Unsightly butted or mitered corners can ruin an otherwise beautiful job. When ordering rule or border, let us miter it for you on our Rouse precision, power mitering machine, and be assured that the rules on that "particular" job will complement the job that you have tried so hard to produce.

Figure 1: A schematic diagram of the experimental setup. It shows a participant sitting at a table, viewing a video screen. A camera is positioned above the screen. A target is located on the screen. A horizontal line is drawn on the screen, representing the target position. The participant's hand is positioned at the start of the movement. The diagram illustrates the spatial relationship between the participant, the screen, the camera, and the target.
