Following up on ideas sparked during their first time on stage together at the 2010 SoundQuest Fest in Tuscon Arizona, Loren and Mark's **Tree of Life** is a musical exploration merging the ambient soundworlds of Southeast Asia, North and South America with the spiritual influences of Bali and India.

Supported by Sarangi maestro Pankaj Mishra from India, and up-and-coming percussionist Max Link from Germany, **Tree of Life** expands into a transformative soundscape taking the listener into mysterious realms of divergent paths and traditions.

Special thanks to: the spiritual/cultural traditions of the world for having inspired our sounds. Gabi Link for supporting us with culinary delights during recording and initial mixing. Steve Roach for bringing us together, his friendship, and for his never-ending musical inspiration. Sam Rosenthal for continuing to carry the torch. Max Link, Pankaj Mishra, and Kathrine Wright for their great talents.
