CD-ROM and BOOK

24 CIRCUS DISPLAY FONTS

CD-ROM and BOOK

DOVER PUBLICATIONS, INC.
Mineola, New York

The CD on the inside back cover contains all of the fonts shown in this book in both TrueType and Postscript Type 1 formats for the Macintosh® and for Windows®. Each font is shown on two pages of the book. The first page shows the basic character set in large size. The second page features a "character map" showing all of the characters in the font and how they are accessed on the Macintosh. (To access special characters in Windows, see the Readme file on the CD. Please note that there are a small number of special characters that cannot be accessed in Windows.) This character map consists of four, four-row charts. Each row of each chart corresponds to a keyboard row. The first chart shows what character you get when you press the keys with no modifier; each of the remaining three charts shows the effect of a different modifying key or keys.

System Requirements

Macintosh System 6 or later; Windows 3.1 or higher. 5 MB of RAM required. Hard disk space required depends on the number of fonts installed.

Installation

Refer to the Readme file on the CD for instructions. Note to Windows users: Some folders may have abbreviated names.

Full installation instructions may also be found online at the following addresses:

24 CIRCUS DISPLAY FONTS

CD-ROM and BOOK

In this CD-ROM and book collection, typographer and print historian Dan X. Solo presents 24 fonts reminiscent of the exuberant print styles found on turn-of-the-century posters and broadsides. Fondly recalling that era are the attention-getting Panjandrum and Houdini, the exotic Tokyo, the glamorous Diamond Inlay, Startime, and Wave, as well as Cavalcade, Cinderella, Earthquake, Ringmaster, and Torpedo. Easy to use and rich in practical applications, this Dover Electronic Clip Art set contains:

- One CD-ROM containing 24 different fully scalable complete fonts in True Type and Postscript Type 1 formats. All include an upper-case alphabet and numerals and punctuation marks; many include a lower-case alphabet as well.
- A 48-page (8½" x 11") book showing every character in every font, printed large and clearly for easy reference.
- A tamper-resistant, sturdy plastic pouch on the inside back cover of the book to hold the CD-ROM.

Affordable and copyright-free, these attractive faces come in assorted shapes—mostly tall, fat, and bold, but always eye-catching and easy to use. Dover Electronic Display Fonts can be used with any Macintosh®- or Windows®-compatible computer with a CD-ROM drive and 5MB of RAM.

Original Dover (2000) publication. One CD-ROM and book. 24 fonts. 48pp. 8½ x 11. Paperbound.

Free Dover Pictorial Archive and Clip Art Catalog (59062-3) available upon request.
