>

PLURAL

1 -mus	<i>implēmus</i>	<i>implēbāmus</i>	<i>implēbimus</i>
2 -tis	<i>implētis</i>	<i>implēbātis</i>	<i>implēbitis</i>
3 -nt	<i>implent</i>	<i>implēbant</i>	<i>implēbunt</i>

The only irregularities which are obvious above are really not problematic. In the first person singular of the first conjugation, the **-ā-** of the stem is absorbed into the **-ō** personal ending. This is true of all verbs of the first conjugation, but there is no trouble with this since the first person singular form is learned as a vocabulary item. Note that the **-ō** and **-m** endings for the first person singular are *not* interchangeable. The paradigms will illustrate which ending is to be used for each tense. (The future of the first and second conjugations and the present indicative of all conjugations use the **-ō** endings in the first person singular. All other tenses in the present system use the **-m** ending.)

In the future of the first two conjugations, the **-i-** of the tense sign is absorbed into the **-ō** personal ending and changes to **-u-** in the third person plural.

Therefore, in order to interpret a Latin verb form in the present system, one reads backwards:

optābant -nt = 'they'

-ba- = imperfect tense

optā- = 'desire'

THEREFORE: 'they used to desire' (third person plural imperfect active indicative)

clāmābīs -s = 'you' (sing.)

-bi- = future tense

clāmā- —'shout'

THEREFORE: 'you will shout' (second person singular future active indicative)

terrēmus -mus = 'we'

— = present tense (no tense sign)

terrē- = 'frighten'

THEREFORE: 'we frighten' (first person plural present active indicative)

G. The Irregular Verb *sum*, 'be'

As in all Indo-European languages, the verb "to be" is somewhat irregular and must be learned thoroughly. The present, imperfect, and future tenses of this verb are given below. Despite the irregularities, note that the personal endings are those which one would normally expect.

sum, esse, fui, futūrus, 'be'

PRESENT	IMPERFECT		FUTURE	
SING. PL.	SING.	PL.	SING.	PL.
sum sumus	eram erāmus		erō erimus	
es estis	erās erātis		eris eritis	
est sunt	erat erant		erit erunt	

H. The Noun System

The inflection of nouns, pronouns, and adjectives is called *declension*, and such words are said to be *declined*.

Every Latin noun belongs to one of three grammatical *genders*: *masculine*, *feminine*, or *neuter*. The gender of each noun must be learned as a vocabulary item, for it is important in the matter of noun and adjective agreement.

The inflection, or declension, of nouns shows the qualities of *number* and *case*. The case endings indicate the grammatical and syntactical relationship of the given noun to the other words in the sentence. Whereas English relies largely on word order to illustrate such relationships, Latin relies on its inflections. In addition, where the English uses a prepositional phrase, the Latin frequently needs only the one inflected word. See examples under GENITIVE and DATIVE below.

There is no definite or indefinite article in Latin. The articles “the, a, an” are frequently supplied in an English translation.

There are five cases which will be of concern to us at the present. These are: Nominative, Genitive, Dative, Accusative, Ablative. The basic uses of each case are described below.

1. **NOMINATIVE:** This is the case of the subject and the predicate nominative.

Fēmina optat. *The woman* desires.

Fēmina est rēgina. *The woman* is a queen.

2. **GENITIVE:** In general, the genitive case is used for a noun which is dependent upon another noun and is often introduced by the preposition “of” in English (except where “of” means ‘concerning’).

patria fēminae the native land *of the woman*, *the woman's* native land

timor aquae fear *of water*

urna pecūniae a jar *of money*

3. **DATIVE:** This case generally expresses the person (or thing), with the exception of the subject and object, *with reference to* whom (or what) the action or idea of the main verb is relevant. It is usually rendered in English by the prepositions “to” or “for”, and one of its uses includes the indirect object.

Taedam fēminae dat. He gives the torch *to the woman*. (*Fēminae* is the *referent* of the action; that is, the action of the verb occurs *with reference to her*.)

Taedam fēminae optat. He chooses a torch *for the woman*.

4. ACCUSATIVE: Essentially, the accusative case is used as the direct object of a verb or as the object of certain prepositions.

Fēminam videt.

He sees *the woman*.

Fēmina in aquā ambulābit. The woman will walk into *the water*.

5. ABLATIVE: The ablative generally expresses notions connected with the English prepositions “from, with, in”, and “by”. Sometimes prepositions are required to express these notions; other times the case ending alone serves this purpose. Distinctions will be pointed out in later Units.

Cum fēminā ambulat.

He walks with *the woman*.

Fēmina est in aquā.

The woman is in *the water*.

Nauta fēminam taedā terret.

The sailor frightens the woman *with a torch*.

I. The First Declension

There are five basic groups of nouns in Latin. Each of these is called a *declension*. These declensions are distinguished from one another by the ending of the genitive singular: for the first declension, this is -ae, for the second, -i, for the third, -is, for the fourth, -ūs, and for the fifth, -ei. At present we shall be concerned only with the first of these groups, the first declension.

Noun entries in the vocabulary lists are given in three parts:

fēmina, -ae, F.

The first of these parts is the nominative singular form; the second indicates the ending of the genitive singular; the third reveals the gender of the noun (*M.* for masculine, *F.* for feminine, *N.* for neuter). Most nouns of the first declension are feminine, but there are a few which are masculine.

A noun form consists of a stem and a case ending. In order to arrive at the stem of any noun in Latin, take the full genitive singular form and drop the ending.

fēmin / ae

(stem) (ending)

For the first declension, it may seem pointless to go to the genitive form to arrive at the stem when the same results might be obtained by using the nominative form. But for many nouns the genitive form is significantly different from the nominative, so that the stem for all nouns can only be found by this procedure.

To this stem the endings of the particular declension are added. The endings for the first declension are:

SINGULAR

Nominative	-a	fēmina	(the, a) woman (subject)
Genitive	-ae	fēminae	of (the, a) woman, (the, a) woman's
Dative	-ae	fēminae	to/for (the, a) woman
Accusative	-am	fēminam	(the, a) woman (object)
Ablative	-ā	fēminā	from/with/in/by (the, a) woman

PLURAL

Nominative	-ae	fēminae	(the) women (subject)
Genitive	-ārum	fēminārum	of (the) women, (the) women's
Dative	-is	fēminis	to/for (the) women
Accusative	-ās	fēminās	(the) women (object)
Ablative	-is	fēminis	from/with/in/by (the) women

UNIT ONE — VOCABULARY

ambulō (1)*	walk
aqua , -ae, F.	water
clāmō (1)	shout
corōna , -ae, F.	crown, wreath
corōnō (1)	crown
cum (prep. + abl.)	with
cūra , -ae, F.	care, concern, anxiety
dē (prep. + abl.)	concerning, about; (down) from
dō , dare, dedī, datus	give, grant
dōnō (1)	give, present, reward
ē , ex (prep. + abl.)	out of, from
enim (postpositive conj.)	indeed, of course; for
et (conj.)	and
et . . . et	both . . . and
(adv.)	even
fāma , -ae, F.	talk, report, rumor, fame, reputation
fēmina , -ae, F.	woman
fōrma , -ae, F.	form, shape, figure, beauty
habeō , -ēre, habui , habitus	have, hold, possess, consider
impleō , -ēre, implēvī , implētus	fill, fill up
in (prep. + acc.)	into, onto (motion toward)
(prop. + abl.)	in, on (place where)
insula , -ae, F.	island
nauta , -ae, M.	sailor

-ne (enclitic)	(added to the first word of an interrogative sentence or clause; it indicates a question) ²
nōn (adv.)	not
optō (1)	desire, wish (for); choose
patria, -ae, F.	native land, country
pecūnia, -ae, F.	money
poena, -ae, F.	penalty, punishment
poenās dare	to pay a penalty
poēta, -ae, M.	poet
porta, -ae, F.	gate
-que (enclitic)	and ³
rēgina, -ae, F.	queen
sed (conj.)	but
sum, esse, fui, futūrus	be, exist
taeda, -ae, F.	torch
terreō, -ēre, terrui, territus	frighten, alarm, terrify
timeō, -ēre, timui, --	fear, be afraid (of)
turba, -ae, F.	crowd, uproar
via, -ae, F.	way, road, path, street
videō, -ēre, vidi, vīsus	see

* The entry (1) after a verb indicates that the verb belongs to the first conjugation and has the regular principal parts in **-āre**, **-āvi**, **-ātus**.

¹ ē before a word beginning with a consonant; ex before a vowel or h and sometimes before a consonant.

² e.g., Timetne? Is he afraid?

Fēmināsne vidēs? Do you see the women?

³ e.g., poēta rēginaque = poēta et rēgina

UNIT ONE — NOTES ON VOCABULARY

Many verbs in Latin derive from nouns. For example, **corōnō**, **corōnāre**, **corōnāvī**, **corōnātus**, ‘crown’, comes from **corōna**, **corōnae**, F., ‘crown’. Such verbs are called denominatives.

The preposition **cum**, ‘with’, always takes the ablative case: **cum cūrā**, ‘with care’, **cum fēminā**, ‘with a woman’.

Note that **dē** has both the meaning ‘concerning’ and ‘down from’. It always takes the ablative case.

Although most first conjugation verbs follow the pattern **-āre**, **-āvi**, **-ātus**, the verb **dō**, **dare**, ‘give’, does not. The **-a-** in the infinitive is short and the other principal parts are **dēdi**, **datus**. When an infinitive is used with this verb, it is best to use the meaning ‘grant, allow’ for **dō**. For example:

Rēgina fēminās vidēre corōnam dat. The queen grants (allows) the women to see (her) crown.

The first conjugation verb **dōnō**, ‘give, present, reward’, may govern an accusative and a dative *or* an accusative and ablative. In other words, with **dōnō**, one may present something to someone or present someone with something:

Aquam nautis dōnābimus. We shall give water to the sailors.

Nautās aquā dōnābimus. We shall present the sailors with water.

Enim, ‘indeed, of course’, is a postpositive conjunction. This means that it cannot be the first word of a clause. Usually, a word that is postpositive is placed as the second word of a clause. **Enim** generally introduces a statement which corroborates what precedes.

Et means ‘and’. In a series, the first **et** means ‘both’. For example:

Et fēminaē et nautae in viā ambulant. Both the women and the sailors are walking in the street.

As an adverb, **et** means ‘even’:

Et rēgina poenās dabat. Even the queen was paying the penalty.

One cannot know for sure exactly what the principal parts of a verb in the second conjugation will be:

habeō, habērē, habui, habitus	have
impleō, implērē, implēvi, implētūs	fill
videō, vidērē, vidi, visus	see

Thus, each verb must be learned thoroughly; one cannot simply guess at the principal parts.

The preposition **in** may take either the accusative or the ablative case, with a difference in meaning. The accusative case is used to express movement toward; thus **in** with the accusative means ‘into’ or ‘onto’: **in turbam**, ‘into the crowd’. Sometimes this movement can be in a hostile sense, as ‘The man led his troops against the sailors’ (**in nautās**). The ablative case, on the other hand, is not associated with movement, but with location. Thus **in** with the ablative means ‘in’ or ‘on’: **in turbā**, ‘in the crowd’.

A vowel before **-ns-** is long; thus, **īnsula**, **īnsulae**, F., ‘island’.

Literally, the idiom **poenās dare** means ‘to give punishments’, but the actual meaning is the opposite, ‘to pay a penalty’. Of course, the verb is conjugated:

Poenās dabit. He will pay the penalty.

Although most nouns of the first declension are feminine, **poēta**, **poētae**, ‘poet’, and **nauta**, **nautae**, ‘sailor’, are masculine. These words are declined in the same way as the feminine nouns of the first declension.

An enclitic is attached to the end of a word and is pronounced with it. In English we translate **-que**, ‘and’, *before* the word to which it is attached:

poētae nautaeque	the poets and sailors
Fēminās vidēbunt rēgīnamque corōnābunt.	They will see the women and crown the queen.

The verb “to be” is irregular in most languages; Latin is no exception. Note that **est** may be translated ‘there is’ as well as ‘he, she, it is’. Thus, **erat**, ‘there was’; **erit**, ‘there will be’. Since the verb “to be” cannot logically have a passive voice, it does not have a perfect passive participle (which, for most verbs, is given as the fourth principal part). In its place, the future active participle has been provided. Translate **futūrus** as ‘going to be’. Of course the verb “to be” cannot take an object. When this verb is used as a “linking” verb, one finds the same case preceding and following it.

Nauta est poēta. The sailor is a poet.

Timeō, **timēre**, **timūi**, --, ‘fear’, lacks a fourth principal part. In order not to confuse the meanings of **terreō**, **terrēre**, **terrui**, **territus**, ‘frighten’, and **timeō**, remember that **terreō** means ‘terrify’ and that a timid person is one who is afraid.

Caesar’s famous expression, **Vēni**, **vīdī**, **vīcī**, ‘I came, I saw, I conquered’, is a very handy way of remembering the third principal parts of these verbs (**veniō**, ‘come’, Unit Two; **videō**, **vidēre**, **vīdī**, **vīsus**, ‘see’; and **vincō**, ‘conquer’, Unit Fourteen).

Note that the **-ī** in the perfect tenses of **videō** is long (**vīdī**). Very often in Latin the short vowel in the present stem lengthens in the perfect.

UNIT TWO

A. The Perfect Active Indicative System of All Verbs

1. All verbs in Latin, regardless of the conjugation to which they belong, are formed identically in the perfect, pluperfect, and future perfect tenses respectively. As in the present system, the verb form in these tenses usually consists of a stem, a tense sign, and an ending.
2. The perfect stem is derived by dropping the *-i* from the third principal part of the verb.

		STEM
optō, -āre, -āvi, -ātus	desire	
optāvī		optāv/i
imleo, -ēre, -ēvi, -ētus	fill	
implēvī		implēv/i
incipiō, -ere, -cēpi, -ceptus	begin	
incēpi		incēp/i
sentiō, -ire, sēnsi, sēnsus	feel, perceive	
sēnsi		sēns/i

This process also applies to the few irregular verbs in Latin; irregularities do not appear in the perfect system.

3. There is a special set of personal endings which is used *only* for the perfect tense. These endings are:

	SINGULAR	PLURAL
1	-i	-imus
2	-istī	-istis
3	-it	-ērunt

The *perfect* tense is formed by adding these endings to the perfect stem. Note that there is no tense sign for the perfect.

4. The *pluperfect* tense is formed by adding the tense sign *-erā-* to the perfect stem and then adding the personal endings *-m*, *-s*, *-t*, *-mus*, *-tis*, *-nt*. It is perhaps easier, however, to regard the formation of the pluperfect indicative as the perfect stem plus the forms of the imperfect indicative of the verb *sum*.

5. The *future perfect* tense is formed by adding the tense sign -eri- to the perfect stem and then the personal endings -ō*, -s, -t, -mus, -tis, -nt. As in the pluperfect, it is easier to regard this formation as the perfect stem plus the forms of the future indicative of the verb **sum** (with -erint in the third person plural instead of -erunt). Thus:

SINGULAR		PLURAL	
Perf.	Pluperf.	Fut. Perf.	Perf.
1 optāvi	optāveram	optāverō	optāvimus
2 optāvisti	optāverās	optāveris	optāvistis
3 optāvit	optāverat	optāverit	optāvērunt

			Fut. Perf.
1	optābō	optāverō	optāverimus
2			optāverātis
3			optāverint

* As with the future tense, the -i- in the first person singular is assimilated into the -ō. Thus, **optābō**, **optāverō**.

B. The Subjunctive Mood

The indicative mood is used to make statements of fact or to ask direct questions. The subjunctive mood is connected with notions involving idea, intent, desire, uncertainty, potentiality, anticipation, or the like. There are many uses of the subjunctive which will be encountered as this course progresses. In this unit we shall be concerned with only one of these uses.

C. Formation of the Subjunctive

While the indicative mood in Latin has six tenses, the subjunctive has only four: present, imperfect, perfect, and pluperfect. A subjunctive verb has no one equivalent in English and can only be translated according to the construction in which it occurs. By the same token, the translations of the tenses in the subjunctive do not necessarily correspond with those in the indicative.

1. PRESENT ACTIVE SUBJUNCTIVE OF THE FIRST CONJUGATION

The conjugation of the present subjunctive is very similar to that of the present indicative. Begin with the present stem, change the -ā- to -ē-, and add the personal endings -m, -s, -t, -mus, -tis, -nt.

optā- (stem)

optē- (mutated stem for present subjunctive)

optem

optēmus

optēs

optētis

optet

optent

2. IMPERFECT ACTIVE SUBJUNCTIVE OF ALL CONJUGATIONS

The imperfect subjunctive is easily formed for *all* verbs (including irregular verbs) by taking the full present active infinitive, lengthening the final -e, and

adding the personal endings **-m**, **-s**, **-t**, **-mus**, **-tis**, **-nt**. (Note that, as always, a long vowel is shortened before final **-m**, **-t**, or **-nt**.)

optāre/m	implēre/m	incipere/m	sentire/m
optārē/s	implērē/s	inciperē/s	sentirē/s
optāre/t	implēre/t	incipere/t	sentire/t
optārē/mus	implērē/mus	inciperē/mus	sentirē/mus
optārē/tis	implērē/tis	inciperē/tis	sentirē/tis
optāre/nt	implēre/nt	incipere/nt	sentire/nt

3. PERFECT ACTIVE SUBJUNCTIVE OF ALL CONJUGATIONS

To the perfect stem, add **-eri-** and then the personal endings **-m**, **-s**, **-t**, **-mus**, **-tis**, **-nt**.

optāv/eri/m	implēv/eri/m	incēp/eri/m	sēns/eri/m
optāv/eri/s	implēv/eri/s	incēp/eri/s	sēns/eri/s
optāv/eri/t	implēv/eri/t	incēp/eri/t	sēns/eri/t
optāv/eri/mus	implēv/eri/mus	incēp/eri/mus	sēns/eri/mus
optāv/eri/tis	implēv/eri/tis	incēp/eri/tis	sēns/eri/tis
optāv/eri/nt	implēv/eri/nt	incēp/eri/nt	sēns/eri/nt

4. PLUPERFECT ACTIVE SUBJUNCTIVE OF ALL CONJUGATIONS

To the perfect stem, add the tense sign **-issē-** and then the personal endings **-m**, **-s**, **-t**, **-mus**, **-tis**, **-nt**.

optāv/isse/m	implēv/isse/m	incēp/isse/m	sēns/isse/m
optāv/issē/s	implēv/issē/s	incēp/issē/s	sēns/issē/s
optāv/isse/t	implēv/isse/t	incēp/isse/t	sēns/isse/t
optāv/issē/mus	implēv/issē/mus	incēp/issē/mus	sēns/issē/mus
optāv/issē/tis	implēv/issē/tis	incēp/issē/tis	sēns/issē/tis
optāv/isse/nt	implēv/isse/nt	incēp/isse/nt	sēns/isse/nt

D. Present Subjunctive of the Verb *sum*

While the endings are what we should expect, the stem is irregular:

sim	simus
sis	sitis
sit	sint

The imperfect, perfect, and pluperfect subjunctives of this verb are formed according to the rules given under C above. The principal parts of the verb, it must be remembered, are **sum**, **esse**, **fui**, **futūrus**.

E. Conditional Sentences

The sentence “If he works, he is happy” is a conditional sentence. It is composed of two clauses, the *if* clause (sometimes called the *protasis*) and the *concluding* clause (called the *apodosis*). The protasis is introduced in Latin by *sī*, ‘if’, or *nisi*, ‘unless, if not’.

Conditional sentences may be broken up into three basic categories and are formed in Latin according to a specific formula for each category.

1. SIMPLE (GENERAL) CONDITIONS

If (i.e., whenever) he works, he desires money.

Such conditions may also be expressed in past time:

If (i.e., whenever) he worked, he desired money.

FORMULA: Indicative in both clauses.

Sī labōrat, pecūniā optat.

Sī labōrābat, pecūniā optābat.

Sī labōrāvit, pecūniā optāvit.

2. FUTURE CONDITIONS

a. MORE VIVID

If he works, he will desire money.

This type of condition is expressed in English by the present indicative in the *if* clause and the future in the concluding clause.

FORMULA: Future indicative in both clauses.

Sī labōrābit, pecūniā optābit.

NOTE: Occasionally, when the speaker wishes the implications of the condition to be exceptionally emphatic, the future perfect indicative is used in the protasis instead of the simple future.

Sī labōrāverit, pecūniā optābit. *If he works (will have worked), he will desire money.*

In such cases it is emphasized that the action in the protasis *must* be completed in order for the action in the apodosis to occur. Frequently, in English, it is difficult to illustrate the difference between the future and the future perfect in such clauses, except by giving special intonation to the voice, or, in printing, by using italics.

b. LESS VIVID

If he should work, he would desire money.

These conditions, while they refer to future time, conceive of the future act less vividly, or less certainly, than future more vivid conditions.

FORMULA: Present subjunctive in both clauses. (In English, *should* ... *would*)

Sī labōret, pecūniam optet.

NOTE: Occasionally the perfect subjunctive is used instead of the present, but this is rare, and so its discussion has been omitted from these materials.

3. CONTRARY-TO-FACT CONDITIONS

a. PRESENT CONTRARY-TO-FACT

Contrary-to-fact conditions state something which is untrue and hypothesized.

If he were (now) working (but he is not), he would be desiring money (he would desire money).

FORMULA: Imperfect subjunctive in both clauses. (In English, *were —ing*, ...*would be...-ing / would ...*)

Sī labōrāret, pecūniam optāret.

b. PAST CONTRARY-TO-FACT

If he had (in the past) worked (but he did not), he would have desired money.

FORMULA: Pluperfect subjunctive in both clauses. (In English, *had... , would have....*)

Sī labōrāvisset, pecūniam optāvisset.

4. MIXED CONDITIONS

In addition to the strict formulae given above, occasionally one finds a mixed condition where the protasis and the apodosis belong to different categories. Such conditions are constructed as logical thought requires. For example:

If he had (in the past) worked (but he did not), he would (now) be desiring money (he would desire money).

This sentence is past contrafactual in the protasis, but the apodosis refers to present time. Consequently, the protasis must have its verb in the pluperfect subjunctive, while the verb of the apodosis will be imperfect subjunctive.

Sī labōrāvisset, pecūniam optāret.

F. Genitive with Verbs of Accusing and Condemning

The genitive is used with verbs of accusing and condemning to express the charge or the penalty.

Genitive of the charge:

Puellam cūrae culpat. He blames the girl [of] for (her) concern.
[culpō (1), ‘blame’]

Genitive of the penalty:

Nautam pecūniae dāmnāvit. He sentenced the sailor [of money] to pay
money.

vita, -ae, F.	life

UNIT TWO — NOTES ON VOCABULARY

The preposition **ā (ab)** is used only with the ablative case. It has two different meanings, ‘away from’ and ‘by’ (‘through the agency of’, *not* ‘near’). It means ‘by’ only when it is used with words representing living beings, for example, **ā nautā**, ‘by the sailor’, **ā rēginā**, ‘by the queen’; ‘by tears’ or ‘by delay’ would not use **ā (ab)**, but simply the ablative case without a preposition.

Since **ad** means ‘to’ or ‘toward’, it governs the accusative case (the case which expresses movement toward). The preposition **per**, ‘through’, also provides the idea of motion toward and so takes the accusative.

Incipiō, incipere, incēpī, incep̄tus is a compound of the preposition **in-**, ‘on’, plus the verb **capiō, capere, cēpī, captus**. The **-a-** of the uncompounded verb changes to **-i-** in compounds; this is always the case in Latin. It is very common for the **-a-** in a perfect passive participle to change to **-e-** when the verb is compounded. **Incipiō** means literally ‘take on’, thus, ‘begin’. (Cf. He *takes on* a new task. He *begins* a new task.)

There are many compounds of **capiō**: **ad + capiō** is **acciō**, ‘take to (oneself), receive’. The prefix **re-** has the meaning ‘back’; thus, **recipiō**, ‘take back’. The imperative form **recipe** ‘take back’, is our English word “recipe”. The Romans

used a line to indicate an abbreviation, and so the sign for a prescription R is not Rx, but an abbreviation for **recipe**, ‘take back’. **Repellō** (re- + **pellō**, ‘drive’) means ‘drive back’. A water-repellent raincoat drives back the rain so that it does not go through the coat. **Excipiō** (ex + **capiō**) means ‘take out’, and **suscipiō** (**sub**, ‘under’ + **capiō**) means ‘undertake’.

Cōgitō, a first conjugation verb, means ‘think, ponder, consider’. To *think about* something is **cōgitāre dē** (+ ablative) or **cōgitāre** (+ accusative).

Dubitō (1) means ‘hesitate’ when it is used with an infinitive, otherwise ‘doubt’.

Incolō, **incolere**, **incolui**, ‘inhabit’, is obviously related to **incola**, **incolae**, M. or F., ‘inhabitant’; it lacks a fourth principal part.

Insidiae, **insidiārum**, F., ‘ambush, plot, treachery’, although plural in Latin and governing a plural verb, is translated as singular in English.

There is no distinction between **neque** and **nec**; either spelling may be used. **Neque...neque** means ‘neither...nor’: **Rēgīnam neque videt neque timet**, ‘He neither sees nor fears the queen’. The sentence could also be written **Rēgīnam nec videt nec timet**.

In the same way, the spellings of the word ‘nothing’, **nihil** and **nil**, are interchangeable.

Pellō, **pellere**, **peplū**, **pulsus**, ‘push, drive off’, forms its third principal part by the process of reduplication. Some verbs have such reduplicated third principal parts, which are formed by prefixing the word with the initial consonant, followed either by -e- or the vowel of the root. Some other examples of reduplicated perfects are:

canō, canere, cecini, cantus	sing (of)
currō, currere, curreui, cursus	run
poscō, poscere, posui, --	beg, demand

Expellō, **expellere**, **expulī**, **expulsus** is a compound of **pellō** (ex + **pellō**) and so it means ‘push out, drive out’. Often a verb that is compounded will lose its reduplicated form in the perfect (cf. **peplū**, **expulī**).

Very frequently, first declension nouns that end in -tia come over into English with the spelling -ce or -cy (cf. **sententia**, ‘sentence’; **grātia**, ‘grace’; **diligentia**, ‘diligence’; **beneficentia**, ‘beneficence’; **cōstantia**, ‘constancy’).

The perfect forms of **sentiō**, **sentire**, **sēnsi**, **sēnsus**, ‘feel, perceive’, have a long -ē- because of the -ns- which follows.

Sub takes either the accusative or the ablative case depending upon whether the idea of movement toward or location is involved. In other words, if one were drilling down under the earth, in Latin **sub terram** would be used, but if one were to speak of the rock lying under the earth, **sub terrā** would be used.

Again notice the lengthening of the -e- in **veniō**, **venire** to -ē- in the perfect active, **vēni**.

A good way of remembering the principal parts of verbs is to associate both the present stem and the perfect passive stem with English words. For example:

<i>incipiō</i>	<i>incipient</i>	<i>inception</i>
<i>expellō</i>	<i>expel</i>	<i>expulsion</i>
<i>sentiō</i>	<i>sentient</i>	<i>sensual</i>
<i>veniō</i>	<i>convene</i>	<i>convention</i>

UNIT TWO — DRILL

I.

Verb identification: Translate indicatives; identify subjunctives by so labeling them, and appending information as to person, number, tense, and voice.

1. ambulat, ambulāret, ambulāvit, ambulāverat
2. clāmābunt, clāmant; clāment, clāmāvērunt
3. vidērunt, viderant, viderint (two possibilities), vidissent
4. optāverās, optāveris (two possibilities), optēmus, optāvimus
5. timērēmus, timēmus, timuimus, timēbāmus
6. dedissem, dem, dabam, dedi

II.

1. Si in īsulā eritis, pecūniā habēre optābitis.
2. Si in īsulā sītis, aquam optētis.
3. Si in patriā essētis, fēminās vidērētis.
4. Sī in patriā fuissētis, clāmāre timuissētis.
5. Sī fēminam vidēbit, clāmābit.
6. Sī fēminam viderit, clāmābit.
7. Sī fēminam vidēret, clāmāret.
8. Sī fēminam vidisset, clāmāvisset.
9. Sī fēminam optet, clāmet.
10. Si taedam nautae det, portam vidēbō.
11. Si taedam nautae dabit, portam vidēbō.
12. Si taedam nautae dederit, portam vidēbō.
13. Si taedam nautae dedisset, portam vidissem.
14. Si taedam nautae daret, portam vidērem.

III.

Ellipsis. Note the following progression, and how the verb “to be” is omitted.

Est fāma fēminis. Est fōrma fēminis.

Est fāma fēminis et est fōrma fēminis.

Est fāma fēminis et fōrma.

Fāma fēminis et fōrma.

UNIT TWO — PRELIMINARY EXERCISES (SECTIONS A, B, C, D)

I.

1. Incolaene dē glōriā patriae tacuērunt?
2. Rēginam dē incolārum īsidiis monui.
3. Glōriam enim optāverint.
4. Nil nisi glōriam optāverō.
5. Puellae neque lacrimās neque culpam cēlāverant.
6. Sententiās dē animā mūtare incēperāmus sed sententiās nōn mūtāverātis.
7. Invidiamne ex animā expulisti?
8. Noxam ab incolis pepulerimus.
9. Per undās ad terram vēnistis, sed in patriā semper fuimus.
10. Pecūniām rēginae ē terrā cēperat.

II.

A *synopsis* is a summary outline of a given verb that shows at a glance the major inflectional variations of that verb. In Latin, a synopsis gives all the forms of a given verb in a specified person and number. Writing synopses is an excellent way to solidify one's knowledge of the verbal system in Latin.

The following example is a synopsis of **cēlō** (1) in the third person singular:

cēlō, cēlāre, cēlāvī, cēlātus, 'hide, conceal'

ACTIVE VOICE		
	INDICATIVE MOOD	SUBJUNCTIVE MOOD
Present	cēlat	cēlet
Imperfect	cēlābat	cēlāret
Future	cēlābit	---
Perfect	cēlāvit	cēlāverit
Pluperfect	cēlāverat	cēlāvisset
Future Perfect	cēlāverit	---

Write synopses of the following verbs:

1. dubitō (1), second person plural; third person singular
2. labōrō (1), third person plural; first person singular

UNIT TWO — EXERCISES

UNIT THREE

A. Nouns of the Second Declension

Nouns of the second declension are distinguished by the genitive singular ending -i.

nātus, -i, M. son, child

puer, pueri, M. boy

saxum, -i, N. rock, stone

While most nouns of the first declension are feminine, most of the second declension are masculine or neuter.

In order to decline a noun of the second declension, add the case endings for this declension to the stem. As usual, the stem is found by dropping the ending from the full genitive singular form. The endings are:

	SINGULAR		PLURAL	
	MASCULINE	NEUTER	MASCULINE	NEUTER
Nom.	-us*	-um	-i	-a
Gen.	-i	-i	-ōrum	-ōrum
Dat.	-ō	-ō	-is	-is
Acc.	-um	-um	-os	-a
Abl.	-ō	-ō	-is	-is

* The -us ending occurs for the masculine singular in most instances. Occasionally, however, nouns ending in -r or -er will occur, as will be seen in the vocabularies (e.g., vir, puer).

NOTE CAREFULLY:

1. The neuter differs from the masculine of the second declension in three places:
 - a. nominative singular
 - b. nominative plural
 - c. accusative plural
2. In all neuter nouns in the language, the nominative and accusative forms of each number are *always* identical.

3. In all neuter nouns in the language, the nominative and accusative plural end in -a.

By applying these rules we can decline **nātus**, **puer**, and **saxum** as follows:

	SINGULAR			PLURAL		
Nom.	nātus	puer	saxum	nātī	pueri	saxa
Gen.	nātī	pueri	saxī	nātōrum	puerōrum	saxōrum
Dat.	nātō	puerō	saxō	nātīs	puerīs	saxīs
Acc.	nātūm	puerūm	saxūm	nātōs	puerōs	saxa
Abl.	nātō	puerō	saxō	nātīs	puerīs	saxīs

B. First-Second Declension Adjectives

An adjective is a word which describes or modifies a noun. In Latin, adjectives must *agree* with the nouns they modify in *gender*, *number*, and *case*, and so adjectives, like nouns, are *declined*.

First-second declension adjectives utilize the case endings of the first two declensions. When the endings of the first declension are used, the adjective is said to be feminine and will modify feminine nouns; when the endings of the second declension are used, the adjective is said to be masculine or neuter and will modify masculine or neuter nouns respectively.

In the dictionary, the adjectival forms given are the nominative singular masculine, feminine, and neuter (in that order):

magnus, -a, -um large, big, great

The full forms are

magnus, magna, magnum

The entire declension is:

	SINGULAR			PLURAL		
	M.	F.	N.	M.	F.	N.
Nom.	magnus	magna	magnum	magnī	magnae	magna
Gen.	magnī	magnae	magnī	magnōrum	magnārum	magnōrum
Dat.	magnō	magnae	magnō	magnīs	magnīs	magnīs
Acc.	magnum	magnam	magnum	magnōs	magnās	magna
Abl.	magnō	magnā	magnō	magnīs	magnīs	magnīs

Some first-second declension adjectives exhibit the -er ending in the masculine nominative singular (e.g., **dexter**, **dextra**, **dextrum**, 'right' [as opposed to left], 'favorable'). The stem in such words may be derived from the feminine nominative form by dropping its ending:

dextr/a

The entire declension will be formed on this stem:

	M.	F.	N.
Nom.	dexter	dextra	dextrum
Gen.	dextri	dextrae	dextri
Dat.	dextrō	dextrae	dextrō
		...etc.	

C. Noun-Adjective Agreement

As noted under B above, an adjective must agree with the noun it modifies in *gender, number, and case*.

'of a rock' (genitive) = *saxi*

'of a large rock' = *magni saxi*

(The noun is neuter, singular, genitive; the adjective must be neuter, singular, genitive.)

'to/for a woman' (dative) = *fēminaē*

'to/for a wretched woman' = *fēminaē miserae*

(The noun is feminine, singular, dative; the adjective must be feminine, singular, dative.)

At first glance it may seem needless to go through the considerations of gender, number, and case, for agreement appears to be achieved simply by matching endings. But this is generally not true. Consider the following example:

poēta, -ae, M., 'poet'

'great poet' (nominative): The noun is masculine, singular, nominative; thus, the adjective must be *masculine*, singular, nominative.

Thus: *poēta magnus*

'great poets' (nominative): The noun is masculine, plural, nominative; thus, the adjective must be masculine, plural, nominative.

Thus: *poētae magni*

More often than not, the endings of words which go together are *not* identical; therefore, one should not look for such correspondence.

D. Adjectives Used As Nouns

As in English, an adjective may be used without a noun if that noun can be understood. Cf.:

The good (men) and the just (men) voted for freedom. Fortune favors the brave (men). Examples:

magnus (masculine)	a great man
magna (feminine)	a great woman
magnum (neuter)	a great thing
Magna optō.	I desire great things.
Multa bona habet.	He has many good things; he has many goods; he has much property.
Rōmānōs timet.	He fears the Romans.

E. Ablative of Means (Instrument)

The ablative *without* a preposition is used to express the *means* or *instrument* by which something is done.

Nautae gladiis pūgnant.	The sailors fight <i>with</i> (<i>by means of</i>) swords.
Oculis vidēmus.	We see <i>with</i> (<i>by means of</i>) [our] eyes.
Fēminās taedā terruit.	He frightened the women <i>with</i> (<i>by means of</i>) a torch.

F. Ablative of Manner

The ablative case may be used *with* or *without* the preposition **cum** to denote the *way* or *manner* in which something is done. The **cum** is required in this construction when the noun in the ablative is *not* modified by an adjective; when it is modified, **cum** is optional.

Verba misera cum veniā audivisti.	You heard (my) wretched words <i>with indulgence</i> (<i>indulgently</i>).
Verba misera magnā (cum) veniā audivisti.	You heard (my) wretched words <i>with great indulgence</i> (<i>very indulgently</i>).

Note that phrases of this type can usually be translated by an English adverb ending in *-ly*.

G. Clauses of Purpose; Sequence of Tenses

In the sentence “I fight to overcome the sailor,” “to overcome the sailor” expresses the *purpose* for which the subject is fighting. Purpose is frequently expressed in English by the infinitive; in Latin a subordinate clause is normally required: “I fight in order that I may overcome the sailor”. Purpose clauses are frequently introduced by the subordinating conjunctions **ut** (in this case, meaning ‘in order that’) or **nē** (‘in order that...not’); they have their verbs in the subjunctive.

In Unit One the various tenses of the indicative were divided into two categories: primary and secondary. The tenses of the subjunctive, as well, may be so divided. The scheme follows:

	INDICATIVE	SUBJUNCTIVE
PRIMARY TENSES	Present Future Perfect ("have" or "has") Future Perfect	Present Perfect
SECONDARY TENSES	Imperfect Perfect (English past) Pluperfect	Imperfect Pluperfect

In most subordinate clauses in which the subjunctive is used, a system called *sequence of tenses* occurs. That is, if the verb of the main (independent) clause is in a primary tense, the verb of the subordinate (dependent) subjunctive clause must be primary. This is called *primary sequence*. Likewise, if the verb of the main clause is in a secondary tense, the verb of the subordinate clause must be secondary. This is called *secondary sequence*.

In primary sequence, the *present subjunctive* regularly denotes an action which occurs at the *same time* as that of the main verb or will occur at some time *subsequent* to that of the main verb. The *perfect subjunctive* denotes an action which occurred *prior* to the time of the main verb.

In secondary sequence, the *imperfect subjunctive* regularly denotes an action which occurs at the *same time* as that of the main verb or will occur at some time *subsequent* to that of the main verb. The *pluperfect subjunctive* denotes an action which occurred *prior* to the time of the main verb.

Thus:

Present and Imperfect Subjunctive — contemporaneous or subsequent action (with reference to the main verb)

Perfect and Pluperfect Subjunctive — prior action (with reference to the main verb)

It will be observed, then, that the tenses of the subjunctive frequently have no specific English tense values of their own but are *relative* to the tense of the main verb of a given sentence.

Since purpose clauses must logically refer to an action which will occur subsequent to the main verb, only the present and imperfect subjunctives are used in this construction.

PRIMARY SEQUENCE:

- Pūgnō **ut** nautam **superem**. I fight *in order that I may overcome* the sailor.
- Pūgnābō **ut** nautam **superem**. I shall fight *in order that I may overcome* the sailor.
- Pūgnāvī **ut** nautam **superem**. I have fought *in order that I may overcome* the sailor.
- Pūgnāverō **ut** nautam **superem**. I shall have fought *in order that I may overcome* the sailor.

SECONDARY SEQUENCE:

- Pūgnābam **ut** nautam **superārem**. I was fighting *in order that I might overcome* the sailor.
- Pūgnāvī **ut** nautam **superārem**. I fought *in order that I might overcome* the sailor.
- Pūgnāveram **ut** nautam **superārem**. I had fought *in order that I might overcome* the sailor.

Negative purpose clauses are introduced by the subordinating conjunction **nē** instead of **ut**.

- Pūgnō **nē** nauta fēminam **superet**. I fight *in order that the sailor may not overcome* the woman.
- Pūgnābam **nē** nauta fēminam **superāret**. I was fighting *in order that the sailor might not overcome* the woman.

H. Indirect Commands

Consider the sentence, “I beg that you overcome the sailor”. “That you overcome the sailor” is an indirect command and represents a direct imperative: “I beg you. Overcome the sailor!” Many verbs of *ordering, warning, begging, urging, asking*, and the like, take such a construction. The indirect command is really a substantive clause which functions as the direct object of the main verb.

Ōrō **ut** nautam I beg that you overcome the sailor.
superēs.

Ōrābam **ut** nautam I begged (was begging) that you overcome the sailor.
superārēs.

Ōrāvī **ut** verba cum I begged that you hear (my) words with indulgence.
veniā audīrēs.

Ōrābam **nē** verba I begged that you not hear the words of the sailor.
nautae audīrēs.

UNIT THREE — VOCABULARY

acerbus , -a, -um	bitter, harsh
ager , agri , M.	field
audiō , -ire, -ivī, -itus	hear, listen (to)
bellum , -i, N.	war
bonus , -a, -um	good
caecus , -a, -um	blind, hidden, secret
campus , -i, M.	plain, level surface
clārus , -a, -um	bright, clear, famous

vēla dare	to set sail
venia, -ae, F.	indulgence, favor, kindness, (obliging) disposition
ventus, -ī, M.	wind
verbum, -ī, N.	word
vir, virī, M.	man

UNIT THREE — NOTES ON VOCABULARY

Associating an English word with the Latin will be helpful in remembering when the **-e-** of a second declension masculine word remains and when it drops out: e.g., **agriculture** (**ager, agri**, M., 'field'), **pulchritude** (**pulcher, pulchra, pulchrum**, 'beautiful'), **liberal** (**liber, libera, liberum**, 'free').

Gerō, gerere, gessī, gestus means 'conduct, manage'; when it is used with **bellum**, it means 'wage (war)'; **Rōmānī multa bella gessērunt**, 'The Romans waged many wars'.

Gladius, gladiī, M., 'sword' has a diminutive **gladiōlus**, 'little sword', which gives the name of the flower whose leaf looks like a little sword. The diminutive endings will be discussed later.

Multus, multa, multum usually means 'much' in the singular and 'many' in the plural. However, one can say in Latin: **Multus Rōmānus gladiō pūgnāvit**, 'Many a Roman fought with a sword'.

Nātus, nātī, M. is really the passive form of the perfect participle of a verb meaning 'to be born'; thus **nātus** is 'the one having been born, the son, child'.

Ōrō, ōrāre, ōrāvī, ōrātus, 'beg (for)' may govern two accusatives: the thing begged for and the person begged: **Rēgīnam pecūniām ōrāvit**, 'He begged the queen for money'.

Petō, petere, petīvī, petitus means 'ask' or 'ask for'. If one asks someone for

something in Latin using the verb **petō**, he asks something from somebody: **Nātūs dōnum ā Marcō petīvit**, '(His) son asked Marcus for a gift'.

Pūgnō, **pūgnāre**, **pūgnāvī**, **pūgnātus**, 'fight' is an intransitive verb and is used with **cum** to mean 'fight against': **Multī cum Rōmānīs pūgnāvērunt**, 'Many (men) fought with the Romans'. (Note that "with" in this sense means 'against', *not* 'on the side of'.) **Repūgnō** is a compound of **pūgnō** (**re-** + **pūgnō**) and means 'fight back, resist'.

Scribō, **scribere**, **scriptī**, **scriptus** means 'write'; thus, **īnscribō**, 'write in or on'; **rescribō**, 'write back'.

Spectō, a first conjugation verb, 'look at' has many compounds:

aspectō (ad + spectō)	look toward, face
exspectō	look out for, await
respectō	look back
	...etc.

There is another verb in Latin closely related to **spectō**: **speciō**, **specere**, **spēxi**, --, which also means 'look at' and has many compounds:

aspiciō	look at <i>or</i> toward
dēspiciō	look down upon
inspiciō	look into, examine
respiciō	look back, consider

Vēlūm, **vēlī**, N. is a 'cloth' or 'covering'; it can also mean a 'sail'. The idiom **vēla dare** means 'to set sail': **Vēla ab īsulā dedērunt**, 'They set sail from the island'.

UNIT THREE — DRILL

I.

Change these noun forms to the plural. In some cases there may be several possibilities.

- | | | |
|-----------|-----------|-----------|
| 1. bellūm | 3. oculūm | 5. veniāe |
| 2. nātī | 4. saxō | |

II.

Change these noun forms to the singular:

- | | | |
|-------------|----------|------------|
| 1. bellōrum | 3. saxa | 5. fēminās |
| 2. puerōs | 4. viris | |

III.

A. Decline **caecus**, **-a**, **-um** in the singular.

Decline **bonus**, **-a**, **-um** in the plural.

B. For each of the following, supply the proper form of **magnus**, **-a**, **-um**:

- | | | | |
|-----------|-----------|-----------|-------------|
| 1. fēmina | 3. puerō | 5. campus | 7. nautārum |
| 2. bellum | 4. poētae | 6. aquam | 8. ager |

IV.

Translate the following sentences, all of which contain clauses of purpose or indirect commands:

1. Puella dē noxā tacet ut cum nautā ambulet.
2. Puella cūram fāmae cēlāvit ut pecūniām habēret.
3. Poēta tacet ut dē nātūrā animae cōgitet.
4. Poēta tacuit ut dē nātūrā animae cōgitāret.
5. Fēminaē pecūniām optābant ut ad prōvinciam venirent.
6. Tacuērunt incolae nē rēgina sententiam mūtāret.
7. Tacent incolae nē rēgina sententiam mūtēt.
8. Monēmus ut dē vitā cōgitētis.
9. Cum lacrimis monuit nē dē vitā cōgitārēmus.
10. Nil clāmāvit nē incolās terrēret.
11. Nil clāmāvit nē fēminaē oculōs lacrimis implērent.
12. Nil clāmāvit nē fēminaē oculōs lacrimis implēre inciperent.
13. Cum cūrā labōrābāmus ut nautās ē prōvinciā pellerēmus.
14. Dē morā nautārum clāmāre dubitābat nē fēminaē timērent.
15. Monēbimus ut sententiam mūtētis.
16. Monuistis ut pecūniām cēlem.

V.

Translate the following sentences which contain adjectives used as nouns and/or ablatives of means or manner.

1. Nōtus cum cūrā labōrat. [**Nōtus**, **-a**, **-um**, ‘well-known, famous’]
2. Nōtōs taedīs pepulērunt.
3. Pecūniām nōtae cēlāvistī?
4. Nōta cum invidiā cēlāvimus.
5. Nōta magnā (cum) invidiā cēlāvimus. [**magnus**, **-a**, **-um**, ‘great’]
6. Puellās monēbāmus nē nōtās taedis terrērent.

UNIT THREE — PRELIMINARY EXERCISES (SECTIONS A, B, C, D, E, F)

1. Puer laetus dōna multa ā servis petīvit.
2. Multa ā servis petīvistī sed dōna virō bonō veniā bonā dedērunt.

3. Saxum magnum in aquā erat sed in terrā erant saxa magna et multa.
4. Si nauta miser ventōs bonōs örāvisset, laetusne fuisset?
5. Si liberi magnā cum diligentia in agrō pūgnābunt, malōs superābunt.
6. Si pulchrae poētam caecum audirent, sententiās malās dē vitā mūtārent.
7. Verba acerba poētae caeci audivistis et miserī esse incēpitistis.
8. Nātis servōrum gladiōs magnōs dedimus.
9. Rōmāni bella multa acerbaque gessērunt.
10. Malumne est bellum gerere?
11. Si virī malī in campis clāris Marcī pūgnent, incolās bonōs terrae superērent.
12. Cum glōriā puerī gladiis pūgnābant.

UNIT THREE — EXERCISES

I.

1. Nautae validi magnā cum cūrā pūgnābant ut incolās insulae superārent.
2. Saxis pūgnāverāmus nē nautae acerbi fēminās poētarum clārōrum spectārent.
3. Virī magnā diligentia labōrant nē cum pueris malis in prōvinciā pūgnent.
4. Rēgina magnum gladium virō bonō dabit ut cum Rōmānis in campō pūgnet.
5. Marcus, vir magnus et bonus, corōnam ad poētam portāvit.
6. Nautae Rōmāni vēla ventis dextris dabant nē viri malī campōs tenērent.
7. Viri liberi bellum cum diligentia gessērunt ut liberi semper essent.
8. Liberi malōs multis gladiis superābunt nē servi miserī sint.
9. Rēgina pulchra poētae caecō dōnum bonum dederat ut verba clāra semper audiret.
10. Turba magna rēginam bonam gladiis terruit ut et prōvinciam et insulam superāret.
11. Virī validi nautās örāvērunt ut incolās prōvinciae bellō et gladiis superārent.
12. Si dōnum bonum poētae Marcō darētis, magna verba cum diligentia scriberet.
13. Si verba mala puerōrum audivistis, laeti nōn erātis.
14. Liberi prōvinciae servi fuissent, nisi nautae Rōmāni bellum in patriā gessissent.
15. Nisi tacuisset, miserum monuisse ut lacrimās cēlāret.
16. Nisi tacuerint, miserōs monēbō ut lacrimās cēlent.
17. Sententiās rēgina prōvinciae mūtāvit nē poētae timērent.
18. Rēgina virōrum sententiās mūtāvit ut nāti in agris labōrare optent.
19. Poētae bonō sī pecūniām dedissēs, multa dē agris prōvinciae scripsisset ut incolis magna fāma esset.
20. Validi incolae patriam et fāmam in dextris tenent. Per dextram örāmus ut magnā diligentia cum malis pūgnent ut semper Rōmāni simus liberi. [per, 'by' (in oaths)]

21. Pueri ad dextram spectaverant ut gladiōs malōrum oculis vidērent.
22. Vidistisne magnum bellum in campis? Fēminaē sī bellum vidissent, nātōs magnis cum lacrimis monuissent ut malōs ex agris patriae expellerent.
23. Nisi verba poētarum audivissēs, nihil dē nātūrā animae et vitae nunc sentirēs et vitam miseram nōn mūtāvissēs.
24. Nisi malōs saxis gladiisque ē cellā pepulissēmus, patriam cum glōriā nōn tenuissēmus, et nunc servī essēmus.
25. Ā rēgīnā petivisti ut veniam incolis daret.
26. Poēta validōs in agris monuit ut clārum gladium sub saxō peterent.

UNIT FOUR

A. The Present Active System of All Four Conjugations

1. PRESENT ACTIVE INDICATIVE

In order to illustrate the inflections of the entire verbal system, we shall use the following verbs:

- | | | |
|----|---|---|
| 1. | optō, -āre, -āvi, -ātus | desire |
| 2. | impleō, -ēre, -ēvi, -ētus | fill |
| 3. | $\begin{cases} dūcō, -ere, dūxi, ductus \\ incipiō, -ere, -cēpi, -ceptus \end{cases}$ | $\begin{cases} lead \\ begin \end{cases}$ |
| 4. | sentiō, -ire, sēnsi, sēnsus | feel |

Note that *two* verbs have been listed for the third conjugation. These differ from one another in the -i- which appears before the final -ō in the first person singular form of one of them. This -i- will appear in various other places throughout the conjugation. Such verbs are called *i-stems*. It will be observed that all verbs of the fourth conjugation also have an -i- before the ending, and so i-stems of the third conjugation will have something in common with verbs of the fourth conjugation. (The major difference is the length of the vowel: in the third conjugation it is short; in the fourth it is generally long.)

The conjugation of the present indicative can best be illustrated by the following table:

1	2	3	3 i-stem	4	Ending
optō	impleō	dūcō	incipiō	sentiō	-ō
optās	implēs	dūcis	incipis	sentīs	-s
optat	implet	dūcīt	incipit	sentīt	-t
optāmus	implēmus	dūcīmus	incipimus	sentīmus	-mus
optātis	implētis	dūcītis	incipitis	sentītis	-tis
optant	implent	dūcīunt	incipiunt	sentīunt	-nt

The personal endings are identical for all four conjugations. The difficulty

in the third conjugation lies in the stem vowel: we should expect it to be **-e-** (**dūce/re**), but it appears as **-i-** or, in the third person plural, **-u-**. Also, note that for i-stem verbs, the **-i-** appears in the first person singular and the third person plural.

2. PRESENT ACTIVE SUBJUNCTIVE

The sign for the present subjunctive of the first conjugation is the vowel **-ē-**; for the second, third, and fourth conjugations, it is **-ā-**, but this **-ā-** in some conjugations appears in conjunction with another vowel. It will be easiest to form the present subjunctive for all conjugations as follows:

- Arrive at the stem.
- Drop the stem vowel.
- In place of the original stem vowel, substitute **-ē-** for the first conjugation, **-eā-** for the second, **-ā-** for the third, **-iā-** for i-stems of the third, and **-iā-** for the fourth.
- Add the endings **-m**, **-s**, **-t**, **-mus**, **-tis**, **-nt**.

The following will illustrate:

1	2	3	3 i-stem	4
optem	impleam	dūcam	incipiam	sentiam
optēs	impleās	dūcās	incipiās	sentiās
optet	impleat	dūcat	incipiat	sentiat
optēmus	impleāmus	dūcāmus	incipiāmus	sentiāmus
optētis	impleātis	dūcātis	incipiātis	sentiātis
optent	impleant	dūcant	incipiant	sentiant

These forms should now be compared to those of the present indicative, so that the differences may be discerned readily.

One will observe at once some difficulties in the recognition of forms and will understand how important it is to know the principal parts of verbs, particularly the second part which indicates to which conjugation the verb belongs. **Dūcat**, for example, looks dangerously like **optat**. Only by knowing that **dūcō** belongs to the third conjugation, while **optō** belongs to the first, can one tell that the **-a-** in **dūcat** is the sign of the present subjunctive, while in **optat** it is the sign of the present indicative.

3. IMPERFECT ACTIVE INDICATIVE

The sign for the imperfect indicative of all conjugations is **-bā-**. In the third conjugation, the stem vowel lengthens (from **-e-** to **-ē-**). In i-stem verbs of the third conjugation and in all verbs of the fourth conjugation, **-iē-** appears before the tense sign throughout:

1	2	3	3 i-stem	4
optābam	implēbam	dūcēbam	incipiēbam	sentiēbam
optābās	implēbās	dūcēbās	incipiēbās	sentiēbās
optābat	implēbat	dūcēbat	incipiēbat	sentiēbat
optābāmus	implēbāmus	dūcēbāmus	incipiēbāmus	sentiēbāmus
optābātis	implēbātis	dūcēbātis	incipiēbātis	sentiēbātis
optābant	implēbant	dūcēbant	incipiēbant	sentiēbant

4. IMPERFECT ACTIVE SUBJUNCTIVE

The imperfect active subjunctive for all conjugations has been illustrated in section C2 of Unit 2 (page 36 above).

5. FUTURE ACTIVE INDICATIVE

The sign for the future of the first two conjugations is **-bi-** (with **-bō-** in the first person singular and **-bu-** in the third person plural). The sign for the future of the third and fourth conjugations is **-ē-** (with **-a-** in the first person singular). This vowel replaces the original vowel of the stem. I-stems show the **-i-** throughout.

1	2	3	3 i-stem	4
optābō	implēbō	dūcam	incipiam	sentiām
optābis	implēbis	dūcēs	incipiēs	sentiēs
optābit	implēbit	dūcet	incipiet	sentiēt
optābimus	implēbimus	dūcēmus	incipiēmus	sentiēmus
optābitis	implēbitis	dūcētis	incipiētis	sentiētis
optābunt	implēbunt	dūcent	incipient	sentiēnt

Again, some possible difficulties in interpretation will be noted:

dūcēt; optēt; implet

Dūcō, -ere is a third conjugation verb; -e- in this conjugation is the sign of the future; therefore, **dūcēt** is third person singular future active indicative.

Optō, -are is a first conjugation verb; -e- in this conjugation is the sign of the present subjunctive; therefore, **optēt** is third person singular present active subjunctive.

Implēō, -ere is a second conjugation verb; -e- in this conjugation is the vowel of the present stem; therefore, **implet** is third person singular present active indicative.

Frequently, however, the syntactical structure of a sentence will help determine the form of the verb, even if the conjugation to which the verb belongs is not known.

Ōrō ut urnam implēas.

The **ōrō ut** indicates that a subjunctive clause is being introduced; hence, the **-ā-** in **impleās** must be the sign of the present subjunctive and not the vowel of the present indicative of the first conjugation. Therefore:

Ōrō ut urnam impleās. I beg you to fill the urn.

B. The Present Passive System of All Four Conjugations

If one can conjugate a verb in the active voice, he can do it easily in the passive. Instead of appending the personal endings **-ō (-m)**, **-s**, **-t**, **-mus**, **-tis**, **-nt** to the appropriate stem or tense sign, he will append a special set of *passive* personal endings. These are:

-or, -r	-mur
-ris (-re)	-minī
-tur	-ntur

The active and passive forms are placed side by side in the following paradigms to illustrate this formation.

1. PRESENT INDICATIVE

1

ACTIVE	PASSIVE
optō	I desire
optās	you desire
optat	he desires
optāmus	we desire
optātis	you desire
optant	they desire
	optor*
	optāris (optāre)
	optātūr
	optāmūr
	optāmīnī
	optāntūr*
	I am desired
	you are desired
	he is desired
	we are desired
	you are desired
	they are desired

* Note that a long vowel is shortened before final **-r** and **-ntur**.

2

ACTIVE	PASSIVE	ACTIVE	PASSIVE
impleō	impleor	dūcō	dūcor
implēs	implēris (implēre)	dūcis	dūceris (dūcere)*
implet	implētūr	dūcīt	dūcītūr
implēmus	implēmūr	dūcīmūs	dūcīmūr
implētis	implēmīnī	dūcītīs	dūcīmīnī
implent	implēntūr	dūcīnt	dūcīntūr

3 i-stem

ACTIVE	PASSIVE	ACTIVE	PASSIVE
incipiō	incipior	sentiō	sentior
incipis	inciperis (incipere)*	sentiōs	sentīris (sentire)
incipit	incipitūr	sentiōt	sentītūr

4

* Note that the short **-i-** becomes short **-e-** before the **-ris (-re)** ending.

incipimus	incipimur	sentimus	sentimur
incipitis	incipimini	sentitis	sentimini
incipiunt	incipiuntur	sentiunt	sentiuntur

2. IMPERFECT INDICATIVE

1

ACTIVE

optābam	I was desiring
optābās	you were desiring
...etc.	

PASSIVE

optābar	I was being desired
optābāris	you were being desired (optābāre)
...etc.	

2

ACTIVE

implēbam	implēbar
implēbās	implēbāris (implēbāre)
...etc.	...etc.

3

ACTIVE

dūcēbam	dūcēbar
dūcēbās	dūcēbāris (dūcēbāre)
...etc.	...etc.

3 i-stem

ACTIVE

incipiēbam	incipiēbar
incipiēbās	incipiēbāris (incipiēbāre)
...etc.	...etc.

4

ACTIVE

sentiēbam	sentiēbar
sentiēbās	sentiēbāris (sentiēbāre)
...etc.	...etc.

3. FUTURE INDICATIVE

1

ACTIVE

optābō	I shall desire
optābis	you will desire
optābit	he will desire
optābimus	we shall desire
optābitis	you will desire

4. PRESENT AND IMPERFECT SUBJUNCTIVES

As one would expect, the present and imperfect subjunctives are formed in the same way as the active, except that the *passive* personal endings are used instead of the active ones. For an illustration of this, see the review chart on page 66.

C. The Perfect Passive System of All Four Conjugations

All verbs in Latin, regardless of the conjugation to which they belong, are conjugated identically in the perfect system.

In the perfect system the passive is a *compound* form; that is, it is composed of two words: a participle and a helping verb, **sum**. The perfect passive participle is the fourth principal part of most verbs. This form, while given in the vocabularies with a **-us** ending (**optātus**), is, in fact, an adjective and so can be declined. It might be written **optātus**, **-a**, **-um** just like the adjective **magnus**, **-a**, **-um**.

1. PERFECT PASSIVE INDICATIVE

The perfect passive indicative is composed of the fourth principal part of the verb (perfect passive participle) and a form of the present indicative of the verb **sum**. The ending of the participle is declined to show the number and gender of the subject. Since it refers to the subject, it is in the nominative case.

optātus sum	I (masc.) have been desired, I was desired
optāta sum	I (fem.) have been desired, I was desired
optātus est	he has been desired, he was desired
optāta est	she has been desired, she was desired
optātum est	it has been desired, it was desired
optātī sunt	they (masc.) have been desired, they were desired

The paradigm for the perfect passive indicative is:

optātus (-a, -um) sum	optātī (-ae, -a) sumus
optātus (-a, -um) es	optātī (-ae, -a) estis
optātus (-a, -um) est	optātī (-ae, -a) sunt

2. PLUPERFECT PASSIVE INDICATIVE

FORMATION: Perfect passive participle plus imperfect of the verb **sum**.

optātus (-a, -um) eram	optātī (-ae, -a) erāmus
optātus (-a, -um) erās	optātī (-ae, -a) erātis
optātus (-a, -um) erat	optātī (-ae, -a) erant

3. FUTURE PERFECT PASSIVE INDICATIVE

FORMATION: Perfect passive participle plus future of the verb **sum**.

optātus (-a, -um) erō	optātī (-ae, -a) erimus
optātus (-a, -um) eris	optātī (-ae, -a) eritis
optātus (-a, -um) erit	optātī (-ae, -a) erunt

4. PERFECT PASSIVE SUBJUNCTIVE

FORMATION: Perfect passive participle plus present subjunctive of the verb **sum**.

optātus (-a, -um) sim	optātī (-ae, -a) simus
optātus (-a, -um) sis	optātī (-ae, -a) sītis
optātus (-a, -um) sit	optātī (-ae, -a) sint

5. PLUPERFECT PASSIVE SUBJUNCTIVE

FORMATION: Perfect passive participle plus imperfect subjunctive of the verb **sum**.

optātus (-a, -um) essem	optātī (-ae, -a) essēmus
optātus (-a, -um) essēs	optātī (-ae, -a) essētis
optātus (-a, -um) esset	optātī (-ae, -a) essent

D. Review of Verb Conjugations

The chart on page 66 will illustrate the forms of all the tenses of the indicative and the subjunctive of all four conjugations.

E. Ablative of Personal Agent

The *agent* (*agō*, *-ere*, *ēgī*, *āctus*, ‘do’) or *person* who performs the action of a passive verb is regularly expressed in the ablative case preceded by the preposition *ā* or *ab*, ‘by’.

Puella *ā rēgīnā* terrētur. The girl is frightened *by the queen*.

UNIT FOUR — NOTES ON VOCABULARY

Agō, agere, ēgi, āctus is an important verb which has many meanings: ‘do, drive, discuss, spend time, conduct (life)’. When a speaker **agit**, he is ‘pleading (a case)’; when an actor **agit**, he is ‘acting’. Note that the **a-** in the present stem lengthens to **ē-** in the perfect active stem, and to **ā-** in the perfect passive form. **Gratiās agere** with the dative means ‘to thank’ someone: **Gratiās rēgīnae ēgi**, ‘I thanked the queen’.

The preposition **cum**, when it is used as a prefix, is spelled **com-** or sometimes **co-**. The verb **cōgō, cōgere, coēgi, coāctus** means ‘drive together, collect, compel’ (compounded from **cum** + **agō**).

Altus, -a, -um describes something measured up or down; thus, it has both meanings, ‘high’ and ‘deep’.

The adjective **amicus, -a, -um**, ‘friendly’, and its opposite **inimicus, -a, -um**, ‘unfriendly’, are very often used substantively (as many adjectives are). Thus **amicus**, ‘a friendly (man)’ is a ‘friend’, and **amica**, a ‘girlfriend’ as well as a ‘prostitute’; **inimicus** as a noun refers to a personal ‘enemy’ as opposed to a public enemy.

The plural forms of **deus, dei**, M., ‘god’, are: **dī, deōrum** or **deum, dis, deōs, dis**. Just as **deus, dei** is ‘god’ and **dea, deae**, ‘goddess’, so **filius, filii** is ‘son’ and **filia, filiae**, ‘daughter’.

Dūcō, dūcere, dūxi, ductus not only means ‘lead’ but also ‘consider’.

Just as the **a-** of **agō** lengthens to **ē-** in the perfect active stem, so the **-a-** of **faciō, facere**, ‘make, do’, lengthens in **fēci**, the perfect active form; however, it

remains short in **factus**, the perfect passive participle. There are many compounds of this verb:

afficiō (ad + faciō)	do (something) to (someone), affect
cōnficiō (where the prefix con- has the meaning ‘completely’)	do completely, accomplish
perficiō (per, ‘thoroughly’)	do thoroughly, complete, accomplish
reficiō (re- can also mean ‘again’ as well as ‘back’)	make again, renew
praeficiō (prae, ‘in front of’)	make (someone) in front of (others); put in charge

Factum, facti, N., is ‘the thing which has been done’, thus, ‘deed’.

Honestus, -a, -um does *not* mean ‘honest’, but ‘honorable, respected, distinguished’.

Legō, legere, lēgi, lēctus basically means ‘gather, choose’; it then extends its meaning to ‘read’. **Intellegō** is a compound of **legō** (**inter-** [**intel-**], ‘between, among’). When one chooses among other ideas, he understands. Some of the compounds of **legō** keep the -g- in the perfect active stem; others, like **intelligō**, change the -g- to -x-. There is no rule to indicate which compound will take which spelling.

Do not confuse **liber**, **librī**, M.. ‘book’, with **liber**, **libera**, **liberum**, ‘free’. **Littera**, **litterae**, F., is a letter of the alphabet; the plural is used for an epistle. Thus **litterae**, **litterārum** is a ‘letter’: **Litterās Marcī vidi**, ‘I saw Marcus’ letter’. If one wants to speak of ‘letters’, an adjective must be used: “several letters”, “many letters”, “two letters”, etc. As in English, the plural may be used for “literature”; cf. in English, “a man of letters”.

Mittō, mittere, misi, missus means ‘send’. In Latin, one sends something to someone or someplace using **ad** with the accusative, not the dative case alone:

Litterās ad amicum misi. I sent a letter to [motion stressed]
(my) friend.

Litterās amicō misi. I sent a letter for [the person referred to is
(my) friend. stressed]

Do not confuse the form **miseris** (‘you will have sent’ or second person singular perfect subjunctive active) with its long -ī- with the dative and ablative plural of **miser**, **misera**, **miserum** (**miseris**) which has a short -i- in its root.

An indirect object is often found with **mōnstrō**, a first conjugation verb, ‘show, point out, demonstrate’. One points something out to someone in the dative case: **Rēginam virō mōnstrābō**, ‘I shall point out the queen to the man’.

Pōnō, pōnere, posui, positus means ‘put, place, set aside’. Thus:

compōnō (com-, ‘together’)	put together
dēpōnō	put down, deposit
impōnō (im- for in-)	place in or on
praepōnō (prae, ‘in front of’)	put in front of, place at the head
prōpōnō (prō-, ‘forward’)	put forth
repōnō (re-, ‘back’)	put back

Tegō, tegere, tēxi, tēctus, ‘cover, conceal’, is related to two nouns of interest. **Tēctum, tēctī**, N., is a ‘covering’ and so ‘roof’; the meaning is then extended to ‘house’. With a slight vowel change in the root of this verb there is produced the famous covering or garment for which the Romans are known, **toga, togae**, F.

Trādō, trādere, trādidi, trāditus is a compound of **trāns-**, ‘across’ and **dō**, ‘give’, but note that although **dō** is a first conjugation verb, this compounded form belongs to the third conjugation. Literally it means ‘give across’ and so the meaning is ‘hand over’ or ‘betray’.

The adverb from **vērus, -a, -um** is either **vērē** or **vērō**; there is no difference between them.

The passive of **videō** means ‘seem’: **Marcus honestus vidētur**, ‘Marcus seems honorable’. It can also mean ‘be seen’: **Marcus in tēctō vīsus est**, ‘Marcus was seen in the house’.

Villa, villae, F.; is a ‘country house, farmhouse’. It was not necessarily a villa in our sense of the word, but a simple dwelling in which countryfolk lived.

REVIEW: UNITS ONE TO FOUR

Review of Syntax

1. Dāmnor semper ab acerbis malōrum factōrum, sed fāma nōn perdita est.
(ablative of personal agent; adjective used as a noun; genitive with verbs of accusing and condemning)
2. Libri mali ab honestis dāmnor, sed magnā cum invidiā ab amicis legitur et bonus esse dūcitur.
(genitive with verbs of accusing and condemning; ablatives of personal agent; adjectives used as nouns; ablative of manner; predicate adjective)
3. Si multa mala dē factis deōrum audīta essent, incolae ad ārās nōn vēnissent.
(adjective used as a noun; past contrary-to-fact condition)
4. Si ad īsulam clāram mittēmur nē in patriā videāmur, multās litterās amicis cāris scribēmus nē ab inimīcis trādāmur.
(future more vivid condition; two purpose clauses in primary sequence; adjectives used as nouns; ablative of personal agent)
5. Cārusne dis videāris si dōna cibi in āris pōnās?
(dative with a special adjective; future less vivid condition)
6. Si oppidum īsidiis dēlērētur, facta mala inimīcōrum ab incolis intellegērentur.
(present contrary-to-fact condition; ablative of means; adjective used as a noun; ablative of personal agent)
7. Fēminaē lacrimās cēlāre nōn dubitant. Fēminās ūrāmus nē lacrimās cēlēnt.
Tacēmus nē fēminaē lacrimās cēlēnt.
(indirect command in primary sequence; purpose clause in primary sequence)
8. Petēbāmus ā nātis ut saxa clāra in cellam neque cum morā neque cum noxā portārentur, nē in campis cēlārentur et perderentur.
(ā + abl. with petō; indirect command in secondary sequence; ablatives of manner; purpose clause in secondary sequence)

Synopsis of Verbs

A synopsis (refer to Preliminary Exercises for Unit Two) should include the active and passive forms of the verb in the indicative and subjunctive moods.

The following synopsis of **dūcō**, -ere, **dūxi**, **ductus** in the first person plural will serve as a model:

dūcō, **dūcere**, **dūxi**, **ductus**, ‘lead, consider’

INDICATIVE

	ACTIVE	PASSIVE
Present	dūcimus	dūcimur
Imperfect	dūcēbāmus	dūcēbāmur
Future	dūcēmus	dūcēmur
Perfect	dūximus	ductī (-ae, -a) sumus
Pluperfect	dūxerāmus	ductī (-ae, -a) erāmus
Future Perfect	dūxerimus	ductī (-ae, -a) erimus

SUBJUNCTIVE

Present	dūcāmus	dūcāmur
Imperfect	dūcerēmus	dūcerēmur
Perfect	dūxerimus	ductī (-ae, -a) sīmus
Pluperfect	dūxissēmus	ductī (-ae, -a) essēmus

UNITS 1-4: Self-Review A

While long marks appear below only in places where confusion might arise, they should appear in your answers.

I.

- A. Change these forms to the passive, retaining mood, person, number, and tense:
1. impleverunt
 2. terrueritis (2 possibilities)
 3. viderat
 4. species
 5. sentiebam
- B. Change these forms to the active, retaining mood, person, number, and tense:
1. monitus esses
 2. teneremur
 3. capiemini

- Sī ā virīs oppidi videāmur, inimici habeāmur (dūcāmur) et ē prōvinciā pellāmur (expellāmur).

UNIT FIVE

A. Participles: Definition and Formation

If we wish to take a verb and make an adjective out of it, we construct a *verbal adjective or participle*.

The *shouting* woman departed.

The men saw the *destroyed* town.

A participle, like any other adjective, must agree with the noun it qualifies in gender, number, and case. In the sentences given as examples above, “shouting” is feminine, singular, nominative to agree with “woman”; “destroyed” is neuter, singular, accusative to agree with “town”. The participle also has the attributes of tense and voice: “shouting” is present active; “destroyed” (i.e., “having been destroyed”) is perfect passive.

The participle, although an adjective, still retains its verbal powers and accordingly, for example, can take an object:

The men *destroying the town* were sailors.

The formation of participles is illustrated below:

	ACTIVE	PASSIVE
Present	optāns desiring	--
Perfect	--	optātus, -a, -um having been desired, desired
Future	optātūrus, -a, -um going to desire, about to desire	optandus, -a, -um having to be desired, to be desired*

1. PRESENT ACTIVE PARTICIPLE. To form the present active participle, add **-ns** to the present stem. In the case of i-stem verbs, **-ie-** will appear in the present participle:

optā/ns implē/ns dūcē/ns incipiē/ns sentiē/ns

* The future passive participle regularly carries the accessory notion of obligation, necessity, or propriety.

The form given is the nominative singular for all three genders. The present participle declines, but according to a scheme which differs from that which you have already learned. This will be discussed in Unit Eight. (Note that a vowel lengthens before **-ns**.)

2. **PERFECT PASSIVE PARTICIPLE.** The perfect passive participle is the fourth principal part of the verb:

optātus, -a, -um implētus, -a, -um ductus, -a, -um inceptus, -a, -um
sēnsus, -a, -um

3. **FUTURE ACTIVE PARTICIPLE.** To form the future active participle, take the fourth principal part of the verb, drop the **-us** ending and add in its place **-ūrus, -a, -um**:

optātūrus, -a, -um implētūrus, -a, -um ductūrus, -a, -um
inceptūrus, -a, -um sēnsūrus, -a, -um

4. **FUTURE PASSIVE PARTICIPLE.** To form the future passive participle, add **-ndus, -a, -um** to the present stem. In i-stem verbs, **-ie-** will appear:

optandus, -a, -um implendus, -a, -um dūcendus, -a, -um
incipiendus, -a, -um sentiendus, -a, -um

Note that a long vowel shortens before **-nd**.

B. Some Uses of the Participle

The tense of the participle is *relative* to that of the main verb. A *present* participle refers to an action *contemporaneous* with that of the main verb; a *perfect* participle refers to an action *prior* to that of the main verb; a *future* participle refers to an action *subsequent* to that of the main verb. There are some problems which arise in this system because of the lack of certain participial forms (i.e., present passive and perfect active), but these may be circumvented easily, as will be seen later.

Multiple interpretations of a participle are possible in English:

1. PRESENT ACTIVE PARTICIPLE

Fēmina clāmāns discessit. The *shouting* woman departed.
 The woman departed *shouting*.
Shouting, the woman departed.
 The woman *who was shouting* departed.
 The woman, *since she was shouting*, departed.
 The woman, *although she was shouting*, departed.
When (while) she was shouting, the woman departed.
If she was shouting, the woman departed.

OBSERVATIONS:

- In each case, the present participle **clāmāns** refers to an action which was going on at the same time as that of the main verb.
- The participle can be translated into English with causal ("since"), concessive ("although"), temporal ("when, while"), or conditional ("if") force. The participle alone, then, can stand for the if-clause (protasis) of a conditional sentence. It can also stand for a relative clause. The interpretation of a participle must depend upon the requirements of the *context* of each specific passage.
- Frequently when a participle is meant to be taken as concessive, the word **tamen**, 'nevertheless', is inserted to qualify the main verb.

Fēmina clāmāns tamen discessit. Although the woman was shouting, nevertheless she departed.

2. PERFECT PASSIVE PARTICIPLE

Fēmina terrīta clāmāvit. The *having-been-frightened* woman shouted.
 The woman, *having been frightened*, shouted.
Having been frightened, the woman shouted.
 The *frightened* woman shouted.
 The woman *who had been frightened* shouted.
Since she had been frightened, the woman shouted.
Although she had been frightened, the woman shouted.
When (after) she had been frightened, the woman shouted.
If she had been frightened, the woman shouted.

OBSERVATIONS:

- The perfect passive participle refers to an action which occurred prior to the time of the main verb.
- The absence of the perfect active participle in Latin makes it impossible at this stage of our study to express a verbal idea in the active voice as having occurred prior to the time of the main verb.

The woman, having shouted (after she had shouted), departed.

A subordinate clause, introduced perhaps by the subordinating conjunction **postquam**, 'after', would have to be used in this case:

Postquam clāmāvit, fēmina discessit. After she shouted, the woman departed.

3. FUTURE ACTIVE PARTICIPLE

- Fēmina discessūra virum vidit. The *about-to-depart* woman saw (her) husband.
- The woman, *about to depart*, saw (her) husband.
- About to depart*, the woman saw (her) husband.
- The woman *who was about (going) to depart* saw (her) husband.
- Since* the woman *was going to depart*, she saw (her) husband.
- Although* the woman *was going to depart*, she saw (her) husband.
- When (as)* the woman *was going to depart*, she saw (her) husband.
- If* the woman *was going to depart*, she saw (her) husband.

OBSERVATION: The future active participle refers to an action which will occur or has occurred subsequent to that of the main verb.

4. FUTURE PASSIVE PARTICIPLE

- Librōs legendōs in mēnsā posuit. He placed *having-to-be-read* books on the table.
- He placed books *to be read* on the table.
- He placed books *which had to be read* on the table.

OBSERVATIONS:

- The future passive participle refers to an action which will occur or has occurred subsequent to that of the main verb.
- The future passive participle (sometimes called the *gerundive*) carries with it the notion of obligation, necessity, or propriety.

These participial constructions may occur in any grammatical case:

- Fēminae discessūrae pecūniā dedit. He gave money to the *about-to-depart* woman.
- He gave money to the woman who was *about to depart*.

C. Periphrastics

The future participles (active and passive) are compounded with the verb **sum** to form the active and passive periphrastic conjugations.

1. ACTIVE PERIPHRASTIC CONJUGATION

The active periphrastic is translated by the English ‘about to, going to, ready to’.

INDICATIVE:

Pres.	<i>optātūrus (-a, -um)</i>	sum	I am about to desire
Impf.	<i>optātūrus (-a, -um)</i>	eram	I was about to desire
Fut.	<i>optātūrus (-a, -um)</i>	erō	I shall be about to desire
Perf.	<i>optātūrus (-a, -um)</i>	fui	I have been (was) about to desire
Plupf.	<i>optātūrus (-a, -um)</i>	fueram	I had been about to desire
Fut. Pf.	<i>optātūrus (-a, -um)</i>	fuerō	I shall have been about to desire

SUBJUNCTIVE:

Pres.	<i>optātūrus (-a, -um)</i>	sim
Impf.	<i>optātūrus (-a, -um)</i>	essem
Perf.	<i>optātūrus (-a, -um)</i>	fuerim
Plupf.	<i>optātūrus (-a, -um)</i>	fuissem

2. PASSIVE PERIPHRASTIC CONJUGATION

The passive periphrastic is translated by ‘have (has) to, should, ought to’, or ‘must’.

INDICATIVE:

Pres.	<i>optandus (-a, -um)</i>	sum	I am having-to-be desired, I have to be desired, I should (ought to) be desired, I must be desired
Impf.	<i>optandus (-a, -um)</i>	eram	I had to be desired
Fut.	<i>optandus (-a, -um)</i>	erō	I shall have to be desired
Perf.	<i>optandus (-a, -um)</i>	fui	I had to be desired
Plupf.	<i>optandus (-a, -um)</i>	fueram	I had had to be desired
Fut. Pf.	<i>optandus (-a, -um)</i>	fuerō	I shall have had to be desired

SUBJUNCTIVE:

Pres.	<i>optandus (-a, -um)</i>	sim
Impf.	<i>optandus (-a, -um)</i>	essem
Perf.	<i>optandus (-a, -um)</i>	fuerim
Plupf.	<i>optandus (-a, -um)</i>	fuissem

These compound periphrastic forms should not be confused with the compound passives of the perfect system which have been met earlier. Distinguish:

optātus est	he has been desired	(passive)
optātūrus est	he is about to desire	(active periphrastic)
optandus est	he is (has) to be desired	(passive periphrastic)

D. Dative of Agent with the Passive Periphrastic

Personal agent is regularly expressed by the ablative case preceded by the preposition **ā** (**ab**). With the passive periphrastic, however, the personal agent is normally expressed by the dative case without a preposition. In fact, this use of the dative is purely referential; the action of the verb is viewed as necessary with reference to the agent.

Poēta rēgīnae videndus est. The poet must be seen *by the queen*.

(Note that the -us ending on **videndus** agrees with the subject **poēta** which is masculine.)

E. Dative of the Possessor

With forms of the verb **sum**, the dative is sometimes used to show possession. The *possessor* is put into the dative case.

Corōna est rēgīnae. A crown is *to the queen*; *the queen* has a crown; the crown is *the queen's*.

Liber est amicō. A book is *to the friend*; *the friend* has a book; the book is *the friend's*.

F. The Verb **possum**, 'be able'

This verb is a compound of **sum**. In the present system, when the form of **sum** begins with **s**, the prefix **pos-** is added to conjugate **possum**; when the form of **sum** begins with **e**, the prefix **pot-** is added. The imperfect subjunctive is constructed, as usual, on the full present infinitive, and the perfect system is formed as one might expect.

G. Complementary Infinitive and Object Infinitive

There are verbs in Latin which frequently require an infinitive to complete their meaning. Some of these are verbs which express ability, will, desire, and the like.

Amicum vidēre optō. I desire *to see* (my) friend.

Amicum vidēre possum. I am able *to see* (my) friend.

Bonus esse vidētur. He seems *to be* good.

Such infinitives are called *complementary* infinitives because they *complete* the idea of the verb. When they are used with transitive verbs, as in the first example above, they are in effect *object* infinitives since they function as the direct object of the transitive verb.

UNIT FIVE — NOTES ON VOCABULARY

The prepositions **ante**, ‘before’, and **post**, ‘after’, are well known, since one speaks of the ante-bellum South, or the post-bellum South, for example, in reference to the Civil War. These expressions will serve as reminders that both prepositions govern the accusative case. Both words can be used adverbially as well: **ante**, ‘previously, before’; **post**, ‘afterwards, after, behind’. And so, one

might say either **Urna ante mēnsam posita est**, ‘The urn was placed in front of the table’, or **Litterās ante scripsimus**, ‘We wrote the letter before’.

The word **arma**, **armōrum** has no singular; it is a neuter word found only in the plural.

Aurum, **auri**, N., ‘gold’, has as its adjective **aureus**, **-a**, **-um**, ‘golden, of gold’. The chemical symbol for gold, *Au*, comes from the first two letters of **aurum**.

Autem, ‘however, moreover’, like **enim**, ‘indeed’, is a postpositive conjunction; it cannot be the first word in a clause.

Cēdō, **cēdere**, **cessi**, **cessus** is another verb with many compounds. It means ‘go, move, yield’, and so **accēdō** (*ad* + **cēdō**) is ‘go to, approach’; **discēdō** (*dis-*, ‘apart’ + **cēdō**), ‘go from, depart, leave’; **excēdō**, ‘go out’; **recēdō**, ‘go back’, etc.

Dēbeō, **dēbēre**, **dēbui**, **dēbitus**, when used with an infinitive, means ‘ought’; otherwise it means ‘owe’.

Ferrum, **ferri**, N., is the word for ‘iron’ (chemical symbol *Fe*); it can also mean ‘sword’.

Imperō, **imperāre**, **imperāvī**, **imperātus**, ‘order, command’, may govern the dative case. One gives a command to someone that he do something (*ut* or [negative] *nē* + subjunctive): **Fēminaē ut canat imperō**, ‘I order the woman to sing’.

Interficiō is another compound of **faciō** and means ‘kill’.

Magister, **magistri**, M., is the person in charge of something, ‘superior, director, master, teacher’.

Medius, **-a**, **-um** means ‘the middle of’; it is an adjective like any other adjective, taking the case of the noun which it modifies: **in mediō oppidō**, ‘in the middle of the town’; **ad medium oppidum**, ‘toward the middle of the town’.

Moveō, **movēre**, ‘move’, lengthens its **-o-** in the perfect tenses: **mōvī**, **mōtūs**. **Removeō**, a compound of **re-** + **moveō**, means ‘move back, remove, take away, set aside’.

Nōscō, **nōscere**, **nōvī**, **nōtus** and **cognōscō**, **cognōscere**, **cognōvī**, **cognitus** both mean ‘learn’ in the present, imperfect, and future tenses. However, once one has learned something, he knows it; therefore, the perfect tenses mean ‘know’.

Umquam (sometimes spelled **unquam**) means ‘ever’; its opposite, **numquam** (sometimes spelled **nunquam**) means ‘never’.

Pius, **-a**, **-um**, ‘loyal, dutiful, pious’, has as its negative counterpart **impious**, **-a**, **-um**, ‘irreverent, wicked, impious’; the prefix **in-** may have the meaning ‘not’.

Populus with a short **-o-** means ‘people’ and is masculine; with a long **-ō-** it means ‘poplar tree’ and is feminine. Obviously, a careful pronunciation is needed to make a distinction between these two words. **Populus**, **populī**, M., ‘people’, is a collective noun and since it is singular, any adjective modifying it or verb used with it must also be singular. In the plural, it means ‘peoples’.

Possum, posse, potui has no fourth principal part; it means ‘be able, can’. If the meaning ‘be able’ is used, it will be easy to remember that a complementary infinitive is used with **possum**. A complementary infinitive completes the meaning of an intransitive verb. “I am able” or “I ought” does not mean anything until an infinitive is used to complete the meaning: **Canere possum**, ‘I am able to sing’; **Ferrum removere dēbeō**, ‘I ought to remove the sword’.

The conjunction **postquam**, ‘after’, is sometimes cut up into two parts (**post...quam**); this is called *tmesis*. By dividing the word, one gives the sentence a greater cohesion: **Dominus post interfectus est quam trāditus est**, ‘The master was killed after he had been betrayed’.

The present stem of **ruō, ruere, rui, rutus**, ‘fall, go to ruin, rush’, is the same as the perfect active stem; thus, **ruit**, ‘he rushes’, or ‘he has rushed’.

The adjective **socius, -a, -um**, ‘allied’, when used substantively means ‘ally’: **Multī socii Rōmānī in magnō bellō pūgnāvērunt**, ‘Many (men) allied to the Romans fought in the great war’ or ‘Many men fought in the great war as allies to the Romans’. Often adding the English word “as” makes for a smoother translation of a Latin sentence: **Et domini et servī pii ad ārās deōrum vēnērunt**, ‘Both the dutiful masters and slaves came to the altars of the gods’ or ‘Both the masters and slaves came to the altars of the gods as dutiful men’.

UNIT SIX

A. Nouns of the Third Declension

Nouns of the third declension occur very frequently in Latin and are distinguished by the genitive singular ending **-is**. This declension admits of all three genders, and while there are several minor variations within the system, all nouns in this declension can be dealt with easily according to the observations which follow.

In order to decline a noun of the third declension, determine the *stem* by dropping the genitive singular ending and then add the specified endings for this declension.

Dat.	-i	-ibus	-i	-ibus	
Acc.	-em	-ēs (-is)	--	-a (-ia)	
Abl.	-e	-ibus	-e (-i)	-ibus	

OBSERVATIONS:

- As is the case with all neuter nouns in Latin, the nominative and accusative forms of each number are identical.
- There is no specific nominative singular ending for this declension. It must be learned for each noun as a vocabulary item.
- The alternate endings in parentheses above belong to a class of nouns called *i-stems*. In this book, nouns which are i-stems will be signaled in the vocabulary by the addition of the genitive plural ending **-ium** to the regular principal parts: **māter, mātris, F.**, 'mother'; but **urbs, urbis, -ium, F.**, 'city'. Those who care to learn rules for determining which nouns are i-stems may find the notes at the end of this section helpful.

4. Masculine and feminine i-stems frequently have -is as an alternate for -ēs in the accusative plural.

It will be easy to decline the following nouns according to the observations above.

rūmor, -ōris, M.	rumor, gossip
nox, noctis, -ium, F.	night
sīdus, -eris, N.	star, constellation
moenia, -ium, N. (only in pl.)	(city) walls

NOTES: RULES FOR DETERMINING WHICH THIRD DECLENSION NOUNS ARE I-STEMS
A third declension noun will generally be an i-stem if:

1. the nominative and genitive singular have the same number of syllables:

ignis, ignis, -ium, M. fire

2. the stem of the noun ends in two consonants *except* if the second consonant is an I or r:

nox, noctis, -ium, F. night
mōns, montis, -ium, M. mountain

BUT:

pater, patris, M. father
māter, mātris, F. mother

(even though the first rule applies also)

3. the nominative singular of a neuter noun ends in -e, -al, or -ar:

mare, maris, -ium*, N.	sea
animal, animālis, -ium, N.	animal
exemplar, exemplāris, -ium, N.	model

These neuter words end in -i in the ablative singular (instead of -e) and in -ia in the nominative and accusative plural.

* Although this form is not found in extant literature, it has been reconstructed here.

B. Infinitives

Although the Latin verb has six infinitives — present active, present passive, perfect active, perfect passive, future active, and future passive — only five are in common use. In addition, the future active and future passive participles combined with an infinitive of the verb sum yield the infinitives of the active and passive periphrastic conjugations.

1. PRESENT INFINITIVE

- a) ACTIVE. The present active infinitive is the second principal part of the verb:

optāre	to desire
dūcere	to lead

- b) PASSIVE. To form the present passive infinitive for the first, second, and fourth conjugations, replace the final -e of the active infinitive with -i. For the third conjugation, replace the entire -ere with -i:

optāri	to be desired
implēri	to be filled
dūci	to be led
incipi	to be begun
sentiri	to be felt

2. PERFECT INFINITIVE

- a) ACTIVE. The perfect active infinitive is formed for all verbs by adding -isse to the stem of the third principal part:

optāvisse	to have desired
implēvisse	to have filled
dūxisse	to have led
incēpisse	to have begun
sēnsisse	to have felt

- b) **PASSIVE.** The perfect passive infinitive is formed with the fourth principal part (perfect passive participle) plus the infinitive of **sum** (**esse**).

optātus, -a, -um esse	to have been desired
implētus, -a, -um esse	to have been filled
ductus, -a, -um esse	to have been led
inceptus, -a, -um esse	to have been begun
sēnsus, -a, -um esse	to have been felt

3. FUTURE INFINITIVE

- a) **ACTIVE.** The future active participle plus **esse** are the ingredients for the future active infinitive.

optātūrus, -a, -um esse	to be going to desire
implētūrus, -a, -um esse	to be going to fill
ductūrus, -a, -um esse	to be going to lead
inceptūrus, -a, -um esse	to be going to begin
sēnsūrus, -a, -um esse	to be going to feel

- b) **PASSIVE.** The future passive infinitive occurs so rarely in Latin that its discussion has been omitted from this text.

4. PERIPHRASTIC INFINITIVES

The periphrastic conjugations also have infinitives formed by compounding the present or perfect infinitives of the verb **sum** with the future active and future passive participles. In the active periphrastic conjugation, this infinitive (with **esse**) merges with, and is in fact one and the same thing as, the future active infinitive. The infinitive of the passive periphrastic carries with it the notion of obligation, necessity, or propriety, just as the finite passive periphrastic forms do.

- a) **ACTIVE.**

optātūrus esse	to be going to desire
optātūrus fuisse	to have been going to desire

- b) **PASSIVE.**

optandus esse	to have to be desired
optandus fuisse	to have had to be desired

C. Indirect Statement: Subject Accusative and Infinitive

The statement “Dawn is sprinkling the lands with a new light (day)” is a *direct* statement.

Aurōra terrās novō lūmine spargit.

After words which express or imply actions that take place in the head, such as saying, thinking, seeing, perceiving, knowing, and the like, we are able to

express statements *indirectly*; that is, the essence of the original speaker's ideas is reported by someone else, although not necessarily in his exact words.

He says that dawn is sprinkling the lands with a new light (day).

In English an indirect statement is generally introduced by the subordinating conjunction *that*, for which there is no equivalent in classical Latin. Instead, a construction with the subject in the accusative case and the verb in the infinitive is used.

In order to change a statement from direct to indirect, take the subject of the direct one and make it accusative; take the finite verb and change it to an infinitive. The rest of the sentence remains unchanged.

Dicit aurōram terrās novō He says *dawn to sprinkle* the lands with a new lūmine spargere. light (day); He says *that dawn is sprinkling* the lands with a new light (day).

The tense of the infinitive in this construction is relative to that of the main verb (much like the tense of participles discussed in the previous unit). The *present* infinitive expresses an action which is or was going on at the *same time* as that of the main verb; the *perfect* infinitive refers to an action which occurred *prior* to that of the main verb; and the *future* infinitive signals one which will occur *subsequent* to that of the main verb.

PRESENT INFINITIVE

Dicit aurōram terrās novō	He says (i.e., now) that dawn is sprinkling the lūmine spargere. lands with new light (i.e., now).
Dixit aurōram terrās novō	He said (i.e., yesterday) that dawn was lūmine spargere. sprinkling the lands with new light (i.e., yesterday).
Dicet aurōram terrās novō	He will say (i.e., tomorrow) that dawn is lūmine spargere. sprinkling the lands with new light (i.e., tomorrow)

PERFECT INFINITIVE

Dicit aurōram terrās novō	He says (i.e., now) that dawn has sprinkled lūmine sparsisse. (sprinkled) the lands with new light (i.e., yesterday).
Dixit aurōram terrās novō	He said (i.e., yesterday) that dawn had lūmine sparsisse. sprinkled the lands with new light (i.e., the day before yesterday).
Dicet aurōram terrās novō	He will say (i.e., tomorrow) that dawn has lūmine sparsisse. sprinkled (sprinkled) the lands with new light (i.e., today).

FUTURE INFINITIVE

Dicit aurōram terrās novō lūmine sparsūram* esse.	He says (i.e., now) that dawn will sprinkle the lands with new light (i.e., tomorrow).
Dixit aurōram terrās novō lūmine sparsūram esse.	He said (i.e., yesterday) that dawn would sprinkle the lands with new light (i.e., today).
Dicet aurōram terrās novō lūmine sparsūram esse.	He will say (i.e., tomorrow) that dawn will sprinkle the lands with new light (i.e., the day after tomorrow).

* Since the future active, perfect passive, and the periphrastic infinitives are composed of a participle and the infinitive of *sum*, the participle is, in effect, a predicate adjective and must agree with its noun (the subject of the indirect statement) in gender, number, and case.

D. The Irregular Noun *vis*

In the singular this noun regularly means 'force' or 'power'. In the plural it means 'strength'.

vis	virēs
--	virium
--	viribus
vim	virēs (viris)
vi	viribus

E. Ablative of Separation

Some verbs which express or imply separation or deprivation are accompanied by the ablative case. The prepositions **ā** (ab), 'away from', **ē** (ex), 'from, out of', or **dē**, 'from, down from', are sometimes used with this construction, but more usually the ablative occurs alone.

Hominēs incolās insulae servitūte liberāvērunt.	The men freed the inhabitants of the island <i>from slavery</i> .
Oedipus, quod liber (ē) cūrā nōn erat, sē oculis privāvit.	Oedipus, because he was not free <i>from care</i> , deprived himself <i>of (his) eyes</i> .

The word **careō**, -ēre, 'lack, be wanting', takes an ablative of separation:

Pecūniā careō. I lack *money*.

Allied with this construction are the following:

1. ABLATIVE OF ORIGIN

The ablative, with or without a preposition, expresses the origin or descent of a person or thing.

Aenēas (ē) **deā** nātus est. Aeneas is the son *from a goddess*.

2. ABLATIVE OF PLACE FROM WHICH

In order to express place from which, the ablative is used with the preposi-

tions **ā** (**ab**), **ē** (**ex**), or **dē**. But with names of towns, cities, and small islands, and the words **domus**, ‘home’, and **rūs**, ‘country’, no preposition is used.

Ab Italiā vēnit. He came *from Italy*.

BUT:

Rōmā vēnit. He came *from Rome*.

F. Accusative of Place To Which

Place to which is expressed by the accusative case with the preposition **ad**. With names of towns, cities, and small islands, and the words **domus**, ‘home’, and **rūs**, ‘country’, no preposition is used.

Ad Italianam vēnit. He came *to Italy*.

Ad urbēm vēnit. He came *to the city*.

BUT:

Rōmam vēnit. He came *to Rome*.

Domum vēnit. He came *home*.

G. The Locative Case (*locus*, *-ī*, M., ‘place’)

The names of towns, cities, and small islands, and the words **domus** and **rūs** require a special case to express *place in which* or *place where*, which for other nouns is expressed by the ablative with the preposition **in**. This case is called the *locative*.

For nouns of the first and second declensions, the locative singular is identical to the genitive singular. In the plural for these two declensions, it is identical in form to the ablative plural.

For nouns of the third declension, the locative ends in either **-e** or **-ī** in the singular, in **-ibus** in the plural.

<i>Rōmae</i>	at Rome	(<i>Rōma</i> , <i>-ae</i> , F.)
<i>Athēnīs</i>	at Athens	(<i>Athēnae</i> , <i>-ārum</i> , F.)
<i>domī</i>	at home	(<i>domus</i> , <i>-i</i> , F.)
<i>Carthāgīne</i>	at Carthage	(<i>Carthāgō</i> , <i>-inis</i> , F.)
	or <i>Carthāgīnī</i>	
<i>rūrī</i>	in the country	(<i>rūs</i> , <i>rūris</i> , N.)

UNIT SIX — NOTES ON VOCABULARY

Athēnae, Athēnārum, ‘Athens’, is a feminine plural word.

The verb **careō, carēre, carui, caritus**, ‘lack, be without’, governs the ablative case: **Lūmine carēmus**, ‘We are without light’. The mark ^, a caret, shows that something is lacking.

Dicō, dicere, dixi, dictus, ‘say, tell, speak’, often governs an object and an indirect object. Verbs of giving, telling, and showing take an indirect object. **Rūmōrem auditum frātri dicam**, ‘I shall tell my brother a rumor that I’ve heard’.

The word **domus** is sometimes considered a second declension noun and sometimes a fourth declension noun. In this book it is presented in Unit Six as second declension, and again in Unit Eight as second or fourth. Note that it is a feminine word even though it has the same endings as a masculine noun in the second declension.

Exemplar, exemplāris, N., and **exemplum, exemplī**, N., may be used interchangeably. The abbreviation e.g., **exempli grātiā** (*grātiā*, with preceding genitive, ‘for the sake of’), means ‘for the sake of an example’.

Moenia, moenium is a neuter plural word of the third declension; these are protective (city) walls as opposed to the walls of a house.

Nōn sōlum... sed etiam means ‘not only...but also’: **Nōn sōlum sorōre sed etiam frātre careō**, ‘I am without not only a sister but also a brother’.

Notice that **māter, mātris**, F., ‘mother’, **pater, patris**, M., ‘father’, and **frāter, frātris**, M., ‘brother’, are not i-stems and that **pater** has a short -a-.

Regō, regere, rēxi, rēctus, ‘rule’, lengthens its -e- in the perfect tenses. **Rēx, régis**, M., ‘king’, and **rēgnūm, rēgnī**, N., ‘kingdom’, are connected with this verb.

The ending **-tūs, -tūtis** is a feminine ending of abstract nouns that indicates a quality or state of being. **Servus** is ‘slave’ and so **servitūs, servitūtis**, F., is the ‘state of being a slave’, that is, ‘slavery’.

Students often have difficulty with the irregular noun **vīs**. In the singular, which lacks a genitive and dative form, the meaning is ‘force, power’ and in the plural, it means ‘strength’. There is no reason to confuse it with **vir**, ‘man’, which has a short -i- and belongs to the second declension, since **vīs** has a long -i- and is a third declension noun. The accusative plural of ‘men’ is **virōs**, of ‘strength’, **vīrēs** or **vīrīs**. The dative and ablative plural of ‘men’ is **virīs**, of ‘strength’, **vīribus**.

UNIT SIX — DRILL

I.

Supply forms of the adjective **bonus**, -a, -um to modify the following nouns.

<i>miles, militis, M.</i>	<i>soldier</i>
<i>soror, sorōris, F.</i>	<i>sister</i>
<i>corpus, corporis, N.</i>	<i>body</i>
<i>mēns, mentis, -ium, F.</i>	<i>mind</i>
<i>exemplar, -āris, -ium, N.</i>	<i>example, model</i>

1. miles	11. militi	21. milite	31. militum
2. soror	12. sorōri	22. sorōre	32. sorōrum
3. corpus	13. corpori	23. corpore	33. corporum
4. mēns	14. menti	24. mente	34. mentium
5. exemplar	15. exemplāri	25. exemplāri	35. exemplārium
6. militis	16. militem	26. militēs	36. militibus
7. sorōris	17. sorōrem	27. sorōrēs	37. sorōribus
8. corporis	18. corpus	28. corpora	38. corporibus
9. mentis	19. mentem	29. mentēs	39. mentibus
10. exemplāris	20. exemplar	30. exemplāria	40. exemplāribus

II.

A. Rewrite these sentences in indirect statement after **sentit**, ‘he feels’:

1. *Puella incolās dē periculō monet (monēbit, monuit).*
2. *Fēminaē sententiās semper mūtant (mūtābunt, mūtāvērunt).*
3. *Tēcta in mediō oppidō flammis dēlentur (dēlēta sunt).*
4. *Socii ē terrā discēdere nōn possunt (potuērunt).*
5. *Amicus vitam sine culpā agit (aget, ēgit).*
6. *Vita bona ab aīnicō agitur (ācta est).*
7. *Honesti in periculō nōn pōnendi sunt (pōnendi erant).*
8. *Litterae ad magistrum mittuntur (mittēbantur).*
9. *Nōti dē malis cōgitant (cōgitābunt, cōgitābant).*
10. *Oppidum ab inimicis trāditur (trāditum est).*
11. *Amicō est (erat, erit) multa pecūnia.*
12. *Sine cūrā rēgina vivere nōn potest (potuit).*

B. Translate the indirect statements you wrote above, first after **sentit**, ‘he feels’, then after **sēnsit**, ‘he felt’.

III.

Omit the initial verbs of the head and rewrite the indirect statements as direct ones:

1. *Vidimus fāmam rēginae esse (fuisse, futūram esse) magnam.*
2. *Cognōverātis incolās rēginae multam pecūniā dēbēre (dēbuisse).*
3. *Respondit bellum cum diligentiā pūgnātum esse (pūgnāri).*

4. Intellegō nautās villam perdidisse (perdere, perditūrōs esse).
5. Intellēxi villam à nautis perditam esse (perdi).
6. Sentiunt honestōs malum ē terrā pellere nōn posse (potuisse).

IV.

Translate the following sentences which contain “place” constructions or ablatives of separation or source:

1. Multōs familiā honestā nātōs ab oppidō ad īsulam misimus. [**familia**, -ae, F., ‘family’]
2. Multōs Syrācūsīs Tarentum mīsimus. [**Syrācūsae**. -ārum, F. pl., ‘Syracuse’, a city in Sicily; **Tarentum**, -ī, N., ‘Tarentum’, a town in Southern Italy]
3. Ruīnae Syrācūsīs vidēri potuērunt, sed neque Tarentī neque in patriā.
4. Ē viā in cellam ambulāvērunt.
5. Liberi invidiā vitam agimus.
6. Malōs magnā vi dē saxō altō iactāverant. [**iactō** (1), ‘throw, hurl’]

UNIT SIX — PRELIMINARY EXERCISES (SECTION A)

1. Rēx militibus imperāvit nē discēderent.
2. Multa lūmina urbis ab hominibus captis visa sunt.
3. Flammae ignium multōrum nōn sōlum in monte sed etiam in marī visae sunt.
4. Multa animālia sorōribus frātribusque mōnstrāvimus.
5. Patri erat magnus timor maris.
6. Si mentēs militum timōre implēbuntur, hominēsne pūgnāre poterunt?
7. Liberi servitūtem timent et cum vigōre pūgnābunt nē servi sint.
8. Rūmōrēsne novōs dē moenibus igni dēlētis audivistis?
9. Militēs domōs mātrum patrumque vidēre optāvērunt.
10. a) Corpora multōrum hominum vigōre carent.
b) Corpora multōrum animālium valida sunt.

UNIT SEVEN

A. Demonstrative Adjectives

Demonstrative (**dēmōnstrō** (1), ‘point out’) adjectives *point out* the word with which they agree. There are three demonstrative adjectives of extreme importance:

- (1) **hic, haec, hoc**, ‘this’
- (2) **ille, illa, illud**, ‘that’
- (3) **is, ea, id**, ‘this’ or ‘that’ (unemphatic)

Hunc (illum, eum) virum vidēs. You see *this (that, this or that)* man.

Cum hōc (illō, eō) virō ambulās. You walk with *this (that, this or that)* man.

Vidēsne hoc (illud, id) dōnum? Do you see *this (that, this or that)* gift?

The connotative distinctions between **hic**, **ille**, and **is** can be gauged from the following:

Hunc librum optās? Do you want this book (i.e., here, as opposed to that book there)? [Emphatic Demonstrative]

Illum librum optās? Do you want that book (i.e., there, as opposed to this book here)? [Emphatic Demonstrative]

Eum librum optās? Do you want this (that) book (i.e., the one just referred to, e.g.)? [Unemphatic Demonstrative]

As is the case with other adjectives, **hic**, **ille**, and **is** are often found used substantively:

Hunc (illum, eum) vidēs. You see *this (that, this or that)* man.

Cum hōc (illō, eō) ambulās. You walk with *this (that, this or that)* man.

Vidēsne hoc (illud, id)? Do you see *this (that, this or that)* thing?

In English it is often more convenient to translate **is**, **ea**, **id** when used substantively as a pronoun or, as in the last two examples below, as a possessive adjective:

Eum vidēs. You see *this (that)* man; you see *him*.

Cum eō ambulās. You walk with *this (that)* man; you walk with *him*.

Vidēsne id? Do you see *this (that)* thing? Do you see *it*?

Eius librum habeō. I have the book *of this (that)* man (woman); I have the book *of him (her)*; I have *his (her)* book.

Patrem eārum vidēmus. We see the father *of these (those)* women; we see the father *of them*; we see *their* father.

B. Personal Pronouns

Since the endings of a Latin verb already indicate the subject of that verb, personal pronouns are not required. However, pronouns in the nominative case are sometimes used for *emphasis*.

Clāmō. I shout.

Ego clāmō. It is *I* who shout; *I* am the one who shouts.

The other cases of the personal pronouns are used as they are in English, i.e., as substitutes for nouns.

Librum mihi dat. He gives the book *to me*.

Mē videt. He sees *me*.

Mēcum ambulās. You are walking with *me*. (Note that, with personal pronouns, the **cum** is regularly attached as a suffix to the pronoun instead of preceding it.)

1. FIRST PERSON

ego	I	nōs	we
mei	of me	nostrum}	of us
mihi	to/for me	nōbis	to/for us
mē	me	nōs	us
mē	from/with/in/by me	nōbis	from/with/in/by us

2. SECOND PERSON

tū	you	vōs	you
tui	of you	vestrum}	of you
tibi	to/for you	vōbis	to/for you
tē	you	vōs	you
tē	from/with/in/by you	vōbis	from/with/in/by you

NOTE: **Nostrum** and **vestrum** are used as *partitive* genitives (page 154):

multi **nostrum** many *of us* ("many" is the part, "us" is the whole)

Nostri and **vestri** are used as *objective* genitives; that is, they function as the *object* of the word on which they depend (pages 178–9):

Odium **nostri** est magnum. The hatred *of (for) us* is great.

(**nostri** is the *object* or recipient of the hatred)

3. THIRD PERSON

There is no third person personal pronoun as such. As indicated in section A above, the forms of *is*, *ea*, *id* are frequently used without a noun as a substitute for the third person pronoun. However, a third person *reflexive* pronoun does occur.

4. REFLEXIVE PRONOUNS

A *reflexive* (**reflectō**, **-ere**, **-flexī**, **-flectus**, 'bend back, reflect') pronoun generally refers to or *reflects* the subject of its own clause; therefore, it cannot have a nominative case.

In the first and second persons, there is no separate reflexive pronoun; one uses simply the correct case of *ego* or *tū*, and whether the usage is reflexive or not can be determined from the relationship of the pronoun to the subject: If they are the same person or thing, then the pronoun is reflexive; if they are different, then the pronoun is not reflexive.

- Mē videō. I see *myself*. (Reflexive)
 Mē videt. He sees *me*. (Not Reflexive)
 Tē vidēs. You see *yourself*. (Reflexive)
 Tē videt. He sees *you*. (Not Reflexive)

In the third person, however, a separate form is used.

Sē videt. He (she, it) sees *himself (herself, itself)*.

Sē vident. They see *themselves*.

Note the following examples, which illustrate reflexive and nonreflexive usage:

- Eum videt. He (person A) sees *him* (person B).
 Sē videt. He sees *himself*.
 Eōs videt. He sees *them*.
 Sē vident. They see *themselves*.
 Mē videt. He sees *me*.
 Mē videō. I see *myself*.

C. Possessive Adjectives

The possessive adjectives for the first person are **meus**, -a, -um, 'my', and **noster**, **nostra**, **nostrum**, 'our'. For the second person, they are **tuus**, -a, -um, 'your', and **vester**, **vestra**, **vestrum**, 'your'. Since they are adjectives, they must agree with the thing possessed in gender, number, and case.

- Tuum frātrem videō. I see *your* brother.
 Nostram mātrem vidēmus. We see *our* mother.
 Meum imperium ādit. He hates *my* authority.

As has been seen throughout this text, the possessive adjective need not be expressed in Latin when its sense can be inferred easily from the context. When the adjective is used in Latin, it is strictly emphatic or is used to clarify a point which the context would otherwise leave obscure.

- Patrem videō. I see (my) father.

BUT:

- Patrem **meum** videō. I see *my* father.
 (the adjective is emphatic or elucidative, i.e., as opposed to "your" father, "their" father, etc.)

The possessive adjective for the third person is **suus**, **-a**, **-um** (singular and plural), but this word is used only *reflexively*; that is, the thing possessed belongs to the subject. When reflexive possession is not desired in the third person, a form of **is**, **ea**, **id** in the genitive case is used.

Suum imperium ūdit. He/she hates *his/her (own)* authority.

Suum imperium ūdērunt. They hate *their (own)* authority.

BUT:

Eius imperium ūdit. He/she hates the authority *of him (her/it/this one/that one)*; he/she (person A) hates *his/her/its* (person B's or something's) authority.

Eōrum imperium ūdērunt. They hate the authority *of them (of these/those men)*; they (group A) hate *their* (group B's) authority.

OBSERVATION: The genitive of the personal pronouns is *never* used to show possession. In order to express possession in the first and second persons, the *possessive adjectives* must be used.

D. Relative Pronoun

The relative pronoun introduces an adjectival clause which modifies the antecedent (**ante + cēdō**, 'go before'; thus, 'that which goes before') of that pronoun.

The man *whom* you see is my friend.

The relative pronoun "whom" agrees in gender and number with its antecedent, "man", but its case is determined by its use in its own clause. Consequently in Latin the pronoun is masculine singular because of its antecedent, but accusative because it is the object of the verb "you see".

The forms of the relative pronoun follow:

SINGULAR			PLURAL		
M.	F.	N.	M.	F.	N.
qui who	quae who	quod which (that)	qui	quae	quae
cuius of whom, whose	cuius cui	cuius cui	quōrum quibus	quārum quibus	quōrum quibus
cui to/for whom	cui quam	cui quod	quibus quōs	quibus quās	quibus quae
quem whom	quā from/with/in/by	quō whom	quibus quibus	quibus quibus	quibus quibus

Note these examples:

Poēta **cuius** amicus erat The poet *of whom* the friend was blind was
 caecus puerum audiēbat. listening to the boy; the poet *whose* friend
 was blind was listening to the boy.

(**cuius**: masculine singular because of its antecedent **poēta** which is masculine singular; genitive because of its dependence on **amicus** in its own clause)

Fēminās **quae** in viā clāmant ōdimus. We hate the women who shout in
 the street.

(**quae**: feminine plural because of its antecedent **fēminās** which is feminine plural;
 nominative because it is the subject of the verb **clāmant**)

THE RELATIVE PRONOUN AT THE BEGINNING OF A SENTENCE (CONNECTING RELATIVE)

The relative pronoun is frequently used in Latin to begin a sentence where the English would use a demonstrative or a personal pronoun. Since the antecedent of the relative pronoun is a word or idea in the previous sentence, this usage makes for greater cohesion between sentences and thoughts.

Filius dixit urbem in periculō magnō My son said that the city was in great
 esse. **Quae** postquam audivī, vērō danger. After I heard *which things*
 timēbam. (*these things*), I was truly afraid.

Miles mē monuerat ut ex oppidō The soldier had warned me that I
 discēderem. **Quem** postquam mē depart from the town. After I
 interfectūrum esse sēnsi, mox perceived that *whom (he)* was
 discessi. going to kill me, I soon (i.e.,
 thereupon) departed

E. Interrogative Adjective

The interrogative adjective (which? what?) is identical in form to the relative pronoun.

Quem virum vidēs? *Which (what) man do you see?*

Cum **quō** virō ambulās? *With which (what) man are you walking?*

Quod dōnum vidēs? *Which (what) gift do you see?*

F. Interrogative Pronoun

The interrogative pronoun is identical to the interrogative adjective in the *plural*; in the *singular*, the following forms are used:

M. F.	N.
quis	quid
cuius	cuius
cui	cui
quem	quid
quō	quō

Quem vidēs? *Whom* do you see?

Quōcum* ambulās? With *whom* are you walking?

Quid vidēs? *What* do you see?

- * Note that with the interrogative pronouns, as with personal pronouns, **cum** is regularly attached as a suffix to the pronoun instead of preceding it.

IN REVIEW — Note the following comparisons between pronominal and adjectival usage:

Pronoun: Cui taedam dedisti?	<i>To whom (to which one)</i> did you give the torch?
-------------------------------------	--

Adjective: Cui fēminaē taedam dedisti?	<i>To which (what) woman</i> did you give the torch?
---	---

Pronoun: Quis taedam tibi dedit?	<i>Who</i> gave you the torch?
---	--------------------------------

Adjective: Quae fēmina taedam tibi dedit?	<i>Which (what) woman</i> gave you the torch?
--	--

G. Ablative of Accompaniment

The ablative is used with the preposition **cum** to denote accompaniment.

Ad urbēm cum amīcō venit. He comes to the city *with (his) friend*.

Ad urbēm mēcum venit. He comes to the city *with me*.

H. Ablative of Time When or Within Which

Time when or within which is expressed by the ablative. A preposition is not regularly used.

Illō tempore miser erat. *At that time* he was unhappy.

Quīnque annīs hoc opus perficiet. *Within five years* he will complete this task.

I. Accusative of Duration of Time and Extent of Space

The accusative, usually without a preposition, is used to express duration of time or extent of space. It answers the question “for how long?”, whether it be of time or distance.

Quīnque annōs miser erat. *For five years* he was unhappy.

Quīnque pedēs ad dextram ambulāvit. He walked *five feet* to the right.

J. Subjunctive in Subordinate Clauses in Indirect Statement

Subordinate clauses within an indirect statement (subject accusative and infinitive) normally have their verbs in the subjunctive, the tense of which is frequently determined according to the rules of tense sequence (Unit Three, section G) after the verb or phrase of the head which introduces the indirect statement.

Vir quem **vidēs** pecūniam optat. The man whom you see desires money.

Dicō virum quem **videās** pecūniam I say that the man whom *you see* optare. (may see) desires money.

(present subjunctive, primary sequence, simultaneous action after **dicō**)

Dixi virum quem **vidērēs** pecūniam I said that the man whom *you saw* optare. (might be seeing) desired money.

(imperfect subjunctive, secondary sequence, simultaneous action after **dixi**)

Vir quem **vidisti** (vidēbās) pecūniam The man whom you saw desires optat. money.

Dicō virum quem **vidēris** pecūniam I say that the man whom *you saw* optare. (may have seen) desires money.

(perfect subjunctive, primary sequence, prior action after **dicō**)

Dixi virum quem **vidissēs** pecūniam I said that the man whom *you had seen* (might have seen) desired optare. money.

(pluperfect subjunctive, secondary sequence, prior action after **dixi**)

The development of this usage is logical, for the subjunctive is the mood of *idea, intention, possibility*, etc., as opposed to *fact*, and the person reporting the statement (in this case, “I”) does not claim responsibility that the subject of the relative clause (in this case, “you”) *actually* sees the man. The indicative might have been used in this case, but the tone would then be:

Dicō virum quem **vidēs** I say that the man whom *you actually see* (and I accept responsibility for this statement) desires pecūniam optare. money.

UNIT SEVEN — NOTES ON VOCABULARY

Cōficiō and **perficiō** are both compounds of **faciō** with an intensive prefix and mean ‘do completely, accomplish’. The **-ō-** of **cōficiō** is long because it precedes **-nf**. A vowel is lengthened before **-ns**, **-nf**, and **-nct**.

Genus, generis, N., not only means ‘descent, origin, race’, but also ‘sort’: **Est homō illius generis**, ‘He is a man of that sort’.

Hic, haec, hoc and **ille, illa, illud** are emphatic words which point out the word they modify: this book as opposed to that one; **hic liber... ille**. Since **ille** points to something further away, it can also mean the thing mentioned previously, ‘the former’, as opposed to the last thing said (**hic**, ‘the latter’).

Inveniō is a compound of **veniō**, ‘come’; it means ‘come upon, find’.

Is, ea, id is a weaker word; it does not point out so strongly as **hic** and **ille** and so it can mean either ‘this’ or ‘that’. Of course, when it is used substantively, ‘this man’, ‘this woman’, ‘this thing’ are more easily expressed as ‘he’, ‘she’, ‘it’. The abbreviation *i.e.*, **id est**, means ‘that is’.

Locus, loci, ‘place’, is masculine in the singular, but, most often, neuter in the plural, **loca, locōrum**, ‘places’. **Loci, locōrum**, masculine, when it does occur, usually refers to passages of literature or the points of an argument.

Ōdi is a defective verb. It has only perfect tenses and so the perfect infinitive is given. The perfect tense is translated as present, the pluperfect as imperfect, and the future perfect as future: **ōdi**, ‘I hate’, **ōderam**, ‘I hated’, **ōderō**, ‘I shall hate’.

Opus and **tempus**, like **corpus**, are neuter words whose nominative singular ends in **-us**. **Opus est** is an idiom meaning ‘there is need of’. What is needed is put into the nominative case or the ablative, less frequently the genitive; the person who is in need is in the dative case: **Opus tibi est mēnsa?** or **Opus tibi est mēnsā?** or **Opus tibi est mēnsae?**, ‘Do you need a table?’

Opprimō is a compound of **premō**. Once again, the vowel in the uncompounded verb weakens when the verb is compounded.

Qui, quae, quod can be either the relative pronoun ‘who, which, that’ or the interrogative adjective ‘which, what’. The relative pronoun will have an antecedent; the interrogative adjective will not, but, since it is an adjective, it will

be used with a noun: **Vir quem vidi mus nōs ōdit**, ‘The man whom we saw hates us’; **Quem librum legis?**, ‘What book are you reading?’

Quis, quid is the interrogative pronoun, ‘who, what’: **Quem vidēs?**, ‘Whom do you see?’

Salūs, salūtis, F., means ‘health, safety’; the idiom **salūtem dicere** means ‘to greet, say hello’: **Pater tuus nōbīs salūtem dixit**, ‘Your father said hello to us’.

Reflexive pronouns refer to the subject of the sentence or clause in which they occur (for exceptions, see Unit Fourteen, section E) and so there is no nominative case. The same forms are used for the singular and plural and for all three genders. The possessive adjective **suus, -a, -um** refers to something owned by the subject: **Rēgīna nautīs suīs imperāvit ut vēla darent**, ‘The queen ordered her sailors that they set sail’.

The pronoun **tū** is ‘you’, referring to one person; **vōs** is the plural ‘you’. The plural is never used as a polite form of ‘you’ in Latin as is the case in many modern languages. The possessive adjective **tuus, -a, -um** is used to indicate possession by a singular ‘you’: **vester, vestra, vestrum**, by the plural ‘you’: **tuus pater**, ‘your (singular ‘you’) father’; **tui librī**, ‘your (singular ‘you’) books’; **vester filius**, ‘your (plural ‘you’) son’; **vestrae sorōrēs**, ‘your (plural ‘you’) sisters’.

Vōx, vōcis, F., ‘voice’, is associated with **vocō**, ‘call’.

UNIT SEVEN — DRILL

I.

Give the gender, number, and case of the pronouns or adjectives in italics in the following sentences. Then, referring to the paradigms in the Unit, translate only those words into Latin.

1. Is *this* your book? Is *it* his?
2. With *whom* were *you* walking at *that* time? Not with *your* mother, but with *his*.
3. *What* do *you* think about the voice of *this* man?
4. *I* hate *those* men, but *I* love *these*.
5. To *whom* did *you* give the gifts *which* I sent *to you* from *that* island?
6. *This* man knew that *he* hated the voice of *that* man.
7. *I* completed the work, not *you*.
8. *Whose* book is *this* *which* was placed on *your* table?
9. The women *whom* we saw at *that* time were the mothers of *those* boys *to whom* we had given money.
10. (At) *what* time shall *we* see *them*?
11. *His* friends will love *him* and the woman *whom* he loves.

12. *Whose* right hand has written *that* book about which people say many good things?
13. The unhappy man sent gifts neither to *his* sister nor to *his* brother, but *his* friend sent gifts to *his* (i.e., the unhappy man's) mother.
14. The soldier hates *his* country's enemies and *he* desires to conquer *them*.
15. *We* lived in *their* country for five years and *they* did not consider *us* enemies.

II.

Translate the following sentences:

1. Scimus tē domum quae ardeat multōs mēnsēs incoluisse. [mēnsis, mēnsis, -ium, M., 'month']
2. Dixērunt sē per oppida in quibus socii vidēri potuissent trēs noctēs ambulāvisse. [trēs, fem. acc. pl. adj., 'three']

II.

Rewrite sentences 11, 13, and 28 in indirect statement after **dīcit** and **dīcēbat**. Translate each of the sentences you wrote.

III.

1. What book is this which has been sent to us by our friends (by his friends) with whom we were walking?
2. The man whom you saw at that time is the sailor to whom I gave those gifts.
3. For five years he hoped that he would complete this, his own work, but now he hates it.
4. We said that we would move five feet to the right in order that we might see your king with his queen and their sons.
5. Those wretched people not only hate themselves, but they also say that we hate them.

IV. Readings

- A. The poet Catullus, after renouncing his love for Lesbia, addresses her (Catullus 8.15–19):

... Quae tibi manet¹ vita?
 Quis nunc tē adibit?² Cui vidēberis bella?³
 Quem nunc amābis? Cuius esse dicēris?
 Quem bāsiābis?⁴ Cui labella⁵ mordēbis?⁶

¹ **maneō**, -ēre, **mānsi**, **mānsus**, 'remain' ² **adibit** (3rd person sing. future indicative), 'will approach' ³ **bellus**, -a, -um, 'beautiful' ⁴ **bāsiō** (1), 'kiss' ⁵ **labellum**, -i, N., 'little lip' ⁶ **mordeō**, -ēre, **momordi**, **morsus**, 'bite'

NOTE: For some observations on the rhythm of this and subsequent selections from verse which will appear in the readings, see *A Note on Quantitative Rhythm*, p. 401.

B. Martial 12.73:

Herēdem¹ tibi mē, Catulle,² dicis.
 Nōn crēdam,³ nisi⁴ lēgerō, Catulle.²

¹ **herēs**, **herēdis**, M., 'heir' ² **Catullus**, -i, M., a man's name; here, it is in the vocative case (the case of direct address; see Unit Eight, Section G) ³ **crēdō**, -ere, **crēdī**, **crēditus**, 'believe' ⁴ **nisi** (for **nī**): occasionally, certain metrical necessities cause a long vowel to shorten in verse.

C. Catullus 58:

Caeli,¹ Lesbia nostra, Lesbia illa,
 illa Lesbia, quam Catullus ūnam²
 plūs³ quam⁴ sē atque suōs amāvit omnēs,⁵
 nunc in quadriviis⁶ et angiportis⁷
 glūbit⁸ magnanimi⁹ Rēmī¹⁰ nepōtēs.¹¹

¹ **Caelius**, -i, M., a man's name; here, in the vocative case (the case of direct address; see Unit Eight, section G) ² **ūnus**, -a, -um, 'alone' ³ **plūs** (adv.), 'more' ⁴ **quam** (adv.), 'than' ⁵ **omnēs** (acc. pl. M.), 'all' ⁶ **quadrivium**, -i, N., 'crossroads' ⁷ **angiportum**, -i, N., 'alley' ⁸ **glūbō**, -ere, 'bark, peel, skin' ⁹ **magnanimus**, -a, -um, 'great-souled'
¹⁰ **Rēmus**, -i, M., 'Remus', the brother of Romulus, the founder of Rome ¹¹ **nepōs**, **nepōtis**, M., 'descendant'

D. Martial 1.38:

Quem recitās¹ meus est, O Fidentine,² libellus:³
 sed male⁴ cum⁵ recitās,¹ incipit esse tuus.

¹ **recitō** (1), 'recite' ² **Fidentinus**, -i, M., a man's name; here, in the vocative case (the case of direct address; see Unit Eight, section G) ³ **libellus**, -i, M., 'little book' ⁴ **male** (adv.), 'badly' ⁵ **cum** (conj.), 'when'

E. Martial 1.32:

Nōn amo tē, Sabidi,¹ nec possum dicere quārē:²
hoc tantum³ possum dicere, nōn amo tē.

¹ *Sabidius*, -i, M., a man's name; here, in the vocative case (the case of direct address; see Unit Eight, section G) ² *quārē* (adv.), 'why' ³ *tantum* (adv.), 'only'

F. Martial 5.43:

Thāis¹ habet nigrōs,² niveōs³ Laecānia¹ dentēs.⁴
Quae ratiō⁵ est? Ēmptōs⁶ haec habet, illa suōs.

¹ *Thāis* and *Laecānia* are names of women in the nominative case. ² *niger*, *nigra*, *nigrum*, 'black' ³ *niveus*, -a, -um, 'snowy white' ⁴ *dēns*, *dentis*, M., 'tooth' ⁵ *ratiō*, -ōnis, F., 'reason' ⁶ *ēmō*, -ere, *ēmi*, *ēmptus*, 'buy'

G. Martial 12.80:

Nē laudet¹ dignōs,² laudat¹ Callistratus³ omnēs.⁴
Cui malus est nēmō,⁵ quis bonus esse potest?

¹ *laudō* (1), 'praise' ² *dignus*, -a, -um, 'worthy' ³ *Callistratus*, -i, M., a man's name
⁴ *omnēs* (acc. pl. M.), 'all' (i.e., 'everyone') ⁵ *nēmō* (nom. sing.), 'no one'

H. Martial 7.3:

UNIT EIGHT

A. Adjectives of the Third Declension; Present Participles

There are two types of adjectives in Latin:

1. those which have the endings of the first and second declensions;
2. those which have the endings of the third declension.

First-second declension adjectives have already been learned. Most third declension adjectives are declined largely like i-stem nouns of the third declension. The important features are:

ablative singular: -i

genitive plural: -ium

accusative plural (M. and F.): -is as well as -es

nominative and accusative plural (N.): -ia

Adjectives of the first and second declension have three terminations; that is, there is a separate nominative singular form for each of the three genders (**bonus**, -a, -um). Adjectives of the third declension can have either three, two, or one termination. These varieties are illustrated below.

1. ADJECTIVES OF THREE TERMINATIONS

Adjectives of three terminations are given in the vocabulary in the masculine, feminine, and neuter nominative: **ācer**, **ācris**, **ācre**, 'sharp'.

SINGULAR			PLURAL		
M.	F.	N.	M.	F.	N.
ācer	ācris	ācre	ācrēs	ācrēs	ācria
ācris	ācris	ācris	ācrium	ācrium	ācrium
ācri	ācri	ācri	ācribus	ācribus	ācribus
ācrem	ācrem	ācre	ācrēs(-is)	ācrēs(-is)	ācria
ācri	ācri	ācri	ācribus	ācribus	ācribus

The stem for such adjectives will be found by dropping the ending from the feminine singular nominative form.

2. ADJECTIVES OF TWO TERMINATIONS

Adjectives of two terminations are given in the vocabulary in the masculine-feminine and neuter nominative: **omnis, omne**, 'every, all'.

SINGULAR		PLURAL	
M., F.	N.	M., F.	N.
omnis	omne	omnēs	omnia
omnis	omnis	omnium	omnium
omni	omni	omnibus	omnibus
omnem	omne	omnēs(-is)	omnia
omni	omni	omnibus	omnibus

3. ADJECTIVES OF ONE TERMINATION

Adjectives of one termination are given in the vocabulary in the masculine-feminine-neuter nominative and the genitive singular: **ingēns, ingentis**, 'huge'.

SINGULAR		PLURAL	
M., F., N.		M., F., N.	
ingēns		ingentēs, ingentia (neut.)	
ingentis		ingentium	
ingenti		ingentibus	
ingentem, ingēns (neut.)		ingentēs(-is), ingentia (neut.)	
ingenti		ingentibus	

The genitive singular for adjectives of one termination is given so that the stem on which the declension is built may be known.

4. PRESENT PARTICIPLES

Present participles are declined like third declension adjectives of one termination.

SINGULAR		PLURAL	
M., F., N.		M., F., N.	
optāns		optantēs, optantia (neut.)	
optantis		optantium	
optanti		optantibus	
optantem, optāns (neut.)		optantēs(-is), optantia (neut.)	
optanti(-e)		optantibus	

NOTE: For the moment, the following distinction between the **-i** and **-e** endings of the ablative singular should be remembered:

- i generally occurs when the participle is used as an attributive adjective
- e generally occurs when the participle is used as a noun

B. Fourth Declension Nouns

The genitive singular ending for the fourth declension is **-ūs**. While there are three genders of nouns in this declension, the neuter is rare.

frūctus, -ūs, M., 'enjoyment'

	SINGULAR	PLURAL
Nom.	frūctus	frūctūs
Gen.	frūctūs	frūctuum
Dat.	frūctui	frūctibus
Acc.	frūctum	frūctūs
Abl.	frūctū	frūctibus

Most nouns ending in **-us** in this declension are *masculine*; the others are *feminine*. Neuter nouns differ from this paradigm in these places:

1. the nominative and accusative singular end in **-ū**
2. the dative singular ends in **-ū**
3. the nominative and accusative plural end in **-ua**

C. Fifth Declension Nouns

The genitive singular ending is **-ei**, but when the stem ends in a vowel, the ending is **-ēi**. Most nouns of the fifth declension are *feminine*.

rēs, reī, F., 'thing'

	SINGULAR	PLURAL
Nom.	rēs	rēs
Gen.	reī	rērum
Dat.	reī	rēbus
Acc.	rem	rēs
Abl.	rē	rēbus

NOTE: This completes our discussion of the declensional system in Latin. There are no adjectives which have the endings of the fourth and fifth declensions. Also, the number of nouns which belong to these two declensions is limited; the great bulk of Latin nouns belongs to the third declension.

D. Ablative of Respect (Specification)

The *respect* in which a statement is true is expressed by the *ablative without a preposition*.

Haec fēmina speciē pulchra est.

This woman is beautiful *in (respect to) appearance*.

Meā sententiā nihil perficiunt.

In (respect to) my opinion, they will accomplish nothing.

E. The Irregular Verb *eō, ire*, 'go'

The verb *eō, ire, ii* (or *īvi*), *itus*, 'go', exhibits some irregularities in the present system. The rest of the verb is regular, except as follows:

1. In the perfect active indicative, the second person singular is *istū* (for *iistī*), and the second person plural is *istis* (for *iistī*).
2. The perfect active infinitive is *īsse* (for *iisse*), which provides the stem for the pluperfect active subjunctive. For the full conjugation, see Appendix, pp. 354–355.

PRESENT INDICATIVE

<i>eō</i>	<i>īmus</i>
<i>is</i>	<i>ītis</i>
<i>it</i>	<i>eunt</i>

IMPERFECT INDICATIVE

(conjugates according to normal rules for the imperfect, but with no *-iē-*)

<i>ibam</i>	<i>ībāmus</i>
<i>ibās</i>	<i>ibātis</i>
<i>ibat</i>	<i>ibant</i>

PRESENT SUBJUNCTIVE

<i>eam</i>	<i>eāmus</i>
<i>eās</i>	<i>eātis</i>
<i>eat</i>	<i>eant</i>

FUTURE INDICATIVE

(conjugates like first-second conjugation verbs with *-bi-*)

<i>ibō</i>	<i>ībimus</i>
<i>ibis</i>	<i>ibitis</i>
<i>ibit</i>	<i>ibunt</i>

PRESENT PARTICIPLE

īens, euntis

F. The Present Imperative (*imperō* (1), 'command')

The *imperative* is the mood of *command*. The present imperative is formed for the four conjugations as follows:

1. ACTIVE

For all conjugations, the *singular* imperative active is the present stem:

<i>optā!</i>	desire!	<i>incipē!</i>	begin!
<i>implē!</i>	fill!	<i>senti!</i>	feel!

For the first, second, and fourth conjugations, the *plural* imperative is formed by adding *-te* to the present stem; for the third conjugation, the stem vowel is changed from *-e* to *-i* before adding *-te*:

<i>optāte!</i>	desire!	<i>incipite!</i>	begin!
<i>implēte!</i>	fill!	<i>sentīte!</i>	feel!

EXCEPTIONS: The following third conjugation verbs do not have the *-e* in the singular of the present imperative active: *dicō*, 'say'; *dūcō*, 'lead'; *faciō*, 'make, do'; *ferō*, 'carry'.

dic!	BUT	dicite!
dūc!		dūcite!
fac!		facite!
fer!		ferte! (note absence of stem vowel -i-)

2. PASSIVE

The singular imperative passive is identical to the second person singular of the present passive indicative with the *-re* ending:

optāre!	be desired!
implēre!	be filled!
incipere!	be begun!
sentire!	be felt!

It will be noted that these forms look like those of the present active infinitive.

The plural imperative passive is identical to the second person plural of the present passive indicative:

optāmini!	be desired!
implēmini!	be filled!
incipimini!	be begun!
sentimini!	be felt!

3. NEGATIVE IMPERATIVES, ACTIVE AND PASSIVE

Negative imperatives are expressed by the command words *nōli* (singular) and *nōlite* (plural), 'be unwilling', followed by the present infinitive of the verb:

Nōli optāre!	Don't (sing.) desire!
Nōli optāri!	Don't (sing.) be desired!
Nōli implēre!	Don't (sing.) fill!
Nōli implēri!	Don't (sing.) be filled!
Nōli dūcere!	Don't (sing.) lead!
Nōli dūci!	Don't (sing.) be led!
Nōlite dūcere!	Don't (pl.) lead!
Nōlite dūci!	Don't (pl.) be led!

Negative imperatives may also be expressed with the present or perfect subjunctive (with no obvious distinction in meaning) introduced by *nē*:

Nē optēs.	May you not desire; (I hope that you) don't desire.
Nē dūcātis.	May you not lead; (I hope that you) don't lead.
Nē dūxeritis.	May you not lead; (I hope that you) don't lead.

[Another imperative form, the so-called *future imperative*, appears rarely in Latin, generally in formal or legal documents and as a regular imperative

for a few verbs. It has been omitted from the exercises in this book, but it is discussed in the Appendix, p. 362.]

G. The Vocative Case (*vocō* (1), ‘call’)

The *vocative* is the case of *direct address*. It is generally identical to the nominative, except for second declension nouns ending in **-us** or **-ius**:

Nouns ending in **-us** have a vocative singular in **-e**:

Marcus venit. Marcus is coming.

Marce, veni! *Marcus*, come!

Nouns ending in **-ius** have a vocative singular in **-ī**:

Vergilius carmen scripsit. Vergil wrote a poem.

Vergili, scribe carmen! *Vergil*, write a poem!

The adjective **meus**, **-a**, **-um**, ‘my’, has the masculine singular vocative **mī**:

Meus filius venit. My son is coming.

Mi **filli**, veni! *My son*, come!

All plural vocatives are identical to the nominative plural.

H. Datives of Purpose (Service) and Reference: The Double Dative Construction

Two datives frequently appear in close proximity, one denoting the *purpose* (*service*) with reference to which the action or idea expressed in the clause occurs, the other denoting the person or thing with reference to whom or which the action or idea occurs or is relevant.

Filiī mātrī frūctū sunt.

The sons are (*for the purpose of*) an asset (*with reference*) to their mother; the sons serve as an asset to (for) their mother; the sons are an asset to their mother.

Ad urbēm salūtī mihi vēnit.

He came to the city for (*the purpose of*) a salvation (*with reference*) to (for) me; he came to the city to save me.

Opiniō mali periculō erat civitāti.

The opinion of the evil (man) was (*for the purpose of*) a danger (*with reference*) to the state.

UNIT EIGHT — NOTES ON VOCABULARY

The suffix **-tās**, **-tātis** is a feminine ending of abstract nouns which indicates a quality or state. **Cīvis** is a citizen; **cīvitās**, **cīvitātis**, F., is the 'state of being a citizen', thus, 'citizenship, state'. **Liber**, 'free', thus becomes the stem of the abstract noun **lībertās**, **lībertātis**, F., 'the state of being free', i.e., 'freedom'.

Diēs, **diēi** is one of the two masculine nouns in the fifth declension (the other is a compound of **diēs**). Sometimes it occurs in the singular as feminine, especially when a specific day is meant or when the reference is to time in general: **longa diēs**, 'a long day'.

Domus, 'house, home', has some forms which belong to the second declension and others which belong to the fourth declension; therefore, it is given in this book as both a second and fourth declension noun. The most common forms are:

domus	domūs
domūs	domuum
domui	domibus
domum	domōs
domō	domibus

The locative is **domī**.

The verb **eō**, **ire**, **ii** or **ivī**, **itus**, 'go', in the perfect active stem may shorten from **-iv-** to **-i-**. There are many compounds of this verb:

adeō	go to, approach
abeō	go away, depart
circumeō	go around, surround
ineō	go in, enter
exeō	go out, depart
	...etc.

Fēlix, **fēlicis**, 'happy, fortunate', takes the negative prefix **in-** to form the word for 'unhappy, unfortunate', **infēlix**, **infēlicis**.

Frūctus, frūctūs, M., ‘enjoyment, fruit, profit’, is used in the dative case with the verb **sum** to form the idiom **frūctui esse**, ‘to be an asset to’: **Nauta rēgīnae frūctui erat**, ‘The sailor was an asset to the queen’.

Iaciō, iacere, iēci, iactus, ‘throw’, produces the frequentative verb **iactō**. A frequentative verb is usually a first conjugation verb formed from the fourth principal part of another verb and which, originally, had the idea of the action being repeated; in many verbs, this idea became lost in time and no discernible difference in meaning is seen in the two verbs. However, **iactō** does have the additional meaning ‘boast’.

Iubeō, iubēre, iussi, iussus, ‘order’, is the only verb of ordering in Latin that does not regularly use the construction for an indirect command (**ut** or **nē** with the subjunctive), but rather an infinitive with subject accusative: **Rēgina nautās vēla dare iussit**, ‘The queen ordered the sailors to set sail’.

The word **manus, manūs** is feminine even though, in addition to the meaning ‘hand’, it means ‘a band (of men)’.

Mōtus, mōtūs, M., is a noun of the fourth declension made from the perfect passive participle of **moveō**; it means ‘motion, movement’. In the same way, **sēnsus, sēnsūs**, M., ‘sensation, feeling’, is formed from the perfect passive participle of **sentiō**.

The verb **quaerō, quaerere, quaeſivi, quaeſitus**, ‘seek, ask (for)’, may introduce an indirect command: **Quaeſivimus nē domum irēs**, ‘We asked that you not go home’. If one seeks something from someone, either **ā** (ab), **dē**, or **ex** is used: **Pecūniā ab (dē, ex) amicīs quaeſivimus**, ‘We sought money from our friends’.

Rēs, rei, F., is an abstract word with many meanings, e.g., ‘thing, matter, affair, situation, business, lawsuit, event, property’; **rēs pūblica** is the ‘public thing, the public matter’, therefore, ‘state, republic’.

UNIT EIGHT — DRILL

I.

Give a form of the adjectives **magnus, -a, -um**, **gravis, -e**, and **ingēns, ingentis** to go with each of the following noun forms. In some cases, there may be several possible interpretations.

- | | | | |
|------------|----------------|----------------|-----------------|
| 1. frāter | 8. sidera | 15. manūs | 22. periculōrum |
| 2. noctis | 9. rēgum | 16. manui | 23. dōnō |
| 3. sidus | 10. rūmōribus | 17. diēs | 24. bella |
| 4. mātri | 11. frātrum | 18. frūctibus | 25. gladiō |
| 5. sorōrem | 12. servitūtem | 19. spem | 26. nautae |
| 6. homine | 13. corporis | 20. manuum | |
| 7. hominēs | 14. rei | 21. prōvinciae | |

II.

Translate and give the syntax of the words in boldface type:

1. **Hic homō mente** est validus.
2. **Haec fēmina pulchra** est **fōrmā**.
3. **Ille civis sānus** est **corpore**.
4. **Illi infēlicēs** sunt **salūte**.
5. **Superāti militēs vītā et vigōre** sunt miseri.
6. **Si Rōmam eat**, amicis nōn careat.
7. **Nisi militēs urbī salūti ibunt**, magnus erit timor.
8. **Si ad īsulam īset (īret)**, fēlix fuissem (essem).
9. **Rōmam it**; Athēnās **eunt**; Eis imperō ut Athēnās **eant**; Ad urbem **ibant**; Eis imperābam nē ad urbem **īrent**.
10. **Homō ad prōvinciam iēns** erat intellegēns.
11. **Quae est filia hominis ad prōvinciam euntis?**
12. **Dicō homini ad prōvinciam eunti esse filiam speciē pulchram**.
13. **Discēde ē prōvinciā!**
14. **Oppūgnāte urbem cum vigōre!**
15. **Nōli discēdere ē prōvinciā!** Nē discesseris (**discēdās**) ē prōvinciā!
16. **Nōlite oppūgnāre urbem!** Nē oppūgnāveritis (**oppūgnētis**) urbem!
17. **Nōli, amice, spectāre montem; spectā campum!**
18. **Mi fili, nōli timōre opprimi!** Nē timōre oppressus sis (**opprimāris**)!
19. **Morsne erit bonō finī vitae nostrae?**
20. **Militēs timōri civibus missi sunt.**

UNIT EIGHT — PRELIMINARY EXERCISES (SECTIONS A, B, C)

1. **Haec civitās infēlix metū gravi dēlētur.**

UNIT NINE

A. Comparison of Adjectives

Adjectives in Latin occur in three *degrees*: positive (e.g., “brave”), comparative (e.g., “braver, rather brave, too brave”), and superlative (e.g., “bravest, most brave, very brave”). Adjectives appear in the vocabularies in the positive degree.

Note the following observations for the formation of the comparative and superlative degrees of adjectives.

1. COMPARATIVE

Find the stem of the adjective by dropping the genitive singular ending from the positive form, and to this stem add **-ior** for the masculine and feminine, **-ius** for the neuter.

validus, -a, -um	valid/i	validior, validius
fortis, -e	fort/is	fortior, fortius

The comparative adjective is declined like third declension adjectives, but with **-um** in the genitive plural instead of **-ium** and with **-a** in the neuter nominative and accusative plural instead of **-ia** (that is, it is not an i-stem). The stem for adjectives in the comparative degree is the full nominative singular masculine-feminine form, with the **-o-** lengthened.

SINGULAR		PLURAL	
M. & F.	N.	M. & F.	N.
fortior	fortius	fortiōrēs	fortiōra
fortiōris	fortiōris	fortiōrum	fortiōrum
fortiōri	fortiōri	fortiōribus	fortiōribus
fortiōrem	fortius	fortiōrēs(-is)	fortiōra
fortiōre(-i)	fortiōre(-i)	fortiōribus	fortiōribus

2. SUPERLATIVE

Most adjectives form the superlative by adding **-issimus**, **-a**, **-um** to the stem of the positive form.

validissimus, -a, -um
fortissimus, -a, -um

These are declined like first-second declension adjectives.

Adjectives which end in **-er** in the masculine nominative singular of the positive degree form the superlative by adding **-rimus, -a, -um** directly to the masculine nominative form.

ācer, ācris, ācre ācerimus, -a, -um

Six adjectives which end in **-lis** in the masculine and feminine nominative singular of the positive degree form the superlative by adding **-limus, -a, -um** to the stem of the positive degree.

similis, -e simillimus, -a, -um

These adjectives are:

facilis, -e	easy
difficilis, -e	difficult
similis, -e	similar
dissimilis, -e	unlike
gracilis, -e	slender
humilis, -e	humble, low

3. Quam PLUS THE SUPERLATIVE

Quam followed by an adjective (or adverb) in the superlative degree gives the meaning 'as... as possible'.

Quam fortissimus est. He is *as brave as possible*; he is *as brave as can be*.

B. Irregular Comparison of Adjectives

Five common adjectives have irregular comparisons and must be learned.

bonus, -a, -um	melior, melius	optimus, -a, -um
good	better	best
malus, -a, -um	peior, peius	pessimus, -a, -um
bad	worse	worst
magnus, -a, -um	maiор, maius	maximus, -a, -um
great	greater	greatest
parvus, -a, -um	minor, minus	minimus, -a, -um
small	smaller	smallest
multus, -a, -um	plūs (neuter only in sing.)	plūrimus, -a, -um
much	pl., plūrēs, plūra	most, very many more

NOTE: The masculine plural comparative of **magnus**, **maiōrēs**, is frequently used to mean ‘ancestors’, (i.e., ‘those greater [in respect to age]’).

C. Comparison with **quam**; Ablative of Comparison

Comparisons can be made in two ways in Latin:

1. Pater eius est altior **quam hospes**. His father is taller *than the guest*.

The conjunction **quam** is here equivalent to the English ‘than’. As in English, **quam**, ‘than’, has the same case after it as it has before it.

Dixit patrem esse altiōrem **quam hospitem**. He said that his father was
taller *than the guest*.

Pater est altior **quam ego**. The father is taller *than I*.

2. Pater eius est altior **hospite**. His father is taller *than the guest*.

Here the ablative, without a preposition, is used with the comparative adjective to denote comparison. The ablative of comparison and the construction with **quam** may be used interchangeably with no distinction in meaning.

D. Ablative of Degree of Difference

The ablative, without a preposition, is used with comparatives to express the degree in which the two things being compared differ. Less frequently, this kind of ablative is also found with a superlative in statements in which there is an implicit comparative judgment made.

Pater eius est pede altior hospite (quam hospes).	His father is taller than the guest <i>by a foot</i> ; his father is <i>a foot</i> taller than the guest.
Nunc multō fēlicior est.	Now he is happier <i>by much</i> ; he is <i>much</i> happier now.
Multō optimus ex omnibus pūgnantibus est.	He is <i>by far (much)</i> the best of all who are fighting.

E. Adverbs and Their Comparison

1. Most adverbs are formed from adjectives. Two of the more frequent formations of the positive degree are noted below:

- a) From adjectives of the first and second declensions, adverbs are frequently formed by adding the ending **-ē** to the stem of the adjective.

miser, misera, miserum
poor

miserē
poorly

- b) Adverbs formed from adjectives of the third declension frequently exhibit the ending **-iter**.

fortis, -e	fortiter
strong	strongly, bravely

There is no way to determine that a given adverb will not be formed according to these rules; adverbs formed differently will be given as vocabulary items.

2. The comparative degree of an adverb is formed by adding the ending **-ius** to the stem of the positive degree of the *adjective*. It will be noted that the comparative is really the neuter accusative singular of the comparative of the adjective.

fortiter	fortius
bravely	more bravely, rather bravely, too bravely
facile	facilius
easily	more easily, rather easily, too easily
miserē	miserius
poorly	more poorly, rather poorly, too poorly

3. The superlative is formed with the ending **-issimē** (or **-rimē**, **-limē** when the adjective would be thus formed; see section A above) added to the stem of the positive degree of the *adjective*.

fortissimē	most bravely
facillimē	most easily
miserrimē	most poorly
quam miserrimē	as poorly as possible

F. Irregular Comparison of Adverbs

bene	melius	optimē
well	better	best
male	peius	pessimē
badly	worse	worst
magnopere	magis	maximē
greatly	more	most, especially
parum	minus	minimē
not enough	less	least
multum	plūs	plūrimum
much	more	most
diū	diūtius	diūtissimē
long (in time), for a long time	longer	longest

saepe	saepius	saepissimē
often	more often	very often
--	prius	primum
	before	first
prope	propius	proximē
near	nearer	nearest, next

G. Partitive Genitive

The genitive is sometimes used in Latin to express the *whole* group or unit of which the word on which the genitive depends expresses the *part*. This usage is called the *partitive genitive* or the *genitive of the whole*.

Fortissimus **omnium militum** ad mē The bravest *of all the soldiers* came vēnit. to me.

Multi **hominum** opiniōnēs sapientium Many *of the men* praise the opinions of the wise. laudant.

The ablative, preceded by the prepositions **ē** (ex), or **dē** is used as an alternative to the partitive genitive with some words. This is especially frequent when the word denoting the *part* is a cardinal numeral.

Quīnque **ex militibus** domum vēnērunt. Five *(out of) the soldiers* came home.

Some words used substantively in Latin require a partitive genitive to render an idea which in English would be expressed with a noun and adjective.

Satis **pecūniae** habet. He has enough (*of*) money.

Plūs **pecūniae** habet quam tū. He has more (*of*) money than you.

In the singular, the word **plūs** is used substantively and is generally indeclinable; in the plural, it is used attributively and is declined.

Plūs hominum ad sē vocāvit. He called *more* (*of*) men to him.

Plūrēs hominēs ad sē vocāvit. He called *more* men to him.

tam ... quam	so ... as, as ... as
templum, -ī, N.	temple
tūtus, -a, -um	safe

UNIT NINE — NOTES ON VOCABULARY

The easiest way to memorize the irregular comparisons of adjectives is to associate the forms with the English derivatives:

bonus, melior (*ameliorate* is to make *better*), **optimus** (an *optimist* is a person who looks at the *best* side of things)

malus, peior (a *pejorative* meaning of a word is a *worse* one), **pessimus** (a *pessimist* is a person who looks at the *worst* side of things)

magnus, maior (a *major* problem is a *rather great* one), **maximus** (the *maximum* penalty is the *largest* one)

parvus, minor (a *minor* problem is a *rather small* one; eight *minus* (*smaller* [by]) two is six), **minimus** (the *minimum* penalty is the *smallest* one)

multus, plūs (six *plus* (*more* [by]) two is eight; *plural* means *more* than one), **plūrimum** does not have an English derivative.

Maiōrēs, maiōrum, M. pl. means ‘ancestors’ because they are the ones ‘greater (in age)’ than we are.

Quam with the superlative means ‘as... as possible’; with the comparative it means ‘than’. **Quam** can mean ‘how’ in an exclamatory sense: **Quam pulchra est!**, ‘How beautiful she is!’ And, of course, **quam** can be the feminine accusative singular of the relative pronoun or interrogative adjective.

Aiō is a defective verb with not many forms; the present tense of the indicative is found in four persons, of the subjunctive in three. The imperfect indicative is complete. The verb means ‘say’ or ‘say yes’.

The suffix **-tia**, sometimes with a connecting vowel, or the suffix **-ia** is added to the stem of an adjective to produce an abstract noun; thus, **amicitia** is ‘friendship’. **Sapiēns**, ‘wise’, produces **sapientia**, ‘wisdom’.

Cadō, cadere, cecidī, cāsus, ‘fall’, has many compounds; it must not be confused with **caedō, caedere, cecidī, caesus**, ‘fell, cut’, which also has many compounds. **Incidō**, ‘fall into, happen’, is a compound of **in + cadō**; **incidō**, ‘cut into, engrave’, is from **in + caedō**; the **-ae-** diphthong becomes **-i-** in compounds. Once again it is clear that it pays to be attentive to long and short vowels. The last principal part of **cadō** produces the fourth declension noun **cāsus, cāsūs**, M., ‘fall, accident, occurrence, chance’.

Dēmēns (**dē + mēns**) describes someone who is ‘(down, away) from his mind’, thus, ‘mad, raving’.

Note the irregular adverbs **facile**, ‘easily’; **male**, ‘badly’; **multum**, ‘much, very’; and **magnopere** (uncontracted, **magnō opere**), ‘with great work’, thus, ‘greatly’.

Remember that the six adjectives ending in **-lis** — **facilis, difficilis, similis, dissimilis, gracilis**, and **humilis** — form their superlatives by doubling the **-l** and adding **-imus**.

The noun **laus**, **laudis**, F., ‘praise’, is related to the first conjugation verb **laudō**, ‘praise’.

Nam is a *conjunction* meaning ‘for’: **Nam omnis populus rēgem timuit**, ‘For all the people feared the king’.

The neuter second declension noun **odium**, ‘hatred’, is related to the verb **odi**, ‘hate’. The English word *annoy* comes from **in odiō**.

Sometimes an adjective is more easily translated as an adverb: **Humilēs in tēctum domini vēnimus**, ‘We came humbly into the master’s house’; literally, ‘We, humble, came into the master’s house’; **Prīmī accessērunt**, ‘They were the first to approach’ or ‘They approached first’.

Proximus, -a, -um is often found with the dative: **Proximus turbae fuit**, ‘He was nearest the crowd’.

Similis and **dissimilis** may govern either the genitive or the dative without distinction: **Patris similis est** and **Patri similis est** both mean ‘He is like his father’.

Summus, -a, -um means ‘top (of)’: **Animal in summō monte vīdimus**, ‘We saw the animal on the top of the mountain’.

Tam...quam means ‘so...as’: **Quid est tam dulce quam habēre amicum cārissimum?**, ‘What is so sweet as having (*literally*, ‘to have’) a very dear friend?’

UNIT NINE — DRILL

UNIT TEN

A. Ablative Absolute

The word “absolute” comes from the fourth principal part of the verb **absolvō**, -**ere**, -**solvi**, -**solūtus**, ‘untie, loosen’. Grammatically, it refers to a part of the sentence which has no close syntactical connection with the rest; it is “untied” or “detached” from the main clause.

English has a *nominative absolute*:

This being the case, I shall now help you.

Note that the nominative absolute in English utilizes a subject, “this” and a participle, “being”. The subject of the absolute construction is different from the subject (or object) of the main clause. In the broadest sense, the absolute functions as an adverb giving the circumstances in which the action of the main clause occurs.

The Latin absolute construction requires the ablative, not the nominative, case. All tenses of the participle may occur, according to the observations stated in the unit on participles above, although the future is very rare in classical Latin.

Coniuge veniente, *With her husband coming*, the woman will depart.

fēmina discēdet. *When her husband is coming (comes)*, the woman will depart.

Since her husband is coming, the woman will depart.

If her husband is coming (comes), the woman will depart.

Although her husband is coming, the woman will depart.

...etc.

[NOTE that when the present participle is used in an ablative absolute, the -e ending for the ablative singular occurs rather than -i.]

OBSERVATIONS:

1. The subject of the ablative absolute, **coniuge**, is different from the subject of the main clause, **fēmina**. Hence, **coniuge veniente** is a true absolute.
2. The present participle refers to an action which occurs at the *same time* as that of the main verb.

3. Because of the absence of a perfect *active* participle, it will be impossible to express an active idea in the absolute as having occurred *prior* to the time of the main verb without recasting it in the passive voice. Another construction would have to be used (e.g., *Si coniūnx vēnit, postquam coniūnx vēnit, quamquam coniūnx vēnit*, etc.).

Coniuge visō, *With her husband having been seen, the woman fēmina discessit.* departed.

When she had seen her husband, the woman departed.

Since she had seen her husband, the woman departed.

If she had seen her husband, the woman departed.

Although she had seen her husband, the woman departed.

...etc.

OBSERVATIONS:

1. Note that in the last four translations above, the subordinate clause has been changed from the passive to the active voice. The subject "she" of the subordinate clause is the same as the subject of the main clause *in English*. In the Latin, however, the subject of the perfect passive participle is *not* the same as that of the main verb (*coniuge* is the subject of the ablative absolute; *fēmina* is the subject of the main clause; note the first English translation above).
2. The perfect participle refers to an action which occurred *prior* to the time of the main verb.

NOTE: If we wish to render "When she was departing, the woman saw her husband" into Latin, we *cannot* use the ablative absolute because the subject of each clause ("she" and "woman") is the same. A simple participle must be used instead:

Fēmina discēdēns coniugem vidit.

Illā fēminā rēginā, *With that woman (being) queen, the inhabitants incolae fēlicēs erant.* were happy.

When that woman was queen, the inhabitants were happy.

...etc.

OBSERVATION:

Since there is no present participle for the verb **sum**, two nouns are sometimes used in an ablative absolute construction with an *implied* participle connecting them. The second noun is in effect a predicate ablative.

Custōde amīcum vocante, *With the guardian calling his friend, the sailors*
nautae fūgērunt. *fled.*

When the guardian was calling his friend, the
sailors fled.

...etc.

OBSERVATION:

The participle, since it is a verbal adjective, retains its verbal functions. Consequently it can control an object, as in the case of **amicum** above.

B. Adjectives with Genitive Singular in *-ius*

There is a group of adjectives which are like first-second declension adjectives except that they have **-ius** in the genitive singular of all genders and **-i** in the dative singular. One of these is **tōtus, -a, -um**, ‘whole, all’.

SINGULAR			PLURAL
M.	F.	N.	
tōtus	tōta	tōtum	
tōtius	tōtius	tōtius	
tōti	tōti	tōti	the plural is identical to that of magnus, -a, -um
tōtum	tōtam	tōtum	
tōtō	tōtā	tōtō	

The other adjectives of this class are:

alius, -a, -ud	other
alter, altera, alterum	the other (of two)
ūllus, -a, -um	any
nūllus, -a, -um	no, none
uter, utra, utrum	which (of two)
neuter, neutra, neutrum	neither
sōlus, -a, -um	only
ūnus, -a, -um	one, alone

C. Ablative of Cause

The ablative, generally without a preposition, is sometimes used to express *cause*.

Clāmāre gaudiō coepit. She began to shout *because of joy*.

Fōrmā laudābantur. They were praised *because of (their) beauty*.

Sometimes cause is expressed by **ob** or **propter**, ‘on account of’, followed by the accusative case.

Propter metum fēminās interfēcit. He killed the women *on account of fear*.

D. Ablative and Genitive of Description

A noun in the ablative or genitive case, when modified by an adjective, may be used to describe or express a quality of another noun.

Vir magnā sapientiā }
Vir magnaे sapientiae } a man of great wisdom

E. The Irregular Verb *ferō* and Its Compounds

Ferō, ferre, tuli, latus, ‘bring, carry, bear, endure’, exhibits certain peculiarities in the present indicative, present infinitive, and present imperative. The other forms are exactly what we would expect for a third conjugation verb.

PRESENT INDICATIVE

ACTIVE		PASSIVE	
ferō	ferimus	feror	ferimur
fers	fertis	ferris	ferimini
		(ferre)	
fert	ferunt	fertur	feruntur

IMPERATIVE

SING.	PL.
fer!	ferte!

There are several compounds of *ferō* which occur frequently and should be learned. Some are:

ad + *ferō* = *afferō, afferre, attulī, allātus*, ‘bring to, present’

ab + *ferō* = *auferō, auferre, abstulī, ablātus*, ‘carry away’

com + *ferō* = *cōferō, cōferre, contulī, collātus*, ‘bring together, collect; compare;’ reflexive *sē cōferre* = ‘take oneself’ (i.e., to a place), ‘go’

dē + *ferō* = *dēferō, dēferre, dētulī, dēlātus*, ‘bring away, bring down, offer; report’

dis + *ferō* = *differō, differre, distulī, dilātus*, ‘differ’

ex + *ferō* = *efferō, efferre, extulī, élātus*, ‘carry out; bring forth’

in + *ferō* = *inferō, inferre, intulī, illātus*, ‘carry into; inflict’

ob + *ferō* = *offerō, offerre, obtulī, oblātus*, ‘bring before; offer; expose’

re + *ferō* = *referō, referre, rettulī, relātus*, ‘bring back, report’

sub + *ferō* = *sufferō, sufferre, sustulī, sublātus*, ‘undergo, endure’

It will be easy to form other compounds of this verb by the addition of other prefixes.

UNIT TEN — NOTES ON VOCABULARY

There are nine adjectives in Latin which end in **-ius** in the genitive singular and **-i** in the dative singular: **alius**, **alter**, **ūllus** ('any'), **nūllus** ('none'), **uter**, **neuter** ('neither'), **sōlus** ('alone'), **tōtus** ('whole'), and **ūnus** ('one'). **Alius** means 'other, another', **alter**, 'the other (of two)', and **uter**, 'which (of two)'. **Alterius** was used as the genitive singular of **alius** (see Appendix, page 322). **Alius... alius** means 'one...another': **Alius in tēctō alius in viā erat**, 'One man was in the house, another in the street'. When two forms of the adjective **alius** are found in the same sentence, they are translated twice:

Alii aliud mihi dixērunt. Some men told me one thing; others told me another.

Alia dōna ad aliōs amicōs misērunt. They sent some gifts to some friends, other gifts to others (other friends).

Apud is like the French **chez**; it means 'at, near, among, at the house of, in the works of'.

The adjective **audāx**, **audācis**, 'bold, courageous', is related to the abstract noun **audācia**, **audāiae**, F., 'boldness, courage'.

Coepi, **coepisse**, **coemptus**, 'began', is a defective verb which has only perfect tenses. **Incipiō** may be used if a present, imperfect, or future tense of 'begin' is needed.

The verb **doceō, docēre, docui, doctus**, ‘teach’, may govern two accusatives. In other words, one teaches something in the accusative case to someone in the accusative: **Multa nātōs docēre optāmus**, ‘We wish to teach many things to our children’.

Errō, a first conjugation verb, means ‘wander’. If one wanders from the true path, one errs; thus, **errō** also means ‘err’.

Ferō, ferre, tulī, lātūs, ‘bear, bring, carry, endure’, is sometimes used, usually in the third person, to mean ‘say, report’: **Auctōrem clārissimum in illō tēctō ferunt vixisse**, ‘They say that the very famous author lived in that house’. Also, **Auctor clārissimus in illō tēctō vixisse fertur**, ‘The very famous author is said to have lived in that house’.

Ferō is one of the four verbs (**dicō, dūcō**, and **faciō** are the others) which drop the ending in the present active singular imperative: **dic, dūc, fac, fer**.

Connected with **fugiō, fugere, fūgi**, **fugitus**, ‘flee’, is the noun **fuga, fugae**, F., ‘flight’.

Iungō, iungere, iūnxi, iūnctus, ‘join’, has a compound **coniungō**, ‘join together’; the person with whom one is joined, **coniūnx**, is one’s ‘spouse’; therefore, this word can be either masculine or feminine.

Iam is an adverb which relies on the tense of the verb for its meaning; with the present tense, it means ‘now’, with a past tense, ‘up to now, already, by this time’, and with the future, ‘soon’.

Mōs, mōris, M., in the singular means ‘custom’, but in the plural, ‘character’, since it is our customs or habits which make up our character.

Negō, a first conjugation verb, is the opposite of **aiō**; it means ‘say no, deny’.

Orbis, orbis, M., is ‘ring, circle’; **orbis terrārum**, ‘circle of lands’, is the way of saying ‘the world’.

There is no difference between **propter** with the accusative and **ob** with the accusative.

Quantus, -a, -um, ‘how much, how great’, is often used correlative with **tantus, -a, -um**, ‘so much, so great’. There is no difference in meaning between **quantus... tantus** and **tantus... quantus**: **Quantōs librōs in mēnsā vīdimus tantōs in cellā**, ‘We saw as many books on the table as (we saw) in the storeroom’; **Tantum gaudium in urbe erat quantum in prōvinciā**, ‘There was as much joy in the city as in the province’.

Quot, ‘how many’, may be correlative with **tot**, ‘so many’. There is no difference in meaning between **quot... tot** and **tot... quot**: **Quot puellae tot pueri in tēctō erant**, ‘There were as many girls as boys in the house’; **Tot dominōs quot servōs in templō vīdimus**, ‘We saw as many masters as slaves in the temple’.

Virtūs, virtūtis, F., is an abstract noun meaning ‘the state of being a man. or the quality of a man’; it is what makes a man a man. namely, ‘manliness, courage, excellence, virtue’.

UNIT TEN — DRILL

I.

Translate each of the following ablatives absolute literally; then give at least four smoother translations:

- | | |
|---|----------------------------|
| 1. hostibus oppressis | 6. sociis interfectis |
| 2. opere perfectō | 7. periculō remōtō |

UNIT ELEVEN

A. Deponent Verbs

Many verbs in Latin have only passive forms, but active meanings. These verbs are called *deponents* (*dē* + *pōnō*, ‘put aside’; i.e., they *put aside* their active forms).

precōr, -ārī, precātus sum	beg, request
vereor, -ērī, veritus sum	fear
ingredior, -ī, ingressus sum	enter, proceed
experior, -irī, expertus sum	try, experience

PRESENT TENSE

INDICATIVE	SUBJUNCTIVE
precōr	precēr
I entreat	
precāris (-re)	precēris (-re)
you entreat	
precātur	precētur
he entreats	
precāmūr	precēmūr
we entreat	
precāmīni	precēmīni
you entreat	
precāntur	precentur
they entreat	

IMPERFECT TENSE

INDICATIVE	SUBJUNCTIVE
precābar	precārer
I used to entreat	
precābāris (-re)	precārēris (-re)
you used to entreat	
...etc.	...etc.

NOTE that the imperfect subjunctive is built onto what would have been the entire

present *active* infinitive. This is especially important for third conjugation verbs where the present passive infinitive looks so different from the active one. Thus:

ingredēter
ingredēterēris (-re)
...etc.

FUTURE TENSE

INDICATIVE	SUBJUNCTIVE
precābor	
I shall entreat	<i>None</i>
precāberis (-re)	
you will entreat	
...etc.	

PERFECT TENSE

INDICATIVE	SUBJUNCTIVE
precātus sum	precātus sim
I have entreated	
precātus es	precātus sis
you have entreated	
...etc.	...etc.

PLUPERFECT TENSE

INDICATIVE	SUBJUNCTIVE
precātus eram	precātus essem
I had entreated	
precātus erās	precātus essēs
you had entreated	
...etc.	...etc.

FUTURE PERFECT TENSE

INDICATIVE	SUBJUNCTIVE
precātus erō	<i>None</i>
I shall have entreated	
...etc.	

INFINITIVES

	ACTIVE	PASSIVE
Present	precāri	--
	to entreat	
Perfect	precātus esse	--
	to have entreated	
Future	precātūrus esse	--
	to be going to entreat	

NOTE that, while the present and perfect infinitives have *passive forms* but *active meanings*, the future infinitive is *active in form and meaning*.

PARTICIPLES

	ACTIVE	PASSIVE
Present	precāns entreating	--
Perfect	precātus, -a, -um having entreated	--
Future	precātūrus, -a, -um going to entreat	precandus, -a, -um having to be entreated

NOTE that the following irregularities occur in the participial system:

1. Deponents *do have* a present participle which is active in *form and meaning*.
2. Deponent verbs have a perfect *active* participle; other verbs have only a perfect *passive* participle.
3. Deponent verbs have *both* a future *active* and a future *passive* participle in *form and meaning*.

The present and future participles and the future infinitive, then, pose the only problem in the deponent system. In all other instances, remember: DEONENTS HAVE PASSIVE FORMS, BUT ACTIVE MEANINGS.

B. Semi-Deponent Verbs

Several verbs have active forms and meanings in the present system, but passive forms with active meanings in the perfect system. These are called *semi-deponents*.

audeō, -ēre, ausus sum, 'dare'

audeō	I dare
audēbam	I used to dare
audēbō	I shall dare
ausus sum	I have dared
ausus eram	I had dared
ausus erō	I shall have dared

C. Subjective and Objective Genitive

There is a verbal idea understood in nouns and adjectives of feeling or action. The noun that is the object of this verbal idea is called the *objective genitive*, and the noun that is its subject is called the *subjective genitive*.

OBJECTIVE GENITIVE:

amor patriae	love of the native land (i.e., what is loved is the native land; patriae is the object of the verbal idea understood in amor)
metus belli	fear of war (i.e., what is feared is war)
cupidus (-a, -um)	desirous of money (i.e., what the subject desires is money)
pecūniae	

SUBJECTIVE GENITIVE:

fēminaē amor	the <i>woman's</i> love of her native land (i.e., the woman is doing the loving and therefore fēminaē is the <i>subjective genitive</i> ; the woman [subject] loves her native land [object])
patriae	

D. Predicate Genitive (Genitive of Characteristic)

A noun in the genitive case which stands alone (or modified by an adjective) in the predicate denotes a characteristic or a class.

Hominis sapientis	It is (<i>the mark</i>) of a wise man to read books.
est librōs legere.	Reading books is <i>the mark of a wise man</i> .
Bonī est deōs laudāre.	It is (<i>the mark</i>) of a good [man] to praise the gods.

E. Infinitive As Subject

The infinitive is, in fact, a neuter noun. In the sentences given as examples under section D above, **legere** and **laudāre** are the subjects of the verb **est**.

Vidēre est crēdere. *To see* is to believe; *seeing* is believing.

Infinitives used in this way may be modified by adjectives which will appear in the neuter.

Librōs legere	To read books is (<i>a</i> good <i>(thing)</i>); reading books is <i>good</i> ; bonum est. it is <i>a good thing</i> to read books.
Scimus bonum esse librōs legere.	We know that to read books is (<i>a</i> good <i>(thing)</i>); we know that reading books is (<i>a</i> good <i>(thing)</i>).

In the last example, the infinitive **legere** is the subject accusative of the infinitive **esse**.

F. The Irregular Verbs *volō*, *nōlō*, *mālō*

volō , <i>velle</i> , <i>volui</i> --	wish, want, be willing
nōlō , <i>nōlle</i> , <i>nōlui</i> , --	be unwilling (contracted from nōn volō)
mālō , <i>mālle</i> , <i>mālui</i> , --	prefer (contracted from magis volō)

All three verbs actually belong to the third conjugation. The only irregularities which occur are in the present tense, as illustrated below. The imperfect subjunctive is formed on the irregular infinitives **velle**, **nölle**, **mälle**. The imperfect and future indicatives as well as the present participle (except for **mälō**, which lacks one) are formed on the stems **vole-**, **nöle-**, and **mäle-**, as if the verbs had regular infinitives (**★volere**, **★nölore**, **★mälere**).

PRESENT TENSE

		PRESENT	
	INDICATIVE	SUBJUNCTIVE	PARTICIPLE
volō	volō	velim	volēns
	vīs	velis	
	vult	velit	
	volumus	velimus

UNIT ELEVEN — NOTES ON VOCABULARY

Audeō, audēre, ausus sum, ‘dare’, and **soleō, solēre, solitus sum**, ‘be accustomed’, are semi-deponents. In other words, in the present, imperfect, and future tenses, the forms are active with active meanings, but in the perfect tenses, the forms are passive with active meanings: **audēbis**, ‘you will dare’; **ausus erat**, ‘he had dared’.

Crēdō, crēdere, crēdidi, crēditus is really an intransitive verb which means ‘be trusting’ and governs the dative case; however, we often translate it as ‘believe, trust’: **Cui crēdis?** ‘To whom are you trusting?; Whom do you trust?’

The adjective **cupidus, -a, -um**, ‘desirous, eager, fond of’, governs an objective genitive: **Cupidus imperii erat**, ‘He was desirous of power’.

Divitiae, divitiārum is a feminine plural noun meaning ‘riches, wealth’.

Dux, ducis, ‘leader, guide’, may be either masculine or feminine; it is related to the verb **dūcō**, ‘lead’.

Fateor, fatēri, fassus sum and its compound **cōfiteor, cōfitēri, cōfessus sum** both mean ‘confess’ and may be used interchangeably.

There is a third conjugation verb **fluō, fluere, flūxi, flūxus**, ‘flow’; when the abstract noun ending **-men, -minis** is added to the stem, the noun **flūmen, flūminis**, N., ‘the result of flowing’, that is, ‘river’, results.

Gradior, gradī, gressus sum, ‘step, walk’, when compounded gives the stem **-gredior**. Thus, **aggredior** (*ad* + *gradior*), ‘go to, approach’; **ēgredior**, ‘go out’; **ingredior**, ‘go into, enter, advance, begin’; **prōgredior**, ‘go forth, proceed, advance’.

The verb **hortor, hortārī, hortātus sum**, ‘urge, encourage’, can introduce an indirect command: **Amīcōs hortātī sumus nē huic hominī crēderent**, ‘We urged our friends not to believe this man’.

Imperātor, imperātōris, M., is ‘the one who does the ordering’, namely, ‘commander, general’; **ōrātor, ōrātōris**, M., is ‘one who does the begging or pleading’, and then, ‘speaker’.

Iuvenis, iuvenis, M. or F., ‘youth, young man’, is not an i-stem; neither is **parēns, parentis**, M. or F., ‘parent’, although according to the rules for i-stems, one would expect them to be.

Loquor, loqui, locūtus sum is ‘speak, talk’; **dicō, dicere, dixi, dictus** is ‘say, tell’.

Volō, velle, volūi, --, ‘wish, want, be willing’, is an irregular verb of the third conjugation. It has two compounds: (**nōn** + **volō**) **nōlō, nōlle, nōlūi, --**, ‘be unwilling, wish...not’, and (**magis** + **volō**) **mālō, mālle, mālūi, --**, ‘prefer, choose rather’. Literally **mālō** means ‘want more’; it may govern an accusative and an ablative of comparison: **Virtūtemne fōrmā māvis?**, ‘Do you want courage more than beauty?; Do you prefer courage to beauty?’

Minor, minārī, minātus sum means ‘jut forth’. Since something that juts forth may be threatening, this verb also means ‘threaten’ and when it does it may govern the dative case. One can either threaten something in the accusative case to the person or thing in the dative or threaten the person or thing in the dative with something in the ablative case:

Dux mortem impiis minātus est. The leader threatened the impious men
or with death.

Dux impiis morte minātus est.

Morior, morī, mortuus sum, ‘die’, has as its future participle **moritūrus, -a, -um**.

Nāscor, nāsci, nātus sum, ‘be born, descend from’, has as its past participle **nātus**. Thus, **nātus, nātū, M.**, is ‘the one born *or* descended’, thus, ‘son’.

Neglegō is a compound of **legō (nec + legō, ‘not choose’)**; it means ‘disregard, neglect’. Like **intellegō**, **neglegō** has an **-x-** in the perfect active stem, **neglēxi**.

Patiō, pati, passus sum has the meanings ‘suffer, endure, allow’. The English word “patient” is a good reminder of the meanings of this verb: a patient in a hospital may be suffering and a person who is patient endures the things that happen to him; when one speaks of Christ’s passion, he means His suffering. The words “patient” and “passion” are also good reminders of the stems of this verb.

Servō, a first conjugation verb, does *not* mean ‘serve’ (**serviō, servire** does); it means ‘save, preserve, rescue, keep’.

Notice that **ut** may be used with the indicative; when it is so used, it means ‘as’ or ‘when’.

Utor, utī, usus sum, ‘use, enjoy, experience’, is one of several deponents which govern the ablative case: **Ferrō usus es?**, ‘Did you use your sword?’ The most common of the other deponents which govern the ablative are: **fruor, frui, fructus sum**, ‘enjoy’; **fungor, fungi, fūctus sum**, ‘perform’; **potior, potiri, potitus sum**, ‘gain possession of’; and **vēscor, vēsci, --**, ‘eat’.

NOUN SUFFIXES

The suffixes **-tor** (M.), **-trix** (F.) added to the stem of a verb produce a noun. Each means ‘one who’. Thus:

inceptor, -ōris, M., ‘one who begins, beginner’

auditor, -ōris, M., ‘one who hears, hearer’

scriptor, -ōris, M., ‘one who writes, writer’

spectātor, -ōris, M., and **spectātrix, -trīcis, F.**, ‘one who looks on, spectator’

āctor, -ōris, M., ‘one who does, doer, performer’

- līberātor**, -ōris, M., ‘one who frees, liberator’
amātor, -ōris, M., and **amātrix**, **amātricis**, F., ‘one who loves, lover’
inventor, -ōris, M., and **inventrix**, **inventricis**, F., ‘one who finds, discoverer’
cantor, -ōris, M., and **cantrix**, **cantricis**, F., ‘one who sings, singer’
victor, -ōris, M., and **victrix**, **victricis**, F., ‘one who conquers, conqueror’
petitor, -ōris, M., ‘one who seeks, seeker’, also, ‘a candidate for office’

By analogy, there are **viātor**, -ōris, M., and **viātrix**, **viātricis**, F., ‘traveler’ (from *via*, ‘way’ + -tor or -trix).

The endings **-ulus**, -a, -um; **-ōlus**, -a, -um (after a vowel); **-culus** -a, -um; **-ellus**, -a, -um; **-illus**, -a, -um are diminutive endings which may also be used to show affection, pity, or contempt.

- puellula**, -ae, F., ‘a little girl’
filiōlus, -i, M., ‘a little son’
homunculus, -i, M., ‘a little man; a poor, weak man’
libellus, -i, M., ‘a little book’
ocellus, -i, M., ‘a little eye’
Graeculus, -i, M. (**Graecus**, -a, -um. ‘Greek’), ‘a no-good Greek’
sigilla, -ōrum, N. pl. (**signum**, -i, N., ‘sign’), ‘little figures, little images’

ADJECTIVAL SUFFIXES ADDED TO THE STEMS OF NOUNS

The suffixes **-eus**, -ius, -ānus, -ēnus, -īnus, -ēius, -cus, -ticus added to the stem of a noun (or, sometimes, an adjective) mean ‘made of’ or ‘belonging to’:

- fēmineus**, -a, -um, ‘belonging to a woman, feminine’
aureus, -a, -um, ‘made of gold, golden’
patrius, -a, -um, ‘belonging to a father, paternal’
rēgius, -a, -um, ‘belonging to a king, royal’
montānus, -a, -um, ‘belonging to a mountain, mountain-’
urbānus, -a, -um, ‘belonging to the city, city-’
terrēnus, -a, -um, ‘made of earth, earthen’
aliēnus, -a, -um, ‘belonging to another, strange’
divīnus, -a, -um, (**divus**, -i, M., ‘god’), ‘belonging to a deity, divine’
marīnus, -a, -um, ‘belonging to the sea, marine’
plēbēius, -a, -um (**plēbs**, **plēbis**, F., ‘common people’), ‘belonging to the common people, plebeian’
cīvicus, -a, -um, ‘belonging to or of a citizen, civic’
bellicus, -a, -um, ‘belonging to or of war, war-’
domesticus, -a, -um, ‘belonging to the house, domestic’
viāticus, -a, -um, ‘belonging to a road, belonging to a journey’

The suffixes **-ālis**, **-āris**, **-īlis** added to the stem of a noun mean 'pertaining to':

- aquālis**, -e, 'pertaining to water'
- corporālis**, -e, 'pertaining to the body, corporeal'
- populāris**, -e, 'pertaining to the people'
- cōsulāris**, -e, 'pertaining to a consul, consular'
- hostilis**, -e, 'pertaining to an enemy, hostile'
- civilis**, -e, 'pertaining to citizens, civil, civic'

The suffixes **-ter** (-**tris**), **-ester** (-**estrīs**), **-timus**, **-nus**, **-urnus**, **-ternus** mean 'belonging to' (especially of times and places):

- equester**, **equestris**, **equestre** (**equēs**, 'horseman, knight'), 'belonging to a horseman, equestrian'
- campester**, **campestris**, **campestre**, 'of or pertaining to a level field'
- terrestris**, -e, 'of or belonging to the earth'
- maritimus**, -a, -um, 'of or belonging to the sea'
- finitimus**, -a, -um, 'bordering upon, neighboring'
- meridiānus**, -a, -um (**meridiēs**, 'noon'), 'of or belonging to mid-day'
- nocturnus**, -a, -um, 'of or belonging to the night'
- diūturnus**, -a, -um, 'of long duration, lasting'
- hesternus**, -a, -um (**heri**, 'yesterday'), 'of or pertaining to yesterday'

- 2. The soldiers fought more bravely by far (much more bravely) in this war than in that one because they used the best possible plans (as good plans as possible).
 a) ablative of degree of difference
 b) ablative of instrument after the verb ūtor
- 3. Our ancestors believed that hope of glory was the mark of a consul of good character.
 a) objective genitive
 b) predicate genitive (genitive of characteristic)
 c) ablative of description
- 4. More desirous of riches than a pious man, the impious man of bad family preferred crimes rather than honorable deeds.
 a) ablative of comparison
 b) cupidior divitiārum quam pius
 c) genitive of description
- 5. To praise is better than to be praised (praising is better than being praised; it is better to praise than to be praised).
 a) infinitive as subject
- 6. When (since, after) the letter had been written as soon as possible, one of

our friends reported that we were (being) praised because of (our) concern.

a) ablative absolute; the participle modifies the subject *litteris*

b) ablative of cause

c) propter cūram or ob cūram

7. Because of the envy of one man, the entire race suffered greatly.

a) subjective genitive

8. After we perceived that the rather sweet (pleasant) guests had not been praised enough, we thought that we would give very great thanks to them.

III.

1. Quantis diēbus post mē Rōmam proficisci vis?

2. Imperātōre mortuō iuvenēs, dēmentēs et crūdēlium hostium (crūdēlibus hostibus) dissimillimī audāciā (ob audāciam/propter audāciam) cecidērunt et quod nūllum auxilium oblātum est (offerēbātur).

UNIT TWELVE

A. Independent Uses of the Subjunctive

The subjunctive occurs most frequently in Latin in subordinate clauses, but some independent uses are found. All of these express notions connected with the basic definition of the subjunctive given in Unit One.

1. JUSSIVE (**iubeō**, **-ēre**, **iussī**, **iussus**, ‘command’) AND HORTATORY (**hortor** (I), ‘urge’) SUBJUNCTIVES

The present subjunctive is used to express a command or an exhortation.

veniat! let him come! command (JUSSIVE)
veniāmus! let's come! exhortation (HORTATORY)

The jussive sense occurs mainly in the third person; the hortatory in the first. The negative is introduced by **nē**.

Nē hoc faciat! Let him not do this!

2. POTENTIAL SUBJUNCTIVE

The subjunctive may be used independently to express an action which might possibly or conceivably occur.

Haec crēdās. You would (could, might) believe these things.

For present or future potentiality, the present (sometimes the perfect) subjunctive is used. This type of subjunctive is allied to future less vivid conditions (see Unit Two); in fact, one might conceive of it as the apodosis (concluding clause) of such a condition, the protasis (if-clause) of which has been suppressed:

Frātrem meī miserērī nōlim I would not wish (my) brother to pity me
(**sī mē videat**). (if he should see me).

OBSERVATION:

The verb **misereor** takes the genitive case to express its object; hence the objective genitive **meī**.

Dicās eum hominem You would say (i.e., if you could) that he is a good
bonum esse. man; you might say that he is a good man.

Past potentiality is expressed with the imperfect subjunctive.

Crēderēs eum hominem You would have believed that he was a good
bonum esse. man; you might have believed that he was a
good man.

The negative of the potential subjunctive is introduced by **nōn**.

3. DELIBERATIVE SUBJUNCTIVE

The present and imperfect subjunctives may be used to *deliberate* about a course of action. This is frequently used in a rhetorical question (i.e., a question which is asked for effect, but which does not demand an answer).

Quid faciam? What am I to do? What should I do?
Quid facerem? What was I to do? What should I have done?

The negative is introduced by **nōn**.

4. OPTATIVE (**optō** (1), ‘desire, wish’) SUBJUNCTIVE

A wish for the future which is capable of fulfillment is expressed by the present subjunctive alone or is introduced by **utinam** or **ut** (negative **utinam nē** or **nē**).

Utinam veniat! Would that he may come; I wish he would come;
if only he would come!

Utinam nē veniat! Would that he may not come; I wish he would not come; if only he would not come!

Wishes incapable of fulfillment utilize the imperfect subjunctive for present time (cf. present contrary-to-fact conditions) and the pluperfect for past time (cf. past contrary-to-fact conditions).

Utinam veniret! Would that he were coming; I wish he were coming;
if only he were coming! (but he is not; the wish is incapable of fulfillment, or *contrafactual*)

Utinam vēnisset! Would that he had come; I wish he had come; if only he had come! (but he did not; the wish is incapable of fulfillment, or *contrafactual*)

B. Direct Questions

Questions are sometimes introduced by interrogative words: **quis?**, ‘who?’; **quid?**, ‘what?’; **quandō?**, ‘when?’; **quō?**, **quō modō?**, ‘how?’; **cūr?**, **quam ob rem?**, ‘why?’; **unde?**, ‘from where?’; etc. If no interrogative word is used, the

enclitic **-ne** is frequently attached to the introductory word in order to indicate that a question is approaching.

Venisne mēcum? Are you coming with me?

When the answer "yes" is expected, the question is introduced by the word **nōnne**.

Nōnne venis mēcum? You are coming with me, aren't you? (answer "yes" expected)

When the answer "no" is expected, the question is introduced by the word **num**.

Num venis mēcum? You aren't coming with me, are you? (answer "no" expected)

Double questions are introduced by the particles **utrum** (or **-ne** or no introductory particle at all) ... **an**, 'whether...or'.

Utrum mēcum venis an cum (Whether) are you coming with me or staying with him?

Servusne es an nōn? Are you a slave or not?

Servus es an nōn? Are you a slave or not?

C. Indirect Questions

Indirect questions are subordinate noun clauses which serve as the object (and, less frequently, the subject) of the words on which they depend. These words usually, but not always, express or imply actions that take place in the head, such as saying, thinking, seeing, perceiving, knowing, asking, and the like. Indirect questions are introduced by an interrogative word and have their verbs in the subjunctive.

I know *who you are*. Direct Question: Who are you?

The noun clause "who you are" serves as the object of the word ("know") on which it depends. It is introduced by an interrogative word ("who") and, in Latin, its verb ("you are") would be in the subjunctive.

We wondered *what gifts you brought*. Direct Question: What gifts did you bring?

The noun clause "what gifts you brought" serves as the object of the word ("wondered") on which it depends. It is introduced by an interrogative word ("what") and, in Latin, its verb ("you brought") would be in the subjunctive.

What you are doing bothers me. Direct Question: What are you doing?

The noun clause "what you are doing" serves as the subject of the word ("bothers") on which it depends. It is introduced by an interrogative

word ("what") and, in Latin, its verb ("you are doing") would be in the subjunctive.

In direct speech, these clauses would have been direct questions with their verbs in the indicative or the deliberative subjunctive.

DIRECT QUESTIONS:

Quid sentiō?	What do I feel?
Quid agēs?	What will you do?
Unde vēnisti?	Where have you come from?
Quam ob rem mē spectās?	Why are you looking at me?
Spectāsne mē?	Are you looking at me?
Venisne mēcum an cum eō manēs?	Are you coming with me or staying with him?
Servusne es an nōn?	Are you a slave or not?
Quid faciam?	What am I to do? What should I do?

In order to turn these direct questions into the indirect form, we must review the rules for sequence of tenses (Unit Three, section G). The primary tenses in the indicative are the present, future, future perfect, and perfect (when translated using the English auxiliary verbs "has, have"). The secondary tenses in the indicative are the imperfect, perfect, and pluperfect. The subjunctive tenses in each sequence are illustrated in the examples below.

NOTE: While indirect questions follow the rules for sequence of tenses, a periphrastic form is frequently used to denote future time.

MAIN CLAUSE	SUBORDINATE CLAUSE		
PRIMARY SEQUENCE:	PRESENT TIME	FUTURE TIME	PAST TIME
Dicō, Rogō	quid faciam	quid factūrus sim	quid fēcerim
I say, I ask	what I am doing	what I shall do	what I did
SECONDARY SEQUENCE:			
Dixi, Rogāvi	quid facerem	quid factūrus essem	quid fēcissem
I said, I asked	what I was doing	what I would do	what I had done

Now, we shall turn the direct questions above into the indirect form:

Quid sentiō?	What do I feel?
Rogō quid sentiam.	I ask what I feel.
Rogāvi quid sentirem.	I asked what I felt (was feeling).
Expōnam quid sentiam.	I shall explain what I feel.
Sciō quid sentiam.	I know what I feel.
...etc.	

Quid agēs? What will you do?
 Rogō quid āctūrus sis. I ask what you will do.
 Rogāvi quid āctūrus essēs. I asked what you would do.
 Expōnam quid āctūrus sis. I shall explain what you will do.
 Sciō quid āctūrus sis. I know what you will do.
 ...etc.

Unde vēnisti? Where have you come from?
 Rogō unde vēneris. I ask where you have come from.
 Rogāvi unde vēnissēs. I asked where you came (had come) from.
 ...etc.

Quam ob rem mē spectās? Why are you looking at me?
 Rogō quam ob rem mē I ask why you are looking at me.
 spectēs.
 Exposui quam ob rem mē I explained why you were looking at me.
 spectārēs.
 Exposui quam ob rem mē I explained why you had looked at me.
 spectāvissēs.
 ...etc.

Spectāsne mē? Are you looking at me?
 Rogō num (*here* = 'whether') mē spectēs. I ask whether you are looking
 at me.
 ...etc.

Utrum venis mēcum (venisne mēcum) Are you coming with me or staying
 an cum eō manēs?
 Nescivērunt utrum venirēs mēcum They did not know whether you
 (venirēsne mēcum) an cum eō were coming with me or staying
 manērēs.
 ...etc.

Servusne es an nōn? Are you a slave or not?
 Rogō servusne sis necne. I ask whether you are a slave or not.
 ...etc.

Quid faciam? What should I do?
 Rogō quid faciam. I ask what I should do.
 ...etc.

OBSERVATION: In double indirect questions, when the second question is negative, **necne** is used more frequently than the **an nōn** of the direct question.

D. The Adjective *idem*, *eadem*, *idem*, 'same'

The forms are essentially those of **is**, **ea**, **id**, with **-dem** added as a suffix. The differences are as follows:

1. In the nominative masculine singular, the **s** of **is** drops out and the **i** becomes long.
2. In the nominative and accusative neuter singular, the **d** of **id** disappears.
3. A final **-m** is changed to **-n** before **-dem**.

Thus, the paradigm:

SINGULAR				PLURAL	
M.	F.	N. —	M.	F.	N.
idem	eadem	idem	eidem (idem)	eaedem	eadem
eiusdem	eiusdem	eiusdem	eōrundem	eārundem	eōrundem
eidem	eidem	eidem	eisdem (isdem)	eīsdem (isdem)	eīsdem (isdem)
eundem	eandem	idem	eōsdem	eāsdem	eadem
eōdem	eādem	eōdem	eīsdem (isdem)	eīsdem (isdem)	eīsdem (isdem)

As with the demonstrative adjectives you have learned, the forms may also be used as pronouns.

E. The Pronoun and the Adjective *quidam*, 'certain'

The pronoun **quidam**, **quaedam**, **quiddam**, and the adjective **quidam**, **quaedam**, **quoddam** are essentially the same in declension as the relative pronoun, with **-dam** added as a suffix. The only exceptions are:

1. The pronoun has **quid-** for the neuter singular, nominative and accusative.
2. **-m** before **-dam** becomes **-n**.

SINGULAR			PLURAL		
M.	F.	N.	M.	F.	N.
quīdam	quaedam	quiddam (quoddam)	quīdam	quaedam	quaedam
cuiusdam	cuiusdam	cuiusdam	quōrundam	quārundam	quōrundam
cuidam	cuidam	cuidam	quibusdam	quibusdam	quibusdam
quendam	quandam	quiddam (quoddam)	quōsdam	quāsdam	quaedam
quōdam	quādam	quōdam	quibusdam	quibusdam	quibusdam

F. The Intensive Adjective *ipse*, *ipsa*, *ipsum*, 'self, very'

This adjective, which may also be used as a pronoun, declines like **ille**, except in the neuter nominative and accusative singular which have **-um** instead of **-ud**.

SINGULAR			PLURAL		
M.	F.	N.	M.	F.	N.
ipse	ipsa	ipsum	ipsi	ipsae	ipsa
ipsius	ipsius	ipsius	ipsōrum	ipsārum	ipsōrum
ipsī	ipsī	ipsī	ipsīs	ipsīs	ipsīs
ipsum	ipsam	ipsum	ipsōs	ipsās	ipsa
ipsō	ipsā	ipsō	ipsīs	ipsīs	ipsīs

Ipse is used to *intensify* the word it modifies or stands for.

- | | |
|----------------------------|---|
| Ipse veniam. | I <i>myself</i> shall come. |
| Virum ipsum vidit. | He saw the man <i>himself</i> ; he saw the <i>very</i> man. |
| Expōnam quid ipse sentiam. | I shall explain what I <i>myself</i> feel. |
| Ipse sēcum loquitur. | He <i>himself</i> speaks with (to) himself. |

G. The Demonstrative Adjective *iste, ista, istud*, 'that (of yours)'

This adjective (also used as a pronoun) declines like **ille**. It frequently carries a pejorative or derogatory tone.

Iste amicus venire nō potest. *That friend (of yours)* can't come; *that damned friend* can't come.

UNIT TWELVE — VOCABULARY

UNIT TWELVE — NOTES ON VOCABULARY

Accipiō (*ad* + *capiō*) in addition to meaning ‘receive, accept’ means ‘hear’, that is, to receive information through the ears.

Sē recipere means ‘to take oneself, withdraw’ to a place: **Servī sē ad deōrum ārās recēpērunt**, ‘The slaves took themselves to the altars of the gods’.

Comes, comitis, M. or F., is formed as though from **comeō** (*com-* + *eō*), ‘go with’; **comes** is the person who goes with someone, ‘companion’.

Cōpia, cōpiae, F., means ‘abundance, supply’ in the singular, but in the plural, it means ‘troops’.

Dēligō, ‘select, choose, gather’, is a compound of **legō**; it has **dēlēgī** for the third principal part.

Exorior is a compound of **orior, orīrī, ortus sum**, ‘rise’. **Exorior** in addition to meaning ‘rise, arise’ means ‘appear, start’. The East is called the Orient because that is where the sun rises.

Expōnō is a compound of **pōnō**; it means ‘set forth, expose, explain’.

Horridus, -a, -um is derived from a verb meaning ‘to bristle’; therefore, it means ‘rough, shaggy’, and thus, ‘horrible’.

Idem, eadem, idem is simply a compound of **is, ea, id** plus **-dem**, ‘exactly’; it means ‘same’. The abbreviation *ibid.* stands for **ibidem**, ‘exactly there’.

Immortālis, -e means literally ‘not’ (*im-*) ‘pertaining to’ (-ālis) ‘death’ (-mort-), thus, ‘immortal, everlasting’.

Ipse, -a, -um, declined like **ille, -a, -ud** (except for the neuter singular nominative and accusative) intensifies the word it modifies and means ‘self, very’. As in Irish literature one is accustomed to read “Oh, ‘tis himself” or “Himself is coming”, so in Latin one may find **Ipse venit**, ‘He himself is coming’, or **Ipsum volui!**, ‘The very man I wanted!’

Iste, -a, -ud (declined like **ille, -a, -ud**) frequently (but not always) has a pejorative sense and means ‘that (of yours)’ or ‘that rotten no-good’.

Iussum is simply the fourth principal part of the verb used as a noun, ‘the ordered thing’ or ‘order, command’. Note that the ablative singular is **iussū**.

Manēō, manēre, mānsī, mānsus and **remanēō, remanēre, remānsī, remānsus**, may be used interchangeably; the **-a-** lengthens in the perfect stem before **-ns-**. Both verbs mean ‘remain’. Do not confuse the singular present active imperative **manē**, ‘remain’, with **māne** (adverb), ‘early in the morning’.

The deponent verb **misereror**, **miserēri**, **miseritus sum**, ‘pity’, governs the genitive case: **Meī miserēris?**, ‘Do you pity me?’

Nesciō is simply **ne** + **sciō**, ‘not know, be ignorant’.

Nōnne and **num** introduce a question. **Nōnne** is used when the answer “yes” is expected, **num** when the answer expected is “no”. **Num** may also introduce an indirect question and then it means ‘whether’.

Ops, **opis**, **F.**, in the singular means ‘power, strength, help’, but in the plural it means ‘resources, wealth’.

Pauci, **paucae**, **pauca** is an adjective found in the plural; it means ‘few’.

Quia and **quod**, ‘because’, may be used interchangeably.

Quidam, **quaedam**, **quiddam** is the pronoun, ‘a certain’; **quidam**, **quaedam**, **quoddam** is the adjective, ‘certain’: **Sī quiddam mihi dicās**, **dē eō taceam**, ‘If you should tell me a certain thing, I would be silent about it’; **Quoddam dōnum quod placēbit tibi habeo**, ‘I have a certain gift which will please you’.

Rogō, ‘ask’, a first conjugation verb, means not only to ask a question, but also to make a demand on someone: **Tē rogāvī nē id facerēs**, ‘I asked you that you not do that’. Note that this verb can take two objects: **Tē pecūniām rogō**, ‘I ask you for money’.

Tamquam means ‘as if, as, as it were’, and **tandem** means ‘at last, at length’. In order not to confuse these two words, it might be helpful to remember that a bicycle built for two is called a tandem (humorously, from the idea of length: the second person sits behind, not next to, the other.)

ADJECTIVAL SUFFIXES ADDED TO THE STEMS OF VERBS

The suffixes **-āx**, **-idus**, **-ulus**, or **-ivus** added to the stem of a verb express the action of the verb as a quality or tendency.

audāx, **-ācis**, ‘bold, courageous’

efficāx, **-ācis** (**efficiō**, ‘effect, bring about’), ‘effectual, efficient’

fugāx, **-ācis**, ‘apt to flee, swift’

loquāx, **-ācis**, ‘talkative’

pūgnāx, **-ācis**, ‘fond of fighting, combative, warlike’

timidus, **-a**, **-um**, ‘fearful, afraid’

vividus, **-a**, **-um**, ‘containing life, living’

bibulus, **-a**, **-um** (**bibō**, **-ere**, ‘drink’), ‘drinking readily’

crēdulus, **-a**, **-um**, ‘easy of belief, credulous’

garrulus, **-a**, **-um** (**garriō**, **-ire**, ‘chatter’), ‘chattering, talkative’

querulus, **-a**, **-um** (**queror**, **querī**, ‘complain’), ‘full of complaints, complaining’

tremulus, **-a**, **-um** (**tremō**, **-ere**, ‘tremble’), ‘shaking, trembling’

āctivus, **-a**, **-um**, ‘active, practical’

captivus, -a, -um, 'taken prisoner, captive'
fugitivus, -a, -um, 'fleeing away, fugitive'
nātivus, -a, -um, 'imparted by birth, innate'

The suffixes **-ilis** and **-ibilis** added to the stem of a verb express passive qualities, and occasionally active ones.

agilis, -e, 'easily moveable, nimble'
docilis, -e, 'easily taught'
amābilis, -e, 'worthy of love, lovely'
crēibilis, -e, 'worthy of belief, credible'
mirābilis, -e (**miror**, -āri, 'wonder at, admire'), 'wonderful, admirable'
mūtabilis, -e, 'changeable'
spectābilis, -e, 'visible, worth seeing'

The suffixes **-bundus** and **-cundus** added to the stem of a verb denote a continuance of the act or quality expressed by the verb.

errābundus, -a, -um, 'wandering about'
furibundus, -a, -um (**furō**, -ere, 'be mad'), 'raging, mad'
moribundus, -a, -um, 'dying'
irācundus, -a, -um (**irāscor**, **irāsci**, 'be angry'), 'irritable, angry'
fācundus, -a, -um (**fōr**, **fāri**, **fātus sum**, 'speak'), 'speaking with ease, eloquent'

This verb **for** contains the stem **fā-** which is found in such words as **fāma**, 'talk, report, reputation'; **fābula**, -ae, F., 'narration, story, play'; **fātum**, -i, N., 'prediction, destiny, fate'; **fās**, indeclinable, 'right, proper, allowable (according to divine dictate)'; **nefās**, indeclinable, 'unlawful, abominable', in other words, so bad it cannot be talked about. The Romans divided their calendar between **fāsti** and **nefāsti** — days (lucky and unlucky) on which business was allowed or not allowed to be conducted. An infant, literally, is a child who does not (**in-**) speak; once he begins speaking he is no longer technically an infant.

UNIT TWELVE — DRILL

1. Respondeāmus!
2. Utinam domini respondeant (respondissent)!

UNIT THIRTEEN

A. The Indefinite Pronouns *aliquis*, *quis*, *quisquam*, *quisque*

Indefinite pronouns represent *some* person or thing without designating exactly *which* one. *Quidam*, ‘a certain’, met in the previous unit, is also an *indefinite* pronoun.

1. *aliquis*

The pronoun **aliquis**, **aliquid** is declined like the interrogative pronoun **quis**, **quid** with **ali-** added as a prefix; the forms for the adjective, **aliquī**, **aliqua**, **aliquod**, are identical to those of the relative pronoun **qui**, **quaē**, **quod** with the prefix **ali-**, with the exception of the feminine nominative singular (as noted in the three parts given), and the neuter nominative and accusative plural, which are **aliqua**.

The pronoun means ‘someone, something, anyone, anything’; the adjective means ‘some, any’.

Aliquis ad mē heri vēnit. *Someone* came to me yesterday.

Nōn sine aliquō metū cum incolis pūgnāvimus. We fought with the inhabitants not without *some* fear.

Vidistine aliquem? Did you see *anyone* (*someone*)?

2. *quis*

Quis, **quid** (adjective **qui**, **qua**, **quod**) is essentially identical to **aliquis**, **aliquid** (adjective, **aliquī**, **aliqua**, **aliquod**), although it perhaps has a greater degree of indefiniteness about it. It is most frequently used instead of **aliquis** after the words **sī**, **nisi**, **num**, and **nē**.

REMEMBER: After **sī**, **nisi**, **num**, and **nē**, all the **ali-**'s drop away.

Si quis ad mē veniat, fēlix sim. If *anyone* (*someone*) should come to me, I would be happy.

Nisi quem videās, fēlix nōn sis. If you should not see *anyone* (*someone*), you would not be happy.

Num quem vidēs? You don't see *anyone* (*someone*), do you?

Hoc fēcit nē quis irātus esset.

He did this in order that *someone* might not be angry.

3. quisquam

Quisquam, quidquam (sometimes written **quicquam**) is declined like **quis, quid** with the suffix **-quam**. It means ‘someone (something), anyone (anything)’ and is used mainly in sentences which are negative or imply negation. The adjective for **quisquam** is supplied by the word **ullus, -a, -um**, ‘any’.

Vix quisquam hoc negāre Hardly *anyone* can deny this.

potest.

Fortior fuit lēgātus quam The envoy was braver than *any(one)* of the
quisquam militum. soldiers. (The implied negation here is that no one of the soldiers was braver than the envoy.)

Sōlis lūx clārior est quam The light of the sun is brighter than the light
lūx ullius ignis. of *any* fire.

4. quisque

The pronoun **quisque, quidque** (sometimes written **quicque**) (adjective, **quīque, quaeque, quodque**) is declined like **quis, quid** (adjective like **qui, quae, quod**) with the suffix **-que** and means ‘each one (each), everyone (every)’.

Haec optimus quisque sentit. *Each (every) very good man perceives these things.*

Quīque vir hanc pueram amat. *Each (every) man loves this girl.*

Cuique homini multa pecūnia There is much money to *each (every) man; each (every) man has much money.*
est.

B. Dative with Certain Intransitive Verbs

There are certain intransitive verbs in Latin which govern the dative case. For example, while in English the verb “persuade” is transitive and governs an object, in Latin **persuādeō** is intransitive (it means ‘I am persuasive’) and takes a dative of reference.

Tibi persuādeō. I am persuasive (*with reference*) to you; I persuade you.

Some of the more common verbs of this variety are:

crēdō, crēdere, crēdidi, crēditus	be credulous, believe; be trusting, trust
faveō, -ēre, fāvi, fautus	be favorable, favor
ignōscō, ignōscere, ignōvi, ignōtus	be forgiving, forgive, pardon
imperō (1)	give orders, command
noceō, nocēre, nocui, nocitus	be harmful, harm
parcō, parcere, pepercī, parsus	be sparing, spare
pāreō, -ēre, pāruī, pāritus	be obedient, obey
placeō, -ēre, placui, placitus	be pleasing, please
persuādeō, -ēre, persuāsi, persuāsus	be persuasive, persuade
studeō, -ēre, -ui, --	be zealous, study

C. Impersonal Passives

Like all intransitive verbs, the verbs introduced in B above cannot logically be used in the passive. When a passive idea is desired, an *impersonal* construction must be used. An *impersonal* verb form appears in the third person singular and has no personal subject. The pronoun "it" may be used in English to give a literal translation.

Tibi parcō.	I spare (am sparing to) you.
Tibi à mē parcitur.	<i>It is spared (there is sparing) to you by me; you are spared by me.</i>
Mihi à tē parcitur.	<i>It is spared (there is sparing) to me by you; I am spared by you.</i>
Mihi à tē parsum est.	<i>It was (has been) spared (there was/has been sparing) to me by you; I was (have been) spared by you.</i>

When such verbs are used in the passive periphrastic construction, the ablative of agent generally occurs instead of the more usual dative of agent in order to avoid confusion with the dative that is governed by the intransitive verb.

Tibi à nōbis parcendum est. It must be spared to you *by us; we must spare you.*

The impersonal passive construction sometimes occurs with other verbs which do not take the dative when particular attention is called to the verbal action itself rather than to the ones performing the action.

Domī pūgnātur. *It is (being) fought at home; there is fighting at home; fighting is going on at home; a battle is being fought at home.*

Āriter pūgnātūm est. *It was fought fiercely; there was fierce fighting; the battle was fiercely fought.*

Ad villam curritur. *It is (being) run to the country house: there is (a) running to the country house: people are running to the country house.*

D. Dative with Compound Verbs

Many verbs compounded with prefixes such as the following govern the dative case.

ad-	con-	ob-	prō-
ante-	in-	post-	sub-
circum-	inter-	prae-	super-

It will be noted that such verbs cannot stand alone or, if transitive, simply with an accusative object; they require another word to complete the sense. For example,

praesum I am at the head of... (Another word is required to complete the sense; it will be in the dative.)

Nautis praesum. I am at the head of *the sailors*; I command *the sailors*.

praeficiō I make at the head of, I place in command of... (Two additional words are required to complete the sense. Since the basic verb in this compound (-ficiō from faciō) is transitive, the root -ficiō will govern the accusative, and the prefix prae- will govern the dative.)

Tē nautis
praeficiō. I place you in command of *the sailors*.

These datives, like all datives, are basically referential.

Nautis praesum. I am at the head with reference to the sailors; I am at the head of the sailors.

Tē nautis
praeficiō. I make you in command with reference to the sailors; I place you in command of the sailors.

E. The Verb *fīō*, 'be made, be done, happen, become'

Fīō, fieri, factus sum is used as the passive for the verb **faciō, -ere, fēci, factus**. The perfect system poses no problem, for it is identical to that formed from **faciō** (the last principal part of both verbs is the same). The present system functions like an i-stem verb of the third conjugation, except that it has active forms with passive meanings, and the quantity of the -i- is long in the present (except for the third person singular), the imperfect, and future indicative, the imperative, and the present subjunctive.

NOTE that the imperfect subjunctive is formed on the hypothetical active infinitive for this verb:

fieri/m
fieri/s
...etc.

F. The Numerical Adjective *duo*, *duae*, *duo*, 'two'

The plural adjective **duo**, 'two', has its own set of endings (shared also by **ambo**, **ambae**, **ambo**, 'both').

M.	F.	N.
duo	duae	duo
duōrum	duārum	duōrum
duōbus	duābus	duōbus
duōs (-o)	duās	duo
duōbus	duābus	duōbus

UNIT THIRTEEN — NOTES ON VOCABULARY

Aliquis, aliquid is the pronoun, ‘someone, anyone, something, anything’; it is declined like **quis, quid** with the prefix **ali-**. **Aliqui, aliqua, aliquod** is the adjective ‘some, any’, declined like the relative pronoun (except that the **quae** forms become **-qua**) with the prefix **ali-**. But the feminine plural remains **-quae**.

Note that the verb **cōstituō, cōstituere, cōstitui, cōstitūtus**, ‘set, establish, decide’, has the same stem in the present and perfect active. Therefore, **cōstituit** may be either present or perfect, for example.

Currō, currere, cucurri, cursus, ‘run’, duplicates the **cu** in the perfect active stem in the same way that **pellō**, for instance, duplicates the **pe** in its perfect active stem **pepul-**.

Duo, duae, duo, ‘two’, and **ambo, ambae, ambo**, ‘both’, are declined in the same way. They are the only remains of the *dual* number in Latin; the dual was used

for two objects only, as the singular is used for one object, and the plural for several objects.

The verb **fīō**, **fieri**, **factus sum**, ‘be made, be done, happen, become’, is used as the passive of **faciō**. In a way, it is the opposite of a deponent verb since its forms are active in appearance, but passive in meaning: **Hoc fīebat**, ‘This was done’.

Hic, ‘here’, is an adverb and should not be confused with the adjective **hic**; **illic** is the adverb ‘there’.

Ignōscō is a compound of **nōscō**; it means ‘be forgiving, forgive, pardon’ and governs the dative case.

There is a deponent verb **īrāscor**, **īrāsci**, **īrātus sum**, ‘become angry’, which is derived from **īra**, ‘anger’. Its participle **īrātus** is used as an adjective, ‘angry’.

Iūs, **iūris**, N., is ‘right, law’, as in our Bill of Rights. There is another word **iūs**, **iūris**, N., which means ‘soup, sauce’.

Lēgātus, **lēgāti**, M., is an ‘envoy, legate’; the legate was an official assistant of a general or governor of a province.

Miror is a first conjugation deponent meaning ‘wonder (at), be amazed (at), admire’; it has a compound, **admiror**, with the same meanings. Related to this compound is the noun **admirātiō**, **admirātiōnis**, F., ‘admiration’.

The first conjugation deponent **mōror**, ‘delay, stay, hinder’, is related to the noun **mōra**, -ae, F., ‘delay’.

Four Latin verbs are frequently confused with one another; a careful memorization of the principal parts of each of them would eliminate such confusion:

parcō, **parcere**, **pepercī**, **parsus**, ‘be sparing, spare’ (+ dative)

pāreō, **pārēre**, **pāruī**, **pāritus**, ‘be obedient, obey’ (+ dative)

parō (1), ‘prepare, make ready, provide, get’

pariō, **parere**, **peperi**, **partus**, ‘bear, give birth to, produce’

Persuādeō, **persuādēre**, **persuāsī**, **persuāsus** is a compound of **suādeō**, ‘urge, persuade’. This verb and **suēscō**, **suēscere**, **suēvī**, **suētus**, ‘be accustomed’, have many compounds and derivatives; in these words, **su** is pronounced as **sw** (compare the English word “suave”). **Persuādeō**, therefore, has four syllables.

Plēbs, **plēbis**, F., ‘common people’, is a collective noun and so it takes a singular verb: **Plēbs ducī crēdit**, ‘The common people trust the leader’.

Praeferō, ‘bring before, place before, prefer’, and **praeficiō**, ‘make before, make at the head of, put in command of’, govern both an object in the accusative case and a dative with compounds: **Dux lēgātum cōpiis praefēcit**, ‘The leader put the legate in command of the troops’.

After **sī**, **nisī**, **num**, and **nē**, **quis** means ‘someone, anyone’, and **quid** means ‘something, anything’. The adjective **qui**, **qua**, **quod**, ‘some, any’, has **qua** forms instead of **quae**.

The spelling **quicquam**, ‘something, anything’, may be used instead of **quidquam**, as **quicque**, ‘each thing, everything’, may be used instead of **quidque**.

Quō is an adverb meaning ‘(to) where’. A chart of these “place” adverbs might be helpful at this point:

ubi , ‘where’	quō ‘(to) where’	unde , ‘from where’
hic , ‘here’	hūc , ‘(to) here’	hinc , ‘from here’
illic , ‘there’	illūc ‘(to) there’	illinc , ‘from there’
ibi , ‘there’	eō , ‘(to) there’	inde , ‘from there’

Obviously, **studium**, **studii**, N., ‘zeal’, and **studeō**, **studēre**, **studī**, --, ‘be zealous, study’ (+ dative), are related.

Usus is a fourth declension noun from **ūtor**; it means ‘use, advantage, enjoyment’.

ADJECTIVAL SUFFIXES ADDED TO THE STEMS OF NOUNS

The suffixes **-ōsus** and **-lentus** added to the stem of a noun mean ‘full of’.

animōsus , -a, -um	full of courage, bold, spirited
annōsus , -a, -um	of many years, aged
aquōsus , -a, -um	abounding in water, moist
bellicōsus , -a, -um	warlike, martial

ABSTRACT NOUN SUFFIXES

The suffixes **-ia** (-iēs), **-tia** (-tiēs), **-tās**, **-tūs**, **-tūdō** added to the stems of adjectives (usually) produce feminine abstract nouns.

<i>dēmentia, -ae, F.</i>	insanity, madness
<i>memoria, -ae, F.</i>	memory, recollection
<i>pauperiēs, -ēī, F.</i>	poverty
<i>saevitia, -ae, F.</i>	a raging, rage, fierceness
<i>laetitia, -ae, F.</i>	joy, gladness, pleasure
<i>cānitiēs, -ēī, F. (cānus, -a, -um, ‘white’)</i>	a grayish-white color
<i>crūdēlitās, -tātis, F.</i>	harshness, severity, cruelty
<i>gravitās, -tātis, F.</i>	weight, heaviness
<i>iuentūs, -tūtis, F.</i>	the age of youth, youth
<i>senectūs, -tūtis, F. (senex, senis, ‘old’)</i>	old age
<i>magnitūdō, -inis, F.</i>	greatness, size
<i>multitūdō, -inis, F.</i>	a great number, multitude

The suffixes *-ium* and *-tium* added to noun stems (usually) produce neuter abstract nouns.

<i>augurium, -ī, N. (augur, -uris, M. or F., ‘soothsayer’)</i>	the observation and interpretation of omens, augury
<i>magisterium, -ī, N.</i>	the office of a president, chief, director, superintendent, etc.
<i>hospitium, -ī, N.</i>	hospitality
<i>servitium, -ī, N.</i>	the condition of a slave, slavery

UNIT FOURTEEN

A. Clauses of Result

Clauses which express the result of an action or a quality are introduced by *ut* for the positive, *ut nōn* (*nēmō*, *nihil*, *numquam*, etc.) for the negative, and have their verbs in the subjunctive.

The approach of a result clause is often indicated by the presence of an adjective or adverb of degree in the main clause.

ADJECTIVES: $\begin{cases} \text{tantus, -a, -um, 'so great'} \\ \text{tālis, -e, 'such, of such a sort'} \\ \text{tot (indeclinable), 'so many'} \end{cases}$

ADVERBS: $\begin{cases} \text{ita, 'so'} \\ \text{tam, 'so'} \\ \text{sic, 'in this way'} \\ \text{adeō, 'so'} \end{cases}$

Tanta est tempestās ut omnēs nāvēs *So great is the storm that all the ships are being destroyed.*

Tam celeriter currit ut nēmō eum vincere possit. *He runs so fast that no one can beat him.*

The rules for sequence of tenses are generally observed. However, the perfect subjunctive is sometimes found in secondary sequence instead of the imperfect in order to lay stress on the fact that the action is completed.

Tam irātus erat ut hoc diceret. *He was so angry that he said this.*
Tam irātus erat ut hoc dixerit. *He was so angry that he (actually) said this. (emphasis on completion of the action)*

Tanta erat tempestās ut omnēs nāvēs dēlērentur. *So great was the storm that all the ships were (being) destroyed.*

Tanta erat tempestās ut omnēs nāvēs dēlētae sint. *So great was the storm that all the ships were (actually) destroyed. (emphasis on completion of the action)*

Note the following similarities and distinctions between purpose and result clauses:

PURPOSE

Positive introduced by **ut**.

Negative introduced by **nē**.

Vēnit ut turbam vinceret.

He came *in order that* he might
overcome the crowd.

Nōn vēnit nē turbam vinceret.

He didn't come *in order that* he
might *not* overcome the crowd.

RESULT

Positive introduced by **ut**.

Negative introduced by **ut...nōn**.

An adverb or adjective of degree in
the main clause frequently signals the
approach of a clause of result.

**Tam fortis erat ut turbam vinceret
(vicerit).**

He was *so* brave *that* he overcame
the crowd.

**Tam fortis erat ut à turbā nōn vin-
cerētur (victus sit).**

He was *so* brave *that* he was *not*
overcome by the crowd.

B. Substantive Clauses of Result

Certain verbs and expressions have result clauses either as their object or subject. Of these, the most important are:

efficere ut, 'to bring it about that'
facere ut, 'to see to it that'

accidit ut, 'it happens that'

fit ut, 'it comes about that, it happens
that'

fieri potest ut, 'it is able to happen that,
it is possible that'

Effecit ut nautae inter
sē pūgnārent. *He brought it about that the sailors fought among
themselves; he brought it about that the sailors
fought one another.*

Accidit ut ego ipse illic
manērem. *It happened that I myself remained there.*

Fit ut nēmō sit
laetior quam ego. *It happens that no one is happier than I.*

+ object clause

+ subject clause

The verbs **efficere** and **facere** are frequently followed by **nē** instead of **ut...nōn** to introduce a negative clause, particularly when there is an implicit notion of command in the sentence.

Fac **nē** cui noceās. See to it *that* you do *not* harm anyone.

**C. Relative Clauses of Characteristic (Generic [*genus, generis*, N., 'sort']
Relative Clauses)**

The relative pronoun *qui*, *quae*, *quod* plus the subjunctive can be used to describe its antecedent in terms of the general qualities or characteristics of the group to which the antecedent belongs.

Is est qui celeriter ambulet. *He is the (kind of) man who walks fast; he is a man who walks fast.*

(The relative clause with its verb in the subjunctive characterizes its antecedent in terms of the general qualities of the larger group to which the antecedent belongs.)

COMPARE:

Is est qui celeriter ambulat. *He is the (actual) man who walks fast.*

(The relative clause with its verb in the indicative describes a particular antecedent.)

Sunt qui ei crēdant. *They are the (kind of) men who trust him; there are men (of the kind) who trust him; there are those who trust him.*

COMPARE:

Hi sunt qui ei crēdunt. *These are the (actual) ones who trust him.*

Quis erat qui hoc crēderet? *Who was there (of the kind) who believed this?*

In many instances, these clauses have general or indefinite antecedents, of which the following are common:

sunt qui	there are those who
est qui	he is one who
nēmō est qui	there is no one who
nihil est quod	there is nothing that
quis est qui?	who is there who?
quid est quod?	what is there that?

But these generic clauses are also found with less vague and even with precise antecedents when they are felt to characterize or generalize rather than denote a specific attribute of the antecedent:

sōlus est qui	he is the only (kind of) man who
is est qui	he is the (kind of) man who
Cicerō est qui	Cicero is the (kind of) man who
dignus est qui	he is the (kind of) man worthy who (to)

Relative clauses of characteristic are best translated into English using the indicative; the generic idea is carried over into English by the formulae which introduce such clauses — i.e., ‘there is *no one* who’, ‘he is the *sort of* man who’. Sometimes, however, the context requires that the subjunctive be rendered with potential force:

Sōlus est qui hoc nesciat.	He is the only one who does not know this. OR He is the only one who would not know this. (potential force)
Quid erat quod agerēmus ?	What was there that we could do? (potential force)
Quis est qui hoc faciat ?	Who is the (kind of) one who does this?; Who is there who does this? OR Who is there who would do this? (potential force)
Nēmō erat qui eum ridēret.	There was no one (the kind) who laughed at him. OR There was no one who would laugh at him. (potential force)
Dignus est qui nautis praesit.	He is the kind of worthy man (i.e., he belongs to the class of worthy men) who is (would be) in command of the sailors; he is worthy to be in command of the sailors.

Frequently, negative relative clauses of characteristic are introduced by **quīn** (= **quī [quae, quod] nōn**):

Nēmō est quīn haec intellegat.	There is no one who does <i>not</i> understand these things. OR There is no one who <i>would not</i> understand these things.
--------------------------------	---

D. Relative Clauses of Result

Very closely allied to the relative clause of characteristic is the relative clause of result.

Nihil est tam malum quod mūtāri nōn possit.	There is nothing so bad <i>with the result that it cannot</i> be changed; there is nothing so bad <i>that it cannot</i> be changed.
---	---

Nēmō est tam caecus quī haec nōn videat.	There is no one so blind <i>who</i> does not <i>see</i> these things; there is no one so blind <i>that he does not see</i> these things.
--	--

Here there is a fusion of both a relative clause of characteristic and a result clause to produce a relative clause of result. The relative pronoun is standing for the **ut** which would normally introduce the clause of result.

E. Relative Clauses of Purpose and Purpose Clauses Introduced by Adverbs

Purpose clauses were presented in Unit Three as having their verbs in the subjunctive and as being introduced by **ut** for the positive and **nē** for the negative. However, there are other ways of expressing purpose with the subjunctive in Latin:

1. **Quō** (ablative, 'by which') introduces a purpose clause which contains a comparative.

Properātis quō celerius You hasten *by which you may arrive* more quickly: you hasten in order that you may arrive more quickly.
 (= Properātis ut eō celerius adveniātis.)

2. Purpose clauses may be introduced by a relative pronoun when its antecedent, usually not the subject of the main verb, is clearly expressed in the main clause. They may also be introduced by an adverb (**ubi**, 'where'; **unde**, 'from where'; **quō**, '(to) where').

Nūntium mittit quī dē mōribus He sends a messenger *who may ask about the customs of the inhabitants*; he sends a messenger *in order that he* (i.e., the messenger) *may ask about the customs of the inhabitants*.
 (= Nūntium mittit ut is dē mōribus incolārum roget.)

Domum cucurri ubi mē cēlārem. I ran home *where I might hide*; I ran home in order that I might *hide there*.
 (= Domum cucurri ut ibi mē cēlārem. I ran home in order that I might hide there.)

Scribēbat librōs quōs alii legerent. He wrote books *which others might read*; he wrote books *in order that others might read them*.
 (= Scribēbat librōs ut eōs alii legerent.)

F. Indirect Reflexives

It has been pointed out in Unit Seven, section B4, that reflexives refer to the subject of the verb of their own clause. A reflexive so used is called a *direct reflexive*.

Senex multam pecūniam sibi parāvit. The old man got much money *for himself*.

However, in subordinate subjunctive clauses and in indirect statement, the reflexive usually refers to the subject of the *main* clause and not to that of the clause in which it appears. This use is called the *indirect reflexive*.

Dux lēgātūm mittit quī sibi multam pecūniam paret. The leader sends a legate in order that he may get much money *for him(self)* (i.e., the leader).

Plēbs ūrat ut sibi parcāmus. The common people beg that we spare *them*.

Dicit illōs irātōs sē interficere velle. He says that those angry men want to kill *him*.

Vir rogāvit quam ob rem iste adūlēscēns ad sē vēnisset. The man asked why that young man of yours had come to *him* (i.e., to the man).

If, in the third example above, the author had wished to take the less frequent course and have his reflexive refer to the subject of the verb in its own clause (here, the infinitive *velle*), clarity could have been achieved by inserting the appropriate form of the intensive pronoun, *ipse*, *ipsa*, *ipsum*:

Dicit illōs irātōs sē ipsōs interficere velle. He says that those angry men want to kill *themselves* (i.e., their *very* selves).

UNIT FOURTEEN — NOTES ON VOCABULARY

Accidō, **accidere**, **accidī**, ‘fall upon, happen, occur’, is a compound of **ad** and **cadō**; it lacks a fourth principal part and the perfect active stem loses the reduplication of the uncompounded form.

Adveniō is obviously a compound of **ad** and **veniō** and so it means ‘come to, arrive’. From the fourth principal part there is formed a fourth declension noun, **adventus**, **adventūs**, M., ‘arrival’.

Anima (Unit Two) was defined as ‘soul, spirit, life-force’; **animus**, **animī**, M., is ‘mind, rational spirit, soul’.

Auctōritās, **auctōritātis**, F., is the abstract noun from **auctor**; it means ‘authority’.

Colloquor, a compound of **com-** and **loquor**, means ‘speak, talk, converse with’.

Dignus, -a, -um, ‘worthy’, and its opposite **indignus**, -a, -um, ‘unworthy’, both govern the ablative case: **Multis dōnis est digna**, ‘She is worthy of many gifts’.

Intendō, **intendere**, **intendī**, **intentus** and **ostendō**, **ostendere**, **ostendī**, **ostentus**, both have the same stem in the present and in the perfect active: **intendimus**, ‘we stretch out’, ‘we have stretched out’; **ostendit**, ‘he shows’, ‘he has shown’.

Nōtus, -a, -um is simply the perfect passive participle of **nōscō** used as an adjective meaning ‘known, well-known, customary’. The original root of **nōscō** began with the letter g- (**gnōscō**). The Latin g is represented by the k in the German “kennen” and the English “know”.

Nūntiō and **nūntius** are obviously related; **nūntiō**, a first conjugation verb, is ‘report, announce’, and **nūntius**, **nūntiū**, M., is the one bringing the report, ‘messenger’, or the report itself, ‘message’. There is also an adjective **nūntius**, -a, -um, ‘announcing’.

Ōs, **ōris**, N., is ‘mouth, expression’. The diminutive **ōsculum**, **ōsculī**, N., is both ‘little mouth’ and ‘kiss’.

Parō, a first conjugation verb already mentioned (vocabulary notes in Unit Thirteen) means ‘prepare, make ready, provide, get’. From the last principal part there is formed a fourth declension noun **parātus**, **parātūs**, M., ‘preparation’.

The root of **senex**, **senis**, ‘old’, is found in the words **senātor**, **senātōris**, M., ‘senator’, and **senātus**, **senātūs**, M., ‘senate’. The senators originally were the older men who through their wisdom and experience were thought capable of guiding the state.

Quālis, -e, ‘what kind of, of what kind’, and **tālis**, -e, ‘such, of such a sort’, are correlatives: **Tālis dux erat quālis pater fuerat**, ‘He was such a leader as his father had been; as a leader, he was of the same character as his father’.

Tempestās, **tempestātis**, F., is ‘weather’, good or bad, as well as ‘storm, season’.

Vēritās, **vēritātis**, F., ‘truth’, is the abstract noun from **vērus**, -a, -um, ‘true’.

Vincō, **vincere**, **vīcī**, **victus** is ‘conquer, beat, overcome’. Remember Caesar’s expression, **Vēni, vīdī, vīcī**, ‘I came, I saw, I conquered’, for the third principal part of this verb. Do not confuse the last principal part **victus** with the last principal part of **vīvō**, ‘live’, which is **vīctus**.

SUFFIXES ADDED TO PRODUCE NOUNS

The suffixes **-iō**, **-tiō**, **-tūra**, and **-tus** added to the root or stem of a verb produce abstract nouns and names of actions.

- opiniō**, **-ōnis**, F. (**opinor**, **-ārī**, **-ātus sum**, ‘suppose, imagine’), ‘opinion, supposition’
- āctiō**, **-ōnis**, F., ‘doing, performing, action, act’
- mūnitiō**, **-ōnis**, F., ‘defending, fortifying, protecting’
- iactūra**, **-ae**, F., ‘a throwing, a throwing away’
- iunctūra**, **-ae**, F., ‘a joining, uniting, juncture’
- arbitrātus**, **-ūs**, M., ‘judgment, free-will, decision’
- victus**, **-ūs**, M., ‘way of life’

The suffixes **-men**, **-mentum**, **-mōniūm**, and **-mōnia** added to the root or stem of a verb produce nouns denoting acts, or means and results of acts.

- agmen**, **agminis**, N., ‘a collected multitude in motion or moving forward, a line of battle, march’
- cōnāmen**, **-inis**, N., ‘effort, exertion, struggle’
- hortāmen**, **-inis**. N., ‘incitement, encouragement, exhortation’
- experīmentum**, **-ī**, N., ‘proof, test, trial’
- mōmentum**, **-ī**, N., ‘movement, motion’
- mūnimentum**, **-ī**, N., ‘defense, fortification, protection’
- alimōniūm**, **-ī**, N., (**alō**, **alere**, **alūi**, **altus**, ‘nourish, support’), ‘nourishment, support’
- parsimōnia**, **-ae**, F. (**parcō**), ‘sparingness, frugality, thrift’

The suffix **-tōrium** added to the stem or root of a verb produces a noun meaning the place of the action.

- audītōrium**, **-ī**, N., ‘the place where something is heard, lecture room, hall of justice’
- dormitōrium**, **-ī**, N., (**dormiō**, **-īre**, **-īvī (-īlī)**, **-ītus**, ‘sleep’), ‘sleeping room, dormitory’

The suffix **-ārius** added to the stem of a noun produces a noun meaning ‘the person belonging to or the person engaged in or the person concerned with’.

- argentāriūs**, **-ī**, M., (**argentum**, **-ī**, N., ‘silver’), ‘a money changer, banker’
- apiāriūs**, **-ī**, M., (**apis**, **apis**, F., ‘bee’), ‘beekeeper’

The suffix **-ārium** added to the stem of a noun produces a noun meaning ‘place for’.

- apiārium**, **-ī**, N., (**apis**, **apis**, F., ‘bee’), ‘beehive’
- aviārium**, **-ī**, N., (**avis**, **avis**, F., ‘bird’), ‘a place where birds are kept, aviary’
- librārium**, **-ī**, N., ‘a place in which to keep books, bookcase’

UNIT FIFTEEN

A. **cum** Clauses

Cum is not only a preposition meaning ‘with’, but it occurs also as a subordinating conjunction with the meanings ‘when’, ‘since’, and ‘although’. The verb in such clauses is most often in the subjunctive, its tense determined by the rules for sequence of tenses after the main verb. The meaning of **cum** in such clauses must be determined from the context of the sentence.

1. TEMPORAL AND CIRCUMSTANTIAL CLAUSES

When the **cum** clause refers strictly to *time* and its action is coordinate with that of the main verb, it is a *temporal cum clause* and **cum** is translated ‘when’. Such clauses have their verbs in the *indicative*.

Cum tē vidēbō, fēlix erō. (*At the very time*) when I see you, I shall be happy.

Cum tē vidī, fēlix eram. (*At the very time*) when I saw you, I was happy.

If the **cum** clause states the *circumstances* in which the action of the main verb takes place, it is called a *circumstantial cum clause* and **cum** is translated ‘when’. When the action in such **cum** clauses refers to *present* or *future* time, the *indicative* is used.

Cum tē vidēbō, fēlix erō. Under the circumstances of my seeing you, I shall be happy; when I see you, I shall be happy.

When the action in the circumstantial **cum** clause is in *past* time, the *subjunctive* is used.

Cum tē vidērem, fēlix eram. When I saw you (i.e., not at a point of time, but under these circumstances). I was happy.

2. CAUSAL CLAUSES

When **cum** translates as ‘since’ or ‘because’, the **cum** clause is *causal*. The verb in *causal cum clauses* is always in the *subjunctive*.

- Cum tē videam, fēlix sum. *Since I see you, I am happy.*
 Cum tē viderim, fēlix sum. *Since I saw you, I am happy.*
 Cum tē vidērem, fēlix eram. *Since I saw you, I was happy.*
 Cum tē vidiſſem, fēlix eram. *Since I had seen you, I was happy.*

3. CONCESSIVE CLAUSES

When **cum** translates ‘although’, the **cum** clause is *concessive*. Frequently **tamen**, ‘nevertheless’, in the main clause indicates that **cum** is to be taken as ‘although’, but the **tamen** is not always there. *Concessive cum clauses always have their verbs in the subjunctive.*

- Cum tē videam, fēlix *Although I see you, (nevertheless) I am happy.*
 (tamen) sum.
 Cum tē viderim, fēlix *Although I saw you, (nevertheless) I am happy.*
 (tamen) sum.
 Cum tē vidērem, fēlix *Although I saw you, (nevertheless) I was happy.*
 (tamen) eram.
 Cum tē vidiſſem, fēlix *Although I had seen you, (nevertheless) I was happy.*
 (tamen) eram.

THUS:

	PRIMARY SEQUENCE	SECONDARY SEQUENCE
cum Temporal	indicative	indicative
cum Circumstantial	indicative	subjunctive
cum Causal	subjunctive	subjunctive
cum Concessive	subjunctive	subjunctive

4. **cum**, ‘whenever’

If **cum** means “whenever”, it takes a *perfect* indicative when the main verb is present, a *pluperfect* indicative when the main verb is imperfect.

- Cum tē vidi, fēlix sum. *Whenever I see you, I am happy.*
 Cum tē videram, fēlix eram. *Whenever I saw you, I was happy.*

B. **cum** Clauses and Ablatives Absolute

The sentences used to illustrate the ablative absolute construction in Unit Ten might also have been expressed with **cum** clauses with no change in meaning:

- Coniuge veniente, fēmina discēdet. } When her husband comes, the
 Cum coniūnx veniet, fēmina discēdet. } woman will depart.
 Coniuge veniente, fēmina discēdet. } Since (although) her husband is
 Cum coniūnx veniat, fēmina discēdet. } coming, the woman will depart.
 Coniuge visō, fēmina discessit. } When (after, since, although) she saw (had
 Cum coniugem vidiſſet, fēmina discessit. } seen) her husband, the woman departed.

It will be noted in this last example that, whereas the ablative absolute with the perfect participle must be expressed in the passive because of the lack of a perfect active participle (since *videō*, -ēre is not a deponent verb) and also in order to avoid concordance of subjects in both clauses, the *cum* clause may use the active voice.

C. Other Words Introducing Temporal, Causal, and Concessive Clauses

1. TEMPORAL

ut
ubi
postquam
quandō

} + indicative

Ut (ubi, postquam, quandō) mē rīsit, When (after) he laughed at me, I
 irātus fiēbam. became angry.

2. CAUSAL

quoniam
quandō

} almost always with indicative
quod
quia

Quoniam (quandō) mē risit, Since (because) he laughed at me, I became
 irātus fiēbam. angry.

3. CONCESSIVE

quamquam
etsi

quamvis + subjunctive

(**quam vis**, 'as you wish')

Quamquam (etsi) mē rīsit, irātus Although he laughed at me, I did not
 (tamen) nōn fiēbam. (nevertheless) become angry.

Quamvis mē risisset, irātus Although he had laughed at me, I
 (tamen) nōn fiēbam. did not (nevertheless) become
 angry.

D. Conjunctions with Indicative or Subjunctive

Several conjunctions take either the indicative or the subjunctive. The distinction is based on the difference between these two moods, which was stated in Unit One: The indicative is the mood of fact, while the subjunctive is the mood of probability, intention, or idea.

1. **quod OR quia**, 'because'

Abest **quod (quia)** corpore validus nōn est. He is absent because he is (actually) not healthy in body (i.e., the speaker believes and accepts responsibility for the excuse).

Abest **quod (quia)** corpore validus nōn sit. He is absent because he is (allegedly) not healthy in body (i.e., the speaker does not accept responsibility for the excuse and so does not express it as a fact; it is within the realm of probability or idea).

This use of **quod** with the subjunctive is referred to as a *quod clause of alleged reason*.

2. **dum OR dōnec**, 'while, as long as, until'

Dum or **dōnec** meaning 'while, as long as' or 'until', when referring merely to a temporal idea, takes the indicative.

Exspectāvit **dum (dōnec) vēni**. He waited until I (actually) came.

Exspectāvit **dum (dōnec) rēginae** **salūtem dixī**. He waited until (while) I greeted the queen.

Exspectāvit **dum (dōnec) voluit**. He waited as long as he wished.

NOTE: **Dum**, 'while', normally uses the present indicative (the so-called historical present) to denote continued action in past time.

Dum haec geruntur, nūntius ad mē vēnit. While these things were (are) going on, a messenger came to me.

When a notion of purpose, intention, or a future idea is involved, the subjunctive is used.

Exspectāvit **dum (dōnec) venirem**. He waited until I should come; he waited for me to come. (i.e., there is nothing in the sentence to say that "I" actually did come; the clause is expressed as an idea or an intention, not a fact)

Exspectāvit **dum (dōnec) rēginae salūtem dicere**. He waited until I should greet the queen; he waited for me to greet the queen.

3. **antequam OR priusquam**, 'before'

When **antequam** and **priusquam** refer strictly to time, they take the indicative.

Antequam (Priusquam) vēni, Before I came, he went away. (stated as a fact)

When purpose, intention, or idea is involved, the subjunctive is used in secondary sequence.

Antequam (Priusquam) venīrem, *Before I could come*, he went away. (i.e.,
discessit. nothing in the sentence states that,
as a fact, “I” actually did come)

In primary sequence, the present or future perfect indicative is generally used (less frequently, the present subjunctive).

Antequam (Priusquam) vēnerō, *Before I (shall have) come*, he will leave.
discēdet.

Frequently **ante/quam** or **prius/quam** is split (tmesis) so as to give the sentence a greater degree of cohesion:

Ante discessit quam venirem. He went away *before* I could come.
Prius clāmāvit quam mē vidit. He shouted *before* he saw me.

E. Clauses of Proviso

Dum, modo, and dummodo (all meaning ‘if only, provided that’) are used to express conditional wishes with the present and imperfect subjunctives. The negative uses **nē**.

Öderint, dum (modo, dummodo) timeant. Let them hate, *provided that they fear.*

Id saepe faciat, dum (modo, dummodo) Let him do this often, *provided that he does not become unhappy.*

F. Accusative of Exclamation

The accusative case is sometimes used in exclamations.

Ö tempora! Ö mōrēs! Oh, the times, oh, the customs!, What times (these are), what customs!

Patriam perditam! Oh wasted land!

Puerum miserum! Unhappy boy!

simul ac (<i>or atque</i>) (conj.)	as soon as (+ indicative)
somnus, -i, M.	sleep, dream
supersum, -esse, -fui, --	be left over, survive
ubi (conj.)	when

UNIT FIFTEEN — NOTES ON VOCABULARY

Absum, abesse, āfui, āfutūrus, a compound of **ab** and **sum** meaning ‘be away, be absent’, has a present participle **absēns**, ‘absent’; **adsum, adesse, adfui, --**, ‘be present’, has no fourth principal part. (Note that although **ab** as a prefix may be shortened to **ā-**, **ad** does not shorten except in such instances as **adspiciō**, ‘look at’, which is usually spelled **āspiciō**. This normally happens before **gn, sp, sc, and st.**)

Prōsum, another compound of **sum**, uses **-d-** as a connecting consonant between **prō** and **esse, prōdesse, prōfui, --**, ‘be useful, do good, benefit, profit’. This connecting **-d-** is used to prevent hiatus (a pause between vowels).

Supersum, also lacking a fourth principal part, means ‘be left over, survive.’

Antequam and **priusquam**, both meaning ‘before’, may be cut into two parts, **ante...quam**, **prius...quam** for greater cohesion in the sentence. This is called **tmesis**: **Ante (Prius) discessimus quam tē vidēre potuimus**, ‘We left before we could see you’.

Appāreō is a compound of **ad** and **pāreō**; it means ‘appear, come in sight, be apparent’.

Dēsinō, dēsinere, dēsii, -- is a compound of **dē** and **sinō** which originally meant ‘let, set’, but later was used exclusively as ‘allow, permit’. **Dēsinō**, literally ‘set down’, means ‘stop, cease’.

Exspectō, a compound of **ex** and **spectō**, ‘look out for’, means ‘wait (for), expect’.

Fore is often used instead of **futūrus (-a, -um) esse**, the future infinitive of **sum**. **Āfore, affore (adsum), prōfore** also are used.

Fors, fortis, F., is a noun meaning ‘chance’. Notice that the genitive singular looks like the adjective **fortis** and that the ablative singular **forte**, ‘by chance’, looks like the neuter adjective **forte**.

Igitur, ‘therefore’, is a postpositive conjunction; it cannot be the first word in a clause.

We have already learned **amicitia** and so **inimicitia** is clearly ‘hostility’.

Iūdex, iūdicis, M., and iūdiciūm, iūdiciī, N., both have the same root; **iūdex** is ‘judge’, and in the plural, ‘jury’, and **iūdiciūm** is ‘trial, judgment, decision’.

Nusquam, ‘nowhere’, is the opposite of **usquam**, ‘anywhere’, and should not be confused with **numquam**, ‘never’.

Nūtrix, nūtricis, F., is ‘she who suckles, nourishes, brings up’ (**nūtriō, nūtrire, nūtrīvī (nūtrī), nūtritus**), thus ‘nurse’.

Occidō, a compound of **ob** and **cadō**, means ‘fall, set, die’, and in this last meaning it is synonymous with **pereō** (a compound of **per** and **eō**, ‘go through [life]’, thus ‘die, perish’). It gives the stem of “occident”, the place of the falling (i.e., setting) sun, thus, the West.

Redeō is another compound of **eō** (re- and **eō**, with a connecting -d- to avoid hiatus); it means ‘return, go back’.

Quidem is an adverb, ‘indeed’; **nē...quidem**, ‘not even’, surround the word or words they emphasize: **Cum nūllā nē sorōrē quidem collocūta est**, ‘She spoke with no woman, not even her sister’.

Simul is an adverb meaning ‘at the same time, together’, but **simul ac** or **simul atque** is a conjunction introducing a verb in the indicative and meaning ‘as soon as’.

UNIT SIXTEEN

A. The Gerund

It has been said that the infinitive is a neuter *verbal noun* and that it may be used as the subject of a verb.

Legere est difficile. *To read* is (a) difficult (thing); *reading* is difficult.

Yet, the infinitive retains its character as a verb by taking an object or by being modified by an adverb.

Ducem dēligere est difficile. It is (a) difficult (thing) *to choose a leader*; *choosing a leader* is difficult.

When the verbal noun is not functioning as the subject of a verb, a specific form, called the *gerund*, is used. The infinitive supplies the nominative of the gerund. The other cases are formed by adding **-nd-** to the present stem of the verb (for i-stems of the third conjugation and for all fourth conjugation verbs, an **-ie-** will appear before the **-nd-**), plus the neuter endings of the second declension. These forms are in fact the same as the neuter singular of the future passive participle, except that there is no nominative.

The gerund has no plural.

Therefore, the forms of the gerund of **dēligō**, **-ere**, 'choose', are:

(Nom.	dēligere	choosing)
Gen.	dēligendi	of choosing
Dat.	dēligendō	to/for choosing
Acc.	dēligendum	choosing
Abl.	dēligendō	from/with/in/by choosing

The gerund functions in the various grammatical cases like any other noun, but it still retains its verbal force and so may control an object and may be modified by an adverb. Intransitive verbs which govern the dative case will do so in the gerund form as well.

Legendō legere	We learn to read <i>by</i> <i>(means of) reading.</i>	(ABLATIVE OF MEANS)
discimus.		
Cupidus legendī est.	He is desirous <i>of</i> <i>reading.</i>	(OBJECTIVE GENITIVE WITH <i>cupidus</i>)
Ducī libenter pārendō	<i>By obeying the leader</i>	(ABLATIVE OF MEANS;
fortiōrēs fiēmus.	willingly, we shall	INTRANSITIVE VERB
	become stronger.	GOVERNING DATIVE)

B. The Gerundive

The gerundive is a verbal adjective and is sometimes called the future passive participle. The forms for the gerundive of *dēligō*, -ere, 'choose', are *dēligendus*, -a, -um.

Although the gerund may govern an object, in such instances Latin frequently prefers to use a gerundive construction instead, except when that object is a neuter adjective or pronoun. Observe:

GERUND:	Librōs legendō legere	<i>By reading books we learn to read.</i>
	discimus.	
GERUNDIVE:	Libris legendīs legere	<i>By means of books to-be-read we learn to read; by reading books we learn to read.</i>
	discimus.	
GERUND:	Cupidus librōs legendī est.	<i>He is desirous of reading books.</i>
GERUNDIVE:	Cupidus librōrum legendōrum est.	<i>He is desirous of books-to-be-read; he is desirous of reading books.</i>

C. The Gerund and Gerundive Used to Express Purpose

Purpose may be expressed by the gerund and gerundive in two common ways:

1. Ad + THE ACCUSATIVE

Ad + the accusative of the gerund may express purpose.

Ad legendum venit. He comes *to (towards) reading, for the purpose of reading, in order to read.*

The gerund, as always, may take a direct object:

Ad legendum librōs venit. He comes to read books.

But when the gerund would take an object, the gerundive construction is preferred in Latin:

Ad librōs legendōs venit. He comes *to (towards) books to-be-read; he comes for the purpose of reading books; he comes to read books.*

2. GENITIVE FOLLOWED BY **causā**, 'for the sake of'

The genitive of the gerund, followed by **causā**, may be used to express purpose.

Legendi causā venit. He comes *for the sake of reading*; he comes *to read*.

Librōs legendī causā venit. He comes *for the sake of reading books*; he comes *to read books*.

Again, when the gerund would govern an object (except in the case of neuter adjectives or pronouns), the gerundive construction is preferred:

Librōrum legendōrum causā venit. He comes *for the sake of books to-be-read*; he comes *for the sake of reading books*; he comes *to read books*.

The reason for the exception in the case of neuter adjectives or pronouns is the confusion in gender which might arise. Consider:

Multa videndī causā venit. He comes to see many things.

BUT:

Multōrum videndōrum causā venit. He comes to see many things (or) men.

It is unclear in the latter case whether the gender is masculine or neuter.

The constructions discussed above are alternate ways of expressing the same idea as purpose clauses:

Venit **ut librōs legat**. He comes *in order that he may read books* He comes *to read books*.

D. Impersonal Verbs

A small number of verbs in Latin are found only in the third person singular, the infinitive, and sometimes the participle because of their peculiar meanings. Such verbs are called *impersonal* verbs because of their lack of a personal subject and require in English the word "it" to function as the subject. Some verbs of this type are:

licet, licēre, licuit	it is permitted
oportet, oportēre, oportuit	it is necessary, it is proper
miseret, miserēre, miseruit	it pities; it moves to pity
piget, pigēre, piguit	it disgusts
taedet, taedēre, taeduit	it bores, it disgusts
paenitet, paenitēre, paenituit	it repents
pudet, pudēre, puduit	it shames
necesse est	it is necessary

The constructions with these verbs are as follows:

1. WITH ACCUSATIVE AND INFINITIVE

oportet; necesse est; licet

- | | |
|------------------------------|--|
| Oportet mē abire. | It is necessary (proper) <i>that I go away</i> ; It is necessary (proper) <i>for me to go away</i> ; I must go away. |
| Necesse est mē abire. | It is necessary <i>that I go away</i> ; I must go away. |
| Licet mē abire. | It is permitted <i>that I go away</i> ; I can (am permitted to) go away. |

2. WITH DATIVE AND INFINITIVE

necesse est; licet

- | | |
|--------------------------------|---|
| Necesse est mihi abire. | It is necessary <i>for me to go away</i> ; I must go away. |
| Licet mihi abire. | It is permitted <i>for me to go away</i> ; I can (am permitted to) go away. |

3. WITH SUBJUNCTIVE CLAUSE INTRODUCED BY **ut** (EXPRESSED OR IMPLIED)

necesse est; licet

- | | |
|---|--|
| Necesse est (ut) abeam. | It is necessary <i>that I go away</i> ; I must go away. |
| Licet (ut) abeam. | It is permitted <i>that I go away</i> ; I can (am permitted to) go away. |

NOTE that there is *no* distinction in meaning in the three uses of **necesse est** and of **licet**.

4. WITH OBJECTIVE GENITIVE AND ACCUSATIVE

miseret; piget; taedet; paenitet; pudet

These impersonals take the genitive of the thing which arouses the feeling and the accusative of the person concerned.

- | | |
|------------------------------|---|
| Miseret mē dolōris. | It pities <i>me of (his) grief</i> ; I pity <i>(his) grief</i> . |
| Paenitet mē sceleris. | It repents <i>me of (my) crime</i> ; I am sorry for <i>(my) crime</i> . |

Instead of a genitive, an infinitive, a **quod** clause, or a neuter pronoun is sometimes used to express the source of the feeling. When this occurs, the infinitive, the **quod** clause, or the neuter pronoun is the subject of the verb.

Legere mē taedet.

Reading bores me.

**Mē paenitet quod tanta sclera in
hāc civitāte facta sunt.**

*The fact that (see p. 294) such great
crimes have been committed in this
state repents me; I am sorry that
such great crimes have been com-
mitted in this state.*

Hoc mē pudet.

This shames me; I am ashamed of this.

E. The Impersonals *interest* and *rēfert*

These two impersonals, which mean ‘it concerns, it is of interest, it is in the interest of’, take the genitive of the person concerned and an infinitive, an *ut* clause, or a demonstrative pronoun in the neuter singular to express the thing which is of concern. But instead of the genitive of the personal pronouns, the following adjectival forms in the ablative case are used: **meā, tuā, suā, nostrā, vestrā**.

**Ducis interest (rēfert) opus
cōficere.**

*It is in the interest of the leader to
complete (his) work.*

**Ducis interest (rēfert) ut celeriter
abeās.**

*It is in the interest of the leader that
you go away quickly; it concerns the
leader that you go away quickly.*

Hoc ducis interest (rēfert).

This is in the interest of the leader.

BUT:

**Meā interest (rēfert) ut celeriter
abeās.**

*It is of interest (with respect to my
[affair]) to me that you go away
quickly; it concerns me that you go
away quickly.*

In the latter case, **meā** is in fact modifying the noun **rē**, which is the first part of the verb **rēfert**. The use of the ablative **meā** with **interest** is on analogy with **rēfert**.

UNIT SIXTEEN — NOTES ON VOCABULARY

Aliēnus, -a, -um has the stem of **alius**, -a, -ud as its base, with the adjectival ending -ēnus, -a, -um, ‘belonging to’, added; thus, **aliēnus** means ‘belonging to another, strange, out of place’.

The ablative of the noun **causa**, ‘cause, reason’, is used as a preposition governing the genitive case; **causā** is placed after the genitive it governs: **Militēs ex oppidō pācis causā discessērunt**, ‘The soldiers withdrew from the town for the sake of peace’.

Infirmus, -a, -um means literally ‘not strong’, therefore ‘weak, unhealthy’.

Stō, stāre, stetī, stātus is the verb ‘stand’. There is also a verb **sistō, sistere, stīti, stātus** meaning ‘cause to stand, make stand, place, set up, establish’. Connected with these two verbs is another, **statuō, statuere, statuī, statūtus**, ‘cause to stand, set up, establish’. These verbs have many compounds:

astō, astāre, astifī, --, ‘stand at or near’

circumstō, circumstāre, circumstetī, --, ‘stand around’

instō, instāre, institī, instātus, ‘stand on or upon, insist, threaten’

obstō, obstāre, obstitī, obstātus, ‘stand before or against; hinder’

dēsistō, dēsistere, dēstīti, dēstitutus, ‘set down, stand off, stop’

insistō, insistere, institī, --, ‘stand upon, pursue’

obsistō, obsistere, obstitī, obstitutus, ‘set or place before; set oneself against, oppose, resist’

persistō, persistere, perstīti, --, ‘continue steadfastly’

resistō, resistere, restīti, --, ‘stand back, stand still, stop’

cōnstituō, cōnstituere, cōnstituī, cōnstitūtus, ‘cause to stand, set up, establish; decide’

dēstituō, dēstituere, dēstītuī, dēstītūtus, ‘set down, leave alone, abandon’

instituō, instituere, institūti, institūtus, ‘put or place into; set up, establish, arrange’

restituō, restituere, restītuī, restītūtus, ‘set up again, restore’

Studiōsus, -a, -um, literally ‘full of zeal’, means ‘fond of, partial to, studious,’ and governs the genitive case.

Utilis, -e has the same root as **ūtor** and thus means ‘useful, beneficial’.

PREFIXES (not from prepositions)

dis- (dī-, dif-), ‘apart’

didūcō, ‘draw apart, separate, divide’

diffugīō, ‘flee in different directions, scatter’

dispellō, ‘drive apart, scatter, disperse’

dispōnō, ‘place here and there, distribute regularly, arrange’

in- (il-, im-, ir-), ‘not’

illiterātus, -a, -um, ‘unlettered, uneducated’

immemor, **immemoris**, ‘unmindful, forgetful’

inauditus, -a, -um, ‘unheard (of), strange’

irrevocābilis, -e, ‘not to be called back, irrevocable, uncontrollable’

re-, ‘back, again’

recēdō, ‘go back, withdraw, retire’

recidō, ‘fall back’

reficiō, ‘make again, remake, restore, renew’

sē-, 'apart'

sēcēdō, 'go apart, go away, withdraw'

sēdūcō, 'lead apart, draw aside'

DENOMINATIVE VERBS

UNIT SEVENTEEN

A. Clauses of Fearing

Verbs or expressions of fearing take subjunctive clauses introduced by **nē** for the positive and **ut** for the negative. While this may seem a curious reversal, it is a logical construction. In the earliest stages of the language, the constructions were *paratactic*; *parataxis* is the absence of subordination and the arrangement of several clauses side by side.

Timeō. I fear. Ut veniat! I wish he would come!

Timeō. I fear. Nē veniat! I wish he would not come!

(*Veniat* is an optative subjunctive; see Unit Twelve.)

As the language developed, the constructions became *hypotactic*; *hypotaxis* is the subordination of one clause to another. Thus:

Timeō **ut** veniat. I fear that he is *not* coming; I fear that he will *not* come.
(It is logical that one would fear that the *opposite* of his
wish might come about.)

Timeō **nē** veniat. I fear that he *is* coming (*will* come).

Clauses of fearing follow the normal rules for sequence of tenses. While the present subjunctive may refer to an act that is either contemporaneous with or subsequent to the action of the main verb, when stress is laid on the subsequence (futurity) of the action, the active periphrastic is occasionally used:

Timeō **ut** veniat. I fear *that he is not coming*; I fear *that he will not come*.

Timeō **ut** ventūrus sit. I fear *that he will not come* (emphasis on futurity).

Sometimes, **nē...nōn** are found instead of **ut** to introduce a negative clause of fearing:

Timeō **nē nōn** veniat. I fear *that he is not coming* (*will not come*).

B. Clauses of Doubting

When **dubitō** (1) means ‘hesitate’, it takes an infinitive:

Hoc facere dubitō. I hesitate *to do* this.

When it means 'doubt', it takes the following constructions which are regularly used with words or expressions of doubting:

- When the word or expression of doubting is positive (as opposed to negative), it introduces an indirect question.

Dubitō **num** abitūrus sit. I doubt *whether (that) he will go away*.

Dubitō **an** abeat. I doubt *whether (that) he is going away*.

- When the word or expression of doubting is negative, a subjunctive clause introduced by **quīn** (translated literally 'but that') is used.

Nōn dubitō **quīn** abeat. I don't doubt (*but*) *that he is going away*.

Nōn dubitō **quīn** abitūrus sit. I don't doubt (*but*) *that he will go away*.

Nōn dubium est **quīn** abeat. It is not doubtful (*but*) *that he is going away*.

Quis dubitat **quīn** abeat? Who doubts (*but*) *that he is going away*?

In the last sentence, **quis dubitat** is an example of a *virtual negative*; that is, the implication is that *no one doubts* that he is going away.

C. Clauses of Prevention

To express prohibition or prevention, the following constructions are used:

- Vetō**, -āre, -ūi, -itus, 'forbid', and **prohibeō**, -ēre, -ūi, -itus, 'prohibit', take a simple infinitive.

Tē **vetō abire**. I forbid you *to go away*.

Tē **prohibeō abire**. I prohibit you *to go (from going) away*.

- The following verbs are among those which take a subjunctive construction:

dēterreō, -ēre, -ūi, -itus deter, prevent

impediō, -ēre, -ūi (-īi), -itus prevent

obstō, -āre, -stītī, -stātūs hinder, stand in the way of

If the verb of prevention is *positive*, the subjunctive clause will be introduced by **quōminus** (= **quō minus**, 'by which the less') or **nē**, 'in order that not'. These clauses are analogous to relative clauses of purpose introduced by **quō** (see Unit Fourteen), and **quōminus** in effect is standing for **ut eō minus**, 'in order that by this the less'.

(Tē) **dēterreō quōminus** I deter you *by which the less you go away*; I
abeās. deter you *from going away*.

(Tē) **dēterreō nē abeās**. I deter you *in order that you not go away*; I
deter (prevent) you *from going away*.

When the verb of prevention is *negative*, the subjunctive clause is introduced by **quōminus**, ‘by which the less’, or **quin**, ‘but that’.

Nōn (tē) dēterreō I don't deter you *by which the less you go away*; I
quōminus abeās. don't deter you *from going away*.

Nōn (tē) dēterreō I don't deter you *but that you go away*; I don't deter
quin abeās. you *from going away*.

D. The Supine

The gerund is a verbal noun. There is another variety of verbal noun in Latin called the *supine*. As we might expect, it is neuter singular, but it has only two cases, the accusative and the ablative, each of which has a specific use. The supine, then, is not nearly as versatile as the gerund and, in fact, occurs infrequently. It is formed on the fourth principal part of the verb.

	I	II	III	IV
ACCUSATIVE	optātum	implētum	inceptum	sēnsūm
ABLATIVE	optātū	implētū	inceptū	sēnsū

The *accusative* of the supine is used without a preposition after verbs of motion to express *purpose*.

It urbem **captum**. He goes *to capture* the city.

The *ablative* of the supine is used with some adjectives as an *ablative of respect*.

Hic liber facilis est **lēctū**. This book is easy *with respect to reading*; this book is easy *to read*.

UNIT SEVENTEEN — NOTES ON VOCABULARY

Aetās, aetātis, F., is ‘time of life, age, life’; do not confuse it with **aestās, aestātis, F.**, ‘summer’.

Celeritās, celeritātis, F., is ‘the state of being swift’, thus, ‘speed, swiftness’.

Dēfendō, dēfendere, dēfendī, dēfēnsus, has the same stem in the present and perfect active; and so **dēfendimus** is ‘we defend’ or ‘we have defended’.

Dēterreō, a compound of **dē** and **terreō**, means ‘frighten from’, and so ‘deter, prevent, hinder, keep from’.

Dubius, -a, -um is the adjective ‘doubtful’. Its stem comes from **duo** and **habeō**, ‘hold two’; its primary meaning is ‘moving in two directions alternately, fluctuating’. It then gets to mean ‘vacillating in mind, uncertain, doubting, doubtful’.

Another adjective, **aniceps, ancipitis**, has a similar history of meaning. Literally, it means ‘two-headed’ (**ambi-**, shortened to **an-**, ‘both’, + **ceps** from **caput**,

capitis, N., ‘head’); the meaning then expands to ‘that extends on two opposite sides’, and then, ‘fluctuating, doubtful’.

The neuter adjective **dubium** used substantively is ‘doubt, hesitation’. The verb **dubitō** with an infinitive is ‘hesitate’; without an infinitive it means ‘doubt’ and takes a construction using the subjunctive. **Dubitō** has **habeō** hidden in its stem as **dēbeō** does (**dē** + **habeō**). **Dēbeō** means literally ‘hold from’; if one holds something from someone, he owes it to him, or he is under obligation to give it back. From there, the two meanings of **dēbeō** emerge: ‘owe’ and ‘be bound to, ought’. **Dubitō** is a contraction of **duhibitāre** (**duo** + a frequentative of **habeō**), ‘to have or hold as two’.

Impediō is a fourth conjugation denominative verb from **pēs, pedis**, ‘foot’. When one gets something in the way of his foot, he becomes hindered and so the verb means ‘deter, impede, prevent’. **Impedimenta, impedimentōrum**, N. pl., is the Latin word for ‘baggage’.

Obitus is the fourth declension noun from **obeō**, ‘go to meet, go down, die, travel, perform’; therefore **obitus** means ‘visit, going down, setting, downfall, ruin, death’.

Ortus, ‘rising’, is the fourth declension noun from **orior**, ‘rise’.

Perveniō, a compound of **per** and **veniō**, means ‘arrive at’; **ad** is used with this verb: **Ad Italiam heri pervenimus**, ‘We arrived at Italy yesterday’.

Relinquō, relinquere, reliquī, relictus, ‘leave behind, abandon’, has an -n- only in the present stem; the English words “relinquish” and “derelict” might be helpful in remembering the roots of the principal parts of this verb.

Retegō (**re-** + **tegō**) does *not* mean ‘cover again’ but ‘uncover, reveal’.

Unā is an adverb meaning ‘together, at the same time’; often it is used with **cum**: **Ad Italiam unā cum sorore īvī**, ‘I went to Italy together with my sister’. Of course, this same sentence could be translated, ‘I went to Italy with one sister’, but usually this ambiguity does not occur.

Vertō, vertere, vertī, versus, has the same stem in the present and perfect active; **vertit** is both ‘he turns’ and ‘he has turned’. Since this verb has many compounds, if one thinks of English derivatives, it is easy to remember the principal parts. For example, consider “convert, conversion; invert, inversion”. **Animadvertisō** means literally ‘turn the mind to’, and so ‘notice’.

Vetō, ‘forbid’, is one of the few verbs of the first conjugation that do not follow the usual pattern of principal parts: **vetō, vetāre, vetui, vetitus**.

FREQUENTATIVE VERBS

Frequentative (sometimes called iterative) verbs are usually first conjugation verbs that are formed from the stem of the perfect passive participle of another verb (of any conjugation) and have the idea of repeated or forcible action, although sometimes this idea is lost.

- captō** (1), 'strive to seize, lay hold with zeal or longing; catch at' (from **capiō**)
clāmitō* (1), 'cry out violently or aloud' (from **clāmō**)
cursō (1), 'run here and there or back and forth' (from **currō**)
dictō (1), 'say often' (from **dicō**)
factitō† (1), 'make or do frequently; be wont to make or do' (from **faciō**)
fugitō (1), 'flee eagerly or in haste; shun' (from **fugiō**)
habitō (1), 'have frequently, be wont to have; inhabit' (from **habeō**)
lectitō† (1), 'gather or collect eagerly or often; read often or with eagerness
or with attention' (from **legō**)
scriptitō† (1), 'write often, compose' (from **scribō**)

* Frequentatives made from first conjugation verbs end in **-itō** rather than **-atō**.

† Here **-itō** has been added to the participial stem.

The following, although frequentatives, have lost the frequentative meaning:

- ductō** (1), 'lead, draw, conduct; delude' (from **dūcō**)
inceptō (1), 'begin, undertake, attempt' (from **incipiō**)
gestō (1), 'bear, carry, have' (from **gerō**)

Visō, visere, visi, visus, although not a first conjugation verb, is a frequentative meaning 'look at attentively'. From this verb another frequentative is formed, **vīsitō** (1), 'see, go to see, visit'.

INCHOATIVE VERBS

Inchoative (also called *inceptive*) verbs add the ending **-scō**, **-scere** either to the present stem of another verb or to the stem of a noun or adjective in order to indicate the beginning of an action. The inchoative verb has no perfect tense of its own, but it may use that of the verb on which it is based.

- ardēscō, -ere, arsi, --,** 'take fire, kindle, be inflamed, gleam'
 (**ardeō, -ēre, arsi, arsus**, 'be on fire, burn')
calēscō, -ere, calui, --, 'grow warm'
 (**caleō, -ēre, calui, --,** 'be hot')
candēscō, -ere, candui, --, 'become bright'
 (**candeō, -ēre, candui, --,** 'glitter, shine')
fervēscō, -ere, --, --, 'become boiling'
 (**ferveō, -ēre, ferbuī, --,** 'be boiling hot, boil')
liquēscō, -ere, licui, --, 'become fluid or liquid, melt'
 (**liqueō, -ēre, liqui** or **licui, --,** 'be fluid or clear')
lūcēscō, -ere, --, --, 'begin to shine, grow light'
 (**lūceō, -ēre, lūxi, --,** 'be light, clear; shine')
rubēscō, -ere, rubui, --, 'grow red'
 (**rubēō, -ēre, rubui, --,** 'be red')

- valēscō, -ere, valui, --, 'grow strong'**
 (valeō, -ēre, -uī, -itus, 'be strong')
irāscor,* -i, irātus sum, 'grow angry'
 (ira, -ae, F., 'anger')
mitēscō,* -ere, --, --, 'grow mild'
 (mitis, -e, 'mild')

* Note that a connecting vowel is sometimes added between the stem and the inchoative suffix.

Some verbs although inchoative in form have no inchoative force in their meaning:

- crēscō, -ere, crēvī, crētus, 'grow, spring forth'**
ignōscō, -ere, ignōvī, ignōtus, 'be forgiving, forgive, pardon'
obliviscor, -i, oblītus sum, 'forget'
proficiscor, -i, profectus sum, 'set forth, set out, start'

UNIT EIGHTEEN

A. Subjunctive by Attraction

We have seen earlier (Unit Seven, section J) that relative clauses in indirect statements usually have their verbs in the subjunctive. This is also frequently the case with relative and other subordinate clauses within clauses whose verbs are in the subjunctive, provided that the subordinate clause is an integral part of the idea of the main clause. The verbs in such subordinate clauses are said to be *attracted* into the subjunctive by the sheer force of the verb that governs the larger construction.

Rōmam profectus est ut illam urbem
quō amici issent periculō servāret. He set out for Rome in order that
he might save from danger that city where his friends *had gone*.

B. *futūrum esse ut; fore ut*

Although Latin has a future passive infinitive, it is not commonly found and consequently its form and use have been omitted from this book. When a future passive idea had to be expressed in indirect statement, a periphrasis was used as follows:

He knows *that* the citizens *will be conquered*. Scit **futūrum esse ut** cīvēs
He knows *that it will be (with the result) that* superentur.
the citizens be conquered.

The futurity is expressed in **futūrum esse**; the verbal idea in the English indirect statement is expressed in an **ut** clause of result (**ut...superentur**).

Fore is an alternate way of expressing **futūrum esse**.

Sentit **fore** ut ipse ā cīvibus laudētur. He feels *that it will be* that he (himself) be praised by the citizens; he feels that he (himself) will be praised by the citizens.

Dixit **fore** ut libri ā poētis scriberentur. He said *that it would be* that books be written by the poets; he said that books would be written by the poets.

This construction is also used to stand for an *active* idea in future time when the verb in question has no fourth principal part and therefore can have no future active infinitive.

Putat fore ut ille vir cārmen He thinks *that it will be that that man be able to write a poem; he thinks that that man will be able to write a poem.*

Pōssum, posse, potui has no fourth principal part and so no future active infinitive; the periphrasis is essential in this case to express the future idea.

C. The Historical Infinitive

Occasionally an infinitive is used in narrative passages instead of a finite verb where the English demands a finite verb. Such infinitives are called *historical* infinitives and emphasize the pure verbal action rather than the agents of that action.

In viis urbīs heri **cūrrere, clāmāre,** In the streets of the city yesterday (there were) *running, shouting, fighting bravely; in the streets of the city yesterday (men/they) were running, shouting, fighting bravely.*

fortiter pūgnāre.

The historical infinitive, in which one can most clearly see the function of the infinitive as a pure verbal noun, is one of the earliest uses of the infinitive.

Yesterday in the streets of the city *running* (occurred), *shouting* (occurred), brave *fighting* (occurred).

The subject of an historical infinitive is in the *nominative* case.

Homō áriter pūgnāre. *The man fought fiercely.*

D. Shortened or Syncopated Forms of the Perfect Active System of Verbs

Forms of the perfect tenses which have -vi- or -ve- in them are sometimes shortened or syncopated by dropping the -vi- or -ve-. Observe:

amāsti	FOR	amāvistī
amārunt		amāvērunt
amārim		amāverim
audisse		audivisse
audissem		audīvissem
dēlērunt		dēlēvērunt
dēlēssem		dēlēvīssem
laudāssēmus		laudāvissēmus
amāstis		amāvistis

E. -ēre for -ērunt in the Third Person Plural, Perfect Active Indicative

The ending -ēre is sometimes used in poetry and high style prose as an alternate for -ērunt:

amāvēre	FOR	amāvērunt
dixēre		dixērunt

F. The Greek Accusative: Accusative of Respect or Accusative After Verbs in the Middle Voice

The ablative case is regularly used in Latin to express *respect* or *specification* (see Unit Eight, section D). Occasionally in poetry and in late Latin the accusative is found with this function. This is really a Greek construction which has been borrowed by the Latin.

Ferrum cingitur. He is girded *with respect to a sword*; he girds on a sword.

The Greek verb has three voices: active, passive, and middle. The middle voice often has the same forms as the passive, but it is used in a reflexive sense; that is, the subject at the same time performs the action and experiences its effect(s). In the example above, **cingitur** may be explained as the equivalent of a Greek middle, meaning literally 'he girds (a sword) on himself'. If we interpret **cingitur** in this way, then **ferrum** may be explained alternatively as the *object* of the middle verb **cingitur**. Whichever way we choose to interpret the grammar, the construction involved is a Greek one.

The accusative of respect is frequently used to express the *part affected*:

Caput vulnerātū est. He was wounded *with respect to his head*; he was wounded *in the head*.

Ōs pallōre suffūsa est. She was suffused *with respect to her face* with pallor; she was suffused with pallor *in her face*.

G. Adverbial Accusative

Closely allied to the accusative of respect is the so-called *adverbial accusative*. What is in fact an accusative of respect functions adverbially:

Maximam partem ille vir sapientissi- *With respect to the greatest part*, that
mus est. man is very wise; *for the most part*
that man is very wise.

Id temporis magnus numerus lēgā- *With respect to that of time*, a great
tōrum ad urbēm vēnit. number of legates came to the city; *at that time* a great number of
legates came to the city.

Multum labōrat ut à cīvībus laudētur. He works *with respect to much* in order that he may be praised by the citizens; he works *a lot* in order that he may be praised by the citizens.

H. Genitive with Expressions of Remembering and Forgetting

The genitive is frequently used with verbs and expressions of remembering and forgetting.

Mātris et **patris** bene memini. I remember *my mother* and *father* well.

Dolōris nūper oblitus eram. I had recently forgotten *my grief*.

Virtūtis eōrum nōn obliviscor. I do not forget their *courage*.

Note that the accusative is also found with verbs and expressions of remembering and forgetting.

I. Genitive of Indefinite Value

A few neuter adjectives and some nouns implying utter worthlessness, such as **as**, **assis**, M., ‘as’ (a small denomination of money), **floccus**, -i, M., ‘a lock of wool’, and **nihilum**, -i, N., ‘nothing’, are sometimes used in the genitive case to express the value of a person, thing, or situation when that value is not specifically determined or is indefinite. This use of the genitive is generally found with verbs meaning ‘consider’, ‘reckon’, and ‘value’.

Magni mē hābet. He considers me *of great (value)*.

Parvī suam civitātem facit. He reckons (makes) his state *of little (value)*.

Familiam suam **flocci** dūcit. He considers his family *of a lock of wool*; he doesn’t care *at all* for his family; he doesn’t give *a damn* for his family.

J. Ablative of Price

The instrumental ablative (ablative of means) is used with some expressions to express the price of something.

Villam suam magnō(pretiō) vendidit. He sold his country house *by means of a great price*; he sold his country house *at a great price*.

Nēmō est qui pāce bellum mūtet. There is no one who would (ex)change war *by means of peace*; there is no one who would exchange war *for peace*.

K. quod, ‘the fact that’

A substantive clause introduced by **quod**, ‘the fact that’, and with its verb in the indicative is sometimes used as the subject or object of another verb, or in apposition to the subject of that other verb.

Quod ille coniugem tantum amat mē movet.	<i>The fact that that man loves (his) wife so much moves me. (subject of main verb)</i>
Alterum est periculum, quod iste plūs imperii vult.	<i>The other danger is <i>the fact that</i> that man (of yours) wants more power. (in apposition to subject of main verb)</i>
Neglēxērunt quod ego civitāti multōs annōs prōsum.	<i>They have neglected <i>the fact that</i> I have been useful to the state for many years. (object of main verb)</i>

UNIT EIGHTEEN — VOCABULARY

aestimō (1)	estimate, reckon
as, assis, -ium, M.	as (a small denomination of money)
cingō, -ere, cīnxī, cīnctus	surround, gird
emō, -ere, ēmī, ēmptus	buy
honor, honōris, M.	honor, distinction, office
memini, meminisse (defective verb)	remember
nihilum, -ī, N.	nothing
numerus, -ī, M.	number
obliviscor, oblīvīscī, oblītus sum	forget
pretium, -ī, N.	price; value
pūgna, -ae, F.	battle, fight
quod sī	but if
vendō, -ere, vendidī, venditus	sell
vulnerō (1)	wound

UNIT EIGHTEEN — NOTES ON VOCABULARY

Cingō, cingere, cīnxī, cīnctus, ‘surround, gird’, lengthens the -i- in the perfect active stem since it is followed by -nx- and in the perfect passive stem since it is followed by -nct-.

In the perfect forms of **emō**, **emere**, **ēmī**, **ēmptus**, ‘buy’, the e- is long. **Ēmptor**, ‘buyer’, is a well-known word because of the famous expression, **Caveat ēmptor**, ‘Let the buyer beware’ (**cavēō**, **cavēre**, **cāvī**, **cautus**, ‘be on guard, take care, beware’).

Memini, ‘remember’, is a defective verb like **ōdī**; it is found only in the perfect tenses and the perfect tense is translated as present, the pluperfect as past, and the future perfect as future. Often this verb governs the genitive: **Patriae meministī?** ‘Do you remember your native land?’

Numerus, numerī, M., is not only ‘number’ but can also mean ‘a group’: **Iste in numerō nostrō nōn est**, ‘That (awful) man is not in our group (crowd)’.

Oblīviscor, oblīvisci, oblitus sum, ‘forget’, often governs the genitive case: **In mediō bellō metūs oblitus est**, ‘In the midst of the war he forgot his fear’.

Pūgna, pūgnæ, F., ‘battle, fight’, is related to **pūgnō**; they both have the same root.

Quod si means ‘but if’. Remember that **quod** has several different meanings: ‘because’, ‘which’ (the neuter relative pronoun), ‘which ?, what ?’ (interrogative adjective), and ‘the fact that’.

Vendō, vendere, vendidi, venditus, is a contraction of **vēnum dō**, ‘give a sale’, and so it means ‘sell’.

Vulnerō, a first conjugation verb, ‘wound’ is a denominative verb from **vulnus, vulneris, N.**, ‘wound’.

COMPOUND WORDS

In addition to using prefixes and suffixes to compound words, Latin may combine a noun stem with a verb or verb stem, an adverb with a verb, or an adjective with a noun. Other combinations also exist.

manumittō, -ere, -misi, -missus, ‘set at liberty, free a slave’

armiger, -a, -um, ‘bearing weapons, armed, warlike’

(used substantively, **armiger, -i, M.**, ‘armor-bearer, shield-bearer’)

benedicō, -ere, -dixi, -dictus, ‘commend, praise’

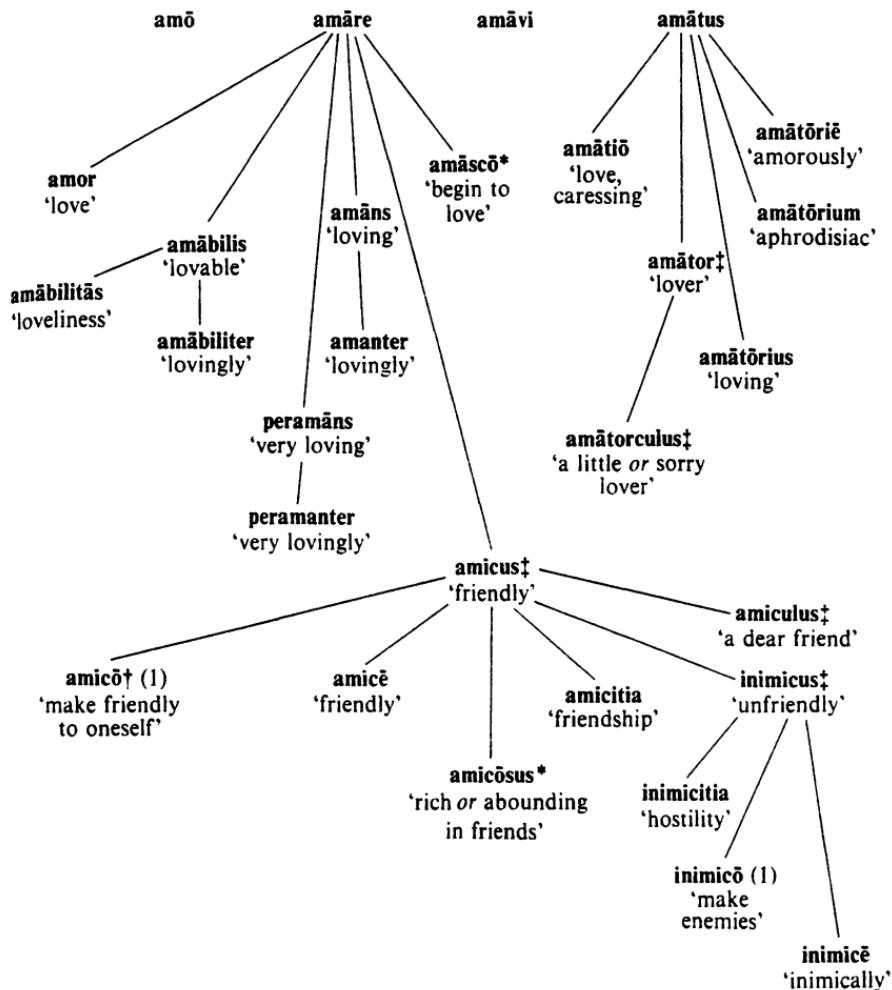

caelicola, -ae, M. (**caelum + colō, ere, colui, cultus**, ‘dwell’), ‘god’

magnanimus, -a, -um ‘great-souled, magnanimous’

avipēs, -pedis (**avis, avis, F.**, ‘bird’), ‘bird-footed, swift-footed’

Some of the principles of Latin word formation are illustrated in the accompanying diagram of the verb **amō**.

Latin Word Formation

* Word found only in an old grammarian.

† Word found once.

‡ Feminine forms are also possible, with the addition of feminine suffixes (-a, -trix).

UNITS 12–18: Self-Review

I.

Translate the following passage; the words in boldface type relate to questions in part II.

NOTE: While serving as provincial governor in Cilicia (Asia Minor), Cicero wrote this letter to Marcus Caelius Rufus, an orator and friend who was in Rome serving as an **aedile**, a public official in charge of public works and recreation. Caelius had written repeatedly to Cicero, keeping him abreast of political news from Rome and also requesting that Cicero be on the lookout for exotic animals that he could import and use for sports events. (It has been slightly adapted.)

Putaresne umquam fieri posse ut mihi verba omnino **deessent**? Non careo solum istā tuā¹ oratoriā,² sed illo etiam ingenio exiguo quo nuper ad litteras **scribendas** utebar. Cum senatus³ **muneris**⁴ mei oblitus sit, vereor ut Romam multos annos redditurus sim et — quod peius est — ne te absente in hāc terrā alienā **peream**.

