K. & E. CO. STEEL PENS.

do. do do do. tee pens, No. 8206 on a card 100

Pens No. 8200 and 8202 are specially made for Draftsmen for drawing paper, which has a more or less occure curface. They have longer miss and less shapp points than most others, possess great elasticity end permit of more rapid lettering or drawing, without scratching or teaching in the grain of the paper. Draftsmen will prefer these pens to say other kind, as most others are intended principally for drawing on stone.

The Payzant Block Lettering Pens are particularly adapted for lettering Engineers' and Architects' Drawings, for border lines or any heavy linework, also for the use of merchants for writing price and show cards, etc.

The common method of forming block letters with a fine pen is allow and tedlens work and but few draftmen are capable of executing neat lettering with reasonable repidity. With the block lettering pen a letter is formed at a single struck. There is no desterity or hanck to acquire to use these pens, as they are es simple to operate as a positive like in forming letters, are avoided in work done with this pen, because all strucks in early direction are uniform in width and density. Work can be done in one-quarter of the time needed with the fine-pen method. It is unnecessary, even on the finest plans to carefully outline the letters in pencil before inking, as a rough draft with guide lines is all it has it needed. These pens are manufactured in any graded sizes: the following is a reproduction of fitter gade with them:
