Mr. President, I had not the slightest idea that the few words of suggestion which I made in regard to the amendment would provoke the outburst of eloquence to which we have been listening. We have heard a good deal upon the floor about almshouses and Federal soldiers. I do not know how it is in the rest of the Union, but in the State of Missouri there are no Federal soldiers in almshouses, and I am proud to say that there are no Confederate soldiers in almshouses there either. When General Lee surrendered at Appomattox there were but eight thousand muskets left of that splendid army which had fought the world in arms and had been battered and beaten back by overwhelming numbers for four long years. Out of companies of one hundred and twenty-five and one hundred and eighty men that went into that terrible strife but ten or twelve returned to their kindred and homes. To-day the South is filled with maimed and crippled soldiers who amid shot and shell and saber-stroke fought for their honest convictions as men have seldom fought before. They ask no pensions. God be thanked, they would not take them. They are not in almshouses, and no man has ever seen one of them begging for bread. Whence comes this talk of Federal soldiers in almshouses? They are not there. I am tired and sick of being forced into this procession of robbery, pretense, and hypocrisy in the name of the true and gallant soldiers of the Union. I have many personal friends among them. I have said before, and I repeat here to-day, that I will give to the disabled or dependent soldiers of the Federal Army, their widows and orphans, the last acre of land and the last dollar of money that belongs to this country; and I would have done the same to

the soldiers of the Confederacy if God had blessed our cause. We hear this talk that we have not done enough for the soldiers. We have spent since the close of the war \$883,400,000 in pensions—a sum unparalleled in the history of the whole world; we have passed laws that preferred them to appointments for office above their fellow-citizens; and to-day we are told that we owe them a debt of eternal gratitude because they did not seize with mailed hand the government of this country and convert it to their own purposes. The great military and political organization, the Grand Army of the Republic, throws its iron glove into the debates of Congress and sends to us bills through its accredited Senators; and when the President of the United States honestly and bravely discharged his executive duty and vetoed an enactment which he considered improper, he was threatened by the officers of this organization with personal insult if he dared to make his presence known in the city where it held its last meeting. There is a limit to human endurance. I have stood here and voted for these bills coerced by my own position, because I have been a Confederate, although I knew I was as honestly anxious for the glory, welfare, and advancement of this country as any one could possibly be. The Senator tells me now I voted for enactments similar to that in this bill. Yes, Mr. President, I voted for them because I wanted to evidence to the whole world that the men with whom I acted in that unfortunate strife were honest and magnanimous; that we respected the brave and gallant soldiers of the Union, and were willing to give them even more than they demanded. But there is a limit to human patience on this subject, and I have reached it. I will be driven no further by claim agents and pretenders in the garb of soldiers. To the honest and brave and real soldiers of the Union Army I am willing to vote any amount of pension; but I do not believe they are here asking for additional largess from the Government. In this city are corps of men engaged in inventing legislation to take more money out of the Federal Treasury. Here is the report of the Commissioner of Pensions showing that in 1879, when we passed the arrears-of-pension act, there were some 36,835 applications for invalid pensions. We passed that act, and in 1880 the

01.

I have read with much satisfaction the first number of your new journal. It is interesting and gives promise of attractive usefulness in the future. I hope it will promptly secure a remunerative circulation. You have entered a new field of thought and interest, intimately connected with the general welfare, and sure, I think, in the near future, to attract more and more attention.

SMALL PICA BOLD-FACE ITALIC

03.

*Your aim is, I infer, to present the situation under the working of a reform system, to set forth the ways in which it steadily promotes the public interest, to show how it invites and deserves the support of all friends of good administration, and to make it plain how it enables worthy officials to serve the people effectually and gain the respect their due. The time is near at hand when there will be a literature and a science of public administration which will deeply interest a vast number of people.*