Magnum desiderium⁵ — mirabile **dictu** — urbis me tenet, desiderium meorum atque in primis⁶ tui. Rogitant legati comitesque, quoniam provinciae me tantopere taedet, quam ob rem diutius hic **maneam**. Tanta onera⁷ in re publicā sustinere potui et solitus sum ut totum negotium⁸ in hoc ultimo⁹ loco viribus meis indignum omnibus arbitrandum sit.

Desine querere de pantheris;¹⁰ iussu meo diligenter **agitatur** ab eis qui venari solent; sed permagna paucitas est, et eae, quae vere sunt, dicuntur queri¹¹ quod nihil cuiquam insidiarum in mēā provinciā nisi sibi fiat. Answer Key — UNITS 12–18: Self-Review

I.

Would you have thought that it was ever possible that words entirely failed me? I lack not only that oratorical skill of yours, but also that small talent which I recently used (enjoyed) for writing a letter. Since the senate has forgotten my service, I fear that I will not return to Rome for many years and — what is worse — that, in your absence, I will perish in this foreign land.

A great longing for the city holds me — remarkable (wonderful, able to be wondered at) to say — a longing for my friends and family (my people) and especially for you. Legates and companions keep on asking why I remain here (any) longer, since the province bores me so greatly. I have been able to endure (support) and have been accustomed to so many responsibilities (burdens) in the state that the whole business in this most distant place must be judged by everyone (all) unworthy of my strength.

Stop asking about the panthers; by my order, there is diligent activity (there is a stirring up diligently) by those men who are accustomed to hunt; but there is a very great scarcity (fewness) [of panthers] and those which are actually here (which truly exist) are said to be complaining because (allegedly) no treachery happens to anyone in my province except (if not) to them. And so most, as certain men believe, have decided to withdraw into Caria from this horrible district. Whatever there is (will be), will be for you, but I clearly don't know how many there will be.

By Hercules, your aedileship is a great concern to me. It especially interests me that you stage as pleasing games as possible. I should wish that you write to me thoroughly about every occurrence with reference to the state as quickly as possible; indeed, I shall consider (think) those things which I know (I'll have learned) from you most reliable (most certain).

II.

1. Imperfect subjunctive as the main verb in the sentence (an independent usage of the subjunctive) expressing a potential idea in past time
2. Subjunctive in a substantive clause of result
3. a) Gerundive (adjective)
 - b) ad is used with a noun and a gerundive to express purpose
4. Genitive case with an expression of forgetting
5. Present subjunctive in primary sequence in a clause expressing positive fearing
6. Ablative form of the supine of *dicere* functioning as an ablative of respect
7. Subjunctive in an indirect question in primary sequence
8. Impersonal passive usage stressing verbal action
9. *cognōverō*

III.

1. Fear did not keep (hinder, stand in your way) you (did it) from remembering what was happening (did it)?
2. We promise that a treaty will be made as soon as possible (that it will be that a treaty be made...).
3. Let someone see whether we can find (discover) a plan about establishing states or not.
4. The hateful man has been ordered (It has been ordered to the hateful man) that no one of the arm bearers living (who live) in the city be spared (that it not be spared to anyone of the arm bearers...).
5. With these things understood (although these things had been understood), there were nevertheless those who (men of the sort who) stopped fighting before they profited (did good to) (their) friends.
6. We ourselves would (could, might) not doubt (but) that by selling (his) home he is able to take (get) much money.
7. They did not hesitate to wait until the leader (guide) should (could) arrive.
for the leader (guide) to arrive.
provided that the leader (guide) arrive.
- The same one (man), truly (indeed), had been put in command of all (the men) by which (in order that) the band of soldiers might be safer (rather safe).
8. Although they had reported (announced) what they were wanting (wanted), the legates nevertheless were not able to (could not) bring it about (effect) that all (men) obey(ed) them.
9. (The fact) that certain men are desirous of wealth (riches) does not move us; we hope, moreover (however), that they (these/those men) will not be so desirous of wealth (riches) that they are forgetful of (forget) honor (distinction).

- i0. They have feared not at all that the judges (jurymen) will (are going to) estimate (reckon) health (safety) of small value (worth).

IV.

1. Pluperfect subjunctive of a defective verb; thus the pluperfect = imperfect.
It is in a relative clause of prevention in secondary sequence.
2. Subjunctive; independent use, either jussive, potential, or optative
3. alicui
4. Subjunctive; relative clause of characteristic (secondary sequence)
5. Indicative; to state a fact (temporal clause referring strictly to time)
6. Subjunctive in a negative clause of doubting (primary sequence)
7. Imperfect subjunctive in secondary sequence in a **dum** clause expressing anticipation (The king hasn't arrived yet; there is no certainty that he will ever arrive.) Also possible as a proviso clause
8. Dative with a compound verb
9. Subjunctive; relative clause of purpose (secondary sequence)
10. **Sibi** is dative case because the intransitive verb **pārēō** governs the dative.
It is an indirect reflexive since it does not refer to the subject of the clause in which it occurs (**omnēs**), but rather to the subject of the main verb of the sentence (**lēgātī**).
11. The whole clause **quod...sunt**
12. Adverbial accusative
13. Genitive of indefinite value

APPENDIX

This appendix will be useful as a reference for complete paradigms, explanations, and examples of syntactical structures and as a comprehensive review of the forms and syntax of Latin. In many cases, a greater number of illustrative sentences is provided in the appendix than in the actual text.

In order to enhance the value of the book as a tool for the reading of a wide variety of Latin authors, the appendix also contains some syntactical explanations which have not been included in the main body of the text.

Refer to the alphabetical index for cross-referencing between the text and the appendix.

* Nouns of the first declension are feminine, except for those that denote males, such as *nauta*, 'sailor'.

† Most nouns of the fifth declension are feminine, except for *dīēs*, which is generally masculine.

Note that the *vocative* case is the same as the nominative except in nouns of the second declension whose nominative singular ends in **-us**; their vocative ends in **-e**. If such a noun has a stem ending in **-i** (before the **-us** ending), the vocative form ends in a single **-ī**: **Marcus**, vocative **Marce**; **Rōmānus**, vocative **Rōmāne**; **filius**, vocative **fili**; **gladius**, vocative **gladiī**.

The *locative* case endings for the first two declensions are the same as the genitive singular if the word is singular, or the ablative plural if the word is plural: **Rōma**, locative **Rōmae**; **Athēnae**, locative **Athēnis**. For nouns of the third declension, the locative ends in **-e** or **-ī** in the singular: **Carthāgō**, locative **Carthāgīne**; **rūs**, locative **rūrī**. In the plural the ending **-ibus** is used.

Formation of the Future Imperative

The future imperative is a rare form in Latin. It exists in the second and third persons, singular and plural. To form the future *active* imperative, take the present stem and for the second and third persons singular, add the ending **-tō**. For the second person plural, add **-tōte** to the present stem, and for the third person plural, add **-ntō** to the stem.

The future *passive* imperative lacks a second person plural. The endings which are added to the present stem are **-tor** for the second and third persons singular and **-ntor** for the third person plural.

In the third conjugation, the **-e-** of the present stem is changed to **-i-**, but in the third person plural to **-u-**. In i-stems of the third conjugation and in the fourth conjugation, an **-i-** appears before the **-u-**.

Thus:

REVIEW OF THE SYNTAX OF NOUNS

Apposition

Apposition may occur in all cases in Latin.

- NOMINATIVE:** 1. Marcus, **bonus vir**, in agris labōrat. Marcus, *a good man*, is working in the fields.
 2. **Nūntii ad insulam ivimus.** We went *as messengers* to the island; We, *messengers*, went to the island.
 3. **Amīcus tuus tibi loquor.** I speak to you *as your friend*; I, *your friend*, speak to you.
- GENITIVE:** Memorēs invidiae tuae, **culpae magnae**, ex urbe ibimus. Mindful of your envy, *a great fault*, we shall go out of the city.
- DATIVE:** Sorōri **Annae dōnum dedit.** He gave a gift to his sister *Anna*.
- ACCUSATIVE:** **Marcum ducem cōpiārum in Italiam misērunt.** They sent Marcus, *the leader* of the troops, into Italy; They sent Marcus into Italy *as leader* of the troops.
- ABLATIVE:** **Socii in patriā Asiā visi sunt.** The allies were seen in their native land *of Asia* (literally, their native land, *Asia*).

Nominative Case

The nominative case is used for the subject of a finite verb and for the predicate nominative.

1. **Nautae vēla ad insulam dedērunt.** *The sailors* set sail to the island.
2. **Marcus est vir honestus.** Marcus is a distinguished *man*. (predicate nominative)
3. **Marcus vir honestus vidētur.** Marcus seems a distinguished *man*. (predicate nominative)
4. **Marcus honestus vidēbātur.** Marcus seemed *distinguished*. (predicate adjective)
5. **Pueri pueriæque in tēctum missi sunt.** *The boys and girls* were sent into the house. (For the masculine verb, see *Additional Rules*, p. 400)
6. **Mare, sidera, animālia, terraque à dis immortālibus facta est.** *The sea, stars, animals and land* were made by the immortal gods. (For the singular verb, see *Additional Rules*, p. 400)

Genitive Case

The genitive case, in general, is used for a noun which is dependent upon another noun. In addition, it may depend upon a verb or an adjective. Thus:

GENITIVE OF POSSESSION (not discussed in the text)

1. **Tēctum mei amīci ignī dēlētum est.** *My friend's* house was destroyed by fire.

2. Māter ducis ab incolis laudāta est. The mother *of the leader* was praised by the inhabitants.
3. Iuvenis frātrem gladiō patris interfēcit. The young man killed his brother with his *father's* sword.
4. Poēta cuius liber est nōtus auxilium ā rēge petīvit. The poet *whose* book is well known sought aid from the king.

PARTITIVE GENITIVE (GENITIVE OF THE WHOLE) (Unit 9G)

The genitive is sometimes used in Latin to express the *whole* group or unit of which the word on which the genitive depends expresses the *part*.

1. Quid malī in nostrō oppidō est? What *evil* is in our town?
2. Pars oppidī flammis dēlēta erat. Part *of the town* had been destroyed by flames.
3. Nihil boni in hāc urbe vidēre possumus. We are able to see nothing *good* in this city.
4. Plūs pecūniae nōs habēmus quam vōs. We have more *money* than you (do).

BUT:

1. Unus ē librī ad nōs missus est. One *of the books* was sent to us.
2. Quinque ē militib⁹ interfecti sunt. Five *of the soldiers* were killed.
3. Quidam ex hominib⁹ in viā ambulābat. A certain one *of the men* was walking in the street.

GENITIVE OF DESCRIPTION (QUALITY) (Unit 10D)

A noun in the genitive case, when modified by an adjective, may be used to describe or express a quality of another noun.

1. Vir magnae sapientiae ab omnibus laudātur. A man *of great wisdom* is praised by all.
2. Verba eius modi ā populō omni audita sunt. Words *of this kind* have been heard by all the people.
3. Cicerō fuit homō magnae fāmae. Cicero was a man *of great reputation*.

GENITIVE OF MATERIAL (not discussed in the text)

The genitive is used to express the material of which something is composed.

1. Urna aurī ā nātis inventa est. An urn *of gold* was found by the children.
2. Tēlane ferri habēs? Do you have weapons *of iron*?
3. Magnum agrum frūmenti vidimus. We have seen a large field *of grain*. [frūmentum, -ī, N., 'grain']
4. Turba fēminārum in viā visa est. A crowd *of women* was seen in the street.

APPOSITIONAL GENITIVE (not discussed in the text)

The genitive is sometimes used instead of a noun in apposition.

1. Nōmen rēgis ā populō Rōmānō nōn dilēctum est. The name *of king* was not esteemed by the Roman people. [diligō, -ere, -lēxi, -lēctus, 'esteem']
2. Difficile est artem rei militaris docēre. It is difficult to teach the art *of warfare*. [rēs militaris, rei militaris, F., 'warfare']
3. Opportūnitās libri legēndi nōbis nōn offertur. The opportunity *of reading a book* is not offered to us. [opportūnitās, -tatis, F., 'opportunity']

PREDICATE GENITIVE (GENITIVE OF CHARACTERISTIC) (Unit 11D)

A noun in the genitive case which stands alone (or modified by an adjective) in the predicate denotes a characteristic or a class.

1. Est boni imperatōris bene dūcere. It is *the mark of a good commander* to lead well.
2. Digni cīvis est dē cūris patriae cōgitāre. It is *the mark of a worthy citizen* to think about the cares of his native land.
3. Sapienter regere est honesti rēgis. Ruling wisely is *the mark of a respected king*.

The genitive serves as the object of a verbal idea of nouns, adjectives, and is used with some verbs. Thus:

GENITIVE WITH VERBS OF ACCUSING AND CONDEMNING (Unit 2F)

The genitive is used with verbs of accusing and condemning to express the charge or penalty.

1. Hostēs gravium scelerum dāmnāvērunt. They condemned the enemy *for serious crimes*.
2. Fēminās irae dāmnāmus. We condemn the women *for their anger*.
3. Nautās insidiārum dāmnābitis. You will condemn the sailors *for their treachery*.

OBJECTIVE GENITIVE (Unit 11C)

There is a verbal idea understood in nouns and adjectives of feeling or action. The noun that is the *object* of this verbal idea is called the objective genitive.

1. Dux bellī hortātus est ut militēs quam fortissimē pūgnārent. The leader *of the war* urged that the soldiers fight as bravely as possible.
2. Incolae oppidī ruinam tēctōrum timuērunt. The inhabitants *of the town* feared the destruction *of the houses*.
3. Erant multi rūmōrēs dē spē pācis. There were many rumors about the hope *of peace*.
4. Multa pecūnia saepe est invidae causa. A lot of money is often the cause of *envy*.
5. Iūnō dē Iovis amōre pulchrārum fēminārum monēbātur. Juno was warned about Jupiter's love *of beautiful women*.

6. **Iuvenis studiōsus legendī** multa didicit. The young man, fond of reading, learned many things.

BUT NOTE also, in contrast, the SUBJECTIVE GENITIVE (Unit 11C):

There is a verbal idea understood in nouns and adjectives of feeling or action. The noun that is the *subject* of this verbal idea is called the subjective genitive.

1. **Iūnō dē Iovis** amōre pulchrārum fēmīnārum monēbātur. Juno was warned about *Jupiter's* love of beautiful women.
2. **Ira rēgīnae** populum terret. The *queen's* anger is frightening the people.
3. **Militēs insidiis hostiūm** superāti sunt. The soldiers were conquered by the treachery of the *enemy*.
4. **Ob rēgis cūram dē salūte** populi urbs quam optimē mūnita est. On account of the *king's* concern about the safety of the people, the city has been fortified as well as possible.
5. **Facta fortissima militūm** à ducib⁹ laudāta sunt. The very brave deeds of the *soldiers* were praised by the leaders.

OBJECTIVE GENITIVE WITH IMPERSONAL VERBS (Unit 16D4)

Some impersonal verbs take the genitive of the thing which arouses the feeling and the accusative of the person concerned.

1. **Mē invidiae** pudet. I am ashamed of my jealousy.
2. **Vōs belli longī** piget? Are you disgusted with the long war?
3. **Quōs superātōrum** miseret? Who pities the conquered?
4. **Ducis interest inimicōs interfici.** It is in the *leader's* interest that his enemies be killed.

GENITIVE WITH EXPRESSIONS OF REMEMBERING AND FORGETTING (Unit 18H)

The genitive is frequently used with verbs and expressions of remembering and forgetting.

1. **Factōrum fortium** ducum nostrōrum semper meminerimus. We shall always remember the brave deeds of our leaders.
2. **Veniae nostrae** oblīvisceris? Are you forgetting our kindness?
3. **Memorēs patriae** magnō cum studiō pūgnābimus. Mindful of our native land we shall fight with great zeal.

Note that the accusative may also be used in these constructions.

GENITIVE OF INDEFINITE VALUE (Unit 18I)

A few neuter adjectives and some nouns implying utter worthlessness, such as **as**, **floccus**, and **nihilum**, are sometimes used in the genitive case to express the value of a person, thing, or situation when that value is not specifically determined or is indefinite. This use of the genitive is generally found with verbs meaning 'consider', 'reckon', and 'value'.

1. Tēctum magnū habeō. I have a house of great value.
2. Inimicōs parvī facimus. We reckon our enemies of little worth.
3. Quid tanti aestimāmus? What do we estimate of such great value?
4. Tē flocci dūcō. I don't give a damn for you.

GENITIVE OF FULLNESS AND WANT (not discussed in the text)

Words expressing fullness and emptiness often govern the genitive.

1. Servi urnam {plēnam aquae} in mēnsā posuērunt. The slaves placed on the table the urn {full of water}. [plēnus, -a, -um, 'full'; inānis, -e, 'empty']
2. Militēs fortēs timōris semper nōn egent. Brave soldiers do not always lack fear. [egeō, -ēre, -ui, --, 'lack, be without']
3. Marcus agrum pauperem aquae coluit. Marcus tilled a field poor in water. [colō, -ere, -ui, cultus, 'till']

GREEK GENITIVE (EPEXEGETICAL GENITIVE) (not discussed in the text)

Following Greek usage, adjectives meaning 'skilled in, having knowledge of' may govern the genitive.

1. Puerum peritum legendī laudābāmus. We kept on praising the boy skilled in reading. [peritus, -a, -um, 'skilled in']
2. Vir doctus litterārum fuit. He was a man learned in literature. [doctus, -a, -um, 'learned']
3. Dux belli gerendī scitus ā cīvibus factus est. A leader skilled in waging war was chosen (*literally*, 'made') by the citizens. [scitus, -a, -um, 'skilled in']

The genitive is sometimes governed by other words, e.g., causā and grātiā. Thus:

GENITIVE WITH causā AND grātiā

Causā and grātiā, both meaning 'for the sake of', govern the genitive and are placed after it.

1. Glōriae causā (grātiā), bellum gessimus. We waged war for the sake of glory.
2. Gēns hostilis bella gerēbat vincendī causā (grātiā). The hostile people used to wage wars for the sake of conquering (i.e., in order to conquer).
3. Nātōs ad prōvinciam misērunt auxiliī petendī causā (grātiā). They sent their sons to the province for the sake of seeking (i.e., in order to seek) aid.

Dative Case

The basic use of the dative case is referential. The person or thing to whom or which the action or idea refers, is of advantage, or disadvantage, is put into the dative case. Thus:

1. **Vōbis Rōmam ire licet.** You are permitted to go to Rome.
2. **Librum nautae ēmi.** I bought a book *for the sailor*.
3. **Dōnum mātri nostrae invēnimus.** We have found a gift *for our mother*.
4. **Tua facta fortia in mihi mentem vēnērunt.** Your brave deeds came into mind *for my advantage*; Your brave deeds came into *my mind*.
5. **Hoc mihi āctum est.** This was done *for me* (i.e., *for my advantage* or *for my disadvantage*).
6. **Cōnsulem tibi laudāvistī.** You praised the consul *for your advantage*.
7. **Pontem hostibus dēlēvimus.** We destroyed the bridge *for the enemy's disadvantage*. [**pōns, pontis**, M., 'bridge']

The following specialized uses of the referential dative also occur:

DATIVE OF INDIRECT OBJECT (Unit 1H3)

The indirect object occurs with verbs of *giving*, *telling*, and *showing*. The person to whom something is given, told, or shown is put into the dative case.

1. **Librum magistrō mōnstrāvimus.** We showed the book *to the teacher*.
2. **Liber magistrō datus est.** The book was given *to the teacher*.
3. **Rēgina poētae multa respondit.** The queen answered many things *to the poet*.
Or: The queen gave many answers *to the poet*.
4. **Quid rēgīnae dictum est?** What was said *to the queen*?
5. **Nōli timōrī cēdere.** Don't yield *to fear*.

DATIVE WITH CERTAIN ADJECTIVES (not discussed in the text)

Adjectives meaning 'near (to)', 'fit (for)', 'friendly (to)', 'pleasing (to)', 'similar (to)', etc., and their opposites take the dative case.

1. **Servus dominō cārus fuit.** The slave was dear *to his master*.
2. **Hostēs proximi oppidō iam erunt.** The enemy by this time will be very near *the town*.
3. **Cōnsul amicus plēbi factus est.** A consul friendly *to the common people* was chosen.
4. **Filius simillimus patri vidētur.** The son seems very like *his father*.

DATIVE WITH CERTAIN INTRANSITIVE VERBS (Unit 13B)

Certain intransitive verbs in Latin govern the dative case. Some common examples are: **crēdō**, **faveō**, **ignōscō**, **imperō**, **noceō**, **parcō**, **pāreō**, **placeō**, **persuādeō**, **studeō**.

1. **Quibus crēdis?** *Whom* do you believe?
2. **Magister puellis fāvit.** The teacher favored *the girls*.
3. **Dōnum frātri placuit?** Did the gift please *your brother*?
4. **Servi dominō pārent.** The slaves obey *their master*.

5. Imperātor cōpiis imperāvit ut pūgnārent. The commander ordered *the troops* to fight.

DATIVE OF THE POSSESSOR (Unit 5E)

With forms of the verb **sum**, the dative is sometimes used to show possession. The *possessor* is put into the dative case.

1. **Incolis** multa tēcta erant. *The inhabitants* had many houses.
2. Cōnsilium bonum fuerat **ducibus**. *The leaders* had had a good plan.
3. Vōbisne est magna cōpia pecūniae? Do *you* have a large supply of money?

DATIVE OF AGENT (Unit 5D)

With the passive periphrastic the personal agent is normally expressed by the dative case without a preposition.

1. Quid **puellae** agendum est? What must *the girl* do? (*Literally*, What must be done *by the girl*?)
2. Oppidum **mīlitibus** oppūgnandum erat. The town had to be attacked *by the soldiers*.
3. Aliiquid magni **cīvibus** agendum erit. *The citizens* will have to do something great.

DATIVE WITH COMPOUND VERBS (Unit 13D)

Many verbs compounded with such prefixes as **ad-**, **ante-**, **circum-**, **con-**, **in-**, **inter-**, **ob-**, **post-**, **prae-**, **prō-**, **sub-**, **super-** govern the dative case. When the original verb is transitive, the compounded form governs an accusative as well.

1. Hostēs bellum **prōvinciae** inferunt. The enemies inflict a war on *the province*.
2. Vir **amicō** in viā occurrit. The man met *his friend* in the street. [**occurrō**, -ere, -curri, -cursus, 'meet']
3. Dux optimōs **nāvibus** praefēcit. The leader put the best men in command of *the ships*.
4. Marcus **cōpiis** praeerit. Marcus will be in command of *the troops*.

ETHICAL DATIVE (not discussed in the text)

The ethical dative is a personal pronoun in the dative case not closely connected with the rest of the sentence; it does not depend on any one word.

1. Nihil boni **mihi** hic inveniri potest. Nothing good can be found here *in my opinion*.
2. Illud **mihi** scelus non est. That is not a crime *as far as I'm concerned*.
3. Quod cōnsilium **tibi** à ducibus legētur? What plan will be chosen by the leaders *in your opinion*?
4. Illud **tibi** est fortis viri factum! That is the deed of a brave man *for you*!
5. Vita **mihi** sine spē est mors. Life without hope, *for me* (i.e., *as far as I'm concerned*), is death.

In addition to these basic referential uses, a noun in the dative case can express the purpose for which an action is performed or for which something exists. This is often used in conjunction with another noun in the dative case which is purely referential in nature. Thus:

DATIVE OF PURPOSE (SERVICE) (Unit 8H)

1. Aurum auxiliō oppidō missum est. The gold was sent *as an aid* to the town.
2. Magna cōpia pecūniae est magnae cūrae. A large supply of money is *a great concern* (i.e., it serves *as a great concern*).
3. Hostēs fuērunt timōrī populō. The enemy were *a fear* to the people (i.e., they served *as a source of fear* for the people).
4. Amicō librum dōnō dedit. He gave his friend a book *for a gift* (i.e., to serve *as a gift*).
5. Magnō auxiliō nostris amīcis fuimus. We were *a great aid* to our friends.

Accusative Case

The accusative case is used as the direct object of a verb or as the object of certain prepositions.

ACCUSATIVE OF DIRECT OBJECT (Unit 1H4)

1. Multōsne maiōrēs frātrēs habēs? Do you have *many older brothers*?
2. Impiōs nōn laudābimus. We shall not praise *wicked men*.
3. Mōtūs siderum nōn intellēxit. He did not understand *the movements* of the stars.

COGNATE ACCUSATIVE (not discussed in the text)

The direct object whose meaning is very closely related to that of the verb is called a cognate accusative (e.g., to dream a dream, dance a dance, sing a song).

1. Vitam bonam et fēlicem vivit. He lives a good and happy *life*.
2. Somnium longum et grātum somniāvī. I dreamed a long and pleasing *dream*.
[*somnium*, -ī, N., 'dream'; *somniō* (1), 'dream']
3. Militēs multa facta fortia fēcērunt. The soldiers did many brave *deeds*.

DOUBLE ACCUSATIVE (not discussed in the text)

Some verbs take two accusatives.

1. Nōs litterās docēre volunt. They want to teach *us literature*.
2. Amici nōs pecūniām ōrāvērunt. Our friends asked *us* for *money*.
3. Vōs auxilium rogāmus. We ask *you* for *aid*.
4. Factum tē cēlāvi. I have hidden the *deed* from *you*.

GREEK ACCUSATIVE: ACCUSATIVE OF RESPECT OR ACCUSATIVE AFTER VERBS IN THE MIDDLE VOICE (Unit 18F)

Occasionally in poetry and late Latin the accusative is used to express *respect* or *specification*. It is frequently used to express the *part affected*. The accusative is used as the object of a verb which looks passive, but which may be considered the equivalent of a Greek middle voice.

1. **Multi oculōs vulnerāti sunt.** Many men were wounded *in their eyes*.
2. **Fēmina caput tēcta per viās oppidī sine servis ambulāvit.** The woman having covered *her head* walked through the streets of the town without slaves. [**caput, capitīs**, N., 'head']
3. **Caput cinctus laurō deus magnum amōrem puellae cecinit.** Having bound his *head* with laurel, the god sang of his great love for the girl. [**caput, capitīs**, N., 'head'; **laurus, -i**, F., 'laurel']

SUBJECT OF THE INFINITIVE (not discussed in the text; but see Unit 6C)

The subject of the infinitive is put into the accusative case.

1. **Nōs ire nōlunt.** They are unwilling *for us* to go.
2. **Fēminās ē tēctis expulsās esse dicit.** He says that *the women* were driven out of the houses.
3. **Dux militēs oppidum oppūgnāre iussit.** The leader ordered *the soldiers* to attack the town.

BUT: the subject of an historical infinitive is in the nominative case.

4. **Servī libenter fugere.** *The slaves* fled gladly.

ACCUSATIVE OF DURATION OF TIME AND EXTENT OF SPACE (Unit 7I)

The accusative, usually without a preposition, is used to express duration of time or extent of space. It answers the question "for how long?", whether it be of time or distance.

1. **In insulā quīnque diēs manēbimus.** We shall remain on the island *for five days*.
2. **Nōs duās hōrās exspectāvērunt.** They waited for us *for two hours*.
3. **Rōmam multōs annōs incoluērunt.** They lived in Rome *for many years*.
4. **Pueri parvī saxum magnum quīnque pedēs portāvērunt.** The small boys carried the large rock *for five feet*.

ACCUSATIVE OF EXCLAMATION (Unit 15F)

The accusative case is sometimes used in exclamations.

1. **Ō impiās fēminās!** Oh wicked women!
2. **Mē miserūm!** Unhappy me!
3. **Infēlicem diem!** Unfortunate day!

ADVERBIAL ACCUSATIVE (Unit 18G)

A word in the accusative case may be used adverbially.

1. **Quid** hoc tibi vidētur? *In what way* does this seem best to you? [videor, 'seem (best)']
2. **Nihil** hoc meā interest. This is *in no way* of interest to me.
3. **Maximam partem** id mihi nōn placet. *For the most part* this does not please me.

PREPOSITIONS WITH THE ACCUSATIVE (Unit 1H4)

The prepositions **per**, **trāns**, **inter**, **post**, **intrā** ('within'), **apud**, **contrā**, **super** ('above'), etc., govern the accusative case.

1. **Ob/Propter nostram culpam** patria dēlēta est. *Because of our fault* our native land has been destroyed.
2. **Militēs post bellum** ad patriam redibunt. The soldiers will return to their native land *after the war*.
3. **Pueri per multās viās** oppidi cucurrērunt. The boys ran *through many streets* of the town.
4. **Trāns flūmen** fūgimus. We fled *across the river*.

ACCUSATIVE OF PLACE TO WHICH (Unit 6F)

Place to which is expressed by the accusative case with the preposition **ad**. With names of cities, small islands, towns, and the words **domus** and **rūs**, no preposition is used.

1. Nautae vēla **ad insulam** dabunt. The sailors will set sail *to the island*.
2. **Ad Italiam** imus. We are going *to Italy*.

BUT:

3. **Rōmam** imus. We are going *to Rome*.

ACCUSATIVE OF PLACE INTO WHICH (not discussed in the text)

Place into which is expressed by the accusative case with the preposition **in**, 'into'.

1. Fēminaē **in viam** ambulant. The women are walking *into the street*.
2. Incolae **in patriam** rediērunt. The inhabitants went back *into their native land*.
3. Nautae **in aquam** ibunt. The sailors will go *into the water*.

BUT:

4. **In viā** ambulant. They are walking *in the street*. (place where)

Ablative Case

The basic function of the ablative case is to answer the questions "from?", "where?", "how?", "when?", "by?"; it can frequently be rendered literally by the

prepositions “from, with, in, by”. For convenience, the uses are arranged below according to whether or not they require prepositions in Latin.

WITHOUT PREPOSITIONS

ABLATIVE OF MEANS (INSTRUMENT) (Unit 3E)

The ablative without a preposition is used to express the *means* or *instrument* by which something is done.

1. Tēcta prōvinciae igni dēlēta sunt. The houses of the province were destroyed *by fire*.
2. Nāti gladiis militum territi erant. The children had been frightened *by the swords* of the soldiers.
3. Urna pulchra aquā implētur. The beautiful urn is being filled *with water*.
4. Cōnsul populum spē salūtis hortātus est. The consul encouraged the people *with the hope* of safety.

Some additional uses of the ablative of means are:

ABLATIVE OF ROUTE (not discussed in the text)

Ibam forte Viā Sacrā. I was walking by chance *along the Sacred Way*. [sacer, sacra, sacram, ‘sacred’]

ABLATIVE OF PRICE (Unit 18J)

The instrumental ablative (ablative of means) is used with some expressions to indicate the price of something.

1. Domum multā pecūniā ēmimus. We bought a house *for a lot of money*.
2. Patriam aurō trādidit. He handed over his native land *for gold*.
3. Iuvenem duce seniōre mūtāre nōlumus. We do not want to exchange a young leader *for an older one*.
4. Servōs magnō pretiō vendidit. He sold the slaves *for a great price*.

ABLATIVE WITH CERTAIN DEONENT VERBS (not discussed in the text)

Ūtor ‘use’, fruor ‘enjoy’, fungor ‘perform’, potior ‘gain possession of’, and vēscor ‘eat’ take the ablative case.

1. Auxiliō amicōrum ūtitur. He makes use of his friends’ *aid*.
2. Dōnō frātris frūctus es? Did you enjoy your brother’s *gift*? [fruor, -i, frūctus sum, ‘enjoy’]
3. Miseri animālibus mortuis vēscuntur. The wretched men are eating *dead animals*. [vēscor, -i, --, ‘eat’]

opus est + ABLATIVE (Vocabulary, Unit 7)

1. Nōbis bonō amicō opus est. We need *a good friend*.

This idea may also be expressed:

2. **Bonus amicus** nōbis opus est. (i.e., with the nominative)

or less frequently:

3. Nōbis bonī amicī opus est. (i.e., with the genitive)

ABLATIVE OF DESCRIPTION (Unit 10D)

A noun in the ablative case, when modified by an adjective, may be used to describe or express a quality of another noun.

1. Virum unō oculō vidimus. We saw a man *with one eye*.
2. Fēmina manibus pulchrīs litterās longās scripsit. The woman *with the beautiful hands* wrote a long letter.
3. Patria maximā famā erat pulcherrima. The country *with a very great reputation* was very beautiful.

ABLATIVE OF TIME WHEN OR WITHIN WHICH (Unit 7H)

Time when or within which is expressed by the ablative. A preposition is not regularly used.

1. Paucis annis patriam novam incolēmus. We shall inhabit a new land *in a few years*.
2. Eō tempore multōs amicōs vidimus. We saw many friends *at that time*.
3. Proximō mēnse socii ad tēctum ducis venient. *Next month* the allies will come to the leader's house. [mēnsis, mēnsis, -ium, M., 'month']
4. Proximā nocte socii ad tēctum ducis vēnērunt. *Last night* the allies came to the leader's house. [proximus, -a, -um, here, 'last']

ABLATIVE OF COMPARISON (Unit 9C)

The ablative, without a preposition, is used with an adjective or adverb in the comparative degree to denote comparison.

1. Iuvenēs facta fortiora patribus fēcērunt. The young men did braver deeds *than their fathers* (did).
2. Tū fēlicior mē es. You are happier *than I*.
3. Puella pulchrior mātre pulchra est. The girl is more beautiful *than her beautiful mother*.

Note that the same idea may be expressed using **quam**:

4. Iuvenēs facta fortiora quam patrēs fēcērunt.
5. Tū fēlicior quam ego es.
6. Puella pulchrior quam māter pulchra est.

ABLATIVE OF DEGREE OF DIFFERENCE (Unit 9D)

The ablative, without a preposition, is used with comparatives to express the degree in which the two things being compared differ. Less frequently, this

kind of ablative is also found with a superlative in statements in which there is an implicit comparative judgment made.

1. **Puella multō pulchrior mātre pulchrā est.** The girl is *much* more beautiful than her beautiful mother.
2. **Marcus duōbus pedibus altior quam frāter est.** Marcus is *two feet* taller than his brother.
3. **Hic nūntius Rōmam quīnque diēbus post missus est.** This messenger was sent to Rome *five days* later.
4. **Is multō pulcherrimus hic est.** He is *by far* the most handsome man here.

ABLATIVE OF CAUSE (Unit 10C)

The ablative, generally without a preposition, is sometimes used to express *cause*.

1. **Rēginam irā crūdēli timēmus.** We fear the queen *because of her cruel anger*.
2. **Militēs metū pūgnāre nōn potuērunt.** The soldiers were not able to fight *because of fear*.
3. **Imperātor lēgātū virtūte laudāvit.** The commander praised the legate *because of his courage*.

ABLATIVE OF RESPECT (SPECIFICATION) (Unit 8D)

The *respect* in which a statement is true is expressed by the ablative without a preposition.

1. **Puella erat pulchra visū.** The girl was beautiful *to see*.
2. **Illa erat pulchra corpore et animō.** She was beautiful *in body and mind*.
3. **Hostēs nōs virtūte vicērunt.** The enemy excelled us *in courage*.

ABLATIVE OF ATTENDANT CIRCUMSTANCE (not discussed in the text)

The ablative case, without a preposition, may be used to express the circumstances in which the action of the sentence occurs.

1. **Ventis secundis multōs diēs nāvigāvimus.** We sailed for many days *with favorable winds*. [secundus, -a, -um, 'favorable'; nāvigō (1), 'sail']
2. **Sacrificium bonis ūminibus fit.** The sacrifice is being made *under good omens*. [sacrificium, -i, N., 'sacrifice'; ūmen, ūminis, N., 'omen']
3. **Flūmen ad litus magnō strepitū ruit.** The river rushes to the shore *with a great noise*. [strepitus, -ūs, M., 'noise']

Note that the ablative absolute may be used to express attendant circumstance:

4. **Dis grātiās manibus ad caelum sublātis agēmus.** We shall give thanks to the gods *with hands raised* to heaven. [grātiās agere, 'to give thanks' + dative; tollō, -ere, sustulī, sublātus, 'lift, raise']
5. **Orātor turbae fulgōre ad dextram visō locūtus est.** The speaker spoke to the crowd *with lightning seen* toward the right.

ABLATIVE ABSOLUTE (Unit 10A)

The ablative absolute composed of a noun and participle in the ablative case (or two nouns, or a noun and adjective, or pronoun and adjective with the participle of the verb “to be” understood) has no close syntactical connection with the rest of the sentence. It functions as an adverb giving the circumstances, time, cause, condition, or concession in which the action of the main verb occurs.

1. **Lēgātō auxilium ferente**, cōpiae hostēs superant. *With the legate bringing aid, the troops overcome the enemy.*
2. **Cicerōne cōsule**, multi fuērunt laeti. *When Cicero was consul, many men were happy. [Cicerō, -ōnis, M., ‘Cicero’]*
3. **Fulgōre vīsō plēbs territa fūgit**. *When the lightning had been seen, the terrified (common) people fled.*
4. **Multis nāvibus dēlētis**, hostēs victi sunt. *The enemy were conquered after many of their ships had been destroyed.*
5. **Hōc factō**, laeti tamen fuimus. *Although this had happened, nevertheless we were happy.*
6. **Marcō laetō**, laeti tamen nōn fuimus. *Although Marcus was happy, nevertheless we were not happy.*

ADJECTIVES WITH THE ABLATIVE (not discussed in the text)

Frētus, -a, -um, ‘relying upon, dependent upon’, and **dīgnus**, -a, -um, ‘worthy’, govern the ablative.

1. **Senex frētus nātis vivit**. The old man lives dependent upon *his sons*.
2. **Frēti fidē tuā nōn timēbimus**. Relying upon *your trustworthiness*, we shall not fear.
3. **Ille est dignus multīs bonīs**. That man is worthy of *many good things*.

WITH PREPOSITIONS**ABLATIVE OF PERSONAL AGENT (Unit 4E)**

The *agent* or *person* who performs the action of a passive verb is regularly expressed in the ablative case preceded by the preposition **ā** or **ab**, ‘by’.

1. **Illi ab omnibus** in oppidō visi sunt. Those men were seen by *everyone* in town.
2. **Rēx ā populō timētur**. The king is feared by *the people*.
3. **Bellum ab incolis prōvinciae gestum est**. War was waged by *the inhabitants* of the province.

PREPOSITIONS WITH THE ABLATIVE

The prepositions **cum**, **in**, **ā** (**ab**), **ē** (**ex**), **dē**, **sine**, **prō**, **sub**, **super** ('above'). etc., govern the ablative case.

1. **Socii cum hostibus pugnāvērunt.** The allies fought *with the enemy*.
2. **Ducēs dē multis cōgitābant.** The leaders thought *about many things*.
3. **Nihil sine pecūniā emere potest.** He can buy nothing *without money*.
4. **Hostēs prō moenibus pugnāvērunt.** The enemy fought *in front of the city walls*.

ABLATIVE OF ACCOMPANIMENT (Unit 7G)

The ablative is used with the preposition **cum** to denote accompaniment.

1. **Fēminaē cum nautīs ambulābant.** The women were walking *with the sailors*.
2. **Nautae cum multis sociis vēla dabunt.** The sailors will set sail *with many allies*.
3. **Incolae prōvinciae cum amicīs ex oppidō discessērunt.** The inhabitants of the province left the town *with their friends*.

ABLATIVE OF PLACE IN WHICH (PLACE WHERE) (Unit 6G)

Place where is expressed by **in** with the ablative, except for the names of small islands, towns and cities, and with the words **domus** and **rūs**.

1. **Erant multī montēs in insulā.** There were many mountains *on the island*.
2. **Pecūnia in cellis cēlāta est.** The money was hidden *in the storerooms*.
3. **Plūrimi in pāce vivere volunt.** Most men want to live *in peace*.

BUT:

4. **Rōmae esse volunt.** They want to be *in Rome*.

ABLATIVE OF PLACE AWAY FROM WHICH (Unit 6E2)

Ā (ab) with the ablative expresses the direction away from a place; however, no preposition is used with the names of small islands, towns and cities, and with the words **domus** and **rūs**.

1. **Ab insulā quam celerrimē discessimus.** We went *away from the island* as quickly as possible.
2. **Animālia ab āris pepulimus.** We drove the animals *away from the altars*.
3. **Turbamne ā tēctō cōnsulis dūcēs?** Will you lead the crowd *away from the consul's house*?

BUT:

4. **Rōmā ad Asiam vēnimus.** We came *from Rome to Asia*.

ABLATIVE OF PLACE OUT OF WHICH (Unit 6E2)

Ē (ex) with the ablative expresses the direction out of a place.

1. **Parva animālia ē mari in terram vēnērunt.** Small animals came *out of the sea onto land*.
2. **Servi qui ex Africā vēnerant in multis urbibus visi sunt.** Slaves who had come *out of Africa* were seen in many cities.

3. Puerōs ē tēctō in viam mittis? Are you sending the boys *out of the house* into the street?

ABLATIVE OF PLACE DOWN FROM WHICH (Unit 6E2)

Dē with the ablative expresses the direction down from a place.

1. Incolae saxa dē moenibus iēcērunt. The inhabitants threw rocks *down from the city walls*.
2. Dē monte magnā cum cūrā ambulāvērunt. They walked *down the mountain* with great care.
3. Quidam dē monte ad mortem cecidit. A certain man fell *down the mountain* to his death.

WITH OR WITHOUT PREPOSITIONS

ABLATIVE OF MANNER (MODAL ABLATIVE) (Unit 3F)

The ablative case may be used *with* or *without* the preposition **cum** to denote the *way* or *manner* in which something is done. **Cum** is required when the noun in the ablative is *not* modified by an adjective; when it is modified, **cum** is optional.

1. Militēs magnō (**cum**) studiō pūgnāvērunt. The soldiers fought *with great zeal (very zealously)*.
2. Nāti litterās longās magnā (**cum**) cūrā scripsērunt. The children wrote a long letter *with great care (very carefully)*.
3. Nūntiī **cum** virtūtē locūti sunt. The messengers spoke *with courage (courageously)*.
4. Socii cōnsilia **cum** diligētiā fēcērunt. The allies made plans *with diligence (diligently)*.

ABLATIVE OF SEPARATION (Unit 6E)

Some verbs which express or imply separation or deprivation are accompanied by the ablative case. The prepositions **ā** (**ab**), **ē** (**ex**), or **dē** are sometimes used with this construction, but more usually the ablative occurs alone.

1. Multi miseri spē carent. Many unhappy men lack *hope*.
2. Viri (**ā**) cūris liberāti vitam fēlicem ēgērunt. The men freed *from their cares* lived a happy life.
3. Fāma imperātōrem **ā** noxā nōn solvit. His reputation did not free the commander *from harm*.

ABLATIVE OF MATERIAL (not discussed in text)

The ablative case may be used, sometimes with the prepositions **dē** or **ex**, to show the material from which an object is made.

1. Urnam **ex** aurō numquam vidimus. We have never seen an urn *of gold*.

2. **Statua dē marmore in forō posita est.** A statue (made) *of marble* was placed in the forum. [*marmor*, -oris, M., 'marble']
3. **Mēnsa minima ex aurō facta mihi mōnstrāta est.** A very small table made of *gold* was shown to me.
4. **Agri multis flōribus pulcherrimis cōstant.** The fields consist of *many very beautiful flowers*. [*flōs*, *flōris*, M., 'flower'; *cōnstō*, -āre, *cōstiti*, -stātus, 'consist of']

ABLATIVE OF ORIGIN (ALLIED WITH ABLATIVE OF SEPARATION) (Unit 6E1)

The ablative, with or without a preposition, expresses the origin or descent of a person or thing.

1. **Cōnsul gente clārā nātus est.** The consul was descended *from a famous race*.
2. **Hic ē mātre pulchrā nātus est.** This man was born *of a beautiful mother*.
3. **Flūmen ā mari oritur.** The river rises *from the sea*.

Locative Case (Unit 6G)

The names of towns, cities, and small islands and the words **domus** and **rūs** use the locative case to express *place where*, which for other nouns is expressed by the ablative with the preposition **in**.

1. **Aenēas Carthāgine nōn diū remānsit.** Aeneas did not remain *in Carthage* for a long time.
2. **Servi vitam fēlicem Rōmae nōn semper vixērunt.** Slaves did not always live a happy life *in Rome*.
3. **Multa aedificia pulchra Athēnis fuērunt.** There were many beautiful buildings *in Athens*. [*aedificium*, -ī, N., 'building']

Vocative Case (Unit 8G)

The vocative is the case of *direct address*.

1. **Puerī, nōlite id facere.** Boys, don't do this.
2. **Librum novum, scriptor clāre,** mihi lege. Read me your new book, *famous writer*.
3. **Veni, fili mī, mēcum.** Come with me, *my son*.

REVIEW OF THE SYNTAX OF VERBS

Infinitives

The infinitive is an abstract verbal noun. (Unit 1C)

COMPLEMENTARY (Unit 5G)

There are verbs in Latin which frequently require an infinitive to complete

their meaning. Some of these are verbs which express ability, will, desire, and the like. The infinitive completes the idea of the verb.

1. Ad Italiam **ire** solēmus. We are accustomed *to go* to Italy.
2. Clārissimum virum **vidēre** potes? Can you *see* the very famous man?
3. Honestus vir **esse** vidētur. He seems *to be* an honorable man.
4. Parentēs et amīcōs nōlī **relinquere**. Don't *abandon* your parents and friends.

INFINITIVE AS SUBJECT (Unit 11E)

The infinitive is, in fact, a neuter noun and thus can be the subject of a verb.

1. **Vidēre** est crēdere. *Seeing* is believing. (*Literally*, 'To see is to believe'. **Crēdere** is a predicate nominative.)
2. Difficile nōn est vītam bene **agere**. It is not difficult *to conduct* life well.
3. Hoc est bonum: bene **agere** et multōs amīcōs **habēre**. This is good: *to do* well and *to have* many friends.
4. Facta fortia **perficere** optimum vidētur. *To accomplish* brave deeds seems best.
5. Est nāti omnibus dictis parentis **crēdere**. It is the mark of a child *to believe* all the sayings of his parent.
6. Bene **vivere** oportet. It is proper *to live* well. (This also occurs with other impersonal verbs.)

OBJECT INFINITIVE (Unit 5G)

An infinitive (sometimes with subject accusative) may be used as the object of another verb.

1. Rōmam **ire** volumus. We want *to go* to Rome.
2. Dux militēs oppidum **oppūgnāre** iussit. The leader ordered the soldiers *to attack* the town.
3. Vōs hoc **facere** vetat. He forbids you *to do* this.
4. Dux militēs sē **recipere** prohibuit. The leader prevented the soldiers from *withdrawing*.

A further use of the object infinitive is:

THE INFINITIVE IN INDIRECT STATEMENT (Unit 6C)

After words which express or imply actions that take place in the head, such as saying, thinking, seeing, perceiving, knowing, and the like, statements are made indirectly. The verb of this indirect statement is in the infinitive and the subject of the infinitive is in the accusative case.

1. Nōs fēlicēs mox **futūrōs esse** (fore) spērat. He hopes that we *will soon be happy*.
2. Tē hoc **fēcissem** pūtāvimus. We thought that you *had done* this.
3. Nōs rūs **ire** scivit. He knew that we *were going* to the country.

HISTORICAL INFINITIVE (Unit 18C)

The infinitive is used in narrative passages instead of a finite verb to emphasize the pure verbal action rather than the agents of that action. The subject of the historical infinitive is in the nominative case.

1. Multi in oppidō clāmāre. Many men in the town *shouted*.
2. Militēs multā cum vi pūgnāre. Soldiers *fought* with a lot of force.
3. Alii per viās oppidi currere, alii apertē plōrāre, alii manūs ad deōs tollere.
Some *ran* through the streets of the town, others *wept* openly, others *raised* their hands to the gods. [apertē, adv., ‘openly’; plōrō (1), ‘weep’; tollō, -ere, sustuli, sublātus, ‘raise, lift’]

EPEXEGETICAL INFINITIVE (not discussed in the text)

An infinitive may be dependent upon an adjective, as happens in Greek.

1. Poēta carmen dignum legī fēcit. The poet composed a poem worthy *to be read*.
2. Servus erat peritus docēre. The slave was skilled in *teaching*. [peritus, -a, -um, ‘skilled’]
3. Hic vir aptus erat regere. This man was fit *to rule*. [aptus, -a, -um, ‘fit’]

INFINITIVE IN EXCLAMATIONS (not discussed in the text)

The infinitive with subject accusative may be used as a main verb in exclamations.

1. Tālem scelerātūm imperium obtinuisse! (To think) that such a scoundrel *has obtained* power!; Such a scoundrel *has obtained* power?! [scelerātus, -ī, M., ‘scoundrel’; obtineō (ob + teneō), ‘get hold of, obtain’]
 2. Mē ut hunc diem vidērem vixisse! (To think) that I *have lived* to see this day!; I *have lived* to see this day?!
 3. Mē tē facere hoc nōn dare! I not *grant* you to do this?!
- Sometimes the enclitic **-ne** is added to the emphatic word to lay stress on the interrogative nature of the exclamation:
4. Mēne ā tē victum esse! I *beaten* by you?!

Imperatives (Units 1A5, 8F)

The imperative mood expresses the action as a command.

1. Timōrem mortis superā! *Overcome* your fear of death!
2. Librum hūc fer! *Bring* the book here!
3. Verba sapientis audite! *Listen to* the words of the wise man!
4. Noxam patere! *Endure* the injury!

The future imperative is used to stress the futurity of the command (particularly when another verb in the sentence is in the future or future perfect tense). It is also used in legal terms.

- Cum tē vidēbō, respōnsum mihi dīcitō. When I see you, *you shall tell me your answer.* [respōnsum, -ī, N., ‘answer’]
- Mox veniet; poenās datō. He will come soon; *he shall pay the penalty.*
- Rēs pūblica ā duōbus cōnsulibus regitor. The republic *shall be ruled* by two consuls.

Some verbs, like **memini**, ‘remember’, regularly use the future imperative instead of the present:

- Mementōte hōrum factōrum fortium! *Remember* (pl.) these brave deeds!

Indicative Mood

The indicative mood is the mood of fact and is used for making direct statements and asking direct questions. (Unit 1A5)

- Hās litterās ad amicum mittēs? *Will you send this letter to your friend?*
- Liber qui ā clārissimō auctōre scriptus erat omnibus praeſentibus lēctus est. The book which *had been written* by the very famous author *was read* to all who were present. [praesēns, praeſentis, ‘present’]
- Servus ad poenās trāditus scelus negāvit. The slave handed over to punishment *denied* his crime.

CONCESSIVE CLAUSES (quamquam and etsī) (Unit 15C3)

- Quamquam rūs incolimus, fēlicēs nōn sumus. *Although we live in the country, we are not happy.*
- Etsī rūs urbe māluērunt, tamen Rōmam incoluērunt. *Although they preferred the country to the city, nevertheless they lived in Rome.*
- Quamquam eōs viderāmus, tamen loqui nōluimus. *Although we had seen them, nevertheless we did not want to speak.*

BUT:

- Cum eōs vidiſſēmus, tamen loqui nōluimus. *Although we had seen them, nevertheless we did not want to speak.*
- Quamvis eōs vidiſſēmus, tamen loqui nōluimus. *Although we had seen them, nevertheless we did not want to speak.*
- Eis ā nōbis vīſis, tamen loqui nōluimus. *Although they had been seen by us, nevertheless we did not want to speak. (Ablative Absolute)*

CAUSAL CLAUSES (quoniam/quandō, quod/quia take the indicative to express actual fact) (Unit 15C2)

- Quoniam } sumus amici, amicitiam nōn negābimus. *Since we are friends, we shall not deny our friendship.*

4. **Eum vidēre volō antequam perierit**. I want to see him *before he dies.*

BUT:

5. Mortuus est **antequam eum vīdērem**. He died *before I could see him.*

quod, ‘the fact that’ (Unit 18K)

A substantive clause introduced by **quod**, ‘the fact that’, and with its verb in the indicative is sometimes used as the subject or object of another verb, or in apposition to the subject of that other verb.

1. **Quod fēlix es, negāre nōn possumus.** *The fact that you are happy we cannot deny.*
2. **Quod tē amō mē fēlicem facit.** *The fact that I love you makes me happy.*
3. **Alia causa timōris est quod nōs ūdit.** *Another cause of fear is the fact that he hates us.*

cum, 'whenever' (perfect indicative when the main verb is present; pluperfect indicative when the main verb is imperfect) (Unit 15A4)

1. **Cum plēbs ducibus pāruit, pāx in rē pūblicā est.** *Whenever the common people obey their leaders, there is peace in the republic.*
2. **Nautae vēla dabant cum venti secundi fuerant.** *The sailors used to set sail whenever the winds were favorable. [secundus, -a, -um, 'favorable']*
3. **Cum parentēs vīderāmus, fēlicēs erāmus.** *Whenever we saw our parents, we were happy.*

BUT:

4. **Cum parentēs vīdimus, fēlicēs erāmus.** *When we saw our parents, we were happy. (stresses time — a single action)*
5. **Cum parentēs vidērēmus, fēlicēs erāmus.** *When we saw our parents, we were happy. (stresses circumstances — a single action)*

CONDITIONS

SIMPLE OR GENERAL CONDITIONS (indicative in both clauses) (Unit 2E1)

1. **Si in agrō es, labōrās.** *If you are in the field, you are working.*
2. **Si in agrō fuistī, labōrāvistī.** *If you were in the field, you worked.*
3. **Si in agrō fuerās, labōrāverās.** *If you had been in the field, you had worked.*

FUTURE MORE VIVID CONDITIONS (future indicative in both clauses; for emphasis, future perfect indicative in protasis) (Unit 2E2a)

1. **Si in agrō eris, labōrābis.** *If you are (will be) in the field, you will work.*
2. **Si in agrō fueris, labōrābis.** *If you are (will have been) in the field, you will work. (emphatic)*
3. **Si domum veniet, statuam vidēbit.** *If he comes (will come) home, he will see the statue.*
4. **Si deōs precātus erit, impetrābit.** *If he begs (will have begged) the gods, he will gain his request. (emphatic) [impetrō (1), 'gain one's request']*

IMPERSONAL PASSIVES (Unit 13C)

1. **In oppidō agitātum est.** *There was a disturbance in the town.*
2. **Domō discēditur.** *There is a departure from the house: they are leaving the house.*

3. Hostibus ā duce parcētur. The enemy *will be spared* by the leader.
4. Puellis ā magistrō favēbātur. The girls *were favored* by the teacher.

NOTE that this construction may be used with the subjunctive also:

5. In oppidō agitētur. *Let there be a disturbance* in the town.
6. Si puellis ā magistrō faveātur, infēlix sim. If the girls *should be favored* by the teacher, I would be unhappy.

Subjunctive Mood

The subjunctive mood is the mood used to express idea, intent, desire, uncertainty, potentiality, or anticipation. (Unit 1A5)

INDEPENDENT USES OF THE SUBJUNCTIVE

HORTATORY SUBJUNCTIVE (Unit 12A1)

The present subjunctive is used to express an exhortation in the first person. The negative is introduced by **nē**.

1. Tēcum veniam. *Let me come* with you.
2. Nē rūs relinquāmus. *Let us not abandon* the country.
3. Auxilium ad miserōs ferāmus. *Let us bring* aid to the wretched men.

JUSSIVE SUBJUNCTIVE (Unit 12A1)

The present subjunctive is used to express a command in the second and third persons. The negative is introduced by **nē**.

1. Crūdēlis senem nē interficiat. *Let the cruel man not kill* the old man.
2. Iram rēginae timeant. *Let them fear* the queen's anger.
3. Pecūniam oblātam capiās. *Take* the offered money.
4. Rēs meliōrēs nē spērētis. *Don't hope for* better matters.

In the second person, occasionally, when the verb is negative, the perfect subjunctive is found instead of the present:

5. Rēs meliōrēs nē spērāveritis. *Don't hope for* better matters.

DELIBERATIVE SUBJUNCTIVE (Unit 12A3)

The present and imperfect subjunctive may be used to deliberate about a course of action. This is frequently found in a rhetorical question. The negative is introduced by **nōn**.

1. Rūs redeam? *Should I go back* to the country? *Am I to return* to the country?
2. Eum iterum nōn videam? *Should I not see* him again? [iterum, adv., 'again']
3. Dōnum frātri eius darem? *Should I have given* a gift to his brother?

OPTATIVE SUBJUNCTIVE (Unit 12A4)

A wish for the future which is capable of fulfillment is expressed by the present subjunctive alone or is introduced by **utinam** or **ut**. The negative is introduced by **utinam nē** or **nē**.

Wishes incapable of fulfillment utilize the imperfect subjunctive for present time and the pluperfect for past time.

1. (Utinam) meliōrēs rēs mihi sint! *If only affairs will be better for me!*
2. (Ut) diūtius vivere possēmus! *If only we could live longer!*
3. (Utinam) sapientior fuisset! *If only he had been wiser!*
4. (Utinam) nē adesset! *If only he were not present!*

POTENTIAL SUBJUNCTIVE (Unit 12A2)

The subjunctive may be used independently to express an action which might possibly or conceivably occur. For present or future potentiality, the present subjunctive is used. For past potentiality, the imperfect subjunctive is used. The negative is expressed by **nōn**.

1. Hoc nōn faciās. *You wouldn't do this.*
2. Servi in bellō pūgnent. *The slaves might fight in the war.*
3. Tēcum irēmus. *We would have gone with you; we might have gone with you.*

USES OF THE SUBJUNCTIVE IN DEPENDENT CLAUSES

SEQUENCE OF TENSES

	INDICATIVE	SUBJUNCTIVE
Primary Tenses	Present	Present (<i>same time as or subsequent to the action of the main verb</i>)
	Future	Perfect (<i>prior to the action of the main verb</i>)
	Perfect ("have" or "has")	Perfect (<i>prior to the action of the main verb</i>)
	Future Perfect	
Secondary Tenses	Imperfect	Imperfect (<i>same time as or subsequent to the action of the main verb</i>)
	Perfect (English past)	Pluperfect (<i>prior to the action of the main verb</i>)
	Pluperfect	

PURPOSE CLAUSES (**ut** + subjunctive; negative **nē**) (Unit 3G)

1. Multō cum vigōre lābōrāvimus **ut** magna praemia acciperēmus. We worked with much vigor in order *that we might receive great rewards.*
2. Nē inimicī vidērentur. dōna pulchra accēpērunt In order *that they might not seem unfriendly.* they accepted the beautiful gifts.
3. Magistrōs laudat **ut** sibi (ipsī) faveant He praises his superiors in order *that they will favor him.*

RELATIVE CLAUSES OF PURPOSE (Unit 14E)

Quō introduces a purpose clause which contains a comparative. A purpose clause may be introduced by a relative pronoun when its antecedent, usually not the subject of the main verb, is clearly expressed in the main clause.

1. **Quō** melius **intellegās**, tōtam rem tibi expōnam. In order that *you may understand* better, I shall explain the whole matter for you.
2. Eum hīs cōsiliis praefēcimus, **qui** multam fāmam obtinēret. We put him in charge of these plans in order that *he might gain* much fame. [**obtineō** (**ob** + **teneō**), ‘get hold of, obtain’]
3. Poēta carmen scripsit **quod** rēgīnae placēret. The poet wrote a poem *in order that he might please* the queen.

PURPOSE CLAUSES INTRODUCED BY ADVERBS (Unit 14E)

Purpose clauses may be introduced by an adverb (**ubi**, **unde**, **quō**).

1. In tēctō sē cēlāvit **ubi** tūtus esset. He hid in the house in order that *he might be safe there*.
2. Nāvēs in portū parant **unde** vēla dent. They are preparing the ships in the harbor in order that *they may set sail from there*. [**portus**, -ūs, M., ‘harbor’]
3. Eunt **quō** tūti sint. They are going where *they may be safe*.

By way of review, note the following seven ways of expressing purpose. There is no difference in the meaning of the sentences below:

1. Amicōs nostrōs Rōmam misimus **ut** multa vidērent.
2. Amicōs nostrōs Rōmam misimus **qui** multa vidērent.
3. Amicōs nostrōs Rōmam misimus **ad** videndum multa.
4. Amicōs nostrōs Rōmam misimus **ad** multa videnda.
5. Amicōs nostrōs Rōmam misimus videndī multa causā (grātiā). [grātiā, preceded by gen., ‘for the sake of’]
6. Amicōs nostrōs Rōmam misimus multōrum videndōrum causā (grātiā). [grātiā, preceded by gen., ‘for the sake of’]
7. Amicōs nostrōs Rōmam misimus multa vīsum.

We sent our friends to Rome to see many things.

KEY: (1) **ut** + subjunctive; (2) relative clause of purpose; (3) **ad** + accusative of the gerund; (4) **ad** + accusative + gerundive; (5) **causā** or **grātiā** + genitive of the gerund; (6) **causā** or **grātiā** + genitive + gerundive; (7) supine in -um with a verb of motion

INDIRECT COMMANDS (Unit 3H)

1. Servōs monet nē verba rīdeant. He is warning the slaves that they not *laugh at his words*.

2. Amīcōs hortātī sumus **nē** opera **neglegant**. We have urged our friends that they *not neglect* their works.
3. Nōbīs imperātūm est **ut** vīribus ac virtūtē **ūterēmur**. We were ordered that we *use* our strength and courage.

RESULT CLAUSES (Unit 14A)

Clauses expressing the result of an action are introduced by **ut** for the positive, **ut nōn** (**nēmō**, **nihil**, **nemquam**, etc.) for the negative, and have their verbs in the subjunctive.

1. Tam crūdēlis est **ut** ab omnibus **timeātur**. He is so cruel *that he is feared* by all.
2. Tantō vigōre discipuli respondent **ut** magistrō **placeant**. The students answer with such great liveliness *that they please* the teacher. [discipulus, -i, M., 'student']
3. Nōn satis celeriter cucurrērunt **ut** periculum **nōn fugerent** (**fūgerint**). They did not run quickly enough *with the result that they did not flee* the danger.
4. Venti ita validi erant **ut** **nēmō** vēla dare posset (**potuerit**). The winds were so strong *that no one could* set sail.

SUBSTANTIVE CLAUSES OF RESULT (Unit 14B)

Certain verbs and expressions have result clauses either as their object or subject.

1. Effēcērunt **ut** pāx fieret (**facta sit**). They brought it about *that peace was made*.
2. Fit **ut** nōs **simus** amici. It happens *that we are* friends.
3. Fac **ut** hoc quam celerrimē **fiat**. See to it *that this is done* as quickly as possible.

With **faciō** and **efficiō**, the negative is often expressed by **nē**, particularly when there is an implicit notion of command in the sentence:

4. Fac **nē** sit mora. See to it *that there isn't* a delay.

RELATIVE CLAUSES OF RESULT (Unit 14D)

A relative clause of characteristic may be fused with a result clause to produce a relative clause of result. The relative pronoun is standing for the **ut** which would normally introduce the clause of result.

1. Quod factum tantum fuit **quod** omnēs **mīrārentur**? What deed was so great *that all (people) admired it*?
2. Tam clārus est **quem** omnēs **sciant**. He is so famous *that all (people) know him*.
3. Tam senex est **qui** morī **velit**. He is so old *that he wants to die*.

fore ut + SUBJUNCTIVE (Unit 18B)

Fore ut is used with the subjunctive often in place of a future *passive* infinitive in indirect statement or in place of a future *active* infinitive when the verb lacks a fourth principal part.

- Spērat fore ut impii ex urbe expellantur. He hopes that the wicked men *will be driven* out of the city.
- Scivit fore ut multum ab eis libris discerēmus. He knew that *we would learn* a lot from those books.
- Tibi diximus fore ut id accideret. We told you that this *would happen*.
- Putās fore ut ei adsint? Do you think that they *will be present*?

RELATIVE CLAUSES OF CHARACTERISTIC (GENERIC RELATIVE CLAUSES) (Unit 14C)
 The relative pronoun **qui**, **quae**, **quod** plus the subjunctive can be used to describe the antecedent of the pronoun in terms of the general qualities or characteristics of the group to which the antecedent belongs. The negative clause is often introduced by **quin**.

- Sunt qui eum laudent. *There are those who praise him; There are those who would praise him.*
- Nēmō est qui eum tē mālit. *There is no one who prefers him to you; There is no one who would prefer him to you.*
- Quid erat quod nōbīs timendum esset? *What was there which we had to fear?*
- Sōlus erit quīn hoc faciat. *He will be the only one who doesn't do this; He will be the only one who won't do this; He will be the only one who wouldn't do this.*

Clauses of Fearing (Unit 17A)

Clauses of fearing are introduced by **nē** for the positive and **ut** (occasionally, **nē...nōn**) for the negative.

- Metuunt ut hostēs urbem reliquerint. They fear *that the enemy has not abandoned* the city.
- Veriti sumus nē nōs ḍōissent. We feared *that they hated us.*
- Timet ut cōpiis praeſit. He is afraid *that he will not be in charge* of the troops.
- Timent nē nōn vēritātem sibi dictūrus sis. They fear *that you will not tell them* the truth.

INDIRECT QUESTIONS (Unit 12C)

Indirect questions are subordinate noun clauses which serve as the object (and, less frequently, the subject) of the words on which they depend. These words usually, but not always, express or imply actions that take place in the head, such as saying, thinking, seeing, perceiving, knowing, asking, and the like. Indirect questions are introduced by an interrogative word and have their verbs in the subjunctive.

- Nōn intellegit quō modō hoc fiat. He does not understand *how this is done.*
- Quid sciat incertum est. It is uncertain *what he knows.*
- Nōn exposuisti cūr hūc venīrēs. You did not explain *why you were coming here.*

4. **Quā dē causā hoc factūrus sīs** manifestum est. It is clear *for what reason you will do this.* [manifestus, -a, -um, ‘evident, clear’]

CONDITIONS

PRESENT CONTRARY-TO-FACT CONDITIONS (imperfect subjunctive in both clauses) (Unit 2E3a)

1. **Si rēx essem**, imperium mihi **esset**. If *I were king, I would have power.*
2. **Nisi frāter meus essēs**, poenās **darēs**. If *you were not my brother, you would pay the penalty.*
3. **Si insidiās contrā rem pūblicam facerent**, cōnsul eōs **opprimeret**. If *they were making a plot against the state, the consul would suppress them.*

PAST CONTRARY-TO-FACT CONDITIONS (pluperfect subjunctive in both clauses) (Unit 2E3b)

1. **Si dē nōbis cōgitāvissētis**, hoc numquam **fēcissētis**. If *you had thought about us, you would never have done this.*
2. **Si oppidum moenibus dēfēnsūm esset**, hostēs nōn **invāsissent**. If *the town had been defended by walls, the enemy would not have invaded it.*
3. **Nisi auxilium tulissētis**, mortuī **essēmus**. If *you had not brought aid, we would have died.*

FUTURE LESS VIVID CONDITIONS (present subjunctive in both clauses; occasionally perfect subjunctive in protasis) (Unit 2E2b)

1. **Si iuvenem laudēs**, fēlix **sit**. If *you should praise the young man, he would be happy.*
2. **Si oppidum ab hostibus vincātur**, incolae servi **fiant**. If *the town should be conquered by the enemy, the inhabitants would become slaves.*
3. **Nisi auxilium ad incolās ferātur**, patiantur. If *aid should not be brought to the inhabitants, they would suffer.*

Note that conditions can be mixed as logic requires (Unit 2E4):

1. **Si eum vīdisset**. fēlix **esset**. If *she had seen him, she would be happy.*
2. **Si periculum sit**, clāmābō. If *there should be danger. I shall shout.*
3. **Si Rōmae essem**, iter longum **fēcissem**. If *I were in Rome, I would have made a long journey.*

SUBJUNCTIVE IN SUBORDINATE CLAUSES IN INDIRECT STATEMENT (Unit 7J)

Subordinate clauses within an indirect statement normally have their verbs in the subjunctive, the tense of which is determined by the verb or phrase of the head introducing the indirect statement.

1. Virum quem **vidērēmus** esse frātrem poētae dixērunt. They said that the man whom *we saw* was the poet’s brother.

2. Deōs praemia populō cui **faveant** datūrōs esse sentit. He feels that the gods will give rewards to the people whom *they favor*.
3. Sē ducibus qui rei pūblicae **praeessent** crēditūrōs esse arbitrāti sunt. They thought that they would believe the leaders who *were in charge of* the state.

CAUSAL CLAUSES (cum + subjunctive) (Unit 15A2 and D1)

Quod or **quia** is used with the subjunctive to give an *alleged* reason.

1. Cum cōnsilia eōrum **rīdērēmus**, magistri nōs ūderant. *Since we laughed at* their plans, our superiors hated us.
2. Haec facere scivimus, **cum** nōbis ā tē **exposita essent**. We knew how to do these things, *since they had been explained* to us by you. [sciō, here, 'know how']
3. **Cum** in Italiā sīmus, Rōmam ibimus. *Since we are* in Italy, we shall go to Rome.
4. Rōmam vēnērunt {**quod**} {**quia**} nōs vidēre vellent. They came to Rome *because they (allegedly) wanted* to see us.

BUT:

5. Quid faciat nescit {**quoniam**} {**quandō**} haec nōn exposita sunt. He does not know what to do *since these things have not been explained*.
6. Quid faciat nescit {**quod**} {**quia**} haec nōn exposita sunt. He does not know what to do *because these things (actually) have not been explained*.
7. Quid faciat nescit, **his** nōn expositis. He does not know what to do *since these things have not been explained*. (Ablative Absolute)

CONCESSIVE CLAUSES (cum + subjunctive; quamvis + subjunctive; ut + subjunctive) (Unit 15A3 and C3; **ut** + subj. not discussed in the text)

1. **Cum** in Italiā sīmus, Rōmam tamen nōn ibimus. *Although we are* in Italy, nevertheless we shall not go to Rome.
2. **Cum** ad rēgem missi essent, eum vidēre nōn potuērunt. *Although they had been sent* to the king, they were not able to see him.
3. Tē vidēre volō, **cum** tē hōc tempore nōn amem. I want to see you, *although I do not love* you at this time.
4. **Quamvis** mē ad tē venire volueris, tamen hoc nōn faciam. *Although you wanted* me to come to you, nevertheless I shall not do it.
5. Illūc ivi **ut** nōllem. I went there {*even though*} {*granted that*} *I did not want to*.

BUT:

6. **Quamquam**
Etsi } mē ad tē venire voluistī, tamen hoc nōn faciam. *Although you wanted me to come to you, nevertheless I shall not do it.*
7. **His expositis**, tamen quid facerēmus nescivimus. *Although these things had been explained, nevertheless we did not know what to do. (Ablative Absolute)*

CIRCUMSTANTIAL CLAUSES (**cum** + subjunctive when the action is in past time; **cum** + indicative when the action is in present or future time) (Unit 15A1)

1. **Cum** fulgor vīsus esset, multi timuērunt. *When the lightning had been seen, many feared.*
2. **Cum** tēctum ardēret, omnēs clāmāvērunt. *When the house was burning, all (people) shouted.*
3. **Cum** hunc cōpiis praeſēcissent, mīlītēs vīcērunt. *When they had put this man in charge of the troops, the soldiers conquered the enemy.*

BUT:

4. **Hoc** cōpiis **praeſectō**, mīlītēs hostēs vīcērunt. *When this man had been put in charge of the troops, the soldiers conquered the enemy. (Ablative Absolute)*
5. **Cum** fulgor vīsus erat, multi timuērunt. *When the lightning had been seen, many feared. (The indicative is used to stress time.)*

ANTICIPATION (Unit 15D2 and D3)

One of the basic uses of the subjunctive is to express anticipation.

- Dōnec**
1. **Dum** } hoc faciās, infēlix erō. *Until you do this, I shall be unhappy.*
Quōad
 2. Labōrem neglēxērunt **dōnec** } litterās tuās acciperent. *They neglected their
dum } work until they could receive your letter. [labor, -ōris, M., 'work']
quōad }*
 3. Hoc faciēmus **antequam** tē videāmus. *We shall do this before we see you.*
 4. Ante aderō **quam** adveniās. *I shall be present before you arrive.*
 5. Prius eum laudāvērunt **quam** eum scirent. *They praised him before they could know him.*

BUT:

1. Labōrem neglēxērunt **dum** litterās tuās accēpērunt. *They neglected their work until they received your letter. (The indicative is used to express fact, not anticipation.)*

2. **Prius eum laudāvērunt quam eum scīvērunt.** They praised him *before they (actually) knew him.*

AND:

3. **Ante aderō quam advenīs (advēneris).** I shall be present *before you arrive.* (The present or future perfect indicative frequently is used with **antequam** and **priusquam** in primary sequence even when there is a notion of anticipation.)

CLAUSES OF PROVISO (dum, modo, and dummodo + present or imperfect subjunctive; the negative uses nē) (Unit 15E)

1. **Hoc faciēmus** $\left\{ \begin{array}{c} \text{dummodo} \\ \text{dum} \\ \text{modo} \end{array} \right\}$ auxilium **offerās.** We shall do this *provided that you offer help.*
2. **Auxilium offerēmus** $\left\{ \begin{array}{c} \text{dum} \\ \text{modo} \\ \text{dummodo} \end{array} \right\}$ **quaerātur.** We shall offer help *provided it is sought.*
3. **Nautae vēla dabunt** $\left\{ \begin{array}{c} \text{modo} \\ \text{dum} \\ \text{dummodo} \end{array} \right\}$ venti secundi sint. The sailors will set sail *provided that the winds are favorable.* [secundus, -a, -um, 'favorable']
Dum
Dummodo } **nē tibi noceam, faciam quid dēbeam.** *Provided that I do not harm Modo you, I shall do what I must.*

SUBJUNCTIVE BY ATTRACTION (Unit 18A)

Frequently relative and other subordinate clauses within clauses whose verbs are in the subjunctive have verbs which are attracted into the subjunctive provided that the subordinate clause is an integral part of the idea of the main clause.

1. **Rōmam ire volō ut tēctum in quō vixerit poēta clārissimus videam.** I want to go to Rome to see the house in which the very famous poet *lived.*
2. **Tam crūdēlis erat ut omnis populus dum viveret eum timēret.** He was so cruel that all the people while *he lived* feared him.
3. **Quis est qui tēctum in quō vivat poēta clārissimus vidēre velit?** Who is there who wants to see the house in which the very famous poet *lives?*

CLAUSES OF DOUBTING (Unit 17B)

Num or **an** + subjunctive is used after a positive expression of doubting; **quin** + subjunctive after a negative one.

- Dubitō **num** veniat. I doubt *whether (that) he is coming (he will come)*.
- Dubitāvērunt **an** hoc facerēmus. They doubted *whether (that) we were doing (would do) this*.
- Dubitāsne **num** diē cōnstitūtā adventūrī sint? Do you doubt *whether (that) they will arrive* on the day which has been decided?
- Nōn est dubium quīn tē timeat. There isn't a doubt (*but*) *that he fears you*.
- Quis dubitet quīn impius sit? Who would doubt (*but*) *that he is wicked*?

CLAUSES OF PREVENTION (Unit 17C)

If the verb of prevention is positive, the subjunctive clause will be introduced by **quōminus** or **nē**; if negative, by **quōminus** or **quīn**.

- Hostēs cōpiās nostrās dēterrūerunt $\left\{ \begin{matrix} \text{quōminus} \\ \text{nē} \end{matrix} \right\}$ advenirent. The enemy prevented our troops *from arriving*.
- Ignis nōn impediet $\left\{ \begin{matrix} \text{quīn} \\ \text{quōminus} \end{matrix} \right\}$ in tēctum ingrediāmur. The fire will not hinder us *from entering* the house.
- Pueri obstant $\left\{ \begin{matrix} \text{nē} \\ \text{quōminus} \end{matrix} \right\}$ opus tuum perficiās? Are the children hindering you *from completing* your work?

SUBJUNCTIVE CLAUSES WITH IMPERSONAL VERBS (**ut** or **nē** expressed or implied + subjunctive) (Unit 16D3 and E)

- Necesse est (**ut**) Marcus nāvibus praeſit. It is necessary *that Marcus be in charge of the ships*.
- Licet (**ut**) rēgem videāmus. It is permitted *for us to see the king*. OR: We are permitted *to see the king*.
- Patriae interest **ut** hostēs discēdant. It is in the interest of the country *that the enemy withdraw*.
- Tuā rēfert **nē** illūc eās. It is to (in) your interest *not to go there*.

Participles (Unit 5B)

A participle is a verbal adjective.

PARTICIPLES AS ATTRIBUTIVE ADJECTIVES

- Virum ā periculō fugientem vidimus. We saw the man *fleeing from danger*.
- Oppidum ab hostibus captum incēnsum est. The town *captured by the enemy was set on fire*. [incendō, -ere, -cēndi, -cēnsus, 'set on fire']
- Servus ā tēctō domini fugitūrus timuit. The slave, *about to flee from his master's house*, was afraid.

ABLATIVE ABSOLUTE

See page 376.

Gerunds (Unit 16A)

The gerund is a verbal noun found only in the singular. It lacks a nominative case which is supplied by the infinitive.

1. Timor **scribendi** multōs scribere prohibet. The fear *of writing* keeps many people from writing.
2. Rūs ivimus **venandi** {causā} {gratiā}. We went to the country for the sake *of hunting*.
OR: We went to the country to *hunt*. [gratiā, preceded by gen., 'for the sake of']
3. Marcum **canendō** praeſēcimus. We put Marcus in charge of *the singing*.
4. Ad **venandum** rūs ivimus. We went to the country to *hunt*.
5. **Eundō** rūs patri placuimus. *By going* to the country we pleased our father.
BUT: Rūs ivimus **venandōrum animālium** {causā} {gratiā}. We went to the country to *hunt animals*. [gratiā, preceded by gen., 'for the sake of'] (The gerundive is used instead of a gerund with an object.)

Gerundives (Unit 16B)

The gerundive is a verbal adjective. It is frequently used instead of a gerund which governs an object except when the object is a neuter adjective or pronoun.

1. Timor librōrum **scribendōrum** multōs scribere prohibet. The fear *of writing books* keeps many people from writing.
2. Multi linguam antiquam **discendam** ódērunt. Many people hate *learning* an ancient language. [lingua, -ae, F., 'tongue, language']
3. Linguā antiquā **discendā** ūtimur. We enjoy *learning* an ancient language. [lingua, -ae, F., 'tongue, language']
4. Rōmam ad Caesarem **videndum** ivimus. We went to Rome to *see Caesar*. [Caesar, -aris, M., 'Caesar']
5. Rōmam Caesaris **videndi** {causā} {gratiā} ivimus. We went to Rome for the sake of *seeing (to see) Caesar*. [Caesar, -aris, M., 'Caesar'; gratiā, preceded by gen., 'for the sake of']

Supines (Unit 17D)

The supine is a verbal noun which occurs only in the accusative and ablative singular. The accusative case is used, without a preposition, to express purpose after a verb of motion, and the ablative, with certain adjectives, expresses respect.

1. Rōmam Caesarem vīsum ivimus. We went to Rome *to see* Caesar. [Caesar, -aris, M., 'Caesar']
2. Ā periculō fugitum cucurrimus. We ran *to flee* from danger.
3. Librum — mirābile dictū! — perfēcimus. We have finished the book — wonderful *to say!* [mirabilis, -e, 'wonderful, marvelous']

CONDITIONS IN INDIRECT STATEMENT

In order to put a conditional statement into the indirect form after a verb or expression of the head, the apodosis is recast in the subject accusative and infinitive construction; the protasis will have its verb in the subjunctive, regardless of its mood in the direct statement. Observe the following:

Simple (General) Conditions

APODOSIS: The subject accusative and infinitive construction is used in indirect statement; the tense of the infinitive is relative to that of the main verb of the head.

PROTASIS: The verb is in the subjunctive, the tense of which is determined by sequence relative to the main verb of the head.

Si insidiās contrā rem pūblicam faciunt, cōnsul eōs opprimit.

If they plot against the state, the consul oppresses them.

Dicit (dicit) si insidiās contrā rem pūblicam faciant, cōnsulem eōs opprimere.

He says (will say) that, if they plot against the state, the consul oppresses them.

Dixit si insidiās contrā rem pūblicam facerent, cōnsulem eōs opprimere.

He said that, if they plotted against the state, the consul oppressed them.

Si insidiās contrā rem pūblicam faciēbant, cōnsul eōs opprimēbat.

If they plotted against the state, the consul oppressed them.

Dicit (dicit) si insidiās contrā rem pūblicam fēcerint, cōnsulem eōs oppressisse.

He says (will say) that, if they plotted against the state, the consul had oppressed them.

Dixit si insidiās contrā rem pūblicam fēcissent, cōnsulem eōs oppressisse.

He said that, if they had plotted against the state, the consul had oppressed them.

Future More Vivid Conditions and Future Less Vivid Conditions

Note that no distinction is made between these two kinds of conditions in indirect statement.

APODOSIS: The subject accusative and infinitive construction is used in indirect statement; the tense of the infinitive will always be future.

PROTASIS: The verb is always in the subjunctive, the tense of which is determined by sequence relative to the main verb of the head.

MORE VIVID:

Si insidiās contrā rem pūblicam {facient
fēcerint} , cōnsul eōs opprimet.

If {they plot
plot (will have plotted)} against the state, the consul will oppress them.

LESS VIVID:

Si insidiās contrā rem pūblicam {faciant
fēcerint} , cōnsul eōs opprimat.

If {they should plot
should plot (should have plotted)} against the state, the consul would oppress them.

MORE VIVID:

Dicit (dicet) si insidiās contrā rem pūblicam {faciant
fēcerint} , cōnsulem eōs oppres-
sūrum esse.

He says (will say) that, if {they plot
plot (will have plotted)} against the state, the consul will oppress them.

LESS VIVID:

Dicit (dicet) si insidiās contrā rem pūblicam {faciant
fēcerint} , cōnsulem eōs oppres-
sūrum esse.

He says (will say) that, if {they should plot
should plot (should have plotted)} against the state, the consul would oppress them.

MORE VIVID:

Dixit si insidiās contrā rem pūblicam {facerent
fēcissent} , cōnsulem eōs oppressūrum
esse.

He said that, if {they plotted
plotted (will have plotted)} against the state, the consul would oppress them.

LESS VIVID:

Dixit si insidiās contrā rem pūblicam {facerent
fēcissent} , cōnsulem eōs oppressūrum
esse.

He said that, if {they should plot
should plot (should have plotted)} against the state, the consul would oppress them.

Present and Past Contrary-to-Fact Conditions

APODOSIS: The subject accusative and infinitive construction is used in indirect statement; the infinitive is always composed of the future active participle plus fuisse.

PROTASIS: The verb is always in the subjunctive, the tense of which is the same as it would have been in the direct statement, *regardless* of the tense sequence relative to the main verb of the head.

PRESENT CONTRARY-TO-FACT:

Si insidiās contrā rem pūblicam facerent, cōnsul eōs opprimeret.

If they were plotting against the state, the consul would oppress them.

PAST CONTRARY-TO-FACT:

Si insidiās contrā rem pūblicam fēcissent, cōnsul eōs oppressisset.

If they had plotted against the state, the consul would have oppressed them.

PRESENT CONTRARY-TO-FACT:

Dicit (dicit) si insidiās contrā rem pūblicam facerent, cōnsulem eōs oppressūrum fuisse.

He says (will say) that, if they were plotting against the state, the consul would oppress them.

PAST CONTRARY-TO-FACT:

Dicit (dicit) si insidiās contrā rem pūblicam fēcissent, cōnsulem eōs oppressūrum fuisse.

He says (will say) that, if they had plotted against the state, the consul would have oppressed them.

PRESENT CONTRARY-TO-FACT:

Dixit si insidiās contrā rem pūblicam facerent, cōnsulem eōs oppressūrum fuisse.

He said that, if they were plotting against the state, the consul would oppress them.

PAST CONTRARY-TO-FACT:

Dixit si insidiās contrā rem pūblicam fēcissent, cōnsulem eōs oppressūrum fuisse.

He said that, if they had plotted against the state, the consul would have oppressed them.

CONDITIONS IN OTHER SUBORDINATE CLAUSES

In order to put a conditional statement into the indirect form after a verb of commanding, fearing, or the like, the observations made above about the protasis of each type of condition will apply, but the apodosis will be recast in

the appropriate construction dependent on the verb of commanding, fearing, or the like.

Si Caesar veniet, vincet. If Caesar comes, he will conquer.

Timeō, si Caesar veniat, nē vincat (victūrus sit). I fear that, if Caesar *comes, he will conquer*.

ADDITIONAL RULES

A collective noun usually takes a verb in the singular, but the plural is found when individuals are thought of: **Quisque domum ire voluerunt**, ‘Each one wanted to go home’.

A compound subject, even when the subjects are singular, takes a verb in the plural: **Māterne et pater tuus venient?** ‘Will your mother and father come?’ When the compound subject is in different persons, the verb is usually in the first person rather than the second person and in the second person rather than the third person: **Si tū et tuus frāter domum ibitis, ego et mea soror illūc ibimus**, ‘If you and your brother go home, my sister and I will go there’. When there is a compound subject in the third person, the verb may agree with the nearest one: **Multi puerī parvi et ūna puella parva aderat**, ‘Many little boys and one little girl were present’.

Two negatives are equivalent to an affirmative: **nōn numquam**, ‘sometimes’; **nōn nullī**, ‘some’; **Nēmō nōn veniet**, ‘Everyone will come’; **Nōn possum nōn venire**, ‘I must come’.

When several nouns of different gender are described by one adjective, the masculine gender predominates over the feminine if *persons* are being described; if *things* of different genders are described by one adjective, the adjective will be neuter: **Meus frāter sororque sunt piī**, ‘My brother and sister are pious’; **Virtūs et vigor sunt bona**, ‘Courage and vigor are good’. Sometimes the adjective will agree with the nearest noun: **Virtūs et vigor sunt bonus**, ‘Courage and vigor are good’.

There is no one word in Latin for “yes” or for “no”. Sometimes the verb is repeated for “yes” or repeated with **nōn** for “no”: **Venisse?**, ‘Are you coming?’ **Veniō**, ‘Yes’. **Nōn veniō**, ‘No’. There are other ways of saying “yes” including: **aiō, etiam, ita, vērō, certē**. Some ways of saying “no” are: **negō, nōn, minimē, nullō modō, nōn quidem**.

Nescio quis is used as an indefinite pronoun meaning ‘someone or other’ and **nescio quid**, ‘something or other’. **Quis** and **quid** are declined, but **nescio** remains the same: **Nescio quis clāmābat**, ‘Someone or other kept shouting’; **Nescio quem dāmnāvērunt**, ‘They condemned someone or other’; **Nescio quid dīxit**, ‘He said something or other’. Note that this phrase does not introduce an indirect question.

ROMAN NAMES

Roman citizens usually had three names: the **praenōmen** (or personal name), the **nōmen** (or family name), the **cōgnōmen** (the name designating the branch of the family).

e.g. Marcus Tullius Cicero

Gaius Julius Caesar

Publius Vergilius Maro

The **praenōmina** were relatively few in number and were customarily abbreviated in the following way:

A.	= Aulus	P.	= Publius
App.	= Appius	Q.	= Quintus
C.	= Gaius	Ser.	= Servius
Cn.	= Gnaeus	Sex.	= Sextus
D.	= Decimus	Sp.	= Spurius
L.	= Lucius	T.	= Titus
M.	= Marcus	Ti.	= Tiberius
M'.	= Manius		

A NOTE ON QUANTITATIVE RHYTHM

Accentual or *qualitative* rhythm in poetry is based on a sequence of stressed and unstressed syllables.

^ ^ ^ ^ ^ ^
By brooks too broad for leaping

^ ^ ^ ^ ^
The light-foot lads are laid.

^ ^ , ^ ^
And rose-lipt girls are sleeping

^ , ^ , ^
In fields where roses fade.

(A. E. Housman)

The rhythm of classical Latin poetry is *quantitative*, not qualitative. It is based on a sequence of syllables which are *temporally* long or short; that is, a long syllable takes more time to pronounce than a short one. To give a rough illustration, one might say that a long syllable is equivalent to a half note while the short syllable is equivalent to a quarter note. On the most basic level, this rhythmic scheme admits of no stress, although one syllable in each foot does in practice receive a *slight* accent which is called **ictus** [**ictus**, -ūs, M., 'blow, beat'].

In order to *scan* or construct a schematic representation of a line of verse, the quantitative length of each of the syllables in that line must be determined. In working this out, division into words is disregarded and the entire line is considered as one cluster of sounds. The rules for syllabification and for determining the quantitative length of syllables are the same as those given in the Introduction (pp. 2-3): A syllable is *long by nature* if it contains a long vowel or a diphthong; a syllable is *long by position* if it contains a vowel which is followed by two consonants. The letter **x** (= ks) is said to be a double consonant. The letters **qu** (= kw) function as one sound cluster; the **u** is not a separate syllable. The combination **qu** does not make for length by position. EXCEPTION: When the two consonants following a vowel are a mute (plosive) (**p**, **b**, **t**, **d**, **c(k)**, **g**) followed by **l** or **r**, the poet has the license to regard the syllable as either long or short.

According to this scheme, the following verses are scanned as shown:

— — ^ — — ^ — ^ — — ^
Quem bāsiābis ? Cui labella mordēbis?
(Catullus 8.19; p. 124)

— ^ ^ — ^ ^ — — — ^ ^ — ^
Quem recitās meus est, Ó Fidentine, libellus:
— ^ ^ — ^ ^ — ^ — ^ — ^
sed male cum recitās, incipit esse tuus.
(Martial 1.38; p. 124)

— — — ^ ^ — ^ — ^ — ^ — ^
Ó passi graviōra, dabit deus his quoque finem.
(Vergil, *Aeneid* 1.199; p. 191)

Note that the symbol — is used for long syllables, and ^ is used for short syllables. Do not confuse the symbol for long syllables with the macron, which is used to mark long vowels.

Occasionally, *elision*, or the full or partial suppression of a final syllable, occurs in the scansion and reading of poetry. Elision is found in the following instances:

- When a word ending in a vowel or diphthong is followed by a word which begins with a vowel or diphthong:

^ ^ — ^ — ^ — ^ — ^
... revocāte animōs maestumque timōrem
(Vergil, *Aeneid* 1.202; p. 191)

Note that the quantity of the full syllable formed by elision is determined by the length (natural or positional) of the second of the two original syllables. In the example above, the syllable is short because the first syllable of **animōs** is short.

2. When a word ending in a vowel or diphthong is followed by a word which begins with a vowel preceded by h:

Adeste, hendecasyllabi, quot estis

(Catullus 42.1)

3. When a word ending in a vowel followed by **m** is followed by a word which begins with a vowel or a vowel preceded by **h**:

Nulla fidēs ullō fuit unquam in foedere tanta

(Catullus 87.3; p. 174)

There is some dispute as to whether elision means the total omission in pronunciation of the first of the two syllables or a more rapid combination of the two sounds in order to fit them into the reduced temporal allotment. In order to acquaint himself or herself with the rules for elision and also to acquire some sense of Latin rhythm, the beginner would do well to omit the first of the two syllables when reading the line aloud. Once some degree of security has been acquired, the reader may, if desired, experiment with the rapid combination of the sounds.

In addition to scanning the lines as we have done, it is possible to divide them into smaller measures of time called "feet". A "foot" is a measure composed of a sequence of long and short syllables. The type or types of feet employed in a given line of verse determine the rhythm of that verse. The following feet are basic and appear in some of the selections in this book:

— vv	dactyl
— —	spondee
vv —	anapest
v —	iamb
— v	trochee
— vv —	choriamb

The scansion of the following lines of verse shows the quantities of the various syllables as well as the division into feet (indicated by |):

— —|— —|— |—|—|—
Quem bāsiābis? Cui labella mordēbis?
— —|— |—|— |—|—|— |—|—|—
Ō passi graviōra, dabit deus his quoque finem.

The rhythmic analysis of Latin poetry is both intricate and fascinating. Although the observations offered above have been necessarily simplified, they should

help to give at least an initial impression of the rhythm and the music of the selections of poetry encountered at this early stage in one's study of the Latin language and literature. By applying these rules, it will be possible to read the selections in this book with some attention to their rhythm and so with greater appreciation.

VOCABULARIES

These lists (Latin-English and English-Latin) contain all the words necessary to do the exercises in this book. Words that are glossed in the main body of the text and that do not appear in the formal Unit Vocabularies are not included.

LATIN-ENGLISH VOCABULARY

The entry (1) after a verb form indicates that the verb belongs to the first conjugation and has the regular principal parts in -āre, -āvī, -ātus. The numbers in the left-hand column refer to the Unit in which the word or phrase first appears.
